| | | Address | Activity Description | Activity Type | Activity Sub-Type | Application Date | Activity # |
| De | sign Re | view Exemption | | | | | |
| 189 | 1535 | RIDGEVIEW DR | Remove existing wrought iron railing of simple vertical picket design and replaced with 42" high balustrade style railing at the rear of the house (not visible from any public right-of-way). The total length of the railing is about 105 linear feet (consulted with staff in staff meeting on 7/24/2012). DRB exemption was granted because the proposed railing is located at the rear of the house and is not visible from any public right-of-way. While the design of the new railing is not in keeping with the design of the Ranch style house, there is not public benefit since it will be completely obscured. This exemption is consistent with windows replacement at the rear of the house where it cannot be seen from the public right-of-way. | Design Review Exemption | Design Review Exemption | July 25, 2012 | PDREXEM1226304 |

| De | sign Re | view Exemption | | | | | |
| 285 | 1150 | NORTON AVE | Modify the roof design of the house in order to integrate an existing portion of the house that has a flat roof and a cover patio. The area of the flat roof is the result of an addition and leaks during the rainy season. The modification of roof design will correct this problem. The existing residence is asymmetrical in its appearance. This change will result in a slightly taller building and will create three rear-facing gables. The proposed change was consulted with JP and AL in the Urban Design Studio and concluded that it is consistent with the Minimal Traditional Style of the residence. See misc. file for drawings and photos of house. | Design Review Exemption | Design Review Exemption | August 28, 2012 | PDREXEM1229915 |
