

Glendale Water and Power

Mission Statement

We are dedicated to providing a full range of competitive energy, water and other services to enhance Glendale's image as the best place to live, work and do business.

FY 2003/04 Accomplishments

Enhance Customer Service

- Continue Infrastructure Improvement Programs

Infrastructure improvement programs were developed for the electrical system, 4kV to 12kV conversions and reconstruction/replacement of underground vaults; the water system, an accelerated replacement program; and, the Utility Operations Center (UOC) for a new site development program.

The UOC site development plan was completed in late 2003 which addressed the long term facility and space needs of the UOC. Three A/E firms were retained to perform the necessary infrastructure review, facility needs analysis and programming.

Preliminary engineering to complete the spill prevention plan for Grayson Power Plant was completed in December 2003.

Air pollution emission concentrations were significantly reduced from Grayson Unit 5 by installation of new control technology

- Upgrade Grayson Power Plant – Phase 1

Construction of Grayson Unit 9, a 50 MW combustion turbine generating unit, to be used for peaking operations, was completed and placed into commercial operation in January 2004. Unit 9 provides electricity with greater reliability, lower emissions, and lower operating cost than Units 6 and 7 which it replaced. Units 6 and 7 were decommissioned in accordance with the upgrade plan.

To properly plan and schedule the addition of new units requires that the existing generating assets be evaluated for their ability to continue to provide service and their potential for improved performance. A study to evaluate the options available for preserving the life, extending the life, and enhancing the capability of the existing Grayson Power Plant units was completed and recommendations were made concerning which of those options are most practical and cost effective and would best fit with a modernization program.

Life preservation options ensure that plant equipment operates effectively for its designed lifetime. Life extension options increase the expected remaining life of plant equipment. Betterment options improve operating characteristics and could include improvements in capacity and efficiency.

- Employee Development

An Employee Development Group was established with representatives from all functional areas.

A Division newsletter, GWP Connections, was developed and distributed to employees on a quarterly basis to improve communication within the Division.

A Supervisory Certificate Program (Level 1) was developed and the pilot program (approximately 25 employees) was implemented.

Ensure Fiscal Responsibility

- Developed Cash Reserve Policies for Electric and Water Systems
- Formalized the Energy Risk Management Policy

Be Relentless Concerning Employee Safety and Ensure GWP Security

- Promote Employee Safety Programs

GWP will continually look for opportunities to increase safety awareness, emphasize employee safety on the job, develop new incentives to reinforce the employee's awareness of the need for safety on the job and continue safety incentive programs currently in place. Continue with employee, supervisor and manager training for the STOP program.

- Provide Security for GWP Facilities

The following items were accomplished at the UOC:

- Installed code operated access controlled gates
- Established police security liaison
- UOC security reviews were conducted by Glendale Police, LADWAP, Pinkerton
- Hired 24/7 guard service and established post orders and a 24/7 patrol
- Formed Security Council consisting of UOC superintendents
- A security assessment was conducted
- Completed installation of CCTV system
- Relocated employee parking lot outside of UOC perimeter
- Established permanent guard kiosk and new main entrance
- Conducted security awareness training
- Established guarded entrance for Unit 9 construction at Flower St
- Installed CCTV control center in main guard kiosk. Established policies and procedures for proper use of equipment
- Provided UOC Network and server backup room security
- Completed Dept. of Homeland Security color coded threat level charts providing security measures for each threat level
- Conducted UOC emergency evacuation plan and developed policy on what scenarios would require power plant abandonment

Completed the following for water reservoirs, pump stations and electric substations:

- Conducted Water system security survey with Fire, Police, Pinkerton and GWP engineers evaluating the requirements of the Pinkerton Assessment.
 - Completed Phase1 of water system upgrade (fencing, lock hardening, signage etc.) and Budgeted Phase 2 security program for outlying water and electric facilities.
 - Established Park Ranger patrols for critical water and electric facilities – five hours per night, 5 to 6 nights per week. Established reporting procedures between Howard Sub and Rangers.
- Expanded role of the new Energy Dispatch Center as the GWP central security hub.
- RFP to design security systems for each critical water and electric facility.
- City Information Services Section to conducted a cyber security audit of GWP and Dispatch Center including SCADA systems and Internet

Pursue Renewable Energy Programs

- A Renewables Portfolio Standard was approved with a goal of reaching 20 percent renewables, and possibly 23 percent renewables, by 2017. Toward that end energy purchase agreements for 3 MW of wind power, and 4.5 MW of energy from landfill gas were executed. GWP's renewable energy is now at approximately 18 percent.

Environmental Affairs Plan

- GWP developed an Environmental Affairs Plan. The purpose of the plan is to provide the roadmap which GWP will use in developing and implementing a system for managing its environmental obligations. The two main environmental goals of GWP are ensuring compliance with applicable environmental laws and regulations and development and implementation of a minimal environmental management system (EMS). Accomplishments include:

- Upgrading the hazardous waste storage areas for Grayson and the transformer shop.
- Storm water compliance improvement and training
- Development of an environmental policy
- Establishment of a GWP environmental coordinators team
- Establishment of a City wide environmental committee
- Implementation of compliance procedures for water discharges, cooling tower maintenance.
- Closure of tanks and piping subject to spills

FY 2004/05 Goals

Enhance Customer Service

- Continue infrastructure improvement programs for the Electric and Water Systems.
- Continue with the Utility Operations Center (UOC) site development program.
- Implement the Grayson Power Plant life extension program.
- Continue to enhance communications within the organization.
- Complete the GWP staffing plan and employee development program to provide an adequate supply of trained, qualified employees.

Ensure Fiscal Responsibility

- Develop and implement a department wide contract administration program.
- Develop a GWP debt management program.
- Continue development and use of GWP's project management initiative and strive to refine and enhance the process.

Be Relentless Concerning Employee Health and Safety and Ensure GWP Security

- Continue to promote employee safety programs and continually look for opportunities to increase safety awareness.
- Continue development and implementation of security measures at the UOC and at outlying electric and water facilities.
- Develop and implement a written GWP Security Management System (SMS)

Renewable Energy Programs

- Continue to pursue renewable energy resources while being sensitive to rate implications, system reliability, impacts on financial resources, and the common goal of overall environmental improvement.
- Continue to investigate renewable energy initiatives with a goal of reaching 20 to 23 percent of retail sales by 2017; GWP is currently at 18 percent.

Environmental Affairs Management

- Continue implementation of GWP's environmental affairs plan to ensure compliance with applicable environmental laws and regulations.
- Develop a written GWP environmental management system (EMS).
