REPORT #: 2016-02

Roubik Golanian, Director of Public Works Public Works Department

Dear Roubik,

Enclosed is the final report for the Parking Meter Shop Operational Audit. Internal Audit would like to thank you and your staff for the support and assistance provided to us during the audit.

Should you have any questions, please feel free to contact Jessie Zhang or myself.

Thank you,

Eileen Donahue, Internal Audit Manager

REPORT #: 2016-02

INTERNAL AUDIT

# **Parking Meter Shop Operational Audit**

August 19, 2015

# Background

In accordance with Internal Audit's fiscal year 2014-15 audit plan, Internal Audit performed an audit of the City's Parking Meter Shop operations.

The parking meter shop is part of the Maintenance Services Division within the Public Works department and is responsible for the following:

- Collection and maintenance of all on-street singlespace parking meters and multi-space digital pay stations in downtown Glendale and Montrose business district, including monitoring and troubleshooting of connectivity of the digital meters and pay stations;
- Repairs of parking meters, including installation and removal of parking meters and poles;
- Performance of parking meter maintenance and repair services for the City of West Hollywood as defined by an established service agreement; and
- Maintenance and collection services for the Glendale Community College (GCC) under an expired agreement with the Glendale Parking Facilities Joint Powers Authority (JPA).

At the time of our fieldwork, the parking meter shop consisted of three Parking Meter Collector/Repairers and one Senior Parking Meter Collector/Repairer, with the senior collector/repairer positon reporting on day-to-day activities to the Traffic and Parking Supervisor and to the Parking Manager on digital technical issues and rate setting related matters.

CITY OF GLENDALE

Three types of parking meters are used by the City: (1) multi-space digital pay stations, (2) single-space coin meters, and (3) single-space Liberty digital meters under a pilot program. In addition, the City of West Hollywood operates single-space digital IPS meters. Each type of meter or pay station is supported by a different software application system that the parking meter employees must have knowledge of to accurately perform their duties.

The quantity of parking meters consisted of 56 active multispace digital pay stations, 11 uninstalled multi-space digital pay stations, 49 single-space Liberty digital meters, and over 1,700 coin meters on the City's downtown streets, Montrose area, and GCC. The City of West Hollywood had in place approximately 2,100 on-street parking meters.

The revenues from the downtown parking meters and multi-space digital pay stations have shown a steady increase over the past five years from \$1.3M in fiscal year 2009 to \$2M in fiscal year 2014. Over this timeframe the percentage of parking revenue paid by credit cards increased from 31% to 55%.

### CITY OF GLENDALE INTERNAL AUDIT

## **Objective, Scope and Methodology**

The objective of this audit was to evaluate the operational efficiency and effectiveness of the parking meter shop in performing maintenance and collection activities. The audit period covered fiscal year 2015. The scope of this audit did not include parking garages operated by a third party vendor contracted by the City.

In order to accomplish the audit objective, Internal Audit performed the following procedures:

- Reviewed relevant documents; for example, parking meter regulations, policies and procedures, parking meter time limits and hours of operation, operating procedures, training manuals, collection routes, and the parking meter related ordinance and City Council resolution on rates.
- Conducted interviews, participated in ride-a-longs and observed detailed operational processes of the parking meter maintenance and collection activities.
- Performed existence and completeness testing of parking meter and pay station inventory on a judgmental sample basis.
- Tested accuracy of maintenance and repair records reported as key performance indicators (KPIs).
- Performed analytical procedures on the parking meter financial trend and reconciliation between the

revenues received and reported by the multi-space digital pay station management systems.

 Conducted detailed testing of credit card transactions on digital meters and pay stations for accuracy and proper support.

## **Summary of Results**

We obtained an understanding of the City's on-street parking meter and pay station maintenance and collection operations. Strict procedures were found in place to ensure the safeguards and accuracy of the parking meter revenue received. Specific procedures have been established and are followed for coin collecting, sorting, counting, and sealing. The parking meter shop staff is diligent in carrying out their duties. New employees receive training on the expectations of their job duties and all parking meter shop employees participate in weekly safety trainings. Staff received positive feedback from the City of West Hollywood for providing good maintenance services, and being polite and courteous when interacting with the public.

Preventive maintenance and minor repairs are conducted as part of the regular collection process through visual inspection of the meters and pay stations. The common preventive maintenance activities include cleaning the pay station coin acceptor and printer. Repairs include re-setting the wireless connection, clearing paper jams, changing the discharged batteries, and replacing critical parts for multispace pay stations and single-space parking meters.

CITY OF GLENDALE INTERNAL AUDIT

A daily report is completed by each staff to track all productive activities performed each day. These daily reports are compiled as weekly production reports and quarterly work reports which are used to support the KPIs reported for number of parking meters repaired. Collections are scheduled daily except Sundays. Collections are secured in locked containers. The collection schedule is prepared primarily following the geographic location from south to north Glendale. However, the multi-space digital pay station collection schedule is triggered by the quantity of coins, paper status, and unsettled credit card transactions based on system generated collection reports.

One important aspect of the collection function is performing the coin count to generate the deposit. At least two employees are present when coins are counted except on the days when only one staff is working. A security camera records the actions of individuals in the counting room. In order to ensure accuracy, all coins collected are counted by the coin counting machine at least twice. Coins are separated and bagged based on their denomination. The bags are deposited securely with the bank after a predetermined amount is reached in each bag. For example, the pennies are bagged at \$25 per bag, with a total count of 2,500 coins, the quarters are bagged at \$500 per bag with a total count of 2,000 coins, and dollars are bagged at \$1,000 per bag with a total count of 1,000 coins. Any coins not bagged are secured in a safe and carried over to the next coin counting day. The parking meter shop staff is also responsible for creating the treasurer's receipts (TR) for all parking meter revenues based on the coin and credit card collections.

From analytical procedures performed, we noted the revenues from downtown parking meters and multi-space digital pay stations have shown a steady increase for the five years from fiscal year 2009 to 2014. Although the revenues have been increasing, the workload for collection has remained relatively the same due to the fact that the increased revenues resulted primarily from parking meter fees paid with credit cards.

# Conclusion

Overall, we found that the parking meter shop has developed a workflow process that meets its operational needs for conducting maintenance and collection activities with the current staffing in an efficient and effective manner. Through the results of our test work we identified 12 opportunities for improvement which are summarized by risk rating in the charts that follow and included in the Observation, Recommendation, and Management Response Section of this report.

## Priority 1 Critical control weakness that exposes the City to a high degree of combined risks.

 Lack of valid multi-space digital pay station service agreement.

#### Priority 2

Less than critical control weakness that exposes the City to a moderate degree of combined risks.

- Written agreement not in place and the billed rates may not reflect costs.
- No support for parking variances.
- <sup>o</sup> Weak controls over system access and data backups.

#### **Priority 3**

Opportunity for good or better practice for improved efficiency or reduce exposure to combined risks.

- Credit card receipts not verified to source.
- Redundancy noted in coin counting process.
- Uncertainty exists over PCI compliance.
- Background checks are not conducted consistently.
- Maintenance activities are not appropriately tracked.
- <sup>o</sup> Purchased pay stations are not put in service timely.
- Improvements over inventory of parking meters and high value replacement parts are needed.
- Single-space digital Liberty meters under a pilot program have not been evaluated.

|            | ltem | Observation                                                                                                                                                                                                                                                                                                                                | Recommendation                                                                                                                                                                                                                                                                                           | Management Response                                                                                                                                                                                                                                                      |
|------------|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            | 1.   | The agreement for maintenance of<br>the existing multi-space digital pay<br>stations is not in place. A new<br>agreement is yet to be finalized due<br>to the inability of the parties<br>involved to concur on the language.<br>However, the vendor continues to<br>provide services.                                                     | It is recommended that Public<br>Works management continue to<br>coordinate with the City Attorney's<br>office to make every effort to<br>execute a valid agreement with the<br>multi-space digital pay station<br>vendor and seek approval to pay<br>outstanding invoices in full.                      | Public Works management agrees<br>with the recommendation.<br>Management will continue working<br>with City Attorney's office and the<br>vendor to finalize the agreement.<br>The pricing will be verified against<br>the executed agreement prior to<br>making payment. |
| Priority 1 |      | As a result, the City has not made<br>payment on invoices to the multi-<br>space digital pay station vendor<br>since March 2014. Therefore, as of<br>June 2015, the total outstanding<br>balance due was over \$40k,<br>including charges for an extended<br>warranty, replacement parts, and<br>system/wireless transmission<br>services. | As operations continue<br>management should ensure timely<br>execution of future maintenance<br>agreements with the vendor to<br>ensure invoices are reviewed<br>against the agreed upon terms,<br>appropriate for the agreement with<br>payments made in the fiscal year<br>when services are rendered. | The anticipated completion date is September 30, 2015.                                                                                                                                                                                                                   |

|            | ltem | Observation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Recommendation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Management Response                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Priority 2 | 2.   | Based on our review and inquires, it<br>was noted that the City does not<br>have a valid service agreement in<br>place with GCC for parking meter<br>maintenance and collection<br>services for on-campus multi-space<br>digital pay stations, although the<br>JPA verbally authorized<br>continuation of the services and has<br>been paying the City since<br>September 2012; yet JPA expired<br>in 2014.<br>In addition, it was noted the hourly<br>rate billed to other entities such as<br>GCC and the City of West<br>Hollywood for either parking meter<br>maintenance or collection services | It is recommended that<br>management continue working with<br>the City Attorney's office to finalize<br>an agreement for providing parking<br>meter maintenance and collection<br>services at GCC. In addition the<br>agreement should clarify fees and<br>billing rates.<br>Additionally, it is recommended<br>that Public Works submit a request<br>to Finance to include the parking<br>meter collector/repairer position in<br>the next fee study in order to<br>establish an appropriate hourly rate<br>to use in billing services provided<br>to other agencies. | Management agrees with the<br>recommendation and has put forth<br>effort to finalize an agreement on<br>the GCC parking meter<br>maintenance and collection<br>services.<br>Also, management will work with<br>the Finance Department to establish<br>an appropriate billing rate for the<br>parking meter collector/repairer<br>position for services provided and<br>billed to outside entities.<br>The anticipated completion is<br>September 30, 2016. |
|            |      | does not clearly represent true<br>costs of the parking meter<br>collector/repairer position.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
