respect to this application, the Planning Hearing Officer has **GRANTED WITH CONDITIONS** your application based on the following:

The subject site is located in the R-2250 (Medium Density Residential) Zone and the General Plan Land Use Element designation is Medium Density Residential. The size of the lot is approximately 8,787 square feet. The applicant proposes to construct a medical residential congregate living facility, which will include eight bedrooms and up to 12 beds. The proposed use is conditionally permitted in the R-2250 zone. The project is consistent with the General Plan – Land Use Element, as it is considered one dwelling unit on a lot which can accommodate three units. The City’s Housing Element Eight-Year Housing Plan (2014-2021) includes goals to provide housing opportunities for persons with special needs, including the handicapped, elderly and homeless populations. The proposed use will serve up to 12 people with medical assisted living accommodations and assist the City achieve its goals of providing a wide range of housing types to meet the needs of its current and future residents.

B. That the use and its associated structures and facilities will not be detrimental to the public health or safety, the general welfare, or the environment.

The proposed use will operate under a program administered by the California Department of Aging (CDA). The program serves older adults, adults with disabilities and long term care residents to live in group homes, in lifestyles as independently as possible. The facility will enhance the general welfare of the public by offering housing opportunities for a segment of the community currently underserved. The proposed facility will not be detrimental to the public health, safety or the environment, as the project has been designed to comply with R-2250 standards for minimum/average setbacks, height, floor area ratio, lot coverage, open space, parking and landscaping.

C. That the use and facilities will not adversely affect or conflict with adjacent uses or impede the normal development of surrounding property.

The use and facilities will not adversely affect or conflict with adjacent uses or impede the normal development of surrounding property. The surrounding neighborhood consists of commercial offices to the north, multi-family dwellings to the south and east, and a combination of single-family and multi-family dwellings to the west. The applicant proposes to construct a two-story facility

designed in a Spanish-style, a prominent design in the surrounding residential neighborhood. To reduce the mass of the building and maintain the visual interest of the design along Ruberta Avenue, the first floor is broken into separate volumes and the second floor is stepped back from the street. The proposed use will not conflict with the adjacent uses, given the residential nature of the neighborhood and that it is well designed in terms of site planning, mass and scale, and style to cohesively fit within the surrounding properties.

D. That adequate public and private facilities such as utilities, landscaping, parking spaces and traffic circulation measures are or will be provided for the proposed use.

The proposed project provides adequate private facilities for utilities, landscaping, parking spaces and traffic circulation. The subject site is accessed from Ruberta Avenue, which is identified as a local street by the City's Circulation Element. Local streets are designed to function and accommodate vehicular, bicyclist and pedestrian traffic and carry low volumes of traffic to and from collector and arterial streets, including nearby Glenoaks Boulevard. The facility is a residential use that can be adequately served by a local street. The project proposes a maximum of 12 beds. The zoning code requires one parking space for every three beds. The project provides two attached two-car garages (four enclosed parking spaces) and an additional single parking space. Access to these parking spaces is provided by an existing alley adjacent to the north property line. The minimum landscape requirement for residential developments in the R-2250 zone is 25%. A total of 2,570 square-feet (29%) of landscaping is provided.
