^{**}Taxpayer's Guide (1999-2000), pp.114-134

Verdugo Fire Communications Center is located on the 3rd floor of Fire Station 21 in Glendale

2000 ACCOMPLISHMENTS

- With the addition of San Gabriel as a Contract Dispatch Service Agency on April 7, 2000, Verdugo Fire Communications Center now serves nine cities, covering over 110 square miles, populated by over 642,000 residents.
- On August 1, a new radio system matrix was implemented which added nine channels to the existing system.
- A total of 47,994 fire and paramedic incidents were dispatched in 2000, including 562 mutual aid responses to jurisdictions outside the Verdugo System.
- A new base station radio was put into operation at a high-rise building in the media district of Burbank, which will provide Burbank with an additional tactical radio channel.
- An Administrative Assistant was added to our staff to provide day to day administrative support.

2001 GOALS

- Continue providing prompt, efficient and professional handling of all calls for fire and paramedic assistance and supply emergency pre-arrival instructions to callers as needed until help arrives.
- Switch over to the newly installed microwave system located in Burbank and Glendale which replaces an outdated system that is no longer supported by the manufacturer.
- Install new base station radios in South Pasadena and Monrovia to provide additional tactical channels for South Pasadena, Monrovia, Sierra Madre, San Marino, Arcadia, and San Gabriel.
- Collaborate with the City of Glendale Information Services Department and all system users to begin
 designing a new radio system in order to remain in compliance with changing FCC regulations and to
 utilize new technologies.
- Create and implement a Performance Measurement System for the Verdugo Center and its employees.
- Continue to work on a mobile data system replacement.

VERDUGO SYSTEM

There were 47,994 incidents dispatched by Verdugo Fire Communications in 2000. The dispatcher determines and enters the most appropriate and descriptive Type Code for each incident into the Computer Assisted Dispatch (CAD) system. Each Type Code falls within a Category: Medical, Fire, Service, or Other. The table below shows how many incidents were entered into the CAD system for each Type Code in the Fire, Medical, and Service Categories during 2000, along with the percent of all Verdugo incidents and the percent of incidents in that Category for the year. Of the 103 Type Codes listed below, the four most frequent incident types were Fire Alarm (56% of Fire incidents), Shortness of Breath (13% of Medical incidents), Miscellaneous Medical (13% of Medical incidents), and Assist the Invalid (23% of Service incidents).

AVERAGE CALL VOLUME PER HOUR BY CITY

In all cities of the Verdugo System, peak call volume occurs between about 8 a.m. and 8 p.m., with the maximum number of calls per hour occurring around noon and the minimum around 3 - 4 a.m.

CALL HANDLING STATISTICS

Data for two incident processing functions are used to monitor the speed with which calls are handled: 911 call receipt and radio dispatch handling time. All 911 calls are measured from the time the dispatcher answers the telephone until the incident is entered into the Computer Assisted Dispatch (CAD) system and transferred to the radio dispatcher. Dispatched calls are measured from the time the incident is received by the radio dispatcher until the alert is sent to fire stations and apparatus. The average call handling times in the Verdugo System during 2000 were 49.8 seconds for 911 call processing and 14.4 seconds for radio dispatching.

RESPONSE TIME STATISTICS

Statistics are also generated for the time it takes for the first assigned unit to go enroute to an incident from dispatch and to arrive on scene from a dispatch. Dispatch to arrival statistics may vary due to a city's geographical layout and the time of day or night.

TIME ELAPSED: DISPATCH TO ARRIVAL

Orbacom Radio Control Screen

OUT OF JURISDICTION CALLS

An incident is classified as Out of Jurisdiction when firefighters or paramedics are asked to respond outside their city of origin. Mutual aid incidents are generally the result of negotiated contracts between cities or jurisdictions. The table below shows the number of Out of Jurisdiction incidents that were dispatched to five destination jurisdictions by any of the nine Verdugo System agencies, along with the incident categories.

CATEGORY	ALHAMBRA	LA COUNTY	LA CITY	MONTEREY PARK	SAN GABRIEL	TOTAL

^{**}April 7 - December 31, 2000

BURBANK FIRE DEPARTMENT

There were 8,364 incidents reported for Burbank in 2000. The dispatcher determines and enters the most appropriate and descriptive Type Code for each incident into the Computer Assisted Dispatch (CAD) system. Each Type Code falls within a category: Fire, Medical, Service, or Other. The table below shows how many incidents were entered into the CAD system for Burbank for each Type Code in the Fire, Medical, and Service categories during 2000, along with the percent of all Burbank incidents and the percent of incidents in that category for the year. Of the 94 Type Codes listed below, the three most frequent incident types were Fire Alarm (51% of Fire incidents), Shortness of Breath (15% of Medical incidents), and Assist the Invalid (31% of Service incidents).

32	LA City	Medical

GLENDALE FIRE DEPARTMENT

There were 14,248 incidents reported for Glendale in 2000. The dispatcher determines and enters the most appropriate and descriptive Type Code for each incident into the Computer Assisted Dispatch (CAD) system. Each Type Code falls within a category: Medical, Fire, Service, or Other. The table below shows how many incidents were entered into the CAD system for Glendale for each Type Code in the Fire, Medical, and Service categories during 2000, along with the percent of all Glendale incidents and the percent of incidents in that category for the year. Of the 92 Type Codes listed below, the four most frequent incident types were Fire Alarm (50% of Fire incidents), Shortness of Breath (14% of Medical incidents), Miscellaneous Medical (14% of Medical incidents), and Assist the Invalid (21% of Service incidents).

PASADENA FIRE DEPARTMENT

There were 13,696 incidents reported for Pasadena in 2000. The dispatcher determines and enters the most appropriate and descriptive Type Code for each incident into the Computer Assisted Dispatch (CAD) system. Each Type Code falls within a category: Medical, Fire, Service, or Other. The table below shows how many incidents were entered into the CAD system for Pasadena for each Type Code in the Fire, Medical, and Service categories during 2000, along with the percent of all Pasadena incidents and the percent of incidents in that category for the year. Of the 90 Type Codes listed below, the four most frequent incident types were Fire Alarm (70% of Fire incidents), Shortness of Breath (12% of Medical incidents), Miscellaneous Medical (12% of Medical incidents), and Assist the Invalid (18% of Service incidents).

TYPE CODE	FIRE INCIDENTS	NUMBER OF INCIDENTS	% OF PASADENA CALLS	% OF FIRE CALLS

An incident is classified as Out of Jurisdiction if firefighters or paramedics are asked to respond outside their city of origin. Mutual aid incidents are generally the result of negotiated contracts between cities or jurisdictions. The chart below shows Pasadena's Out of Jurisdiction responses, as well as the jurisdictions of the incidents.

#INCIDENTS	DESTINATION	CALL TYPE

ARCADIA FIRE DEPARTMENT

There were 3,926 incidents reported for Arcadia in 2000. The dispatcher determines and enters the most appropriate and descriptive Type Code for each incident into the Computer Assisted Dispatch (CAD) system. Each Type Code falls within a category: Medical, Fire, Service, or Other. The table below

shows how many incidents were entered into the CAD system for Arcadia for each Type Code in the Fire, Medical, and Service categories during 2000, along with the percent of total Arcadia incidents and the percent of incidents in that category for the year. Of the 84 Type Codes listed below, the four most frequent incident types were Fire Alarm (63% of Fire incidents), Traffic Collision (13% of Medical incidents), Minor Flooding (16% of Service incidents), and Assist the Invalid (28% of Service incidents).

An incident is classified as Out of Jurisdiction if firefighters or paramedics are asked to respond outside their city of origin. Mutual aid incidents are generally the result of negotiated contracts between cities or jurisdictions. The chart below shows Arcadia's Out of Jurisdiction responses, as well as the jurisdiction of the incidents.

#INCIDENTS	DESTINATION	CALL TYPE

MONROVIA FIRE DEPARTMENT

There were 2,969 incidents reported for Monrovia in 2000. The dispatcher determines and enters the most appropriate and descriptive Type Code for each incident into the Computer Assisted Dispatch (CAD) system. Each Type Code falls within a category: Medical, Fire, Service, or Other. The table below shows how many incidents were entered into

NUMBER OF

INCIDENTS

MONROVIA

CALLS

the CAD system for Monrovia for each Type Code in the Fire, Medical, and Service categories during 2000, along with the percent of all Monrovia incidents and the percent of incidents in that category for the year. Of the 82 Type Codes listed below, the four most frequent incident types were Fire Alarm (56% of Fire incidents), Miscellaneous Medical (13% of Medical incidents), Shortness of Breath (12% of Medical incidents), and Assist the Invalid (18% of Service incidents).

SAN MARINO FIRE DEPARTMENT

There were 993 incidents reported for San Marino in 2000. The dispatcher determines and enters the most appropriate and descriptive Type Code for each incident into the Computer Assisted Dispatch (CAD) system. Each Type Code falls within a category: Medical, Fire, Service, or Other. The table below shows how many incidents were entered into

the CAD system for San Marino for each Type Code in the Fire, Medical, and Service categories during 2000, along with the percent of all San Marino incidents and the percent of incidents in that category for the year. Of the 65 Type Codes listed below, the five most frequent incident types were Fire Alarm (69% of Fire incidents), Miscellaneous Medical (14% of Medical incidents), Traffic Collision (14% of Medical incidents), Minor Flooding (21% of Service incidents), and Assist the Invalid (21% of Service incidents).

SIERRA MADRE FIRE DEPARTMENT

There were 717 incidents reported for Sierra Madre in 2000. The dispatcher determines and enters the most appropriate and descriptive Type Code for each incident into the Computer Assisted Dispatch (CAD) system. Each Type Code falls within a category: Medical, Fire, Service, or Other. The table below shows how many incidents were entered into the CAD system for Sierra Madre for each Type Code in the Fire, Medical, and Service

NUMBER OF

categories during 2000, along with the percent of all Sierra Madre incidents and the percent of incidents in that category for the year. Of the 67 Type Codes listed below, the five most frequent incident types were Fire Alarm (25% of Fire incidents), Smoke in the Area (18% of Fire incidents), Fall - Minor (15% of Medical incidents), Shortness of Breath (15% of Medical incidents), and Assist the Invalid (28% of Service incidents).

Dispatcher Workstation

LANGUAGE TRANSLATION SERVICES

When a call is received for fire or paramedic services and the caller is unable to convey the necessary information in English, the dispatcher will ask what language the caller prefers. The vast majority of foreign-language callers have sufficient grasp of English to tell the dispatcher what language they speak. The call is immediately transferred to an interpreter, and the dispatcher takes down all pertinent information as he/she directs the interpreter in questioning the caller.

Over the phone translation of foreign language calls is currently provided by Language Line Services, which offers translation in over 140 languages.

Eighteen different languages were requested by Verdugo System callers during 2000, with the top five being Spanish, Armenian, Mandarin, Korean, and Russian:

<u>Language</u>	% Requested
Spanish	62.9%
Armenian	23.7%
Mandarin	3.1%
Korean	2.8%
Russian	1.3%
Subtotal	93.8%
