MOTION

Moved by Planning Commissioner Landregan, and seconded by Planning Commissioner Lee, that upon review and consideration of all materials and exhibits of current record relative to Tentative Parcel Map No. GLN 1631, located at 2116 Rimcrest Drive, and after having conducted a hearing on said matter, that the Planning Commission hereby **DENIES** said Tentative Parcel Map No. GLN 1631 in accord with the findings set forth below.

A. The parcel map is to facilitate a residential subdivision of one lot into three residential lots. Due to the steepness of lot 3 and the fact the house on lot 3 does not comply with the Hillside Design Guidelines the project will not be consistent with the City's General Plan land use element; the project is compatible with the goals and objectives of the Housing Element and is commensurate with local and regional needs for housing opportunities in that the parcel map will enable the subdivision of one residential lot into three residential lots and will be developed with one single-family residence on the new lots that will provide increased opportunities for home ownership (Goal 3).

B. The project as designed with three lots will not be consistent with the approved and adopted General Plan Elements as cited in the preceding paragraph.

C. The site is not physically suitable for the proposed development. The site slopes up from the southwest to the northeast. The parcel map will subdivide one residential parcel into three residential parcels for the purpose of developing one new single-family residence on two of the new lots. The existing single-family residence will remain. The proposed home on lot three does not comply with the Hillside Design Guidelines by not following the slope of the lot or being built into the hillside.

E. Adherence to the development criteria and conditions of approval will provide for development of the project site consistent with City environmental standards.

F. Compliance with subdivision design standards and criteria of the Glendale Municipal Code and the conditions of approval will protect the public health and welfare, and prevent any serious health problems.

G. The project will not conflict with any easements acquired by the public at large for access through or use of property within the project site.

H. The sanitary sewer system is adequate to accommodate future new developments in this area.

Adopted this 7th day of December, 2016.

This motion shall take effect and be in force upon the tenth (10th) day after its passage.
