APPLICANT'S PROPOSAL

ENVIRONMENTAL REVIEW

The project is exempt from CEQA review as a Class 1 "Existing Facilities" exemption pursuant to State CEQA Guidelines Section 15301.

REQUIRED/MANDATED FINDINGS

After thorough consideration of the statements contained in the application, the plans submitted therewith, the report by the Community Development Department staff thereon, and the statements made at the public hearing with respect to this application, the Planning Hearing Officer has **GRANTED WITH CONDITIONS** your application based on the following:

A. The proposed use will be consistent with the various elements and objectives of the general plan.

The proposed use will be consistent with the various elements and objectives of the General Plan for the area. The applicant is seeking approval of a conditional use permit to allow the continued operation of a massage establishment. The Land Use Element of the Glendale General Plan designates the subject site as Community Services. Personal service land uses, such as a massage establishment, generally offer a complementary element to surrounding uses. Massage services is an allowed use in the C3 – Commercial Services Zone, subject to the approval of a Conditional Use Permit. The subject site is in a commercial area along South Glendale Avenue (identified as a Major Arterial in the Circulation Element) that is suitable for this type of use. Continued operation of the massage establishment shall be required to comply with the City's Noise Ordinance (Chapter 8.36 Noise Control), and, as such, will be consistent with the Noise Element. No other elements of the General Plan, including the Open Space and Recreation and Housing Element will be impacted as a result of the massage establishment. Therefore, the proposed use is in keeping with the various elements and objectives of the General Plan.

B. The use and its associated structures and facilities will not be detrimental to the public health or safety, the general welfare, or the environment.

The use and its associated structures and facilities will not be detrimental to the public health or safety, the general welfare, or the environment. The facility is located on the north-east corner of South Glendale Avenue and East Chevy Chase Drive. The immediate vicinity of the subject site along South Glendale Avenue is developed with a variety of commercial uses, including restaurants, personal service, and retail uses. A medium-high density residential neighborhood lies to the east along Mariposa Street. The 494 square-foot massage establishment has been in operation at its current location since 1998. No changes are proposed to the on-site building or site plan, including the parking lot. The medical building is oriented towards South Glendale Avenue, and no windows face the residential neighborhood directly east of site. The use meets the intent of the Zoning Ordinance of providing a personal service in the commercial neighborhood and will be beneficial and desirable for the public and the community. There is one church and one public school in close proximity to the massage establishment; Theodore Roosevelt Middle School is located across the street from the subject site on the north-west corner of South Glendale Avenue and East Chevy Chase Drive and the Armenian Church of the Nazarene is located less than a quarter mile away from the subject site on the north-east corner of South Glendale Avenue and East Acacia Avenue. The use must comply with all of the provisions set forth in Chapter 5.64 of the Glendale Municipal Code (Massage Establishments); conditions will be added to the approval of the project to ensure that the massage establishment will continue to operate in a responsible manner. Neither the Glendale Police Department nor Neighborhood Services Division cited major concerns related to the proposed conditional use permit. Section 30.64.020 of the Glendale Municipal Code provides for continuing jurisdiction over the use so that any adverse effects will not be allowed.

C. The use and facilities will not adversely affect or conflict with adjacent uses or impede the normal development of surrounding property.

The use and facilities will not adversely affect or conflict with adjacent uses or impede the normal development of surrounding property. No changes are proposed to the existing on-site buildings as part of the CUP application. The existing massage establishment has been operating from this location for nearly 19 years. Since the granting of the last Conditional Use Permit (Case No. 10537-CU) for a massage use issued in 2003, the business owner has operated without adversely affecting or conflicting with adjacent uses, other commercial tenants in the same building or any of the various types of commercial uses in the surrounding area. Further, the Glendale Police Department did not cite any concerns or issues related with the applicant's request to allow the continued operation of the existing massage establishment. Additionally, no evidence was submitted nor presented at the public hearing that would indicate that the subject massage establishment has been or will be a problem in the future. Approval of the conditional use permit to continue operating a massage establishment at this location will not adversely impact nearby uses on this commercial street nor impede the development of surrounding properties since these properties are already developed. The massage use is not anticipated to draw major traffic or create conflicts with the adjacent uses and no substantial evidence was submitted to indicate that the facility would adversely impact existing facilities.

D. Adequate public and private facilities, such as utilities, parking spaces and traffic circulation measures are provided for the use.

Adequate public and private facilities such as utilities, landscaping and traffic circulation measures are provided for the site and the use. The use has been in operation at its current location since 1998. A parking structure is provided on the subject property to service the subject use and other tenants. This application does not include any added floor area to the existing building or subject tenant space, so no increase in the parking demand is being created. The existing utilities, landscaping, parking spaces, and traffic circulation measures are adequate as they are already in place.
