

INDEPENDENT AUDITORS' REPORT

To the Honorable Mayor and Members of City Council
of the City of Glendale
City of Glendale, California

Report on the Financial Statements

We have audited the accompanying financial statements of the Electric Enterprise Fund (Fund) of the City of Glendale, California (City), as of and for the year ended June 30, 2017, and the related notes to the financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Fund, as of June 30, 2017, and the changes in financial position and cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1, the financial statements present only the Fund and do not purport to, and do not, present fairly the financial position of the City of Glendale, California, as of June 30, 2017, the changes in its financial position, or, where applicable, its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Other Matters

Report on Summarized Comparative Information

We have previously audited the Fund's 2016 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated November 28, 2016. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2016 is consistent, in all material respects, with the audited financial statements from which it has been derived.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management discussion and analysis, schedule of the Fund's proportionate share of the City's miscellaneous plan net pension liability and schedule of contributions, as listed in the table of contents, be presented to supplement the financial statements. Such information, although not a part of the financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audit of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the financial statements of the Fund. The introductory and operating statistical sections are presented for purposes of additional analysis and are not a required part of the financial statements. The introductory and operating statistical sections have not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated November 22, 2017, on our consideration of the Fund's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in

MANAGEMENT DISCUSSION AND ANALYSIS – ELECTRIC UTILITY

The management of Glendale *Water & Power* (a department of the City of Glendale), offers the readers of the City of Glendale Electric Enterprise Fund (Electric Utility) financial statements a narrative overview and analysis of the financial activities of the Electric Utility for the fiscal year ended June 30, 2017. We encourage our readers to consider the information presented here in conjunction with the accompanying financial statements. All amounts, unless otherwise indicated, are expressed in thousands of dollars.

Financial Highlights

During fiscal year 2017, the Electric Utility's retail revenues decreased \$2,556 or 1% from the 2016 level. The decrease in retail revenues was attributable to a decrease in retail sales volume. Total operating revenues increased by \$1,370 or 0.6% and total operating expenses increased by \$9,954 or 6% from fiscal year 2016. After adding the net decrease of \$4,050 from non-operating expenses and subtracting \$19,912 transfer to the General Fund of the City to operating income of \$42,027, total net position increased by \$18,065 in fiscal year 2017.

During fiscal year 2016, the Electric Utility's retail revenues increased \$12,324 or 7% from the 2015 level. The increase in retail revenues was attributable to an increase in the rates charged to the retail customers. Total operating revenues increased by \$1,037 or 0.5% and total operating expenses decreased by \$10,777 or 6% from fiscal year 2015. After adding the net decrease of \$1,739 from non-operating expenses and capital contributions and subtracting \$20,107 transfer to the General Fund of the City to operating income of \$50,611, total net position increased by \$28,765 in fiscal year 2016.

The assets and deferred outflows of the Electric Utility exceeded its liabilities and deferred inflows at the close of fiscal years 2017 and 2016 by \$315,904 and \$297,839 respectively. Of these amounts, \$194,915 and \$156,279 respectively was unrestricted and may be used to meet the Electric Utility's ongoing obligations to creditors and customers. Unrestricted net position balances represented 108% and 91% of annual operating expenses for fiscal years 2017 and 2016 respectively.

Overview of The Financial Statements

This discussion and analysis is intended to serve as an introduction to the City of Glendale Electric Utility financial statements. The Electric Utility is a business-type activity of the City, and its activities are recorded in a separate enterprise fund. These financial statements include only the activities for the City of Glendale Electric Utility. Information on citywide financial results is available in the City of Glendale's Comprehensive Annual Financial Report.

The City of Glendale Electric Utility's financial statements comprise two components: 1) financial statements and 2) notes to the financial statements. In addition, this report also contains other information to provide our readers additional information about the Electric Utility including sales statistics and other relevant data. Included as part of the financial statements are three separate statements which collectively provide an indication of the Electric Utility's financial health.

The *Statement of Net Position* presents information on assets and deferred outflows of resources, and liabilities and deferred inflows of resources, with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial condition of the utility is improving or deteriorating.

The *Statement of Revenues, Expenses and Changes in Net Position* presents information showing how the Electric Utility's net position changed during the most recent two fiscal years. Results of operations are recorded under the accrual basis of accounting whereby transactions are reported as underlying events occur regardless of the timing of cash flows. Thus, revenues and expenses are reported in these statements for some items that will result in cash flows in future fiscal periods, i.e. accounts payable and accounts receivable. The accrual basis of accounting is more fully described in the accompanying Notes to the Financial Statements.

The *Statement of Cash Flows* presents the flows of cash and cash equivalents during the last two fiscal years including certain restricted amounts.

The *Notes to the Financial Statements* provide additional information that is essential to a full understanding of the data provided in the financial statements. The notes to the financial statements can be found on pages 18 to 44 of this report.

The required supplementary information are presented immediately following the notes to financial statements.

Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of the Electric Utility's financial position. In the case of the Electric Utility, total assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources by \$315,904 and \$297,839 as of June 30, 2017 and 2016, respectively. A portion of the Electric Utility's net position (37% and 46% as of June 30, 2017 and 2016, respectively) reflects its net investment in capital assets such as production, transmission, and distribution facilities, less any related outstanding debt used to acquire those assets. The Electric Utility uses these capital assets to provide services to customers; consequently, these assets are not available for future spending. Resources needed to repay the outstanding debt shown on the balance sheet must come from other sources such as operations since the capital assets themselves cannot be used to liquidate these long-term liabilities.

An additional portion of the Electric Utility's net position (2% and 2% as of June 30, 2017 and 2016, respectively) represents resources that are subject to external restrictions on how they may be used. This line item historically included net position restricted for SCAQMD emission controls and debt repayment. For fiscal year ended June 30, 2017 and 2016, the net position restricted for SCAQMD emission controls is \$5,669 and \$5,669, respectively.

The unrestricted portion of the Utility's net position (62% and 52% as of June 30, 2017 and 2016 respectively) may be used to meet the Electric Utility's ongoing obligations to creditors and customers.

Net Position – Electric Utility

The Electric Utility's net position as of June 30, 2017, 2016, 2015 is as follows:

	<u>2017</u>	<u>2016</u>	<u>2015</u>
Current and other assets	\$ 266,015	\$ 238,889	\$ 214,754
Capital assets	<u>283,325</u>	<u>292,983</u>	<u>291,625</u>
 Total assets	 <u>549,340</u>	 <u>531,872</u>	 <u>506,379</u>
 Deferred outflows of resources	 <u>18,113</u>	 <u>8,677</u>	 <u>4,140</u>
 Current liabilities	 25,086	 18,871	 14,236
Long-term liabilities	<u>222,601</u>	<u>218,701</u>	<u>215,934</u>
 Total liabilities	 <u>247,687</u>	 <u>237,572</u>	 <u>230,170</u>
 Deferred inflows of resources	 <u>3,862</u>	 <u>5,138</u>	 <u>11,275</u>
 Net position:			
Net Investment in capital assets	115,320	135,891	156,466
Restricted for SCAQMD emission controls	5,669	5,669	5,669
Unrestricted	<u>194,915</u>	<u>156,279</u>	<u>106,939</u>
 Total net position	 <u>\$ 315,904</u>	 <u>\$ 297,839</u>	 <u>\$ 269,074</u>

Net position increased by \$18,065 (or 6%) and increased by \$28,765 (or 11%) during fiscal years 2017 and 2016, respectively. In fiscal year 2017, the increase in net position was primarily the result of the increase in retail revenues from the rate plan implemented in 2013 and increase in sales to other utilities. In fiscal year 2016, the increase in net position was primarily the result of the increase in retail revenues and a decrease in operating expenses.

On August 13, 2013, the City Council approved an 8% system average rate increase effective September 13, 2013. The five year rate plan ends on June 30, 2018, with a final 2% rate increase starting on July 1, 2017. The Electric Utility is in the process of developing a new five year plan.

Changes in Net Position – Electric Utility

The Electric Utility's changes in net position for the years ended June 30, 2017, 2016, 2015 is as follows:

	2017	2016	2015
Revenues:			
Retail sales	\$ 198,898	\$ 201,454	\$ 189,130
Sale to other utilities	19,788	16,013	26,826
Miscellaneous revenues	4,299	4,148	4,622
Non-operating revenues	1,377	3,259	1,043
Total revenues	<u>224,362</u>	<u>224,874</u>	<u>221,621</u>
Expenses:			
Production	116,512	113,964	121,593
Transmission and distribution	34,864	26,552	27,830
Customer accounting and sales	3,178	3,399	4,663
Depreciation	25,469	26,156	26,691
Gas depletion	935	933	1,004
Interest expense	5,427	4,998	7,322
Total expenses	<u>186,385</u>	<u>176,002</u>	<u>189,103</u>
Excess (deficiency) before transfers and contributions	37,977	48,872	32,518
Capital contributions	-	-	325
Transfers to the City's General Fund	<u>(19,912)</u>	<u>(20,107)</u>	<u>(20,357)</u>
Change in net position	18,065	28,765	12,486
Net position, beginning of year	<u>297,839</u>	<u>269,074</u>	<u>256,588</u>
Net position, end of year	<u>\$ 315,904</u>	<u>\$ 297,839</u>	<u>\$ 269,074</u>

Revenue by Source – Electric Utility

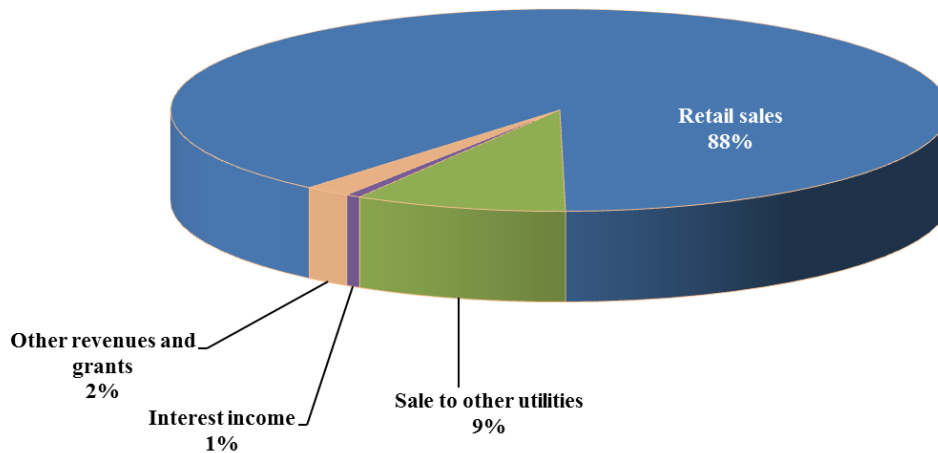

Year ended June 30, 2017

Retail revenues (residential, commercial, and industrial) continued to be the primary revenue source for the Electric Utility, making up approximately 88% of total revenue. The total revenues are on par with last year. Retail revenues showed a net decrease of 1% from the prior year due to an approximately 3% decrease in sales volume and a 2% system average rate increase beginning July 1, 2016. Sales to other utilities, accounts for the revenues other than the retail revenues, increased 24% from the prior year due to higher volumes.

Interest income increased 57% from the prior year. The decrease was a result of a decline in the fair market value of investments.

Other revenues and grants are on par with last year.

2017 Revenues

Year ended June 30, 2016

Retail revenues (residential, commercial, and industrial) continued to be the primary revenue source for the Electric Utility, making up approximately 90% of total revenue. Retail revenues showed an increase of 7% from the prior year due to a 5% system average rate increase beginning July 1, 2015 and an approximately 1% increase in sales volume. Wholesale and sales to other utilities have been combined into one account in 2016. Sales to other utilities accounts for the sales other than the retail sales. Sales to other utilities decreased 16% from the prior year due to lower volumes.

Interest income increased 209% from the prior year. The increase was attributed to higher cash reserves and better rate of return.

Other revenues and grants decreased 16% from the prior year due to fewer customer paid jobs and no grants funding project.

2016 Revenues

Expenses by Source – Electric Utility

Year ended June 30, 2017

Total expenses for the Electric Utility increased \$10,383 (or 6%) from the prior year level. Production expenses increased 2% from the prior year as a result of overall higher purchased power expenses. Transmission and distribution expenses increased 31% from the prior year as a result of increased operation and maintenance expenses. Customer accounting and sales expense decreased 7% and depreciation expense decreased 3%. The depletion of gas is on par with last year.

The Gas Depletion account was established to record the use of natural gas associated with the Electric Utility's share of the Natural Gas Project through the Southern California Public Power Authority (SCPPA).

Interest on bonds increased 9% from the prior year due to the issuance of the Electric Revenue Bonds, 2016 Refunding Series.

The City Charter provides at the end of each fiscal year, up to 25% of the operating revenues of the Electric Utility for such fiscal year, excluding receipts from power supplied to other cities or utilities at wholesale rates, shall be transferred from the Public Services Surplus Fund to the City's general reserve fund of the General Fund; provided, however, that the City Council, on an annual basis, may reduce or eliminate the amount to be transferred if the City Council determines that such reduction or elimination is necessary to assure the sound financial position of the utility. Transfers to the City's General Fund decreased 1% from the prior year.

2017 Expenses and Transfers

Year ended June 30, 2016

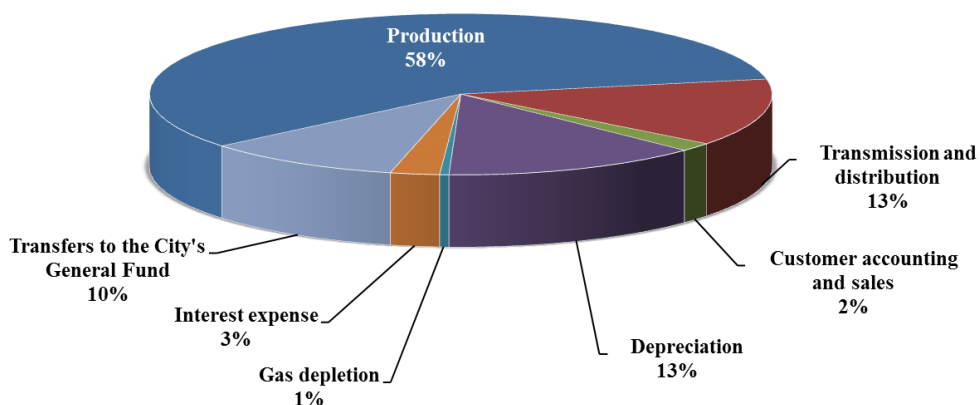

Total expenses for the Electric Utility decreased \$13,101 (or 7%) from the prior year level. Production expenses decreased 6% from the prior year as a result of lower natural gas prices and a decrease in the volume of purchased power. Transmission and distribution expenses decreased 5% from the prior year as a result of decreased operation and maintenance expenses. Customer accounting and sales expense decreased 27% and depreciation expense decreased 2%. The depletion of gas decreased 7% due to lower gas delivery from the Natural Gas Reserve Project.

The Gas Depletion account was established to record the use of natural gas associated with the Electric Utility's share of the Natural Gas Project through the Southern California Public Power Authority (SCPPA).

Interest on bonds decreased 32% from the prior year due to the defeasance of Electric Revenue Bonds, 2006 Series and partially defeasance of Electric Revenue Bonds, 2008 Series on May 2016, as well as an increase in capitalized interest.

The City Charter provides at the end of each fiscal year, up to 25% of the operating revenues of the Electric Utility for such fiscal year, excluding receipts from power supplied to other cities or utilities at wholesale rates, shall be transferred from the Public Services Surplus Fund to the City's general reserve fund of the General Fund; provided, however, that the City Council, on an annual basis, may reduce or eliminate the amount to be transferred if the City Council determines that such reduction or elimination is necessary to assure the sound financial position of the utility. Transfers to the City's General Fund decreased 1% from the prior year.

2016 Expenses and Transfers

Capital Assets and Debt Administration

Capital Assets

The Electric Utility's investment in capital assets as of June 30, 2017 and 2016 was \$283,325 and \$292,983 respectively (net of accumulated depreciation). This included investments in production, transmission, and distribution related facilities, as well as in general items such as office equipment, furniture, etc. Capital assets showed a 3% decrease and 0.5% increase as of June 30, 2017 and 2016, respectively,

The Electric Utility's capital assets as of June 30, 2017, 2016, 2015 are as follows:

	2017	2016	2015
Production	\$ 105,646	\$ 100,831	\$ 102,350
Transmission and distribution	453,598	454,885	437,996
Natural Gas Reserve	22,149	22,144	22,276
General	51,435	51,269	51,102
Less: accumulated depreciation and depletion	(349,503)	(336,146)	(322,099)
Total	\$ 283,325	\$ 292,983	\$ 291,625

Additional information on the Electric Utility's capital assets can be found in Note 3 on pages 27 to 28 of this report.

Long-Term Debt

As of June 30, 2017, 2016, and 2015, the Electric Utility had outstanding long-term debt of \$166,550, \$172,811, and \$174,747, respectively.

The Electric Utility’s outstanding debt as of June 30, 2017, 2016, 2015 is as follows:

	<u>2017</u>	<u>2016</u>	<u>2015</u>
Electric Revenue Bonds	\$ 149,945	\$ 153,390	\$ 168,870
Less: current portion	(6,262)	(4,577)	(2,870)
Unamortized bond premium	<u>22,867</u>	<u>23,998</u>	<u>8,747</u>
 Total long-term debt	 <u>\$ 166,550</u>	 <u>\$ 172,811</u>	 <u>\$ 174,747</u>

During fiscal year 2017, the Electric Utility maintained an “AA-” credit rating from Standard & Poor’s, “A+” credit rating from Fitch, Inc., and “Aa3” credit rating from Moody’s Investors Service for its revenue bonds.

Additional information on the Electric Utility’s long-term debt can be found in Note 4 on pages 29 to 32 of this report.

Economic Factors and Rates

In 2017, the City continued its effort to minimize exposure to market spikes in power and natural gas by implementing retail rate adjustment clauses that allow retail rates to adjust to market conditions and regulatory changes.

The Electric Utility advanced its commitment to environmental improvement by executing a 4-year and a subsequent 21-year purchase of firmed renewable energy, with deliveries starting in December 2015. In addition, the City Council approved agreements that will terminate the Electric Utility’s purchase of coal-fired energy from the San Juan Power Plant in New Mexico at the end of 2017, and the Utility is actively engaged in negotiations to replace the energy currently purchased from the coal-fired Intermountain Power Plant by mid-2025.

The City Council has adopted a Renewable Portfolio Standard (RPS) Procurement Plan focused on compliance with state mandates; this Plan will continue to be modified over time as necessary to reflect new state mandates. Currently, contracts and ownership rights are in place to assure compliance with state renewable energy mandates through 2020. Additional opportunities for renewable energy in the 2020s are being evaluated in light of California SB350, which requires that 50% of retail loads be served with renewable energy by 2030.

GWP completed a long-term Integrated Resource Plan (IRP) and is actively developing alternatives for upgrading the Scholl Canyon landfill gas available within the City of Glendale to allow the production of additional renewable energy. GWP has in place a net energy metering program and a Feed-In Tariff for the purchase of energy from local renewable sources within the City, and is preparing for expected increases in local solar capacity. GWP has also installed a 2 MW battery energy storage facility at its Grandview Substation. Finally, GWP is looking into repowering the Grayson Power Plant and has issued a Draft Environmental Impact Report.

The City is engaged in litigation regarding the City’s transfers from the Electric Fund to the General Fund. Glendale Coalition for a Better Government v. City of Glendale, L.A. Superior Court Case No. 147376, Court of Appeal Case No. B281994; Saavedra et al. v. City of Glendale, L.A. Superior Court Case No. BC539160, Court of Appeal Case No. B281991. The litigation is currently on appeal. For further information regarding the litigation, please refer to the City of

Glendale Comprehensive Annual Financial Report, Note 14 – Contingent Liabilities and Commitments.

Requests for Information

This financial report is designed to provide a general overview of the Electric Utility's finances. Questions concerning any information provided in this report or requests for additional financial information should be addressed to the General Manager of Glendale Water & Power – 141 North Glendale Avenue, Level 4, Glendale, California 91206.

Increase (Decrease) in fair value of investments	(16)	1,433

The notes to the financial statements are an integral part of this statement.

Notes to Financial Statements

1. Summary of Significant Accounting Policies

The following is a summary of significant accounting policies of the City of Glendale (the City) as they pertain to the Electric Enterprise Fund, (Electric Utility). All amounts, unless otherwise indicated, are expressed in thousands of dollars.

Fund

The accounts of the City are organized on the basis of funds, each of which is considered to be an independent fiscal and accounting entity with a self-balancing set of accounts for recording cash and other resources together with all related liabilities, obligations and net position that are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions or limitations.

Basis of Presentation

The City's Electric Utility is used to account for the construction, operation and maintenance of the City-owned electric utility. The Fund is considered to be an enterprise fund, proprietary fund type, and uses flow of economic resources measurement focus to determine net income and financial position, as defined under accounting principles generally accepted in the United States of America. Accordingly, the accrual basis of accounting is followed by the Electric Utility, where revenues are recorded when earned and expenses are recorded when incurred. The Electric Utility is included in the City's Comprehensive Annual Financial Report (CAFR), and therefore, these financial statements do not purport to represent the financial position and changes in financial position, and where applicable, cash flow thereof of the City.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the City's enterprise funds are charges to customers for sales and services. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Pooled Cash and Investments

The Electric Utility pools its cash with the City. The Electric Utility values its cash and investments at fair value in the statement of net position and recognizes the corresponding change in the fair value of investments in the year in which the change occurred. The City categorizes the fair value measurements of its investments based on the hierarchy established by generally accepted accounting principles. The fair value hierarchy, which has three levels, is based on the valuation inputs used to measure an asset's fair value: Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

The City manages its pooled idle cash and investments under a formal investment policy that is reviewed by the Investment Committee and adopted by the City Council and follows the guidelines of the State of California Government Code. Individual investments cannot be identified with any single fund because the City may be required to liquidate its investments at any time to cover large outlays required in excess of normal operating needs.

Interest income from the investment of pooled cash is allocated to the Electric Utility on a monthly basis based upon the prior month end cash balance of the Electric Utility as a percent of the month end total pooled cash balance. The City normally holds the investment to maturity; therefore no realized gain/loss is recorded.

For purposes of statement of cash flows of the Electric Utility, cash and cash equivalents include all pooled cash and investments, pooled designated & invested cash, restricted cash and cash with fiscal agents with an original maturity of three months or less. The Electric Utility considers the cash and investments pool to be a demand deposit accounts where funds may be withdrawn and deposited at any time without prior notice or penalty.

Investment-gas/electric commodity represents the Electric Utility's implementation of a program to purchase and sell options (calls and puts) in natural gas futures contracts at strike prices. These transactions allow the Electric Utility to stabilize the ultimate purchase price of natural gas for the Electric Utility's power plant. They, and other transactions, also give the Electric Utility the ability to manage its overall exposure to fluctuations in the purchase price of natural gas. The options are carried at fair market value. As of June 30, 2017 and 2016, the investment-gas/electric commodity was \$1,495 and \$2,386, respectively.

Pooled Designated Cash and Investments

A Cash Reserve Policy for the Electric Utility was first established in 2003. Its provision calls for annual review of the reserves to determine if the recommended levels are sufficient. The

annual review of the Cash Reserve Policy for the fiscal year ending June 30, 2017, established a target of \$66,400 of designated cash in the following categories: \$40,400 for contingency reserve; \$10,000 for rate stabilization reserve; and \$16,000 for Reserve for Gas Reserve Project. As of June 30, 2017 and 2016, \$66,400 and \$66,400 was designated, respectively.

Capital Assets

The Electric Utility’s capital assets include land, building, improvements and equipments that are reported in the Electric Utility’s financial statements. The Electric Utility follows the City’s asset capitalization policy. Capital assets are defined by the City as assets with an initial, individual cost of \$5 or more and an estimated useful life in excess of one year. Such assets are recorded at historical cost. Donated assets representing utility service assets, which are donated to the City by independent contractors, are recorded at acquisition cost. Depreciation for both purchased and contributed assets are computed using a straight-line method, based upon average estimated useful life of an asset. Interest incurred during the construction phase of the capital assets is included as part of the capitalized value of the assets constructed. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized. As of June 30, 2017 and 2016, total interest incurred is \$7,254 and \$6,005, respectively. For fiscal year ended June 30, 2017 and 2016, the total interest capitalized is \$1,827 and \$1,007, respectively.

A summary of the useful lives of the capital assets of the Electric Utility is as follows:

Assets	Years
Building and Improvements	10-50
General Structure & Parking Lot Landscaping Improvements	10
Building Improvements	20
Land Improvements	30
Transmission-Off System	50
Machinery and Equipment	6-10
Passenger Cars, Pickup	6
Cargo Vans	7
Dump/Tractor/Trailer Trucks	10

Inventories

Inventories, consisting primarily of construction and maintenance materials and tools for the production and distribution system of the Electric Utility are stated at cost, using the weighted average cost method or disposal value.

Long-Term Debt

The long-term debt and other obligations are reported as liabilities in the statement of net

position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are expensed in the period when the debt is issued.

Compensated Absences

The Electric Utility records and funds a liability for its employees' earned but unused accumulated vacation and overtime.

The Electric Utility also provides sick leave conversion benefits through the Retiree Health Saving Plan (RHSP). Unused sick leave is converted to a dollar amount and deposited in the employee's RHSP account at retirement. The account is used to pay healthcare premiums for the retiree and beneficiaries. After the account is exhausted, the retirees can terminate coverage or elect to continue paying the healthcare premiums from personal funds. The Electric Utility records an expense as the benefit is earned and probable of being paid out.

For additional details on the Compensated Absences, please refer to the City of Glendale Comprehensive Annual Financial Report.

Post-Employment Benefits

The Electric Utility participates in the City's Retiree Healthcare Plan which is a single-employer defined benefit healthcare plan administered by the City. The plan provides healthcare benefits to eligible retirees and their dependents. Benefit provisions are established by and may be amended by the City. The City does not have a separate audited GAAP-basis postemployment benefit plan report for this defined benefit plan. No separate obligations are calculated for the Electric Utility, and no obligation is presented herein. The City's contribution is currently based on a pay-as-you-go funding method, that is, benefits are payable when due. This pay-as-you-go method is recorded in the Electric Utility based on the Electric Utility's share of current employees to total city employees. For fiscal year 2017 and 2016, the City's contribution in benefit payments was \$492 and \$2,991, respectively.

For additional details on the Post-Employment Benefit, please refer to the City of Glendale Comprehensive Annual Financial Report.

Pensions

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the City of Glendale's California Public Employees Retirement System (CalPERS) plans and additions

to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Accounts Receivable

The Electric Utility records revenues that have already been earned but not yet received as of June 30 from individual customers, private entities and government agencies. Also, recoveries to utility customer receivables previously written off are recorded when received. An allowance for doubtful account is maintained for utility and miscellaneous accounts receivable. The allowance for doubtful account is adjusted at fiscal year end based on the amount equal to the annual uncollectible accounts. As of June 30, 2017 and 2016, the Electric Utility's allowance for doubtful accounts were \$234 and \$242, respectively.

Unbilled Receivable

The Electric Utility records revenues for utility services delivered to customers but not billed. As of June 30, 2017 and 2016, the Electric Utility's unbilled receivable was \$18,140 and \$17,065, respectively.

Prepaid Items and other

Certain payments to the vendors reflect costs applicable to future accounting period and are recorded as prepaid, which are then recognized as expense as benefits are received. As of June 30, 2017 and 2016, prepaids were \$8,914 and \$6,206, respectively.

Contracts - Retained Amount Due

The Electric Utility withholds 10% of each progress payment on construction contracts. These retained amounts are not released until final inspection is completed and sufficient time has elapsed for sub-contractors to file claims against the contractor. As of June 30, 2017 and 2016, the Electric Utility's contracts – retained amount due were \$729 and \$1,225, respectively.

Deposits

The Electric Utility requires all new or existing utility customers that have not or failed to establish their credit worthiness with the Electric Utility to place a deposit. The deposits are refunded after these customers establish their credit worthiness to the Electric Utility. As of June 30, 2017 and 2016, the Electric Utility's deposits were \$3,428 and \$3,762, respectively.

Transfers to the City

The City's charter provides for certain percentages (up to a maximum of 25%) of operating revenues in the Electric Utility to be transferred to the City's General Fund as based on City Council approval and have been reflected in the financial statements as transfers out. As of June 30, 2017 and 2016, the Electric Utility's transfers to the City were \$19,912 and \$20,107, respectively.

Net Position

Net position represents the difference between assets and deferred outflows of resources, and liabilities and deferred inflows of resources. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowings used for the acquisition, construction or improvement of those assets. Net investment in capital assets excludes unspent debt proceeds. Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the City or through external restrictions imposed by creditors, grantors or laws or regulations of other governments.

The Electric Utility first applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position is available.

Revenue Recognition

Revenues are recognized for services and energy provided to customers, and customers are billed either monthly or bi-monthly. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Budgets and Budgetary Accounting

The Electric Utility presents and the City Council adopts an annual budget. The proposed budget includes estimated expenses and forecasted revenues. The City Council adopts the Electric Utility's budget in June each year via a resolution.

Pronouncements Issued But Not Yet Implemented

The Governmental Accounting Standards Board (GASB) issued pronouncements that have an effective date that may impact future financial presentation. Management has not determined what, if any, impact implementation of the following statements may have on the financial statements of the Electric Utility.

- GASB Statement No. 75 – *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. The objective of this Statement is to improve accounting and financial reporting by state and local governments for OPEB. This Statement replaces the requirements of Statements No. 45 and No. 57. The Statement is effective for periods beginning after June 15, 2017.
- GASB Statement No. 81 – *Irrevocable Split-Interest Agreements*. The objective of this Statement is to improve accounting and financial reporting for irrevocable split-interest agreements by providing recognition and measurement guidance for situations in which a government is a beneficiary of the agreement. The Statement is effective for periods beginning after December 15, 2016.
- GASB Statement No. 83 – *Certain Asset Retirement Obligations*. The objective of this Statement is to address accounting and financial reporting for certain asset retirement obligations. The Statement is effective for periods beginning after June 15, 2018.
- GASB Statement No. 84 – *Fiduciary Activities*. The objective of this Statement is to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported. The Statement is effective for periods beginning after December 15, 2018.
- GASB Statement No. 85 – *Omnibus 2017*. The objective of this Statement is to address practice issues that have been identified during implementation and application of certain GASB Statements. The Statement is effective for periods beginning after June 15, 2017.
- GASB Statement No. 86 – *Certain Debt Extinguishment Issues*. The objective of this Statement is to improve consistency in accounting and financial reporting for in-substance defeasance of debt by providing guidance for transactions in which cash and other monetary assets acquired with only existing resources—resources other than the proceeds of refunding debt—are placed in an irrevocable trust for the sole purpose of extinguishing debt. The Statement is effective for periods beginning after June 15, 2017.
- GASB Statement No. 87 – *Leases*. The objective of this Statement is to better meet the information needs of financial statement users by improving accounting and financial reporting for leases by governments. The Statement is effective for periods beginning after December 15, 2019.

Deferred Outflows and Inflows of Resources

The statement of net position reports a separate section for deferred outflows of resources, in addition to assets. This separate financial statement element represents a consumption of net position that applies to a future period and will not be recognized as an outflow of resources, or expenses, until then. This category consists of loss on debt refunding and deferred outflows of

resources related to pension for reporting in the statements of net position. As of June 30, 2017 and 2016, the Electric Utility's deferred outflows of resources were \$18,113 and \$8,677, respectively.

The statement of net position reports a separate section for deferred inflows of resources, in addition to liabilities. This separate financial statement element represents an acquisition of net position that applies to a future period and will not be recognized as an inflow of resources, or revenues, until then. The Electric Utility records deferred inflows of resources related to pension. As of June 30, 2017 and 2016, the Electric Utility's deferred inflows of resources were \$3,862 and \$5,138, respectively.

2. Pooled Cash and Investments

Cash resources of the Electric Utility are combined with other City funds to form a pool of cash and investments, which is managed by the City Treasurer under a formal investment policy that is reviewed by the Investment Committee and adopted annually by the City Council. Therefore, individual investments cannot be identified with any single fund. Income from the investment of pooled cash is allocated to the Electric Utility on a monthly basis, based upon the month-end cash balance of the Electric Utility as a percent of the month-end total pooled cash balance. Of this total pooled cash and investments, \$213,638 and \$178,370 pertains to the Electric Utility for fiscal year 2017 and 2016, respectively. Pooled cash and investments are stated at the fair value.

The City categorizes the fair value measurements of its investments based on the hierarchy established by generally accepted accounting principles. The fair value hierarchy, which has three levels, is based on the valuation inputs used to measure an asset's fair value: Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

Cash and investments at fiscal yearend consist of the following:

	2017	2016
Pooled cash and investments	\$ 141,569	\$ 91,048
Cash and investments with fiscal agent	6,250	6,113
Restricted cash	5,669	20,922
Pooled designated and invested cash	66,400	66,400
Investment-gas/electric commodity	1,495	2,386
Total	<u>\$ 221,383</u>	<u>\$ 186,869</u>

For additional details on the City investment pool including disclosure relating to Interest Rate Risk, Credit Risk, Custodial Credit Risk, Investment in State Investment Pool and Fair Value

Measurement, please refer to Note 3 of the City of Glendale Comprehensive Annual Financial Report.

Restricted Cash

A separate fund in the City Treasury is established to deposit the proceeds of the Electric Revenue Bonds, 2013 Series and Southern California Air Quality Management District environmental compliance funds. As of June 30, 2017 and 2016 there is \$5,669 and \$20,922 recorded. The amounts set aside in this account shall remain therein until from time to time expended for the projects and purposes of paying for the costs of acquisition and construction of certain improvements to the Electric System of the City. Any remaining unspent bond proceeds once the purposes of the Electric Revenue Bonds, 2013 Series are accomplished will be transferred into the Parity Obligation Payment Fund, held with bond fiscal agent. There are no bond proceeds at end of June 30, 2017.

Deposit and withdrawals to the City’s Treasury Pool are made on the basis of \$1 and not fair value. Accordingly, the fair value measurement of the City’s proportionate share in the pool is based on uncategorized inputs not defined as a Level 1, Level 2, or Level 3 input.

For additional details on the Investment in State Investment Pool and Fair Value Measurement, please refer to Note 3 of the City of Glendale Comprehensive Annual Financial Report.

Cash and investments with Fiscal Agent

The Electric Utility has monies held by trustees or fiscal agents pledged to the payment or security of certain bonds. These are subject to the same risk category as the invested cash. The California Government Code provides that these funds, in the absence of specific statutory provisions governing the issuance of bonds or certificates, may be invested in accordance with the ordinances, resolutions or indentures specifying the types of investments its trustees or fiscal agents may make. These funds are governed by the bond indentures. These ordinances are generally more restrictive than the City’s general investment policy.

As of June 30, 2017, the Electric Utility had \$6,250 on deposit with fiscal agent as required by the bond documents; the Electric Utility had the following underlying investments:

<u>Cash and investments with fiscal agents</u>	<u>Fair Value</u>	<u>Maturity</u>	<u>Moody's Rating</u>
Guaranteed Investment Contracts	\$ 2,398	More than 5 yr	Unrated
Money Market	3,852	Less than 1 yr	Aaa
	<u>\$ 6,250</u>		

As of June 30, 2016, the Electric Utility had \$6,113 on deposit with fiscal agent as required by the bond documents; the Electric Utility had the following underlying investments:

Cash and investments with fiscal agents	Fair Value	Maturity	Moody's Rating
Guaranteed Investment Contracts	\$ 2,398	More than 5 yr	Unrated
Money Market	3,715	Less than 1 yr	Aaa
	<u>\$ 6,113</u>		

For additional details on the fair value measurement, please refer to Note 3 of the City of Glendale Comprehensive Annual Financial Report.

3. Capital Assets

A summary of the changes in Electric Utility June 30, 2017 Capital Assets is as follows:

	Balance at June 30, 2016	Increases	Decreases	Reclass/ Transfers	Balance at June 30, 2017
Capital assets not being depreciated/depleted:

Total accumulated depreciation	314,113	26,156	(12,891)	(151)	327,227
Less allowance for gas depletion:					
Natural Gas Reserve	7,986	933	-	-	8,919
Total assets being depreciated	271,664	(23,697)	(134)	594	248,427
Electric Fund capital assets, net	\$ 291,625	1,861	(429)	(74)	292,983

Natural Gas Project

In June 2005, the City elected to participate in the Natural Gas Reserve Project through SCPPA and entered into a 25 year Gas Sales Agreement with SCPPA for up to 2,000 MMBtu per day. The project calls for the acquisition and development of gas resources, reserves, fields, wells, and related facilities to provide a long-term supply of natural gas for its participants. The first acquisition was completed on July 1, 2005 with the total cost to the participants at \$306.1 million. The City's share in the project is \$13.1 million or 4.2553%, with estimated peak daily volume between 1,600 to 1,800 MMBtu. As of June 30, 2017, the net balance for the Natural Gas Reserve Project was \$12,295.

4. Long-Term Debt

The Electric Utility's outstanding principal as of June 30, 2017 and 2016 consists of the following:

	<u>Remaining Interest Rates</u>	<u>Original Issue</u>	<u>Outstanding June 30, 2017</u>	<u>Outstanding June 30, 2016</u>
Electric Revenue Bonds, 2008 Series	4.00%-5.00%	\$ 60,000	\$ 1,880	\$ 1,880
Electric Revenue Bonds, 2013 Refunding Series	4.00%-5.00%	20,510	19,610	20,510
Electric Revenue Bonds, 2013 Series	3.00%-5.00%	60,000	57,285	58,385
Electric Revenue Bonds, 2016 Refunding Series	4.00%-5.00%	72,615	71,170	72,615
Total			<u>\$ 149,945</u>	<u>\$ 153,390</u>

Electric Revenue Bonds, 2008 Series

The Electric Utility issued \$60,000 in revenue bonds in February 2008 to finance the costs of acquisition and construction of certain improvements to the Electric System of the City.

The Electric Revenue Bonds, 2008 Series were partially refunded in May 2016 with the Electric Revenue Bonds, 2016 Refunding Series. After the issuance of the Electric Revenue Bonds, 2016 Refunding Series, \$1,880 of the partially defeased 2008 Bonds remains outstanding as of June 30, 2017 and will mature at its redemption date on February 1, 2018. \$58,120 of the 2008 Bonds were refunded and deposited into an Escrow Fund established pursuant to an Escrow Agreement dated May 1, 2016 and will be fully redeemed on February 1, 2018 at a redemption price of 100% of the principal amount plus accrued interest.

Electric Revenue Bonds, 2013 Refunding Series

The Electric Utility issued \$20,510 in revenue bonds in March 2013 to provide funds to refund all of the City's outstanding Electric Revenue Bonds, 2003 Series and pay cost of issuance. The bond proceeds were deposited in an escrow account and were used to refund the Electric Revenue Bonds, 2003 Series through a legal defeasance.

The current refunding resulted in the recognition of a deferred outflow of resources of \$120 as of June 30, 2017 and is being amortized through year 2032. The reserve requirement of the bond issue is satisfied by a cash reserve fund with a minimum funding requirement of \$6,249 on parity with other Electric revenue bonds. The bonds mature in regularly increasing amounts ranging from \$935 to \$1,805 annually from 2018 to 2032.

Electric Revenue Bonds, 2013 Series

The Electric Utility issued \$60,000 in revenue bonds in December 2013 to finance the costs of acquisition and construction of certain improvements to the Electric System of the City.

The terms of the 2013 Electric Revenue Bonds' (2013 Bonds) indenture require the trustee to establish and maintain a reserve fund equal to the Reserve Fund Requirement. The Reserve Fund Requirement is defined by the Debt Indentures as the maximum annual debt service on the debt service schedule. Up to 50% of the Reserve Fund Requirement amount may be held in an unrestricted fund or account. The bonds mature in regularly increasing amounts ranging from \$1,130 to \$3,795 annually from 2018 to 2043.

Electric Revenue Bonds, 2016 Refunding Series

The Electric utility of Glendale Water & Power issued \$72,615 in revenue bonds in May 2016 to provide moneys for the refunding of all of the City's outstanding Electric Revenue Bonds, 2006 Refunding Series, a portion of the City's outstanding Electric Revenue Bonds, 2008 Series, and paying the costs of issuance of the 2016 Bonds. The bond proceeds were deposited in an escrow account and were used to refund the Electric Revenue Bonds, 2006 Refunding Series and a portion of the outstanding Electric Revenue Bonds, 2008 Series through a legal defeasance. The advance refunding resulted in the recognition of a deferred outflows of resources of \$4,687 as of June 30, 2017, and is being amortized through 2038.

The terms of the Electric Revenue Bonds, 2016 Refunding Series' (2016 Refunding Bonds) indenture require the trustee to establish and maintain a reserve fund equal to the reserve fund requirement. The reserve fund requirement is defined by the Debt Indentures as the maximum annual debt service on the debt service schedule. Up to 50% of the reserve fund requirement amount may be held in an unrestricted fund or account.

The bonds mature in regularly increasing amounts ranging from \$1,185 to \$4,715 annually from 2018 to 2038. The 2016 Refunding Bonds maturing on or prior to February 1, 2026 are not subject to redemption prior to maturity. The 2016 Refunding Bonds maturing on and after February 1, 2027 are subject to redemption prior to maturity, at the option of the City, as a whole or in part, on February 1, 2026, or on any date thereafter, at a redemption price equal to 100% of the principal amount of the 2016 Refunding Bonds to be redeemed, together with accrued interest to the redemption date.

	\$ 92,462	149,945	242,407

Rate Covenants

The Electric Utility has covenanted in the Indenture of Trust that Net Income of the Electric System for each fiscal year will be at least equal to 1.10 times the amount necessary to pay principal and interest as the same become due on all Bonds and Parity Obligations for such fiscal year. The Electric Utility is in compliance with this requirement. For the year ended June 30, 2017, net income as defined in the indenture, was \$68,202 and the debt service requirement was \$9,953. For the year ended June 30, 2016, net income as defined in the indenture, was \$79,404 and the debt service requirement was \$10,420.

5. Pension Plan

Plan Description

All qualified permanent and probationary employees of the Electric Utility are eligible to participate in the City's Miscellaneous Plan, an agent multiple employer defined benefit pension plan administered by the California Public Employees Retirement System (CalPERS) which acts as a common investment and administrative agent for its participating member employers. Benefit provisions under the Plan is established by State statute and City resolution. CalPERS issues publicly available reports that include a full description of the pension plans regarding benefit provisions, assumptions and membership information can be found on the CalPERS website at: www.calpers.ca.gov.

Benefits Provided

CalPERS provides service retirement and disability benefits, annual cost of living adjustments and death benefits to plan members, who must be public employees and beneficiaries. Benefits are based on years of credited service, equal to one year of full time employment. Members with five years of total service are eligible to retire at age 50 with statutorily reduced benefits. All members are eligible for non-duty disability benefits after 5 years of service.

The Plan's provisions and benefits in effect at June 30, 2017, are summarized as follows:

	Miscellaneous		
	Prior to January 1, 2011	Between January 1, 2011 and December 31, 2012	On or after January 1, 2013
Hire date			
Benefit formula	2.5% @ 55	2% @ 55	2% @ 62
Benefit vesting Schedule	5 years of service	5 years of service	5 years of service
Benefit payments	monthly for life	monthly for life	monthly for life
Retirement age	50-55+	50-63+	52-67+
Monthly benefits, as a % of eligible compensation	2.0% to 2.5%	1.43% to 2.42%	1.0% to 2.5%

Contributions

Section 20814(c) of the California Public Employees' Retirement law requires that the employer contribution rates for all public employers are determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in rate. Funding contributions for both Plans are determined annual on an actuarial basis as of June 30 by CalPERS. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The City is required to contribute the difference between the actuarially determined rate and the contribution rates of employees.

For the year ended June 30, 2017, the Electric Utility contributions to the City's Miscellaneous Plan were \$4,013.

Pension Liability, Pension Expenses and Deferred Outflows/Inflows of Resources Related to Pensions

As of June 30, 2017, the Electric Utility reported a liability of \$56,051 for its proportionate share of the City's Miscellaneous Plan net pension liability. The net pension liability of the Miscellaneous Plan was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015. The Electric Utility's proportion of the City's Miscellaneous Plan net pension liability at June 30, 2017 was based on the Electric Utility's fiscal year 2016 contributions to the City's Miscellaneous Plan relative to the total City contributions to the Miscellaneous Plan. At June 30, 2016, Electric Utility's proportion was 21% for 2016 and 2017.

For the year ended June 30, 2017, the Electric Utility recognized pension expense of \$3,225. At June 30, 2017, the Electric Utility reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Pension contributions subsequent to measurement date	\$ 4,013	-
Net differences between projected and actual earnings on plan investments	9,293	-
Changes of assumptions	-	1,372
Net differences between expected and actual experience	-	2,490
Total	<u>\$ 13,306</u>	<u>3,862</u>

The amount of \$4,013 reported as deferred outflows of resources related to pensions resulting from the Electric Utility's contributions to the City's plan subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2018.

Other amounts reported as deferred outflows/inflows of resources related to pensions will be recognized as pension expense as follows:

<u>Year ended June 30</u>	<u>Amounts</u>
2018	\$ (1,455)
2019	327
2020	4,186
2021	2,373
Total	<u>\$ 5,431</u>

Actuarial Assumptions

The Electric Utility's proportion of the City's total pension liability in the June 30, 2015 Miscellaneous Plan actuarial valuation was determined using the following actuarial assumptions:

Valuation date	June 30, 2015
Measurement date	June 30, 2016
Actuarial cost method	Entry Age Normal Cost Method
Actuarial assumptions:	
Discount rate	7.65%
Inflation	2.75%
Salary increase	Varies by Entry Age and Service
Mortality rate table	Derived using CalPERS' Membership Data for all Funds
Post-retirement benefit increase	Contract COLA up to 2.75% until Purchasing Power Protection Allowance Floor on Purchasing Power applies, 2.75% thereafter

The underlying mortality assumptions and all other actuarial assumptions used in the June 30, 2015 valuation were based on the results of an actuarial experience study for the period of 1997 to 2011, including updates to salary increase, mortality and retirement rates. The Experience Study report can be obtained at CalPERS website under Forms and Publications.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, staff took into account both short-term and long-term market return expectations as well as the expected pension fund cash flows. Such cash flows were developed assuming that both members and employers will make their required contributions on time and as scheduled in all future years. Using historical returns of all the funds' asset classes, expected compound (geometric) returns were calculated over the short-term (first 10 years) and the long-term (11-60 years) using a building-block approach. Using the

expected nominal returns for both short-term and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equivalent to the single equivalent rate calculated above and rounded down to the nearest one quarter of one percent.

The table below reflects long-term expected real rate of return by asset class. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation. These geometric rates of return are net of administrative expenses.

Asset Class	Target Allocation	Real Return Years 1 - 10 *	Real Return Years 11+ **
Global Equity	51.00%	5.25%	5.71%
Global Fixed Income	20.00%	0.99%	2.43%
Inflation Sensitive	6.00%	0.45%	3.36%
Private Equity	10.00%	6.83%	6.95%
Real Estate	10.00%	4.50%	5.13%
Infrastructure and Forestland	2.00%	4.50%	5.09%
Liquidity	1.00%	(0.55)%	(1.05)%
Total	100.00%		

*an expected inflation rate of 2.5% used for this period.

** an expected inflation rate of 3.0% used for this period.

Discount Rate

The discount rate used to measure the total pension liability was 7.65% for each Plan. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that the City's contributions will be made at rates equal to the difference between actuarially determined contributions rates and the employee rate. Based on those assumptions, each pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all period of projected benefit payments to determine the total pension liability.

Sensitivity of the Electric Utility's Proportionate share of the City's Miscellaneous Plan's Net Pension Liability to Changes in the Discount Rate

The following presents the Electric Utility's proportionate share of the net pension liability, calculated using the discount rate of 7.65%, as well as what the Electric Utility's proportionate

share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage point lower or 1-percentage point higher than the current rate:

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

1% Decrease		6.65%
Net Pension Liability	\$	84,373
Current Discount Rate		7.65%
Net Pension Liability	\$	56,051
1% Increase		8.65%
Net Pension Liability	\$	32,452

Pension Plan Fiduciary Net Position

Detailed information about the City’s collective net pension liability is available in the City’s separately issued Comprehensive Annual Financial Report (CAFR). The City’s financial statements may be obtained by contacting the City of Glendale’s Finance Department. The report may also be obtained on the internet at www.glendaleca.gov/government/departments/finance/budget/annual-report.

6. Self-Insurance Program

The Electric Utility participates in City’s unemployment and workers’ compensation insurance. For purposes of general liability, the Electric Utility participated in the City’s self-insurance program which is accounted for in an internal service fund of the City. There were no significant settlements or reductions in insurance coverage from settlements for the past three years. The insurance schedule for fiscal year 2017-18 is as follows:

Insurance Type	Program Limits	Deductible / SIR (self-insured retention)
Excess Liability Insurance	\$ 25,000	\$2,000 SIR per occurrence
D & O Employment Practices	2,000	\$250 SIR
Excess Workers' Comp Employer's Liability Insurance	Statutory	\$2,000 SIR per occurrence
Property Insurance	250,000	Various deductibles up to \$250
Employee Dishonesty - Crime Policy	3,000	\$25
Cyber Insurance	5,000	\$100

The annual premiums are based primarily on claims experience and are charged to expense when paid. Premiums are evaluated periodically and increases are charged to the Electric Utility to reflect recent trends in actual claims experience and to provide sufficient reserve for catastrophic losses. As of June 30, 2017 and 2016, premiums charged for Glendale *Water & Power* were \$1,206 and \$1, 362, respectively.

For additional details on the self-insurance program, please refer to the City of Glendale Comprehensive Annual Financial Report.

7. Net Position

Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the City or through external restrictions imposed by creditors, grantors or laws or regulations of other governments. Net position is reported as unrestricted when there are no limitations imposed on their use.

Excess capital surcharge revenue restricted to retrofit the City's Grayson Power Plant as mandated by Air Quality Management for fiscal years 2017 and 2016 was \$5,669 and \$5,669, respectively.

8. "Take or Pay" Contracts

The Electric Utility has entered into twelve "Take or Pay" contracts, which require payments to be made whether or not projects are completed or operable, or whether output from such projects is suspended, interrupted or terminated. Such payments represent the Electric Utility's share of current and long-term obligations. Payment for these obligations is expected to be made from operating revenues received during the year that payment is due. These contracts provide for current and future electric generating capacity and transmission of energy for the City residents. Through these contracts, the Electric Utility purchased approximately 60% of its total energy requirements during fiscal year 2016-2017. With a few exceptions, the Electric Utility is obligated to pay the amortized cost of indebtedness regardless of the ability of the contracting agency to provide electricity. The original indebtedness will be amortized by adding the financing costs to purchase energy over the life of the contract. All of these agreements contain "step-up" provisions obligating the Electric Utility to pay a share of the obligations of any defaulting participant.

The Intermountain Power Agency, a subdivision of the State of Utah, was formed in January 1974 to finance the construction of a 1,400 megawatt coal-fired generating plant, consisting of two

generating units located near Delta, Utah and associated transmission lines, called the Intermountain Power Project. The project began uprating of the two generating units in early 2003. When the uprating was finished in March 2004, it increased the capacity of the plant from 1,400 megawatts to 1,800 megawatts.

The Electric Utility through contract is obligated for 30 megawatts or 1.704% of the generation. In addition, the Electric Utility entered into an “Excess Power Sales Agreement” with the IPA, agent for the Utah Municipal Purchasers and the Cooperative Purchasers, which entitles the Electric Utility to additional shares that can vary from year to year. As of June 30, 2017, Excess Entitlement share is 0.461%. The total Electric Utility’s obligation from Intermountain Power Project (IPP) is between 35 and 38 megawatts.

The Electric Utility joined the Southern California Public Power Authority (SCPPA) on November 1, 1980. This authority, consisting of the California cities of Anaheim, Azusa, Banning, Burbank, Cerritos, Colton, Glendale, Los Angeles, Pasadena, Riverside, Vernon, and the Imperial Irrigation District, was formed for the purpose of financing future power resources. The Electric Utility has entered into eleven projects with SCPPA.

The first of the SCPPA projects is a 3,810 megawatt nuclear fuel generation plant in Arizona. The Palo Verde (PV) nuclear project consists of three (3) units, each having an electric output of approximately 1,270 megawatts. SCPPA has purchased approximately 225 megawatts of capacity and associated energy (approximately 5.910% of total Palo Verde output), of which the Electric Utility receives 9.9 megawatts or 4.4% of SCPPA’s entitlement. As of June 30, 2017, Electric Utility’s share is 4.40% (PV).

A second project financed through SCPPA is the Southern Transmission System (STS) that transmits power from the coal-fired IPP to Southern California. The 500 kV DC line is currently rated at 2,400 megawatts. The Electric Utility’s share of the line is 2.274% or approximately 55 megawatts. As of June 30, 2017, Electric Utility’s share is 2.274% (STS).

A third project financed through SCPPA is the acquisition of 41.80% ownership interest in a coal-fired 497 megawatt unit in San Juan Generating Station, Unit 3 (SJ), located in New Mexico. SCPPA members are entitled to 208 megawatts.

In July 2015, the City Council authorized the SCPPA to execute, on Glendale’s behalf, a set of three agreements that will collectively shut down Unit 3 at the coal-fired San Juan Power Plant in New Mexico at the end of December 2017. The agreements address restructuring of rights and obligations at San Juan, including disposal of coal inventory, mine reclamation, and plant decommissioning. The termination of operations at San Juan Unit 3 will help GWP achieve California state goals regarding the reduction of greenhouse gas emissions. Under the Mine

Reclamation and Plant Decommissioning Agreements, Glendale shares the responsibility for any liability arising from operations before the December 2017 exit date. As such a liability for decommission the power plant can not be determined at this time.

The Electric Utility is obligated for 20 megawatts or 9.8047% of the SCPPA entitlement. As of June 30, 2017, Electric Utility's share is 9.8047% (SJ).

A fourth project financed through SCPPA is Mead-Adelanto Project (MA). The project consists of a 202-mile 500 kV AC transmission line extending between the Adelanto substation in Southern California and the Marketplace substation in Nevada, and the development of the Marketplace Substation at the southern Nevada terminus approximately 17 miles southwest of Boulder City, Nevada. The initial transfer capability of the Mead-Adelanto Project is estimated at 1,200 megawatts. SCPPA members in the project are entitled to 815 megawatts. The Electric Utility is obligated for 90 megawatts or 11.043% of the SCPPA entitlement. As of June 30, 2017, Electric Utility's share is 11.043% (MA).

A fifth project financed through SCPPA is Mead-Phoenix Project (MP). The project consists of a 256-mile long 500 kV AC transmission line from the Westwing Substation in the vicinity of Phoenix, Arizona to the Marketplace Substation approximately 17 miles southwest of Boulder City, Nevada with an interconnection to the Mead Substation in southern Nevada. The project consists of three separate components: the Westwing-Mead Component, the Mead Substation Component, and the Mead-Marketplace Component. The Electric Utility's participation shares in the components range from 11.7647% to 22.7273%. The Mead-Phoenix Project in conjunction with the Mead-Adelanto Project provides an alternative path for the Electric Utility's purchases from the Palo Verde Nuclear Generating Station, San Juan Generating Station and Hoover Power Plant. These transmission lines also provide access to the southwest U.S. where economical energy is readily available. As of June 30, 2017, Electric Utility's share is 14.80% (MP).

A sixth project financed through SCPPA is the Magnolia Power Project (MPP) located on Burbank Water & Power's generation station complex adjacent to Magnolia Boulevard in Burbank, California. The project consists of a combined cycle natural gas-fired generating plant with a nominally rated net base capacity of 242 megawatts. The Electric Utility is obligated for 40 megawatts or 16.5289% of the project's output. As of June 30, 2017, Electric Utility's generation cost share is 16.5289% and indenture cost share is 17.2536%.

A seventh project financed through SCPPA is Natural Gas Prepaid Project (NGPP). In August 2007, the Electric Utility entered into a 30-year Prepaid Natural Gas Agreement with the SCPPA. The agreement will provide a secure and long-term supply of natural gas up to 3,500 MMBtu per day at a discounted price below a spot market price index. The delivery of natural gas started in July 2008. As of June 30, 2017, Electric Utility's share is 23.0% (NGPP).

An eighth project financed through SCPPA is the Linden Wind Energy Project (LIN) located in Klickitat County in the state of Washington. The facility is a 50 MW capacity wind farm. The 25 year purchase power agreement with SCPPA is for purchase of 10% (approximately 5 MW) of the capacity of the project. The Electric Utility has sold its output entitlement share to Los Angeles Water and Power (LADWP), but remains responsible for all the obligations associated with its participation in the Power Sales Agreements in the event if LADWP should default. As of June 30, 2017, Electric Utility's share is 10.0% (LIN).

A ninth project financed through SCPPA is the Tieton Hydropower Project (THP) located near the town of Tieton in Yakima County, Washington. The Project has a maximum capacity of approximately 20 megawatts. The Project includes a 115 kV transmission line, approximately 22-miles long, connecting the generating station with PacifiCorp's Tieton Substation. The Electric Utility is obligated for approximately 6.8 megawatts or 50% of the project's output. As of June 30, 2017, Electric Utility's share is 50.0% (THP).

A tenth project financed through SCPPA is Windy Point/Windy Flats project (WP) located in Klickitat County in the state of Washington. The Project has a maximum capacity of approximately 262.2 megawatts. The City Council approved a 20 year purchase power agreement with SCPPA for the purchase of approximately 20 megawatts or 7.63% of the renewable energy output from the Project. The Electric Utility has sold its output entitlement share to Los Angeles Water and Power (LADWP), but remains responsible for all the obligations associated with its participation in the Power Sales Agreements in the event if LADWP should default. As of June 30, 2017, Electric Utility's share is 7.63% (WP).

The eleventh project financed through SCPPA is the Milford II Wind Project (MIL2) located near Beaver and Millard Counties, Utah. The Project has a capacity of approximately 102 megawatts. The City Council approved 20 year purchase power agreement with SCPPA for the purchase of approximately 5 megawatts or 4.902% of the Project's output. The Electric Utility has sold its output entitlement share to Los Angeles Water and Power, but remains responsible for all the obligations associated with its participation in the Power Sales Agreements in the event if LADWP should default. As of June 30, 2017, Electric Utility's share is 4.90% (MIL2). Take-or-Pay commitments expire upon contract expiration date, or final maturity of outstanding bonds for each project, whichever is later.

Final fiscal year contract expirations are as follows:

Project	Contract Expiration Date	Glendale's Share
Intermountain Power Project (IPP)	2027	2.1648%
Palo Verde Project (PV)	2030	4.4000%
Southern Transmission System (STS)	2027	2.2740%
San Juan Project (SJ)	2018	9.8047%
Mead-Adelanto Project (MA)	2030	11.0430%
Mead-Phoenix Project (MP)	2030	14.8000%
Magnolia Power Project (MPP)	2036	17.2536%
Natural Gas Prepaid Project (NGPP)	2035	23.0000%
Linden Wind Energy Project (LIN)	2035	10.0000%
Tieton Hydropower Project (THP)	2040	50.0000%
Windy Point/Windy Flats Project (WP)	2030	7.6300%
Milford II Wind Project (MIL2)	2031	4.9020%

A summary of the Electric Utility's "Take or Pay" debt service commitment and the final maturity date as of June 30, 2017:

Fiscal Year	IPP	PV	STS	MA	MP	MPP	NGPP	LIN	THP	WP	MIL2	Total
2018	\$ 4,846	553	1,771	2,380	955	2,867	4,562	1,006	1,670	3,095	623	24,328
2019	5,202	-	1,766	2,358	951	2,866	4,684	1,007	1,668	3,092	623	24,217

In addition to debt service, the Electric Utility's entitlement requires the payment for fuel costs, operation and maintenance (O&M), administrative and general (A&G), and other miscellaneous costs associated with the generation and transmission facilities discussed above. These costs do not have a similar structured payment schedule as debt service and vary each year. The costs incurred for fiscal year 2017 and 2016 are as follows:

Fiscal Year	IPP	PV	STS	SJ	MA	MP	MPP	NGPP	LIN	THP	WP	MIL2	Total
2017	\$8,008	2,651	690	4,769	196	253	4,591	1,508	-	1,371	-	-	24,037
2016	\$7,950	3,368	743	6,422	275	203	4,842	1,427	-	1,119	-	-	26,349

9. Power Purchase Agreements

Boulder Canyon Project

The Electric Utility first participated in Boulder Canyon Project for electric service from the Hoover Power Plant in 1937 for a term of 50-year, expired on May 31, 1987. The plant was operated by Southern California Edison and Los Angeles Department of Water and Power under the supervision of the Bureau of Reclamation during the contract term.

Before the expiration of the contract, Hoover Power Plant Act of 1984 authorized the uprating of the 17 main generating units and provided long-term contingent capacity and firm energy to the participants in a renewal contract. The uprating program replaced all 17 original turbines in the Hoover Dam Power Plant began in 1986. When the program was finished in 1993, it increased the capacity of the plant from 1,344 megawatts to 2,079 megawatts.

In January 1987, the Electric Utility renewed the contract with the United States Bureau of Reclamation providing for the advancement of funds for the Hoover Uprating Project and Western Area Power Administration for the purchase of power from the project. The renewed contract is for a term of 30-year from 1987 to 2017. The Bureau of Reclamation also assumed control of operation and maintenance of the plant in 1987. Under this renewed contract, the Electric Utility is entitled to 21 megawatts or 1.0251% of the capacity and 1.5874% of the firm energy.

High Winds Energy Project

In August 2003, the Electric Utility entered into a 25-year contract, cancelable after 20 years, with PPM Energy, Inc. for the purchase of 9 megawatts of capacity from wind-powered resources in California. The City began taking delivery of the energy on September 1, 2003.

Ormat Geothermal Project

In June 2005, the Electric Utility entered into a 25-year power sales agreement with SCPPA for the Ormat Geothermal Energy Project for purchase of up to 3 megawatts of the project electric energy. The project began commercial operation in January 2006.

Southwest Wyoming Wind Project

In October 2006, the Electric Utility entered into a 16-year contract with PPM Energy, Inc. for the purchase of 10 megawatts of capacity from wind-powered resources in Wyoming. The City began taking delivery of the energy under WSPP master agreement from July 1, 2006 through September 30, 2006. The 16-year contract term started on October 1, 2006.

Pebble Springs Wind Project

In November 2007, The Electric Utility entered into a 18-year contract with SCPPA for the

purchase of 20 megawatts of renewable energy from Pebble Springs Wind Generation Facility. The project began commercial operation in January 2009.

Skylar Renewable Solar Power Purchase Agreement

In September 2014, the Electric Utility entered into a 25-year contract with Skylar Resources L.P. for the procurement of 50 megawatts of firmed renewable solar. At least fifty percent of 50 MW/hour is guaranteed by the seller to qualify as Portfolio Content Category 1 renewable energy on an annual basis.

In November 2015, the transaction was bifurcated into 2 separate renewable energy transactions, one with a term of December 1, 2015 through December 31, 2019 and the other with a term of Jan 1, 2020 through Nov 20, 2040. The 4-year transaction was subsequently novated to Morgan Stanley Capital Group. The City began taking delivery of the energy on December 2015.

10. Subsequent Events

Power Purchase Agreement

The Electric Utility entered into a 50-year contract with the Western Area Power Administration for the Electric Service from the Boulder Canyon Project. The service will commence in October 2017.

Litigation

The City is currently engaged in litigation regarding the City's transfer from the Electric Utility to the General Fund. The Petitioners contend that the annual transfer from the Electric Utility to the General Fund violates Proposition 26. The Petitioners also challenge the City's fund and accounting procedures contending they violate the City Charter.

With respect to the City's accounting practices, the trial court concluded that specified accounting practices, while compliant with Generally Accepted Accounting Principles ("GAAP"), violate the City Charter. The trial court issued a permanent injunction enjoining the City from merging some Charter mandated funds, splitting up others and making the GFT directly from the electric revenue fund to the General Fund without accounting for the appropriate fund transfers required by the Charter. The City has not appealed Charter fund and accounting issues portion of the trial court's ruling, and entered a response (return of the writ) stating its compliance with this portion of the court's orders.

With respect to General Fund transfer (GFT), the trial court concluded that, although Proposition 26 expressly states it is not retroactive, the City's imposition of new rates in August of 2013 was

a tax because the rate plan included the GFT and the court concludes the GFT is not a cost of service.

In the remedy phase of the trial, the trial court concluded that the amount of the unconstitutional tax is the amount of the GFT in the years since the 2013 Electric Rate Plan became effective. The trial court ordered a remedy requiring the City to credit ratepayers the amount of the GFT since the electric rates were increased (and refund the GFT to the Electric Revenue fund in the same amount). That number is \$56,950 plus interest for FY 2013-14, FY 2014-15, and FY 2015-16. The trial court further ordered a credit for FY 2016-17 in the amount of \$19,857, plus interest. Lastly, the trial court ordered that credits for fiscal years 2017-18 and subsequent years will accrue, if applicable at \$1,634 per month. The trial court's order provides that the total amount to be credited is to be credited back over approximately the same amount of time that the transfers were made, starting from the effective date of the 2013 Electric Rate Plan (the time is approximate because credits are based on actual usage which will vary). By way of example but not limitation, if the time between the 2013 Electric Rate Plan to the date of final judgment, including all appeals, is five years and the City has continued to make transfers during that period, then the City will have approximately five years to credit the entire amount of the transfers if it is unsuccessful in its appeals.

The court will also issue a writ of mandate commanding the City to cease to include the GFT in the electric rates charged to consumers unless and until a majority of Glendale electorate approves the tax in the rates.

The City Council has authorized an appeal of the judgment in both cases. Prior to the filing of the notice of appeal, the trial court determined that its judgments and orders – including cessation of the transfers and credits to ratepayers – will be stayed during the City's appeal. As such, status quo will remain in effect during the pendency of the appeal.

The City intends to vigorously prosecute an appeal of this matter. Management is of the opinion that the GFT, adopted by the voters and which pre-dates adoption of Proposition 26, is not thereby vitiated by Proposition 26. It is anticipated that an appeal will take 12-18 months.

For additional details on the General Fund transfer litigation, please refer to the City of Glendale Comprehensive Annual Financial Report.

ELECTRIC UTILITY REQUIRED SUPPLEMENTARY INFORMATION

Schedule of the Electric Utility's Proportionate Share of the City's Net Pension Liability (Miscellaneous Plan) Last 10 Years

	<u>2017</u>	<u>2016</u>	<u>2015</u>
Electric Utility's proportion of the net pension liability	21.00%	21.00%	21.00%
Electric Utility's proportionate share of the net pension liability	\$ 56,051	\$ 45,890	\$ 41,187
Covered payroll	\$ 17,971	\$ 17,697	\$ 18,563
Electric Utility's proportionate share for the City's Miscellaneous Plan's net pension liability as a percentage of covered payroll	311.90%	259.31%	221.88%
Miscellaneous Plan fiduciary net position as a percentage of the total pension liability	73.87%	77.94%	79.94%

- FY2015 is the first year of implementation of GASB 68; therefore, only three years of data are shown.
- The Electric Utility's implemented GASB 82 in FY2016, so covered payroll replaces covered-employee payroll for FY2015. Covered payroll is the payroll on which contributions to pension plan are based.

ELECTRIC UTILITY REQUIRED SUPPLEMENTARY INFORMATION

Schedule of Contributions Last 10 Years

	<u>2017</u>	<u>2016</u>	<u>2015</u>
Actuarially determined contributions	\$ 4,013	\$ 3,634	\$ 2,982
Contributions in relation to the actuarially determined contribution	<u>4,013</u>	<u>3,634</u>	<u>2,982</u>
Contribution deficiency (excess)	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>
Covered payroll	\$ 18,151	\$ 17,971	\$ 17,697
Contributions as a percentage of covered payroll	22.11%	20.22%	16.85%

- FY2015 is the first year of implementation of GASB 68; therefore, only three years of data are shown.
- The Electric Utility's implemented GASB 82 in FY2016, so covered payroll replaces covered-employee payroll for FY2015. Covered payroll is the payroll on which contributions to pension plan are based.
