PHASE I ENVIRONMENTAL SITE ASSESSMENT
Auto Repair & Sales Building
1633 Victory Boulevard
Glendale, California 91201

Dear Kumar:

CCI is pleased to submit our report describing the findings of the Phase I Environmental Site Assessment (ESA) for 1633 Victory Boulevard, Glendale, Los Angeles County, California. This Phase I ESA was prepared in general accordance with the United States Environmental Protection Agency (US EPA) 40 CFR Part 312, Standards and Practices for All Appropriate Inquiries (AAI) and the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation: E1527-13).

The purpose of the Phase I ESA was to identify, to the extent feasible, recognized environmental concerns in connection with the Property. This assessment included a Property reconnaissance, a survey of adjacent sites, interviews with informed persons, and reviews of regulatory agency records, an environmental database report, geologic and hydrogeologic resources, and historical information.

It has been our pleasure in providing this Phase I ESA for your review. Should you have any questions concerning the information contained in the following report, please feel free to contact the undersigned at (310) 373-0159.

Respectfully submitted,
Conservation Consulting International

David A. Jonas
Project Manager

Ken Durand
President

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was completed by CCI at the request of Jayesh Kumar for 1633 Victory Boulevard, Glendale, Los Angeles County, California (Property). The Property location is shown on Figure 1 - Property Location Map. The Phase I ESA was generally conducted according to the guidelines of ASTM Standard Practice of Environmental Site Assessments (E 1527-13) and the US EPA 40 CFR Part 312, Standards and Practices for All Appropriate Inquiries (AAI).

The purpose of the Phase I ESA was to identify, to the extent feasible, recognized environmental conditions in connection with the Property. This assessment included a Property reconnaissance, a survey of adjacent sites, interviews with informed persons, and reviews of regulatory agency records, an environmental database report, geologic and hydrogeologic resources, and historical information.

1.1 PROPERTY DESCRIPTION

The Property is approximately 21,000 square-feet in area and has been developed with two buildings. There is the main building, which includes the canopy, that was constructed on the Property in 1966. The building and canopy are steel structures which were originally constructed for a gasoline service station including automobile repair. The building is approximately 3,537 square-feet in size and currently consists of offices and an automobile repair area. The automobile repair shop is located in the northwest portion of the Property building. The automobile repair shop consists of three service bays two of which have in-ground hydraulic lifts. The third bay has an aboveground hydraulic lift.

A secondary building is located behind (northeast adjacent) the main Property building. The building is used for office purposes and storage reportedly. CCI was unable to access the entirety of the secondary building. The single-story building appeared to be wood-framed with wood walls. The construction date of the secondary building is unknown.

The steel canopy is located adjacent to the southwest side of the main Property building. There are two former dispenser islands located beneath the canopy and the area is paved with concrete. The other exterior areas of the Property are paved with asphalt. Multiple cars were parked on the Property. Because of this, CCI was unable to observe the exterior ground surface of the majority of the Property for suspect in-ground features. There is an enclosure located at the north corner of the Property which is used by the automobile repair shop for the storage of hazardous waste drums.

The Property is currently occupied by M&R Auto Tech (automobile repair), GTR Auto Sales, LLC (automobile sales), and IMEX Remarketing (automobile sales). The surrounding areas of the Property are generally developed with commercial sites and residential sites. A Chevron gasoline station operates on the site adjacent to the northwest of the Property. A gasoline station has operated on this adjacent site since at least 1938.

Address:	1633 Victory Boulevard, Glendale, Los Angeles County, California
Assessor's Parcel Numbers:	5626-013-024
Nature of Property Use:	Automobile sales and repair
Number of Buildings:	Two buildings
Type of Construction:	Steel building and a smaller wooden building
Date of Construction:	1966 (steel building) Unknown (smaller wood building)
Property Size:	21,000 square-feet
Building Size:	3,537 square-feet (steel building) Unknown (smaller wood building)
Current Occupants:	M&R Auto Tech (automobile repair), GTR Auto Sales, LLC (automobile sales), and IMEX Remarketing (automobile sales)

1.2 CONCLUSIONS

A *recognized environmental condition* (REC) refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a Property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term REC is not intended to include "de minimis" conditions that do not present a threat to human health and/or the environment. The results of this assessment revealed the following RECs in connection with the Property:

- A gasoline station was constructed on the Property in 1939. Information reviewed for this Phase I ESA indicated that two underground storage tanks (USTs) were installed on the Property in 1946. These tanks are suspected of being removed in 1966 during the rebuild of the gasoline station. In 1966 four USTs were installed on the Property. In 1971, one UST was installed on the Property. Four USTs were removed from the Property in 1981. There is a canopy located adjacent to the southwest side of the Property building. The dispenser islands were located beneath this canopy. The operation of a gasoline station and the associated USTs on the Property for at least 40 years is considered a REC.
- Automobile repair activities have been conducted on the Property since at least 1966 and possibly earlier during the time period of the original gasoline station building (1939 - 1966). The current automobile repair shop utilizes two in-ground hydraulic lifts. The installation date(s) of these lifts is unknown. The current automobile repair shop stores and uses hazardous materials (motor oil, coolant, and other automotive fluids/lubricants) inside the building and stores hazardous wastes (waste oil, waste oil filters, and waste coolant) in an enclosure at the exterior north end of the Property. Surface-staining was observed throughout the automobile repair shop and hazardous waste enclosure. Overall housekeeping practices inside the automobile repair shop were observed to be poor. The

long term automobile repair activities on the Property are considered a REC.

- CCI observed a metal lid inside the automobile repair shop. The operator of the automobile repair shop indicated that the lid covers a drain which is used to collect wastewater from floor washing activities. CCI suspects that the drain is connected to a 3-stage clarifier. Information reviewed for this Phase I ESA indicated that an industrial waste permit was issued for the Property in 1966 for industrial waste liquids generated from "covered automobile wash rack and lubrication room floor washing." The waste permit also indicated the existence of a 3-stage clarifier. The current tenant, M&R Auto Tech applied for a similar industrial waste permit in 2004 and also indicated an existing clarifier. CCI did not observe a clarifier on the Property. However, there were multiple cars parked throughout the Property, and CCI was unable to observe the exterior ground surface of the majority of the Property for suspect in-ground features.
- According to the Overview and Details Maps provided in the environmental database report reviewed by CCI for this Phase I ESA, the Property is situated within the contaminated groundwater plume associated with the San Fernando Valley (Area 2) National Priorities List (NPL) site. The San Fernando Valley Area 2 is an area of contaminated groundwater. The contaminated groundwater, which underlies an area of approximately 6,680 acres, contains trichloroethylene (TCE) and tetrachloroethylene (PCE). Current and/or historical Property operations include a gasoline station and automobile repair. Based on the current and historical Property operations and the Property being located within the contaminated groundwater plume associated with the San Fernando Valley (Area 2) NPL site, a vapor encroachment condition (VEC) for the Property cannot be ruled out.
- Suspected asbestos-containing materials (ACMs) including finished drywall systems and vinyl floor tiles were noted during the Property survey. Based on the construction date in 1966, there is a possibility that some of the construction materials in the building may contain asbestos fibers.
- Given the 1966 construction date of the building, it is considered possible that lead-based paint (LBP) is present at the Property. The building paint appeared to be in relatively good condition. The potential LBP should not become a health hazard provided that the paint properly maintained and remains sealed.

A historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority of meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the Property to any required controls. The results of this assessment revealed the following HRECs in connection with the Property:

- A waste oil UST was installed on the Property in 1966. A waste oil UST was removed from the Property in 1993. Although the information reviewed by CCI differs in the identified size of the waste oil UST (280-gallon vs. 500-gallon), CCI suspects that this is the same waste oil UST. Following the removal of the tank, two grab soil samples were collected and analyzed for waste oil, gasoline, diesel, chlorinated volatile organics, aromatic hydrocarbons, total lead, and polychlorinated biphenyls (PCBs). The analytical results indicated that the soil samples were non-detect for the targeted analytes. Following these results, the excavation pit was backfilled with the removed soil as well as imported clean fill material. The Glendale Fire Department (GFD) issued a "No Further Action" letter to the Property in 1993 following the removal of the waste oil UST.

A *controlled recognized environmental condition* (CREC) refers to a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. This assessment did not reveal evidence of CRECs in connection with the Property.

1.3 RECOMMENDATIONS

This assessment has revealed evidence of recognized environmental conditions and environmental issues in connection with the Property. Based on the results of this assessment, CCI recommends the following:

- CCI recommends conducting a Phase II ESA on the Property to assess whether the current and/or historic Property operations have adversely impacted the subsurface environment beneath the Property. The Phase II ESA should include a geophysical survey to identify former UST locations.
- CCI recommends developing and implementing an Asbestos Operations and Maintenance (O&M) Plan specific to the Property to manage the known and/or presumed ACMs. These ACMs can be managed under an O&M Plan as long as these materials do not pose an imminent health threat. CCI also recommends developing and implementing a LBP O&M Plan specific to the Property.
- Prior to any renovation or demolition of the Property building, CCI recommends conducting an asbestos survey to determine if any of the building materials used contain asbestos. Identified ACMs would need to be properly abated prior to any renovation or demolition activities.

- Appendix G - Previous Environmental Reports

1.0 INTRODUCTION

Jayesh Kumar engaged CCI to conduct a Phase I ESA of the Property located at 1633 Victory Boulevard, Glendale, Los Angeles County, California. This assessment was prepared in general accordance with ASTM Standard Practice of Environmental Site Assessments (E1527-13) and the US EPA 40 CFR Part 312, Standards and Practices for AAI. Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 OBJECTIVE

The objective of this Phase I ESA was to perform an appropriate inquiry into the uses of the Property as outlined by the ASTM Standard Practice of Environmental Site Assessments (E1527-13) and the US EPA 40 CFR Part 312, Standards and Practices for AAI, and to identify, to extent feasible, *recognized environmental conditions* (RECs) in connection with the Property that potentially have and/or may cause an adverse environmental impact to the Property.

1.2 SCOPE OF SERVICES

The scope of work for this assessment was in general accordance with the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) and the US EPA 40 CFR Part 312, Standards and Practices for AAI. These methodologies are described as representing good commercial and customary practice for conducting an ESA for the purpose of identifying recognized environmental conditions. This assessment included a Property reconnaissance, a survey of adjacent sites, interviews with informed persons, a review of regulatory agency records, a review of an environmental database report, a review of geologic and hydrogeologic resources, and a review of historical resources such as aerial photographs, Sanborn Fire Insurance Maps, topographic maps, and city directories.

1.3 USER RELIANCE

This report may be distributed and relied upon by Jayesh Kumar, its successors and assigns. Reliance on the information and conclusions of this report by any other person or entity is not authorized without the written consent of CCI. This report is not a legal opinion and does not offer warranties or guarantees.

2.0 USER PROVIDED INFORMATION

2.1 TITLE RECORDS

CCI was not provided with any title records from Jayesh Kumar. A search of title records was not conducted by CCI as part of this Phase I ESA.

2.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

No environmental liens or activity and land use limitation information were provided to CCI by Jayesh Kumar.

2.3 SPECIALIZED KNOWLEDGE

No specialized knowledge of environmental conditions associated with the Property was provided to CCI by Jayesh Kumar.

2.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Jayesh Kumar provided CCI with an overview of information regarding the Property including physical address and assessor's parcel number.

2.5 VALUE REDUCTION FOR ENVIRONMENTAL ISSUES

No information was provided to CCI by Jayesh Kumar indicating that the value of the Property has been reduced due to environmental issues.

3.0 PROPERTY RECONNAISSANCE

CCI performed a walking survey of the Property on August 18, 2016, accompanied by Mr. Ketan Kumar, the site contact for this Phase I ESA. The Property was observed for conditions and land uses that may have an affect on the environmental quality of the Property. CCI observed the Property for evidence of facilities such as aboveground and underground storage tanks, electrical transformers, ponds, pits, sumps, waste storage containers, drums or any other facilities where hazardous materials could be stored, disposed of, or dispensed. CCI also observed the Property for evidence of surface staining, stressed vegetation, and chemical odors which may be of concern regarding adverse environmental impacts to the Property.

3.1 LOCATION AND LEGAL DESCRIPTION

The Property is located at 1633 Victory Boulevard, Glendale, Los Angeles County, California, and is legally described by its assessor's parcel number 5626-013-024.

3.2 PROPERTY DESCRIPTION

The Property is approximately 21,000 square-feet in area and has been developed with two buildings. There is the main building, which includes the canopy, that was constructed on the Property in 1966. The building and canopy are steel structures which were originally constructed for a gasoline service station including automobile repair. The building is approximately 3,537 square-feet in size and currently consists of offices and an automobile repair area. There is also a

second-level storage area. There are office areas located in the southeast portion of the Property building. The offices are used by the automobile sales businesses that operate on the Property.

The automobile repair shop is located in the northwest portion of the Property building. The automobile repair shop consists of three service bays two of which have in-ground hydraulic lifts. The third bay has an aboveground hydraulic lift. There was a metal lid covering a reported drain used to collect wastewater from floor washing activities. The automobile repair shop was full of equipment and parts and surface-staining was observed on the concrete floor throughout the shop. Housekeeping practices were observed to be poor.

A secondary building is located behind (northeast adjacent) the main Property building. The building is used for office purposes and storage reportedly. CCI was unable to access the entirety of the secondary building. The single-story building appeared to be wood-framed with wood walls. The construction date of the secondary building is unknown.

The steel canopy is located adjacent to the southwest side of the main Property building. There are two former dispenser islands located beneath the canopy and the area is paved with concrete. The other exterior areas of the Property are paved with asphalt. Multiple cars were parked on the Property. Because of this, CCI was unable to observe the exterior ground surface of the majority of the Property for suspect in-ground features. There is an enclosure located at the north corner of the Property which is used by the automobile repair shop for the storage of hazardous waste drums. There are driveways off of Victory Boulevard, Winchester Avenue, and the alleyway which provide vehicular-access to the Property. The perimeters of the Property are secured with metal fencing (Refer to Photographs 1 - 24, located in Appendix B - Property Photographs).

3.3 CURRENT PROPERTY USE

The Property is currently occupied by M&R Auto Tech (automobile repair), GTR Auto Sales, LLC (automobile sales), and IMEX Remarketing (automobile sales).

3.4 HAZARDOUS MATERIALS

An automobile repair shop operates in the northwest portion of the main Property building. CCI observed one 55-gallon motor oil drum inside the shop along with several small quantity containers of various automotive fluids and lubricants. The drum was not stored within secondary containment. There were also waste oil drain tanks inside the shop. Surface-staining was observed on the concrete floor throughout the shop and general housekeeping practices were observed to be poor.

There is an enclosure located at the north corner of the Property which is used by the automobile repair shop for the storage of hazardous waste drums. CCI observed two waste oil 55-gallon drums, one waste coolant 55-gallon drum, and one waste oil filter 30-gallon drum stored within the enclosure. The drums were not stored within secondary containment. Surface-staining was observed on the ground surface of the enclosure.

3.5 UNDERGROUND STORAGE TANKS

A gasoline station was constructed on the Property in 1939. Information reviewed at the GFD indicated that two 4,000-gallon gasoline USTs were installed in 1946. The gasoline station was demolished in 1966 and rebuilt with the current Property building. A permit was issued in 1966 to remove two 4,000-gallon USTs from the Property and install one 6,000-gallon UST, two 4,000-gallon USTs, and one 280-gallon UST on the Property. In 1971, a permit was issued to install one 6,000-gallon UST on the Property. A permit was issued in 1981 for the removal of one 6,000-gallon UST, one 1,000-gallon UST, and two 4,000-gallon UST. During the site walk conducted for this Phase I ESA, four vent pipes were observed adjacent to the north corner of the Property building.

In 1993, one 500-gallon waste oil UST was removed from the Property. The tank was located to the northwest of the Property building. Following the removal of the tank, two grab soil samples were collected. One sample (S-1A) was collected from the center of the tank excavation and one sample (S-2A) was collected from the stockpile of removed soil. The soil samples were analyzed for waste oil, gasoline, diesel, chlorinated volatile organics, aromatic hydrocarbons, total lead, and PCBs. The analytical results indicated that the soil samples were non-detect for the target analytes. Following these results, the excavation pit was backfilled with the removed soil as well as imported clean fill material. The conclusions included a request for no further action. A copy of the tank removal report can be found in Appendix G of this report. The Glendale Fire Department issued a "No Further Action" letter to the Property in 1993 following the removal of the waste oil UST.

3.6 ABOVEGROUND STORAGE TANKS

CCI did not observe aboveground storage tanks (ASTs) on the Property.

3.7 SUMPS, CLARIFIERS, AND FLOOR DRAINS

CCI observed a metal lid inside the automobile repair shop. The operator of the automobile repair shop indicated that the lid covers a drain which is used to collect wastewater from floor washing activities. CCI suspects that the drain is connected to a 3-stage clarifier. Information reviewed at the GFD indicated that an industrial waste permit was issued for the Property in 1966 for industrial waste liquids generated from "covered automobile wash rack and lubrication room floor washing." The waste permit also indicated the existence of a 3-stage clarifier. The current tenant, M&R Auto Tech applied for a similar industrial waste permit in 2004 and also indicated an existing clarifier. CCI did not observe a clarifier on the Property. However, there were multiple cars parked throughout the Property, and CCI was unable to observe the exterior ground surface of the majority of the Property for suspect in-ground features.

3.8 POLYCHLORINATED BIPHENYLS

Electrical transformers, hydraulic equipment, capacitors, fluorescent light fixtures and similar electrical equipment may contain PCBs in the hydraulic fluids and/or dielectric insulation liquids present within the unit. The federal Toxic Substances Control Act (TSCA) generally prohibits the

domestic manufacture of PCBs after 1979. However there is a potential for equipment manufactured and/or constructed before that date to contain PCBs and current regulations do not require PCB containing equipment to be removed from service.

Two in-ground hydraulic lifts operate inside the Property building. Based on the suspect age of these lifts, it is considered possible that hydraulic oil within the lifts contain PCBs.

3.9 ASBESTOS CONTAINING MATERIALS

Asbestos is the name given to a number of naturally occurring, fibrous silicate materials mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. Asbestos is commonly used as an acoustic insulator, thermal insulation, fire proofing, and in other building materials. Exposure to airborne friable asbestos may result in a potential health risk because persons breathing the air may inhale asbestos fibers. Continued exposure over time may cause serious lung diseases including asbestosis, lung cancer, or mesothelioma. The sampling of building materials for asbestos was not conducted as part of this assessment.

Suspected ACMs including finished drywall systems and vinyl floor tiles were noted during the Property survey. Based on the construction date in 1966, there is a possibility that some of the construction materials in the building may contain asbestos fibers.

3.10 LEAD-BASED PAINT

LBP is recognized as a potential health risk due to the known toxic affects of lead exposure, primarily through ingestion, on the central nervous system, kidneys, and bloodstream. The risk of lead toxicity in LBP varies and based upon the condition of the paint and the year of its application. Paint applied in 1977 or later is not expected to contain lead. Survey and sampling of the paint around the Property for LBP was not conducted as part of this assessment.

Given the 1966 construction date of the building, it is considered possible that LBP is present at the Property. The building paint appeared to be in relatively good condition. The potential LBP should not become a health hazard provided that the paint properly maintained and remains sealed.

3.11 RADON GAS EVALUATION

Radon is a colorless, tasteless radioactive gas that has been linked to possible increased risk of lung cancer. According to the United States Environmental Protection Agency (U.S. EPA), exposure to 4.0 peccaries of radon gas per liter of air (pCi/L) on a regular basis increases the risk of contacting lung cancer. CCI reviewed the California Department of Health Services (DHS) Radon Database for California. The DHS conducted over 16,000 individual radon tests throughout the State of California. The database groups the test results by zip codes. According to the database, the area of the Property does not typically exhibit concentrations of radon thought to be harmful to human health.

3.12 MOLD OBSERVATIONS

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g. ceiling tile, drywall, paper, or natural fiber carpet padding). Mold growths often appear as discoloration, staining, or fuzzy growth on building materials or furnishings and are varied colors of white, gray, brown, black, yellow, and green. In large quantities, molds can cause allergic symptoms when inhaled or through the toxins the molds emit.

During the site survey, CCI observed the accessible interior areas of the building for evidence of water intrusion which would indicate the potential for mold growth. CCI did not observe evidence of areas of water intrusion inside the building. This evaluation did not include areas behind enclosed walls and ceilings.

3.13 POTABLE WATER

Potable water is provided to the Property by the City of Glendale.

3.14 SEWAGE DISPOSAL

Sewage disposal is provided for the Property by the City of Glendale.

3.15 SOURCES OF HEATING AND COOLING

Sources of heating and cooling energy are provided to the Property by Southern California Edison (SCE).

3.16 SURROUNDING AREAS DESCRIPTION

The Property is located at the north corner of the intersection of Victory Boulevard and Winchester Avenue. The surrounding areas of the Property are commercial and residential in nature. The following sites are located adjacent to the Property:

Northwest:	Chevron gasoline station
Northeast:	Residential site
Southeast:	Winchester Avenue followed by a residential apartment building
Southwest:	Victory Boulevard followed by the Griffith Park Motel and a commercial building (no signage)

4.0 VAPOR ENCROACHMENT SCREENING

CCI performed a Tier 1 Vapor Encroachment Screening (VES) for the Property in general accordance with the scope of work and limitations of ASTM E2600-10. The purpose of the Tier 1 VES was to identify if there are known or suspected sources of contamination within the area of concern which potentially poses a VEC for the Property. As part of the VES Tier 1 Screening, CCI completed the following questionnaire which was found in Section X3 of ASTM E2600-10:

VEC Tier 1 Screening

Question	Response	Comments
1. Property Type?	Commercial	
2. Are there buildings/structures on the Property?	Two buildings	
3. Will buildings/structures be constructed on the Property in the future?	Unknown	
4. If buildings exist or are proposed, do/will they have elevators?	No	
5. Type of level below grade (existing or proposed)?	Concrete foundation	
6. Ventilation in level below grade?	No	
7. Sump pumps, floor drains, or trenches (existing or proposed)?	Yes	Reported floor drain inside automobile repair shop
8. Radon or methane mitigation system installed?	No	
9. Heating system type (existing or proposed)?	Unknown	
10. Type of fuel energy (existing or proposed)?	Unknown	
11. Have there ever been any environmental problems at the Property?	None reported	
12. Does/will a gas station or dry cleaner operate anywhere on the Property?	None currently	A gasoline station historically operated on the Property
13. Do any tenants use hazardous chemicals in relatively large quantities on the Property?	Yes	Automobile repair shop
14. Have any tenants ever complained about odors in the building or experienced health-related problems that may have been associated with the building(s)?	Unknown	
15. Are the operations (or proposed operations to be performed) on the Property OSHA regulated?	Yes	Automobile repair shop activities
16. Are there any existing or proposed USTs or ASTs?	Possibly	A gasoline station historically operated on the Property

17. Are there any sensitive receptors (for example, children, elderly, people in poor health, and so forth) that occupy or will occupy the Property?	Unlikely	
--	----------	--

Additional VEC Criteria

Question	Response	Comments
1. Is the Property known to have current or past contamination?	No	
2. Is contamination of the Property suspected?	Yes	Suspected based on current/historical automobile repair activities and gasoline station operations
3. Is an adjacent site known to have current or past contamination which may have impacted the Property?	No	
4. Is a nearby site known to have current or past contamination which may have impacted the Property?	No	
5. Is regional groundwater contamination known to exist beneath the Property?	Yes	Within the contaminated groundwater plume associated with the San Fernando Valley Superfund site
6. Are you aware of other conditions which may result in vapor intrusion at the Property?	No	

According to the Overview and Details Maps provided in the environmental database report reviewed by CCI for this Phase I ESA, the Property is situated within the contaminated groundwater plume associated with the San Fernando Valley (Area 2) NPL site. The San Fernando Valley Area 2 is an area of contaminated groundwater. The contaminated groundwater, which underlies an area of approximately 6,680 acres, contains TCE and PCE.

Current and/or historical Property operations include a gasoline station and automobile repair. Based on the current and historical Property operations and the Property being located within the contaminated groundwater plume associated with the San Fernando Valley (Area 2) NPL site, a VEC for the Property cannot be ruled out.

5.0 INTERVIEWS

5.1 INTERVIEWS WITH PAST AND PRESENT OWNERS/OCCUPANTS

CCI interviewed Mr. Ketan Kumar, the site contact, during the site walk conducted for this Phase I ESA. According to Mr. Kumar, the Property is occupied by automobile sales and repair businesses.

5.2 INTERVIEWS WITH ADJACENT SITE OWNERS/OCCUPANTS

CCI did not interview adjacent site owners/occupants for this Phase I ESA. The Property is currently developed. ASTM E1527-13 standards indicate that interviews of adjacent site owners/occupants are necessary when the subject site is abandoned or if there is evidence of unauthorized uses or uncontrolled access to the Property.

6.0 HISTORICAL REVIEW

The purpose of reviewing historical sources is to develop a history of the previous uses of the Property and surrounding areas in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Property. Historical sources reviewed by CCI for this Phase I ESA included aerial photographs, street directories, Sanborn Fire Insurance maps, and topographic maps and are summarized in the following sections.

6.1 SUMMARY OF PROPERTY USE

The Property appeared to first be developed in 1939 with a gasoline station. The gasoline station building was demolished in 1966 and replaced with the current Property building. The current building was constructed as a gasoline station and automobile repair building. A gasoline station operated on the Property until at least 1975.

The Property is currently occupied by M&R Auto Tech (automobile repair), GTR Auto Sales, LLC (automobile sales), and IMEX Remarketing (automobile sales). Automobile repair businesses have operated on the Property since at least 1966 and possibly earlier during the time period of the original gasoline station building (1939 - 1966). Automobile sales businesses have operated on the Property since at least 1995.

Prior to 1939, the Property consisted of undeveloped land between 1928 and 1938 and was possibly developed with orchards prior to 1928.

6.2 AERIAL PHOTOGRAPH REVIEW

Historical aerial photographs of the Property were reviewed for the years 1928, 1938, 1952, 1954, 1964, 1970, 1977, 1983, 1989, 1994, 2002, 2005, 2009, 2010, 2012, and 2016. The following table summarizes the descriptions of the Property as observed in the aerial photographs:

AERIAL PHOTOGRAPHS		
Year	Source	Description
1928	USGS	Property: The Property consisted of undeveloped land and appeared to have been part of a former orchard.
		Surrounding Areas: Winchester Avenue was developed adjacent to the southeast of the Property. Victory Boulevard was developed adjacent to the southwest of the Property. The surrounding areas of the Property consisted of undeveloped land, orchards, and residential sites.
1938	USDA	Property: The Property consisted of undeveloped land.
		Surrounding Areas: Winchester Avenue was developed adjacent to the southeast of the Property. Victory Boulevard was developed adjacent to the southwest of the Property. A gasoline station appeared to be located on the adjacent site to the northwest of the Property. Generally, the surrounding areas of the Property consisted of undeveloped land and residential sites.
1952	USGS	Property: A gasoline station was developed on the Property.
		Surrounding Areas: Winchester Avenue was developed adjacent to the southeast of the Property followed by undeveloped land and commercial sites. Victory Boulevard was developed adjacent to the southwest of the Property followed by commercial sites and residential sites. Commercial buildings and a gasoline station were located adjacent to the northwest of the Property followed by Western Avenue. Residential sites were located on the surrounding area to the northeast of the Property.
1954	USDA	The Property and surrounding areas were developed similar to that observed in the 1952 aerial photograph.
1964	USGS	Property: A gasoline station was developed on the Property.
		Surrounding Areas: Winchester Avenue was developed adjacent to the southeast of the Property followed by an apartment building and commercial sites. Victory Boulevard was developed adjacent to the southwest of the Property followed by commercial sites and residential sites. Commercial buildings and a gasoline station were located adjacent to the northwest of the Property followed by Western Avenue. Residential sites were located on the surrounding area to the northeast of the Property.
1970	EDR	Property: A new gasoline station building had been developed on the Property compared to the 1964 aerial photograph.

		Surrounding Areas: Winchester Avenue was developed adjacent to the southeast of the Property followed by an apartment building and commercial sites. Victory Boulevard was developed adjacent to the southwest of the Property followed by commercial sites and residential sites. Commercial buildings and a gasoline station were located adjacent to the northwest of the Property followed by Western Avenue. Residential sites were located on the surrounding area to the northeast of the Property.
1977	EDR	Property: A gasoline station was developed on the Property.
		Surrounding Areas: Winchester Avenue was developed adjacent to the southeast of the Property followed by an apartment building and commercial sites. Victory Boulevard was developed adjacent to the southwest of the Property followed by commercial sites and residential sites. A gasoline station was located adjacent to the northwest of the Property followed by Western Avenue. Residential sites were located on the surrounding area to the northeast of the Property.
1983	EDR	The Property and surrounding areas were developed similar to that observed in the 1977 aerial photograph.
1989	USDA	The Property and surrounding areas were developed similar to that observed in the 1983 aerial photograph.
1994	USGS/DOQQ	The Property and surrounding areas were developed similar to that observed in the 1989 aerial photograph.
2002	USDA	Property: A gasoline station was developed on the Property. Multiple cars were parked on the Property.
		Surrounding Areas: Winchester Avenue was developed adjacent to the southeast of the Property followed by an apartment building and commercial sites. Victory Boulevard was developed adjacent to the southwest of the Property followed by commercial sites and residential sites. A new gasoline station building was developed on the adjacent site to the northwest of the Property followed by Western Avenue. Residential sites were located on the surrounding area to the northeast of the Property.
2005	USDA/NAIP	The Property and surrounding areas were developed similar to that observed in the 2002 aerial photograph.
2009	USDA/NAIP	The Property and surrounding areas were developed similar to that observed in the 2005 aerial photograph.
2010	USDA/NAIP	The Property and surrounding areas were developed similar to that observed in the 2009 aerial photograph.
2012	USDA/NAIP	The Property and surrounding areas were developed similar to that observed in the 2010 aerial photograph.
2016	Google Earth	The Property and surrounding areas were developed similar to that observed in the 2012 aerial photograph.

6.3 STREET DIRECTORY REVIEW

Historical business directories including city, cross reference, and telephone directories were reviewed as generated by Environmental Data Resources (EDR). The following table describes the

listings for the Property:

CITY DIRECTORIES	
Year	Listing
1950	Simon S Richfield Service
1956	Richfield Service Stations
1960	Richfield Service Stations
1962	Richfield Service Gas Station
1967	Richfield Service Stations
1970	Richfield Service Stations
1972	Bobs
1975	Bobs ARCO Station
1980	Independent Crane Service Inc and M & M Automotive
1991	Bill Briggs Automotive and Hanna Banana Car & Truck Rental
1995	Bill Briggs Automotive
2001	Bill Briggs Automotive, Pichis Upholstery, and T & M Auto Sales
2006	Ace Rent A Car, American Eagle Car Rental Inc, M & R Auto Tech, Ryder Rentals, Thrift Rentals, VTZ Auto Imports
2008	Ace Rent A Car, American Eagle Car & Truck Rental Inc, Flash Car Rentals Inc, LTZ Auto Imports, M & R Auto Tech, VTZ Auto Imports
2013	LTZ Auto Imports, M & R Auto Tech, and Penske Truck Rental

6.4 SANBORN FIRE INSURANCE MAP REVIEW

Historical Sanborn Fire Insurance Maps were reviewed for the years 1950 and 1965. The following table summarizes the descriptions of the Property as observed in the Sanborn Fire Insurance Maps:

SANBORN FIRE INSURANCE MAPS	
Year	Description
1950	<p>Property: A building was depicted on the south portion of the Property and was labeled as 'gas & oil.'</p> <p>Surrounding Areas: A gasoline station and auto repair site were located adjacent to the northwest of the Property. A dwelling and detached garage were located adjacent to the northeast of the Property. Winchester Avenue was located adjacent to the southeast of the Property followed by a dwelling with a detached garage and a small building labeled as an 'office.' Victory Boulevard was located adjacent to the southwest of the Property followed by a hotel (Tourist Court 12 Units).</p>

1965	<p>Property: A building was depicted on the Property approximately fitting the footprint of the current Property building. The building was labeled as a 'filling station.'</p> <p>Surrounding Areas: A 'filling station' was located adjacent to the northwest of the Property. A dwelling and detached garage were located adjacent to the northeast of the Property. Winchester Avenue was located adjacent to the southeast of the Property followed by a dwelling with a detached garage and a 20-unit apartment building. Victory Boulevard was located adjacent to the southwest of the Property followed by a motel, a garage, and a store.</p>
------	---

6.5 TOPOGRAPHIC MAP REVIEW

Topographic maps were reviewed to document the prior uses of the Property and surrounding area. United States Geological Survey (USGS) produced maps were available for the years 1894, 1896, 1898, 1900, 1902, 1921, 1926/1928, 1953, 1966, 1972, 1994, and 2012. The following table summarizes the descriptions of the Property as observed in the Topographic Maps:

TOPOGRAPHIC MAPS	
Year	Description
1894	Structures were not identified on the Property.
1896	Structures were not identified on the Property.
1898	Structures were not identified on the Property.
1900	Structures were not identified on the Property.
1902	Structures were not identified on the Property.
1921	Structures were not identified on the Property.
1926/1928	Structures were not identified on the Property.
1953	The Property is color-shaded which indicated urban development.
1966	The Property is color-shaded which indicated urban development.
1972	The Property is color-shaded which indicated urban development.
1994	The Property is color-shaded which indicated urban development.
2012	Structures were not identified on the Property.

6.6 OTHER HISTORICAL DOCUMENTS

CCI contacted the Glendale Building Department (GBD) with a request to review the building permit history for the Property. The following table contains a listing of the information reviewed:

Year	Owner/Applicant	Description
1939	Richfield Oil Corp	Building permit for the construction of a gasoline service station
1939	Richfield Oil Corp	Sign permit
1947	Richfield Service	Sign permit
1957	Richfield Oil Corp	Building permit to enlarge and enclose lube area and semi-cantilever pump canopy
1966	Shell Oil	Building permit to demolish service station
1966	Richfield Oil Corp	Building permit to erect new steel service station building w/ attached canopy
1966	Richfield Oil	Plumbing permit for an industrial waste interceptor
No Date	---	Undated document indicated the removal of tanks from southeast corner
1974	Bob's ARCO	Certificate of Use & Occupancy indicated use as service station
1975	Fadel ARCO Service	Certificate of Use & Occupancy indicated use as service station
1978	M&M Automotive	Certificate of Use & Occupancy indicated use as auto repair
1978	Independent Crane Service	Certificate of Use & Occupancy indicated use as parking - office
1981	Bill Briggs Automotive	Certificate of Use & Occupancy indicated use as auto repair
1993	Bill Briggs Automotive	Certificate of Use & Occupancy indicated use as auto repair shop
1993	Estate of Gladys B. Schnoor	Building permit for the removal of a 500-gallon waste oil tank
1995	Trademaster Auto Sales	Certificate of Use & Occupancy indicated use as auto sales
1996	T&M Auto Sales	Certificate of Use & Occupancy indicated use as retail cars
1997	Pichi's Upholstery	Certificate of Use & Occupancy indicated use as upholstery
2003	T&M Sales, LLC	Zoning Use Certificated indicated use as vehicle sales
2004	Flash Car Rental Inc	Zoning Use Certificated indicated use as vehicle rental
2004	M&R Auto Tech	Zoning Use Certificated indicated use as auto repair
2005	LTZ Auto Imports	Zoning Use Certificated indicated use as vehicle sales
2009	Glendale Auto Gallery	Zoning Use Certificated indicated use as auto sales
2012	IMEX Remarketing	Zoning Use Certificated indicated use as auto sales - retail

6.7 PREVIOUS ENVIRONMENTAL REPORTS

Underground Tank Removal Closure Report, Shewy Environmental Management Co., Inc., August 18, 1993

According to the report, one 500-gallon steel waste oil tank was removed from the Property on August 17, 1993. The tank was located to the northwest of the Property building. Following the removal of the tank, two grab soil samples were collected. One sample (S-1A) was collected from the center of the tank excavation and one sample (S-2A) was collected from the stockpile of removed soil. The soil samples were analyzed for waste oil, gasoline, diesel, chlorinated volatile organics, aromatic hydrocarbons, total lead, and PCBs. The analytical results indicated that the soil samples were non-detect for the targeted analytes. Following these results, the excavation pit was backfilled with the removed soil as well as imported clean fill material. The conclusions included a request for no further action. A copy of the tank removal report can be found in Appendix G of this report.

The GFD issued a "No Further Action" letter to the Property in 1993 following the removal of the waste oil UST.

7.0 RECORDS REVIEW

7.1 ENVIRONMENTAL DATABASE REPORT

Environmental Data Resources provided a list of sites within designated distances of the Property that are listed by regulatory agencies. Environmental Data Resources has also provided a map of these sites, which can be found in Appendix F - Environmental Database Report.

SUMMARY OF FEDERAL, STATE, AND TRIBAL DATABASE FINDINGS			
Regulatory Database	Minimum Search Distance	Property Listed	# of Sites Listed
Federal National Priority List (NPL)	1 mile	No	1
Federal Delisted NPL	1 mile	No	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List	½ mile	No	2
Federal CERCLIS No Further Remedial Action Planned (NFRAP)	½ mile	No	0
Federal Resource Conservation and Recovery Act (RCRA) Generators	¼ mile	Yes	4
RCRA NonGen/NLR	¼ mile	No	0
Federal RCRA Corrective Action Facilities (CORRACTS)	1 mile	No	0

Federal RCRA Treatment, Storage, and Disposal Facilities (TSD)	½ mile	No	0
Federal Institutional Control/Engineering Control Registry	½ mile	No	1
State and Tribal Leaking Underground Storage Tank (LUST) Sites	½ mile	No	5
State and Tribal Underground Storage Tank (UST) Sites	¼ mile	No	1
State and Tribal Aboveground Storage Tank (AST) Sites	¼ mile	No	0
CA FID UST	¼ mile	Yes	1
HIST UST	¼ mile	No	1
SWEEPS UST	¼ mile	Yes	3
State and Tribal Voluntary Cleanup Sites	½ mile	No	0
Brownfields Sites	½ mile	No	0
SLIC	½ mile	No	8

EDR US Hist Cleaners	¼ mile	No	5
Federal Emergency Response Notification System (ERNS) List	Property	No	---
HAZNET	Property	Yes	---
EMI	Property	No	---

The Property is listed in the environmental database report as follows:

- A1** Bill Briges Auto
1633 Victory Blvd
Databases: RCRA-SQG, SWEEPS, FID UST, FINDS, WIP, ECHO
Summary: The Property is listed on the RCRA database as being a small quantity generator of hazardous waste. The database does not list violations for the Property. The site is also listed on the SWEEPS UST database which reports one active 300-gallon waste oil tank on the Property. The site is also listed on the FID UST database which reports the status as active. The site is also listed on the WIP database which reports the file status as historical.
- A2** M & R Auto Tech
1633 Victory Blvd
Databases: HAZNET
Summary: The Property is listed on the HAZNET database for the year 2012. The waste type is not reported by the database.
- A3** Bobs
1633 Victory Blvd
Databases: EDR Hist Auto
Summary: The Property is listed on the EDR Hist Auto database which reports gasoline stations on the Property for various years between 1940 and 1973, automobile repair businesses on the Property for various years between 1999 and 2012, and auto sales on the Property for the year 2009.
- A4** Estate of Gladys B. Schnoor
1633 Victory Blvd
Databases: HAZNET
Summary: The Property is listed on the HAZNET database which reports the waste category as other empty containers 30 gallons or more (1993).

The following NPL site is listed within 1/8 mile of the Property:

- NPL** San Fernando Valley (Area 2)
Crystal Springs Wellfield Area
Databases: NPL, SEMS, US ENG CONTROLS, ENVIROSTOR, HIST Cal-Sites, ROD, PRP, ICIS, FINDS, Cortese, ECHO
Distance/Direction from Property: The Property lies within the contaminated groundwater plume.
Summary: The San Fernando Valley Area 2 is an area of contaminated groundwater located in the vicinity of the Crystal Springs Well Field Area in the cities of Los Angeles and Glendale. This area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people. The contaminated groundwater, which underlies an area of approximately 6,680 acres, contains

TCE and PCE.

Discussion: According to the Overview and Details Maps provided in the environmental database report, the Property is situated within the contaminated groundwater plume associated with this NPL site. CCI reviewed information for the this NPL site on the United States Environmental Protection Agency (US EPA) website. CCI found that the current Property address was not listed on the list of potential responsible parties (PRP) and does not appear to have been a contributing source of contamination to this NPL site.

The following sites are located adjacent to the Property:

- A5 Berg's Service & Sports Store
- A6 Berg S Service & Sports Store
- A7 Chevron Station No 95560
- A8 Standard (Gas Station)
- A9 Chevron USA Products Company Suzanne Sissung
- A10 (No Name)
- A11 Chevron Station #95560

1651 - 1655 N Victory Blvd

Databases: EDR Hist Auto, RCRA-LQG, FINDS, ECHO, WIP, SWEEPS UST, HIST UST, UST

Distance/Direction from Property: Adjacent to the northwest of the Property.

Summary: The site is listed on the EDR Hist Auto database which reports Berg's Service & Sports Store on the site for the year 1955, Victory Sports Cars Service on the site for the years 1960 and 1967, Price Dick Chevron Service on the site for the years 1971 and 1972, Jenson Bob Chevron Service on the site for the years 1973 and 1977, Rancho Chevron on the site for the years 1999 and 2002, Chevron Stations on the site for the years 2003, 2006, 2008, 2009, 2010, 2011, and 2012, and Ray Smart Chevron on the site for the years 2004 and 2007. The site is also listed on the RCRA database as being a large quantity generator of hazardous waste. The database does not list violations for the site. The site is also listed on the WIP database which reports the file status as historical. The site is also listed on the SWEEPS UST database which reports four active tanks on the site. The site is also listed on the HIST UST database which reports four tanks installed on the site in 1970.

Discussion: This site is located adjacent to the northwest of the Property and has operated as a gasoline station since at least 1938. The Property is located in a downgradient groundwater flow direction from this site. Based on the location and length of operation, it is considered possible that this site has adversely impacted the subsurface environment beneath the Property.

The following sites are within 1/8 mile of the Property:

- A12 Blue Chip Cleaners
1619 Victory Blvd

Databases: EDR Hist Cleaners

Distance/Direction from Property: 155 feet to the south-southeast of the Property

Summary: The site is listed on the EDR Hist Cleaners database which reports Blue Chip

Cleaners on the site for the year 1960.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

B13 Henry s Garage

B14 Love J A

300 Western Av

Databases: EDR Hist Auto

Distance/Direction from Property: 223 feet to the north-northwest of the Property

Summary: The site is listed on the EDR Hist Auto database which reports a gasoline station on the site for the years 1930, 1940, and 1945, and automobile repair on the site for the years 1940, 1945, and 1955.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

C15 Carrier

1650 S Victory Blvd

Databases: WIP

Distance/Direction from Property: 226 feet to the west-northwest of the Property

Summary: The site is listed on the WIP database which reports the file status as historical.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

C16 Price Dick Chevron Service

1654 Victory Blvd

Databases: EDR Hist Auto

Distance/Direction from Property: 238 feet to the west-northwest of the Property

Summary: The site is listed on the EDR Hist Auto database which reports Price Dick Chevron Service on the site for the years 1960, 1964, and 1967.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

B17 Calif. Geol Systems Inc.

B18 Henry S Garage

312 Western Ave

Databases: WIP, EDR Hist Auto

Distance/Direction from Property: 258 feet to the north of the Property

Summary: The site is listed on the WIP database which reports the file status as historical. The site is also listed on the EDR Hist Auto database which reports automobile repairing on the site for the years 1960, 1967, and 1972.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

B19 Cannons Auto Repair Inc

- B20** Love J A
307 Western Ave
Databases: RCRA-SQG, FINDS, ECHO, EDR Hist Auto
Distance/Direction from Property: 277 feet to the north-northwest of the Property
Summary: The site is listed on the RCRA database as being a small quantity generator of hazardous waste. The database does not list violations for the site. The site is also listed on the EDR Hist Auto database which reports automobile repair businesses on the site for the years 1945, 1999, 2002, 2003, and 2007 - 2012.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.
- B21** (No Name)
309 Western Ave
Databases: EDR Hist Auto
Distance/Direction from Property: 282 feet to the north-northwest of the Property
Summary: The site is listed on the EDR Hist Auto database which reports AA Auto Smog Test Only on the site for the years 2001, 2003 - 2007, and 2010.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.
- C22** Lockheed Aircraft Corporation
1705 Victory Boulevard
Databases: WMUDS/SWAT
Distance/Direction from Property: 285 feet to the west-northwest of the Property
Summary: The site is listed on the WMUDS/SWAT database. However, the database does not provide details for the site.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.
- B23** (No Name)
- B24** Studio Auto Body
311 Western Ave
Databases: EDR Hist Auto, WIP
Distance/Direction from Property: 298 feet to the northwest of the Property
Summary: The site is listed on the EDR Hist Auto database which reports Studio Auto Body on the site for the years 2001 and 2002 - 2012. The site is also listed on the WIP database which reports the file status as historical.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.
- D25** CPC
1605 S Victory Blvd
Databases: WIP
Distance/Direction from Property: 351 feet to the southeast of the Property

Summary: The site is listed on the WIP database which reports the file status as historical.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

D26 RD And

1603 Victory Blvd

Databases: EDR Hist Cleaner

Distance/Direction from Property: 354 feet to the southeast of the Property

Summary: The site is listed on the EDR Hist Cleaner database which reports Rd And and Thrift-D-Lux Cleaners on the site for the year 1955.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

C27 Victern Shell Service Center

1701 Victory Blvd

Databases: EDR Hist Auto

Distance/Direction from Property: 400 feet to the west-northwest of the Property

Summary: The site is listed on the EDR Hist Auto database which reports a gasoline station on the site for the years 1945, 1955, 1957, 1964, and 1967.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

C28 (No Name)

1702 Victory Blvd

Databases: EDR Hist Cleaner

Distance/Direction from Property: 432 feet to the west-northwest of the Property

Summary: The site is listed on the EDR Hist Cleaner database which reports Maytag Highlander Center on the site for the year 1972 and Thrifty Wash on the site for the years 1999, 2001 - 2003, and 2005 - 2008.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

C29 Party Line Cleaners

1704 Victory Blvd

Databases: EDR Hist Cleaner

Distance/Direction from Property: 446 feet to the west-northwest of the Property

Summary: The site is listed on the EDR Hist Cleaner database which reports Party Line Cleaners on the site for the year 1972, Victory Cleaners and Shoe Repair on the site for the years 2001, 2002, 2003, 2010, and 2011, and Victory Cleaners on the site for the years 2004, 2009, 2011, and 2012.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

- C30** De Stefano M J
1710 Victory Blvd
Databases: EDR Hist Auto
Distance/Direction from Property: 488 feet to the west-northwest of the Property
Summary: The site is listed on the EDR Hist Auto database which reports a gasoline station on the site for the year 1955.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.
- D31** W-4
1550 S Victory Blvd
Databases: WIP
Distance/Direction from Property: 489 feet to the southeast of the Property
Summary: The site is listed on the WIP database which reports the file status as historical.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.
- D32** Little Howard
1548 Victory Blvd
Databases: EDR Hist Cleaner
Distance/Direction from Property: 519 feet to the southeast of the Property
Summary: The site is listed on the EDR Hist Cleaner database which reports Little Howard (carpet and rug cleaners) on the site for the year 1960.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.
- E33** Data & Reference
1725 S Victory Blvd
Databases: WIP
Distance/Direction from Property: 534 feet to the west-northwest of the Property
Summary: The site is listed on the WIP database which reports the file status as historical.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.
- D34** E&J Oil Co
1545 Victory Blvd
Databases: EDR Hist Auto
Distance/Direction from Property: 543 feet to the southeast of the Property
Summary: The site is listed on the EDR Hist Auto database which reports gasoline stations on the site for the years 1955, 1960, 1967, 1971, and 1972.
Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

D35 Full View Entertainment

1538 S Victory Blvd

Databases: WIP

Distance/Direction from Property: 618 feet to the southeast of the Property

Summary: The site is listed on the WIP database which reports the file status as historical.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

E36 Kalman's Automotive

1733 Victory Blvd

Databases: EDR Hist Auto

Distance/Direction from Property: 656 feet to the west-northwest of the Property

Summary: The site is listed on the EDR Hist Auto database which reports Kalman's Automotive on the site for the year 1977.

Discussion: Based on the regulatory status of this site, the environmental quality of the Property is not expected to have been impacted by this site.

7.2 REGULATORY AGENCY REVIEW

CCI contacted the GFD Environmental Management Center with a request to review files for the Property. According to the information reviewed:

- A permit was issued to Richfield Oil Company in 1948 for the installation of two 4,000-gallon gasoline USTs on the Property.
- An Industrial Waste Permit was issued to Richfield Oil Corporation in 1959. The permit indicated that the estimated discharge would be 300-gallons per 15-hour day from "covered automobile wash rack and lubrication room floor washing."
- An Industrial Waste Permit was issued to Atlantic Richfield Company in 1966. The permit indicated that the estimated discharge would be 200-gallons per 14-hour day from "covered automobile wash rack and lubrication room floor washing." The character of the waste was listed as water, dirt, soap, solvent, oil, and grease. The existing facilities was listed as a 6' x 2' x 3' clarifier.
- A permit was issued to Richfield Service Station in 1966 for the removal of two 4,000-gallon USTs and install two 4,000-gallon USTs, one 6,000-gallon UST, and one 280-gallon UST on the Property.
- A permit was issued to ARCO Service Station in 1971 for the installation of one 6,000-gallon UST.
- A permit was issued to ARCO Station in 1981 to remove two 4,000-gallon USTs, one 6,000-gallon UST, and one 1,000-gallon UST.
- An Industrial Waste Discharge Permit application was submitted by Bill Briggs Automotive in 1981. The type of industry was listed as auto repair. The waste producing operation was listed as parts cleaning and garage floor washing. The liquid waste discharge constituents were listed as water, dirt, soap, solvent, and grease. Additional information reported an existing 3-compartment 6' x 2' x 3' clarifier.
- A permit was issued to the Estate of Gladys Schnoor in 1993 for the removal of one 500-

gallon waste oil UST. The waste oil tank was located to the northwest of the Property building.

- A "No Further Action" letter was issued to the Property in 1993 following the removal of the waste oil UST.
- An Industrial Waste Permit application was submitted by M&R Auto Tech in 2004. The type of industry was listed as auto service. The waste producing operation was listed as floor and equipment washing. The liquid waste discharge constituents were listed as water, dirt, soap, solvent, and grease. Additional information reported an existing clarifier.
- A CUPA document dated 2005 for M & R Auto Tech listed hazardous materials used on the Property included motor oil, antifreeze, brake fluid, transmission fluid, and car parts wash solvents, and hazardous wastes generated on the Property included waste motor oil and waste antifreeze.
- A Notice To Comply (NTC) was issued to M & R Autotech on June 8, 2011. The violations noted were; 1) general house keeping, 2) label waste containers, 3) provide secondary containment for waste drums, 4) keep 3 years worth of waste disposal paperwork on site, and 5) keep all oily parts on top of a plastic protective shield.

CCI reviewed the RWQCB website for information regarding the Property on the GeoTracker database. According to the RWQCB website, information was not found for the Property address.

CCI reviewed the Department of Toxic Substances Control (DTSC) website for information regarding the Property on the EnviroStor database. According to the DTSC website, information was not found for the Property address.

CCI reviewed the South Coast Air Quality Management District (SCAQMD) website for information regarding the Property that pertains to permits to operate and/or violations. According to the SCAQMD website, information was not found for the Property address.

CCI reviewed the Los Angeles County Department of Public Works (LACoDPW) website for available files for the Property. According to the website, records (related to industrial waste/underground storage tanks/stormwater) were not found for the Property address.

CCI contacted the GBD with a request to review the building permit history for the Property. The following table contains a listing of the information reviewed:

Year	Owner/Applicant	Description
1939	Richfield Oil Corp	Building permit for the construction of a gasoline service station
1939	Richfield Oil Corp	Sign permit
1947	Richfield Service	Sign permit
1957	Richfield Oil Corp	Building permit to enlarge and enclose lube area and semi-cantilever pump canopy

1966	Shell Oil	Building permit to demolish service station
1966	Richfield Oil Corp	Building permit to erect new steel service station building w/ attached canopy
1966	Richfield Oil	Plumbing permit for an industrial waste interceptor
No Date	- - -	Undated document indicated the removal of tanks from southeast corner
1974	Bob's ARCO	Certificate of Use & Occupancy indicated use as service station
1975	Fadel ARCO Service	Certificate of Use & Occupancy indicated use as service station
1978	M&M Automotive	Certificate of Use & Occupancy indicated use as auto repair
1978	Independent Crane Service	Certificate of Use & Occupancy indicated use as parking - office
1981	Bill Briggs Automotive	Certificate of Use & Occupancy indicated use as auto repair
1993	Bill Briggs Automotive	Certificate of Use & Occupancy indicated use as auto repair shop
1993	Estate of Gladys B. Schnoor	Building permit for the removal of a 500-gallon waste oil tank
1995	Trademaster Auto Sales	Certificate of Use & Occupancy indicated use as auto sales
1996	T&M Auto Sales	Certificate of Use & Occupancy indicated use as retail cars
1997	Pichi's Upholstery	Certificate of Use & Occupancy indicated use as upholstery
2003	T&M Sales, LLC	Zoning Use Certificated indicated use as vehicle sales
2004	Flash Car Rental Inc	Zoning Use Certificated indicated use as vehicle rental
2004	M&R Auto Tech	Zoning Use Certificated indicated use as auto repair
2005	LTZ Auto Imports	Zoning Use Certificated indicated use as vehicle sales
2009	Glendale Auto Gallery	Zoning Use Certificated indicated use as auto sales
2012	IMEX Remarketing	Zoning Use Certificated indicated use as auto sales - retail

8.0 PHYSICAL SETTING

8.1 SURFACE DESCRIPTION

The Property is relatively level. The general slope in the area of the Property is to the south. The Property lies approximately 486 feet above mean sea level. The nearest surface body of water is the Los Angeles River which is located approximately 1,300 feet to the south of the Property.

8.2 SOIL CONDITIONS

According to the environmental database Geocheck® - Physical Source Setting Section, the soil beneath the Property is described as Urban Land.

8.3 GROUNDWATER CONDITIONS

Depth to groundwater in the area of the Property is anticipated to be encountered at depths greater than 60-feet below ground surface (bgs). The groundwater flow direction in the area of the Property is anticipated to be to the south.

9.0 DATA GAPS

The AAI rule requires that environmental professionals document any data gaps that remain after examining all "reasonably ascertainable" sources and explain the reason for such data gaps. The AAI rule also requires the report to expressly identify the sources consulted to address such data gaps and comment on their significance. The following data gaps were encountered during this assessment:

- At the time of the site survey conducted for this Phase I ESA, multiple cars were parked on the Property. Because of this, CCI was unable to observe the exterior ground surface of the majority of the Property for suspect in-ground features.

10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-13 of 1633 Victory Boulevard, Glendale, Los Angeles County, California (APN 5626-013-024), the Property. Any exceptions to, or deletions from, this practice are described in Section 10.0 of this report. This Phase I ESA has revealed no evidence of recognized environmental conditions in connection with the Property except for the following:

- A gasoline station was constructed on the Property in 1939. Information reviewed for this Phase I ESA indicated that two USTs were installed on the Property in 1946. These tanks are suspected of being removed in 1966 during the rebuild of the gasoline station. In 1966 four USTs were installed on the Property. In 1971, one UST was installed on the Property. Four USTs were removed from the Property in 1981. There is a canopy located adjacent to the southwest side of the Property building. The dispenser islands were located beneath this canopy. The operation of a gasoline station and the associated USTs on the Property for at least 40 years is considered a REC.
- Automobile repair activities have been conducted on the Property since at least 1966 and possibly earlier during the time period of the original gasoline station building (1939 -

1966). The current automobile repair shop utilizes two in-ground hydraulic lifts. The installation date(s) of these lifts is unknown. The current automobile repair shop stores and uses hazardous materials (motor oil, coolant, and other automotive fluids/lubricants) inside the building and stores hazardous wastes (waste oil, waste oil filters, and waste coolant) in an enclosure at the exterior north end of the Property. Surface-staining was observed throughout the automobile repair shop and hazardous waste enclosure. Overall housekeeping practices inside the automobile repair shop were observed to be poor. The long term automobile repair activities on the Property are considered a REC.

- CCI observed a metal lid inside the automobile repair shop. The operator of the automobile repair shop indicated that the lid covers a drain which is used to collect wastewater from floor washing activities. CCI suspects that the drain is connected to a 3-stage clarifier. Information reviewed for this Phase I ESA indicated that an industrial waste permit was issued for the Property in 1966 for industrial waste liquids generated from "covered automobile wash rack and lubrication room floor washing." The waste permit also indicated the existence of a 3-stage clarifier. The current tenant, M&R Auto Tech applied for a similar industrial waste permit in 2004 and also indicated an existing clarifier. CCI did not observe a clarifier on the Property. However, there were multiple cars parked throughout the Property, and CCI was unable to observe the exterior ground surface of the majority of the Property for suspect in-ground features.
- According to the Overview and Details Maps provided in the environmental database report reviewed by CCI for this Phase I ESA, the Property is situated within the contaminated groundwater plume associated with the San Fernando Valley (Area 2) NPL site. The San Fernando Valley Area 2 is an area of contaminated groundwater. The contaminated groundwater, which underlies an area of approximately 6,680 acres, contains TCE and PCE. Current and/or historical Property operations include a gasoline station and automobile repair. Based on the current and historical Property operations and the Property being located within the contaminated groundwater plume associated with the San Fernando Valley (Area 2) NPL site, a VEC for the Property cannot be ruled out.
- Suspected ACMs including finished drywall systems and vinyl floor tiles were noted during the Property survey. Based on the construction date in 1966, there is a possibility that some of the construction materials in the building may contain asbestos fibers.
- Given the 1966 construction date of the building, it is considered possible that LBP is present at the Property. The building paint appeared to be in relatively good condition. The potential LBP should not become a health hazard provided that the paint properly maintained and remains sealed.

11.0 RECOMMENDATIONS

This assessment has revealed evidence of recognized environmental conditions and environmental issues in connection with the Property. Based on the results of this assessment, CCI recommends the following:

- CCI recommends conducting a Phase II ESA on the Property to assess whether the current and/or historic Property operations have adversely impacted the subsurface environment beneath the Property. The Phase II ESA should include a geophysical survey to identify former UST locations.
- CCI recommends developing and implementing an Asbestos O&M Plan specific to the Property to manage the known and/or presumed ACMs. These ACMs can be managed under an O&M Plan as long as these materials do not pose an imminent health threat. CCI also recommends developing and implementing a LBP O&M Plan specific to the Property.
- Prior to any renovation or demolition of the Property building, CCI recommends conducting an asbestos survey to determine if any of the building materials used contain asbestos. Identified ACMs would need to be properly abated prior to any renovation or demolition activities.

12.0 DEVIATIONS

Except for the limitations and exceptions discussed in Section 15.0, this Phase I ESA generally complies with the ASTM Standard 1527-13 and the US EPA 40 CFR Part 312, Standards and Practices for AAI.

13.0 ADDITIONAL SERVICES

No additional services beyond the scope of work of the ASTM Standard 1527-13 and the US EPA 40 CFR Part 312, Standards and Practices for AAI were conducted as part of this assessment.

15.0 LIMITATIONS

This report has been prepared by CCI using reasonable efforts to identify recognized environmental conditions associated with hazardous materials at the Property. The conclusions and recommendations of this report are based on data and information collected from observations made on the day(s) of the site survey and from reasonably ascertainable information obtained from government agencies and other referenced sources. This report is not intended to identify all potential environmental concerns or completely eliminate the potential that the Property has environmental impairments. This report is not an exhaustive investigation of the Property or environmental conditions related to the Property.

No amount of assessment or investigation can completely certify that the Property is completely free of environmental concern. It is possible that unpermitted, undocumented or concealed improvements or alterations to the Property could exist beyond that which was found during this assessment. It is possible that there are changes in observed conditions on the Property in the future which would require further assessment of the Property and reevaluation of the conclusions and recommendations expressed in this report.

During the preparation of this report, CCI has relied upon and presumed accurate certain information and data which has been provided by others including government agencies and companies identified herein. Unless stated otherwise within this report, CCI has not attempted to verify and is not responsible for the accuracy or completeness of such information. CCI reserves the right to modify our conclusions and recommendations presented in this report if inaccurate or unreliable data has been provided to CCI by others.

Any cost estimates of the recommended additional scope of work are based solely on the information collected during this assessment. Any cost estimates presented in this report represent a rough estimate, not a proposal. The actual cost and scope of work may vary upon refining during proposal preparation, and with changes in economic conditions, or as additional information becomes available.

16.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX C - PROFESSIONAL QUALIFICATIONS

David A. Jonas

Project Manager

EDUCATION

Bachelor's Degree, Ecology, Behavior and Evolution
University of California, San Diego 1995

REGISTRATIONS

California Registered Environmental Assessor #08125
NREP Registered Environmental Property Assessor #569136

CERTIFICATE COURSES

40-Hour Hazardous Waste Operations Training
8-Hour Hazardous Waste Operations Training Refresher Course

SUMMARY OF QUALIFICATIONS

Mr. Jonas has over twelve years of experience conducting environmental projects, including Phase I Environmental Site Assessments (ESAs) and Phase II Subsurface Investigations, on various types of sites including commercial, industrial, agricultural, and residential properties throughout the United States. Mr. Jonas is familiar with real property environmental due diligence and environmental liability including All Appropriate Inquiry (AAI) and ASTM E1527-05 regulations. Mr. Jonas has experience providing environmental risk assessment for both the lender and borrower involved in real estate transactions, in the design and performance of various soil, soil gas, and groundwater sampling and remediation projects, and in the management and coordination of underground storage tank (UST) removals and closures. Mr. Jonas has experience managing a variety of subcontractors such as drillers, laboratories, geophysical survey companies, and hazardous waste hauling companies, and has significant experience working with Federal, State, County, and local regulatory agencies. Mr. Jonas has received training in the health and safety aspects of hazardous waste operations including the initial 40-Hour Hazardous Waste Operations Training and the subsequent yearly 8-Hour Hazardous Waste Operations Training refresher courses. Mr. Jonas has also received training in identifying, sampling, and remediating microbial contamination from a national analytical laboratory.

SELECT PROJECT EXPERIENCE

Regional Water Quality Control Board Hexavalent Chromium Investigation San Fernando Valley, California

In the early 2000's, the Los Angeles Regional Water Quality Control Board (RWQCB) began a program investigating the presence of hexavalent chromium in drinking water wells in the San Fernando Valley. The RWQCB issued letters to over 200 industrial sites, primarily metal plating shops, which required the sites to conduct soil assessments for the presence of heavy metals including hexavalent chromium. Mr. Jonas has been involved with many of these sites, including two high-profile metal plating sites. Mr. Jonas has managed the soil and groundwater assessments, under direction of the RWQCB, leading to the removal of several sites from the RWQCB's list of potentially contaminated sites. These sites received case closure letters from the RWQCB which indicated that no further action was necessary regarding the hexavalent chromium investigation.

*Phase I Environmental Site Assessments
Various Locations Throughout California*

Mr. Jonas has completed 100's of Phase I ESAs of commercial, industrial, agricultural, and residential sites throughout the State of California for lending institutions and private clients. Responsibilities included the research of historical site usages, interface with pertinent government regulatory agencies, review of environmental database reports, interviews with informed persons, physical site surveys, identification of recognized environmental conditions, potential contamination, and liability based on historical research and site observations, and preparation of the technical report documenting the findings.

*Phase I & II Environmental Site Assessment
Castroville, California*

Mr. Jonas conducted a Phase I ESA on an abandoned 12.2-acre artichoke processing facility for a national bank client. The Phase I ESA was conducted according to ASTM guidelines and included additional bank investigative requirements. The abandoned site included a 75,000 square-foot processing plant and a waste water treatment facility. Multiple containers of hazardous materials and waste up to 200-gallons in quantity remained on the abandoned site along with areas of significant surface-staining. The national bank client requested a Phase II ESA for the site. Mr. Jonas successfully coordinated with numerous subcontractors including a geophysical survey company, an environmental drilling company, an environmental analytical laboratory, and a hazardous materials/waste hauling company to complete the Phase II ESA scope of work. Under direction of the local regulatory agency, the areas of contaminated soil were successfully remediated and the site received regulatory closure.

*Phase I & II Environmental Site Assessment
Fresno, California*

Mr. Jonas conducted a Phase I ESA on a 51.3 acre industrial site developed with 26 buildings for a national bank client. Extensive historical and regulatory research was conducted to determine past uses of the Property. Historical records revealed several former site occupants which were suspected of impacting the subsurface beneath the site. Regulatory agency research indicated that the site was located within the South Fresno Regional Groundwater Plume. Several groundwater monitoring wells associated with the groundwater plume were located on the site. The site was not found to be a contributing source to the groundwater plume. The national bank client requested a Phase II ESA for the site. Mr. Jonas successfully coordinated with numerous subcontractors including a geophysical survey company, an environmental drilling company, an environmental analytical laboratory, and a hazardous materials/waste hauling company to complete the Phase II ESA scope of work.

*Phase I Environmental Site Assessment & UST Removal
Vernon, California*

Mr. Jonas conducted a Phase I ESA on an abandoned industrial facility for a private client. Regulatory agency information indicated that several underground storage tanks were closed in-place on the Property. As a result, the client decided to have the USTs removed from the Property. Under direction of the local regulatory agency, Mr. Jonas oversaw the removal of the USTs, over-excavation of contaminated soil, confirmation soil sampling, and the backfilling/compaction of the excavation pits. Mr. Jonas prepared the technical report documenting the UST removal activities. The site subsequently received regulatory case closure.

Phase II Environmental Site Assessments

Dry Cleaners, Various Locations Throughout California

Mr. Jonas has completed Phase II ESAs on multiple dry cleaning facilities throughout California for the purpose of assessing the environmental condition of the soil, soil gas, and/or groundwater resulting from the current/historical dry cleaning operations. The Phase II ESAs were conducted for national bank clients as well as individual dry cleaner owners. The environmental sampling included limited-access drilling equipment and hand-augers for use in tight interior dry cleaning tenant spaces. The results of several of these Phase II ESAs lead to soil, soil gas, and groundwater remediation projects including the design and installation of active soil vapor extraction systems and groundwater monitoring.

Phase II Environmental Site Assessment & Groundwater Monitoring

Petaluma, California

Mr. Jonas conducted soil and groundwater sampling for a private out-of-state client on a regional shopping mall. The mall has had an ongoing dry cleaning tenant since 1974. Sampling of the soil and groundwater was conducted to determine the extent of the contamination associated with the dry cleaners. Ease of the assessment was hampered by the fact that much of the contamination plume was being drive by groundwater flow under direction and the influence of a creek located adjacent to the site. Mr. Jonas successfully coordinated with several subcontractors including geophysical survey companies, environmental drilling companies, and environmental analytical laboratories to complete the assessments. The project was complicated due to a nearby gasoline station which had impacted the groundwater in the area with fuel constituents.

LUST Site Remediation and Closure

Indio, California

Mr. Jonas took over an on-going soil and groundwater remediation project of a former gasoline station site which had leaking underground storage tanks. Following several rounds of groundwater monitoring events coupled with studying the date from the soil vapor extraction system, Mr. Jonas concluded that the remediation efforts at the site had been successful. Mr. Jonas recommended to the local regulatory agency overseeing the site remediation that soil sampling be conducted on the site to confirm the success of the remediation efforts. Based on the results of the confirmation soil sampling, Mr. Jonas recommended that closure be granted for the site by the regulatory agency. The regulatory agency concurred with the conclusions and recommendations of Mr. Jonas and subsequently granted regulatory closure for the LUST site. Mr. Jonas then oversaw the proper abandonment of the groundwater monitoring wells and soil vapor extraction system.

Underground Storage Tank Removal and Closure

Los Angeles, California

Mr. Jonas managed and coordinated the removal and regulatory closure of a 10,000-gallon gasoline UST at a commercial site. There were several unknowns for the project including the size, age, and contents of the UST. To complicate matters, the local regulatory agency had no records of the UST. Prior to commencement of the removal activities, several permits, additional to the standard UST closure permit, were needed due to the lack of documentation of the UST. Mr. Jonas then successfully coordinated and managed several subcontractors to complete the project. Regulatory closure for the UST was subsequently granted to the Property by the local regulatory agency.

John McKenna
Zoning Administrator

(ORDINANCE NO. 4026 REQUIRES THAT THIS CERTIFICATE BE POSTED IN A CONSPICUOUS PLACE ON THE PREMISES AND SHALL NOT BE REMOVED EXCEPT BY THE SUPERINTENDENT OF BUILDINGS.)

ZONING USE CERTIFICATE

March 13, 2009

For Existing Legal Structure or Building

PZUC-20090124

Named Business: *Glendale Auto Gallery a dba of International Motors Exchange, Inc.*

Named Applicant: *David Ohanjanyan, President*

Street Address: *1633 Victory Blvd., #C, Glendale, CA 91201*

Use: *AUTO SALES*

Floor Area: *225*

Zoning: *C3 (I)*

This certifies that so far as ascertained by or made known to the Zoning Administrator, the building identified above is a legally existing building and has been determined that the change of use to the named use, owner or tenant will not result in any violation of the various ordinances of the city regulating zoning and land use.

Edith M. Fuentes

Zoning Administrator

(Section 30.16.960 of the Glendale Municipal Code requires that this certificate be posted in a conspicuous place on the premises and shall not be removed except by the Zoning Administrator.)

NOTE: "THIS CERTIFICATE ISSUED TO CORRECT OUR ERROR ON BUSINESS NAME OF CERTIFICATE PZUC-20090105, WHICH IS STILL IN EFFECT."

The issuance of this certificate does not relieve the owner, tenant and/or applicant from their legal obligations to obtain any and all necessary permits and/or complying with other applicable local, state and federal regulations that may apply to their use and/or business.

APPLICATION FOR ZONING USE CERTIFICATE

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by CCI were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>SAN FERNANDO VALLEY</i>	<i>CRYSTAL SPRINGS WELL</i>	<i>0 - 1/8 (0.000 mi.)</i>	<i>0</i>	<i>13</i>

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/07/2016 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity

EXECUTIVE SUMMARY

generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CHEVRON STATION NO 9	1655 VICTORY BLVD	W 0 - 1/8 (0.018 mi.)	A7	63

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 09/10/2015 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SAN FERNANDO VALLEY	CRYSTAL SPRINGS WELL	0 - 1/8 (0.000 mi.)	0	13

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 05/02/2016 has revealed that there are 11 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there is 1 CA UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

CA WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the CA WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 CA WMUDS/SWAT site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Hazardous waste / Contaminated Sites

CA HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the CA HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 CA HIST Cal-Sites site within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

EXECUTIVE SUMMARY

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 14 EDR Hist Auto sites within approximately 0.125 miles of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at proposal (October 15, 1984): San Fernando Valley Area 2) is an area of contaminated ground water located in the vicinity of the Crystal Springs Well Field in the Cities of Los Angeles and Glendale, Los Angeles County, California. This area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 6,680 acres, contains trichloroethylene (TCE) and perchloroethylene (PCE), according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State's recommended drinking water guidelines for TCE and PCE (5 and 4 parts per billion respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State's guidelines. Status (June 10, 1986): EPA and the Los Angeles Department of Water and Power are entering into a

Site Description: The Glendale Study Area is located within the San Fernando Basin. The San Fernando Basin is located within the Upper Los Angeles River Area (ULARA), which consists of the entire watershed of the Los Angeles River and its various tributaries. The San Fernando Basin covers approximately 122,800 acres and comprises 91.2 percent of the ULARA alluvial fill. It is bounded on the north and northwest by the Santa Susana Mountains, on the northeast by the San

SAN FERNANDO VALLEY (AREA 2) (Continued)

1000710134

Gabriel Mountains, on the west by the Simi Hills, and on the south by the Santa Monica Mountains. The San Fernando Basin is a significant source of drinking water, with an estimated total volume of 3 million acre-feet of groundwater stored in aquifers within the alluvial fill of the basin. The groundwater of the San Fernando Basin has been used as a source of drinking water for more than 800,000 residents within the cities of Los Angeles, Burbank, Glendale, and San Fernando. Groundwater extractions within the San Fernando Basin typically provide 15 percent of Los Angeles' annual average water supply and historically have accounted for between 50 and 100 percent of the water needs of the other cities. The Glendale Study Area is in the vicinity of the Crystal Springs National Priorities List (NPL) Site, one of the four San Fernando Valley Superfund NPL sites, and is adjacent to the Los Angeles River. The Glendale Study Area includes two portions of the aquifer where high concentrations of contaminants have been identified: the North Plume and the South Plume. Although contamination has been detected throughout the Glendale Study Area in an apparently contiguous plume, differences exist between the North Plume and South Plume, including the types of contaminants detected and the concentrations of the contaminants. The Glendale North and South Plumes are separated by an area of groundwater with lower concentrations of contamination. The Glendale South OU includes the South Plume of VOC contamination and adjacent areas where contamination is known or believed to have migrated. The Glendale South OU extends south towards the Pollock Operable Unit. Some of the monitoring wells constructed to help define the extent of the Pollock OU are located within the Glendale South OU. In 1990, an analysis was performed to evaluate the need for an OU within the Crystal Springs NPL site (CH2M Hill, 1990). This analysis included a qualitative comparison based on known groundwater contamination, potential downgradient impacts and water supply. This analysis concluded that there was a need for an OU within the Crystal Springs NPL site because of the: 1) high concentrations of TCE and PCE present in groundwater, 2) critical loss of groundwater production in the Glendale area and 3) potential impact of contaminating groundwater downgradient from the Crystal Springs NPL site. Additional data collection was recommended to more adequately characterize the horizontal and vertical distribution of contamination in the aquifer, and also to improve the definition of the hydrogeology of the area. EPA conducted a remedial investigation (RI) that characterized the nature and extent of contamination in the Glendale Study Area. Upon completion of the Remedial Investigation Report for the Glendale Study Area (January 1992), a feasibility study (FS) was undertaken for the Glendale South OU which evaluated a range of cleanup alternatives for addressing the contaminated groundwater. The FS report entitled Feasibility Study for the Glendale Study Area South Plume Operable Unit was completed in August 1992. In 1980, after finding organic chemical contamination in the groundwater of the San Gabriel Valley, the California Department of Health Services (DHS) requested that all major water purveyors using groundwater in the San Fernando Valley conduct tests for the presence of certain industrial chemicals in the water they were serving. The results of initial tests and of subsequent testing revealed the presence of volatile organic compound (VOC) contamination in the groundwater of the San Fernando Valley. These findings resulted in a number of municipal supply wells for the cities of Los Angeles, Burbank, and Glendale being taken out of service. The primary contaminants of concern were and are the solvents trichloroethylene (TCE) and perchloroethylene (PCE), which have been widely used in a variety of industries including machinery degreasing, metal plating and dry cleaning. In 1984, EPA proposed four sites within the San Fernando Valley for inclusion on the NPL and in 1986 the sites were added to the list. Each site encompasses an area in which production wells produced groundwater containing concentrations of TCE and PCE above State and Federal standards in

SAN FERNANDO VALLEY (AREA 2) (Continued)

1000710134

1984. The four NPL sites in the San Fernando Valley are the North Hollywood, Crystal Springs, Verdugo, and Pollock sites, also referred to as San Fernando Valley Areas 1, 2, 3, and 4, respectively. The EPA has now shifted from defining the sites based on production wells to managing it as one large site defined by the extent of the contaminated plume of groundwater. The San Fernando Valley Study Area includes the four sites as listed on the NPL and adjacent areas where contamination has or may have migrated. A basinwide groundwater RI report for the San Fernando Valley Study Area was completed in December 1992. Groundwater wells installed by EPA as part of the basinwide groundwater RI are routinely sampled to continue to monitor the nature and extent of the groundwater contamination in the San Fernando Valley. In addition, monitoring well data gathered at individual facilities in the San Fernando are included in the EPA database which is used to generate plume maps of the basin. EPA has previously signed Record of Decision (ROD) documents for two OUs in the San Fernando Valley: the North Hollywood OU (1987) and the Burbank OU (1989). The North Hollywood OU interim remedy is currently operating and the Burbank OU is in the remedial design phase. In the Glendale Study Area, EPA has identified two OUs: the Glendale North Plume OU and the Glendale South Plume OU. In addition, EPA has recently initiated an RI/FS for an OU in the Pollock area of the San Fernando Valley. All of these OUs represent interim cleanups currently in progress throughout the eastern portion of the San Fernando Valley. All remedial actions established by EPA thus far in the ROD for each OU have been interim measures. EPA has not yet selected a final remedy for the entire San Fernando Valley. The most prevalent groundwater contaminants in the Glendale Study area are TCE and PCE. In 1992, the highest concentrations of TCE and PCE detected in EPA monitoring wells in the San Fernando Valley were 7100 ppb and 160 ppb, respectively. Groundwater samples from wells installed at industrial facilities in the San Fernando Valley near potential sources of contamination have shown concentrations greater than 30,000 ppb for TCE and over 15,000 ppb for PCE. The maximum levels of 820 ppb of TCE and 220 ppb of PCE were detected in shallow wells located in the south plume portion of the Glendale Study Area. The MCL for both TCE and PCE is 5 ppb. Nitrate, an inorganic contaminant, has been detected consistently at levels in excess of the MCL (45 milligrams per liter (mg/l), also referred to as parts per million (ppm) as nitrate, or 10 mg/l nitrate as nitrogen) in the groundwater of the Glendale Study Area. The nitrate contamination is likely to be the result of past agricultural practices and/or septic systems in the San Fernando Valley. It should be noted that the Cities of Glendale and Los Angeles closely monitor the quality of drinking water delivered to residents. The water served to residents must meet all Federal and state drinking water requirements. Currently, nearly all of the water delivered by the City of Glendale is purchased from the Metropolitan Water District (MWD) of Southern California. The City uses a limited amount of groundwater from a small percentage of its nine production wells in the San Fernando Valley. If the levels of VOCs and other contaminants detected in the groundwater of production wells are equal to or less than 10 times MCLs, the State of California Department of Health Services, Office of Drinking Water permits the City to extract the water, blend it with MWD water to meet all drinking water standards, and convey the extracted, blended water to its public distribution system. As described briefly in Section 1 above, the Glendale Study Area includes two portions of the aquifer where high concentrations of contaminants have been identified: the north plume and the south plume. A remedial investigation (RI) that characterized the nature and extent of contamination in the Glendale Study Area was completed in (January 1992). The Glendale Study Area RI included a characterization of the nature and extent of contamination, baseline risk assessments, and other RI data for both the north and south plumes. However, separate FS reports evaluating a range of cleanup alternatives

for the contaminated groundwater were prepared for each plume. The Glendale South OU FS report and subsequent Proposed Plan were finalized in August 1992 and September 1992, respectively. The Glendale North OU FS report was completed in April 1992 and the Proposed Plan was completed in June 1992. EPA's preferred alternatives as described in the Proposed Plans were: extraction of 3000 gallons per minute (gpm) of contaminated groundwater for Glendale North and 2000 gpm for Glendale South, treatment of VOCs by air stripping or liquid phase GAC, and conveyance of the treated water to a water purveyor, where it would be blended with water of a quality such that the treated, blended water would meet all drinking water standards, for eventual distribution through a public water system. As a contingency, if all or part of the treated water was not accepted by the purveyors (possibly due to water supply needs), the treated water from Glendale North would be reinjected and for Glendale South would be recharged at the Headworks Spreading Grounds. In response to comments by the City of Glendale on the Glendale North and South OU Proposed Plans and in order to decrease overall costs associated with the OUs, EPA has determined that the treatment plants for the Glendale North and Glendale South OUs will be combined at one location and the total 5,000 gpm of treated water will be conveyed to the City of Glendale for distribution to its public water supply system. The exact configuration of the combined treatment plant will be determined during the remedial design phase of the project. The Glendale North OU Record of Decision also reflects this decision to combine the treatment plants. However, if EPA determines that combining the treatment plants will significantly delay or hinder the implementation of the Glendale South OU, the treatment plants will not be combined. Furthermore, if the City of Glendale does not accept any or all of the treated water (possibly due to water supply needs), any remaining portion of water will be 1) offered to another San Fernando Valley water purveyor or 2) recharged into the aquifer at the Headworks Spreading Grounds. The interim remedial action selected for the Glendale South Operable Unit (OU) represents a discrete element in the overall long-term remediation of groundwater in the eastern portion of the San Fernando Valley. An interim action ROD addressing the Glendale South Operable Unit of the San Fernando Valley Area 2 was completed in June, 1993.

Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of vapors released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB, and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards. Federal, state, and local agencies have been conducting investigations and cleanup of contaminated groundwater in the SFVGB since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing and implementing cleanup remedies, and identifying responsible parties. EPA provided oversight of the basinwide Remedial Investigation (RI) of groundwater contamination conducted by the Los Angeles Department of Water and Power (LADWP) The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology, hydrology, hydrogeology and the nature and extent of groundwater contamination within the eastern & Verdugo basins; study fate and transport of compounds in the environment; identify Applicable or Relevant and Appropriate Requirements (ARAR's); and evaluate the potential risk to human health and the environment.

The Remedial Investigation of the SFVGB was divided into two phases:

Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contamination information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4).

Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is a federal term which is similar to the State's definition of a removal action.

Phase II activities consist of basinwide remedial investigation conducted by the LADWP.

Remedial Actions (RAs):

North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.

A Record of Decision (ROD) for the North Hollywood RA was

Map ID

SAN FERNANDO VALLEY (AREA 2) (Continued)

1000710134

signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is located at 11845 Vose Street in the N. Hollywood section of Los Angeles.

A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Phase I of the Burbank OU began operations in January 1996 treating groundwater at a rate of 6,000 gpm. Phase II began operations in May 1998 adding an additional 3,000 gpm to the Burbank OU's treatment capacity.

Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU was separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993 designating groundwater extraction and treatment as the interim remedy. The PRPs formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extraction and treatment. The Glendale OU began operations in September 2000.

Verdugo and Pollock (Areas #3 and #4) --

Currently no RAs have been identified for Area #3 or for Area #4. In October 2003, US EPA proposed No Remedial Action Verdugo Basin (Area #3).

Another contaminant of concern, hexavalent chromium, has been identified in the San Fernando Valley Groundwater Basin. EPA and the RWQCB are currently identifying potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified, individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders will be implemented at numerous specific potential source sites within the Basin by RWQCB and DTSC.

The San Fernando Valley Ground Water Basin (SFVGB) is located within the Upper Los Angeles River Area and consists of the eastern portion of the San Fernando Valley and the entire Verdugo Basin. The SFVGB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains.

The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:

Area #1 - North Hollywood NPL site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divided into the North Hollywood Operable Unit (OU) and the Burbank OU.

Area #2 - Crystal Springs NPL Site covers 3975 acres south-east of the North Hollywood NPL site and is located in the cities of Glendale and Los Angeles.

Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the San Fernando Valley and is located in and adjacent to

1000710134

La Crescenta in the Verdugo Mountains.
Area #4 - Pollock NPL Site covers 1653 acres in the southeastern part of the San Fernando Valley and is located in and adjacent to the cities of Los Angeles and Glendale. Groundwater contamination in the SFVGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.

The primary contaminants of concern are volatile organic compounds (VOCs), trichloroethylene (TCE), and tetrachloroethylene (PCE), which have been and/or are being used in many San Fernando Valley industries, such as aeronautical, automotive, dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage, and disposal practices. The SFVGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination at numerous wells have been so severe with TCE and PCE that these wells have

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RAB: Not reported
 CTC: 721.2999
 Current Owner: Local Government; Private Sector
 Current Prog: Not reported
 Future Prog: Not reported
 Acreage: Not reported
 Description: The site comprised 188.86 acres in Glendale, California. The property is owned by several business industries and the city of Glendale. The site is currently located within the boundaries of the San Fernando Valley NPL Site, Glendale Operable Unit (San Fernando Superfund Site Area 2). Contamination at the Glendale Operable Unit consists of chlorinated solvents, namely TCE and PCE in groundwater. There is an allegation that contamination from the Burbank Operable Unit has migrated and contributed to the Glendale Operable Unit. The Record of Decision for Glendale-South Operable Unit for an interim remedy estimated costs as high as \$60 million. The Glendale Operable Unit is an EPA lead site.
 History: Between January 1942 and May 1943, the United States acquired legal interest in the Grand Central Air Terminal, which at the time was a privately-owned airport. A total of 188.83 acres were acquired for use by the military. A major portion of the acreage (181.7 acres) was leased from Curtis-Wright Corporation, and the balance (7.13 acres) was acquired through lesser interest. The site was utilized by the U.S. Army Air Force as a training facility and subsidiary airport during World War II. The site also served as a sub-base to Van Nuys Municipal Airport. From 1942-1943, the U.S. Army constructed improvements on the then-existing airport and adjoining land. In January 1946, the U.S. Army determined the site to be surplus to their needs and the major lease for 181.7 acres was terminated in 1948. The 7.13 acres of lesser interest use was terminated between 1944 and 1948. The streets had been closed and utilized by the U.S. Army. In October 1946, an agreement was executed between the U.S. Government and the City of Glendale, which relieved the U.S. Government of any further responsibility for street maintenance.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WDS:

Facility ID: 4 19I000147
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 4
Facility Telephone: 3232454951
Facility Contact: Steve Manser/William D Wiggins
Agency Name: AUTOMATION PLATING CORP.
Agency Address: Not reported
Agency City,St,Zip: 0
Agency Contact: Not reported
Agency Telephone: Not reported
Agency Type: Private
SIC Code: 3471
SIC Code 2: Not reported
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
Primary Waste: STORMS
Waste Type2: Not reported
Waste2: Stormwater Runoff
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
Facility ID: 4 19I012038

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA

Number of Days to Update: 10	Next Scheduled EDR Contact: 10/17/2016
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/13/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/06/2016	Telephone: 703-603-8704
Date Made Active in Reports: 05/20/2016	Last EDR Contact: 07/06/2016
Number of Days to Update: 135	Next Scheduled EDR Contact: 10/17/2016
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (415) 495-8895

Number of Days to Update: 34	Next Scheduled EDR Contact: 10/17/2016
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Number of Days to Update: 53	Next Scheduled EDR Contact: 09/12/2016
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

COMMERCIAL BUILDING
1633 VICTORY BOULEVARD
GLENDALE, CA 91201

TARGET PROPERTY COORDINATES

Latitude (North):	34.160885 - 34° 9' 39.19"
Longitude (West):	118.29921 - 118° 17' 57.16"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	380240.9
UTM Y (Meters):	3780562.2
Elevation:	486 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630791 BURBANK, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

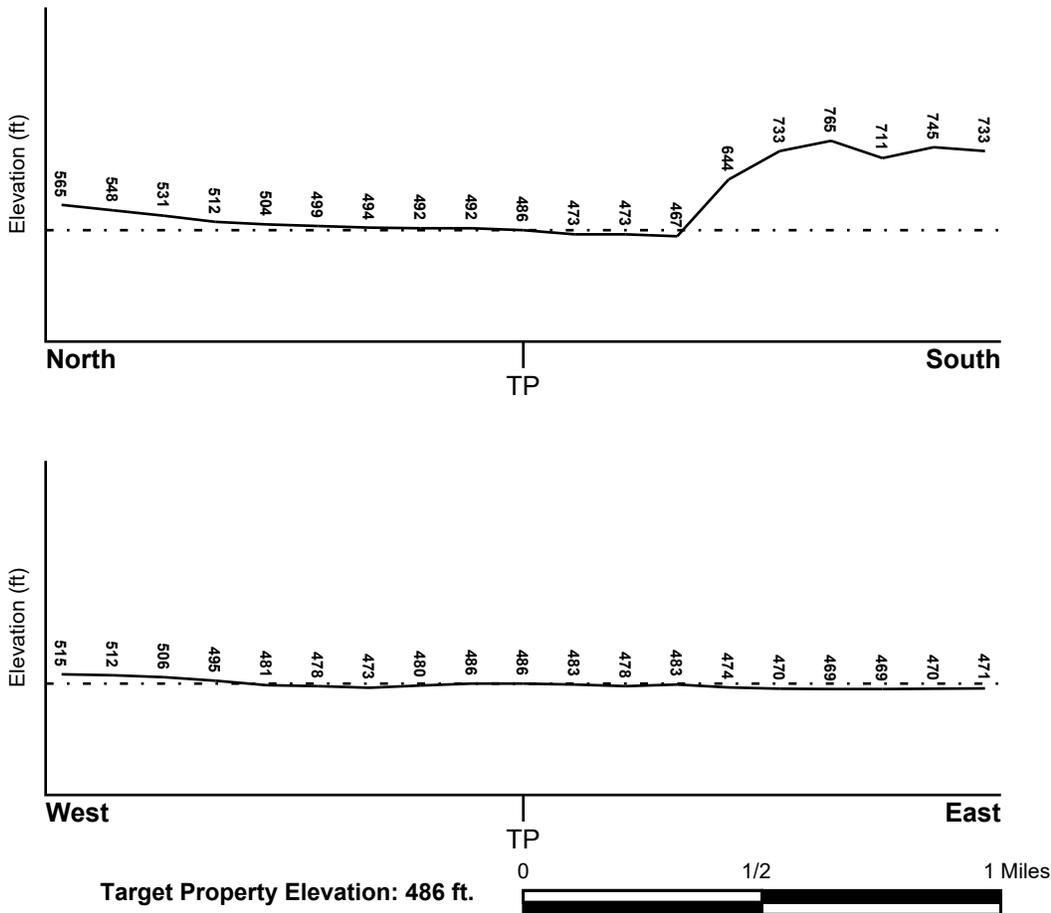

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
LOS ANGELES, CA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
BURBANK	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NNW
Site Name:	Die Casting Id Corp
Site EPA ID Number:	CAD008304412
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	70 feet.
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifers under the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
12	1/2 - 1 Mile WNW	NW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
 clay
 silt loam
 loamy sand

 weathered bedrock
 very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Introduction

This report summarizes the tank removal and soil sample analysis activities conducted by Shewey Environmental Management Co., Inc. (Shewey) at property administered by the Estate of Gladys B. Schnoor, located at 1633 Victory Boulevard in Glendale, California. The site vicinity is shown in Figure 1, and the site plan with tank locations in Figure 2.

All activities conducted at the site were in compliance with the tank removal proposal approved by the client. As no soil contamination was found, there is no need to perform any remedial action relating to the waste oil tank on this property.

Tank Removals

On 17 August 1993, Shewey Environmental Management Co., Inc. removed one underground waste oil storage tank from the site. Table 1 lists the specifications for the removed tank, and Figure 2 shows its location on the site.

Table 1
Specifications for Removed Tank

Designation	Contents	Material	Size (gal)	Removed
Tank 1	Waste Oil	Steel	500 gal.	08/17/93

The UST was pumped free of residual liquids and was inerted of flammable vapors using dry ice. The residual liquids were transported to Gibson Refinery, 401 Canal Avenue, Wilmington, California. The removed UST was transported to Erickson, Inc., 13738 Slover Avenue, Fontana, California for cleaning and disposal. The following transportation, cleaning, and disposal documents are included in Appendix A:

- Uniform Hazardous Waste Manifest No. 92795675 (tank)
- Erickson, Inc. Certificate of Dismantling No. 2919-32774
- Straight Bill of Lading
- American Metal Recycling, Tank Disposal Form No. 40048

Soil Sampling

During the UST removals and excavation, two soil grab samples were obtained, designated as samples S-1A and S-2A. Table 2 lists the designation and location of each sample. The sample locations are also shown in Figure 2.

Table 2 Soil Sample Locations
--

Designation	Location
S-1A	Center of tank excavation (11')
S-2A	Stockpile of removed soil

The soil samples were packaged in 4-ounce clear glass jars with zero headspace, capped with Teflon-lined lids, sealed, and labeled. The jars were placed in sealable bags, recorded on a Chain-of-Custody document, and placed in an ice chest at 4°C for transport to a State of California certified laboratory.

The hand tools used in sample packaging were decontaminated with non-phosphate detergent, given two final rinses with distilled water, and air-dried. All soil sampling was done under the supervision of a registered geologist (see "Reviewed and Approved," below).

Laboratory Sample Analysis

The two discrete soil samples obtained after tank removal were transported to APCL, a California certified laboratory, for testing. The laboratory received the samples within 24 hours and performed the analyses within allowable holding times.

The laboratory was instructed to analyze the samples by EPA method 418.1 for waste oil, 8015 for gasoline and diesel, 8010/8020 for chlorinated volatile organics and aromatic hydrocarbons, 7421 for total lead, and 8080 for PCBs. The action level for TRPH was set at 100 ppm. The laboratory results are shown in Table 3.

Table 3
Laboratory Analysis of Soil Samples

Sample	418.1	8015	8010/ 8020	7421	8080
S-1A	ND.	ND.	N.D. (all)	ND.	ND.
S-2A	ND.	ND.	N.D. (all)	ND.	ND.

Excavation Backfill

Following laboratory confirmation that no contamination existed in the soil surrounding the removed UST, Shewey backfilled the excavation. The soils removed during tank excavation activities were combined with additional clean fill material and compacted to 90% of maximum density in accordance with ASTM test method D1557-78T. Such fill satisfies all compaction requirements of the City of Glendale, and this area will fully support any structural loads that may be constructed on it. The soil compaction report prepared by Berkeley Engineering is included herein as Appendix C.

Well Information

Data are available for two water wells in the vicinity of the project site. Well #3894Z, located in the Griffith Park Equestrian Center 0.3 miles southwest of the site, was measured on 14 October 1992 and showed a groundwater level of 41.2 feet (ground elevation 476.7'). Well #3903A, located on Western Avenue near the railroad tracks NE of the Golden State Freeway, showed a groundwater level of 60.5' (ground el. 488.6') on 11 October 1992. This well is approximately 0.6 miles NE of the site.

Agency Oversight

All on-site activities summarized in this report were conducted by Shewey under the direction and oversight of the City of Glendale Fire Department.

Conclusions

Based upon information presented in this report, we recommend that the status of the underground waste oil storage tank previously located at 1633 Victory Boulevard in Glendale, California, be reclassified as "Abandoned by Removal." We further request that the site be reclassified as "No Further Action."

Should the Glendale Fire Department require further clarification of the remedial action activities concluded at the subject site to complete this investigation, please contact our office at your earliest convenience.

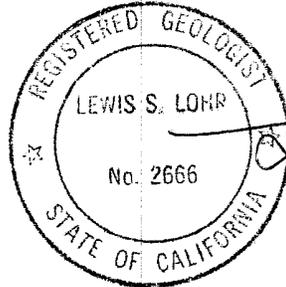

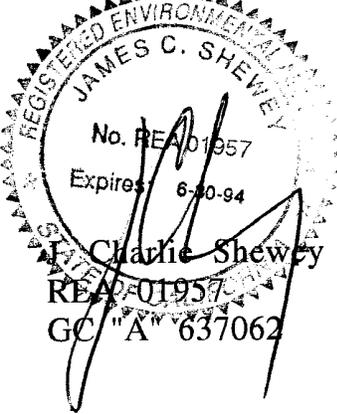

Limitations and Disclaimer

The conclusions in this report address the property as shown in Figures 1 and 2: 1633 Victory Boulevard, Glendale, California. These conclusions are based on (a) the results of the analysis of soil samples obtained after tank removal activities, and (b) observations made by field personnel.

The services performed by Shewey Environmental Management Co., Inc. have been conducted in a manner consistent with the level of care and skill ordinarily exercised by members of our profession currently practicing under similar conditions in southern California. No warranty, expressed or implied, is made or intended with this report.

Reviewed and Approved

This remedial action report has been reviewed and approved by J. Charlie Shewey, California Registered Environmental Assessor, and Lewis S. Lohr, California Registered Geologist.

For: Erickson, Inc. Tank No. (s.) 2919 Location: Fontana, CA Date: 8-19-93 Time: 11:00
Test Method: Visual/Gastech 1314 SMPN Last Product: Waste Oil

This is to certify that I have personally determined that the tank(s) in the following list are in accordance with the American Petroleum Institute and have found the condition of each to be in accordance with its assigned designation. This certificate is based

on conditions existing at the time the inspection herein set forth was completed and is issued subject to compliance with all qualifications and instructions.

Tank(s)	Condition
One (1) 550 gallon steel tank	Safe for Fire: <1% LEL Safe for Men: 20.9% Oxygen
	Hydrocarbon: <10 PPM

Remarks: "Erickson Inc. hereby certifies that the above numbered tank has been decontaminated."

Event of any physical or atmospheric changes affecting the gas-free condition of the above tanks, or if in any doubt immediately stop all hot work and contact the

undersigned. This permit is valid for 24 hours if no physical or atmospheric changes occur

Standard Safety Designation:

Safe for Men: Means that in the compartment or space so designated (a) The oxygen content of the atmosphere is at least 19.5 percent by volume; and that (b) Toxic materials in the atmosphere are within permissible concentrations; and (c) In the judgment of the Inspector, the residues are not capable of producing toxic materials under existing atmospheric conditions while maintained as directed on the Inspector's certificate.

Safe for Fire: Means that in the compartment so designated (a) The concentration of flammable materials in the atmosphere is below 10 percent of the lower explosive limit; and that (b) in the judgment of the Inspector, the residues are not capable of producing a higher concentration than permitted under existing atmospheric conditions in the presence of fire and while maintained as directed on the Inspector's certificate, and further, (c) All adjacent spaces have either been cleaned sufficiently to prevent the spread of fire, are satisfactorily inerted, or in the case of fuel tanks, have been treated as deemed necessary by the Inspector.

The undersigned representative acknowledges receipt of this certificate and understands the conditions and limitations under which it was issued.

RE: Soil Compaction Test

Dear Sirs:

Attached are the compaction test results for the property located in 1633 Victory Blvd., Glendale, California. ASTM D1557-78 was used for density and ASTM D2216 for moisture, allowing for compaction per the following:

90% compaction within boundary of project site.

Very truly yours,

Fred Sheu
