**RE: ADMINISTRATIVE DESIGN REVIEW CASE NO. PDR 1821317
720 WEST KENNETH ROAD**

Dear Mr. Mnatsakanian:

On December 3, 2018, the Director of Community Development, pursuant to the provisions of the Glendale Municipal Code, Title 30, Chapter 30.47, **APPROVED** your design review application to add 533 square-feet to an existing one-story, 3,774 square-foot single-family dwelling (originally constructed in 1937), on an approximately 23,352 square-foot lot located in the R1 Zone, Floor Area District I, located at 720 West Kenneth Road.

CONDITIONS OF APPROVAL:

1. Revise elevation drawings to show location of gutters and downspouts.

SUMMARY OF THE DIRECTOR OF COMMUNITY DEVELOPMENT'S DECISION

Site Planning – The proposed site planning is appropriate to the site and its surroundings for the following reasons:

- The proposed addition is located at the west side of the house, 6'-8" from interior property line, and will be set back considerably from the front façade.
- No new landscaping is proposed at the front or rear. The amount of existing landscaping at the front is sufficient, in terms of code standards and complementing the building's design.

Mass and Scale – The proposed massing and scale are appropriate to the site and its surroundings for the following reasons:

- The mass and scale of the one-story addition will be compatible with the existing structure and surrounding houses. The existing houses on West Kenneth Road are primarily one-story.
- Due to the location of the addition, the scale and proportion of the project fits well within the surrounding context. The addition will defer to the main mass of the house since it is set back 26'-0" from the front porch, not very visible from the street.
- There will be no change in the overall existing height of 20'-6".

- The new roof form will be consistent with the overall building design by having the same pitch of 4½:12 and maintaining the gabled roof form.

Building Design and Detailing – The proposed design and detailing are appropriate to the site and its surroundings for the following reasons:

- The proposed addition will be consistent with the existing building and overall architectural idea.
- The addition will be stucco siding, reinforcing the overall building design by keeping consistency with the existing house. A metal tile roof will be installed to match the texture and color of the existing roof. The siding on the roof fascia will be white wood, matching the existing siding throughout the building. Also, the combination of stucco and wood siding will create visual interest.
- The gutters and downspouts are not shown on the drawings. A condition of approval is recommended requiring revised elevation drawings that show the location of the gutters and downspouts.

This approval is for the project design only. Administrative Design Review approval of a project does not constitute compliance with the Zoning Code and/or Building Code requirements. Please refer to the end of this letter for information regarding plan check submittal.
