**RE: ADMINISTRATIVE DESIGN REVIEW CASE NO. PDR 1820995
1431 GREENBRIAR ROAD**

Dear Mr. Geragos:

On December 3, 2018, the Director of Community Development, pursuant to the provisions of the Glendale Municipal Code, Title 30, Chapter 30.47, **APPROVED** your design review application to build a new 426 square-foot 1-car parking garage, attached to an existing 2-car garage, at the front of an existing 3,136 square-foot, two-story, single-family dwelling (originally constructed in 1966), on an approximately 25,393 square-foot lot located in the R1R Zone, Floor Area District II, located at 1431 Greenbriar Road.

CONSIDERATION:

1. To minimize the appearance of the wide driveway, consider using decorative permeable pavers similar to existing decorative pavers.

SUMMARY OF THE DIRECTOR OF COMMUNITY DEVELOPMENT'S DECISION

Site Planning – The proposed site planning is appropriate to the site and its surroundings for the following reasons:

- The site planning will remain in a similar configuration as existing, with the third garage space located behind the existing garage location and 10'-1" from the interior property line. There will be no change to the existing street front setback since the third space will be recessed behind the existing garage and house.
- No changes are proposed to the existing 2-car garage. The third parking space will be built towards the west. The new garage will be fully integrated with the overall concept of the house by breaking the mass of the garage into two parts and recessing the newer portion back. The garage doors will be facing the street, consistent with the previous design.
- No new landscaping is proposed at the front or rear. The amount of existing landscaping at the front is sufficient, in terms of code standards and complimenting building design in all required setback areas.
- The existing retaining wall towards the west will remain.

Mass and Scale – The proposed massing and scale are appropriate to the site and its surroundings for the following reasons:

- The mass and scale of the additional parking space will be compatible with the existing structure and surrounding houses. The new enclosed parking space is well articulated by being recessed, helping break up the overall mass.
- There will be no change in the overall existing height of 26'-10".
- The existing garage is a front-facing gable, with a 5:12 pitch. The new garage will feature a side-facing gable with a 3 ½:12 pitch. The variation of a front-facing gable and a side-facing gable provide visual interest and appropriate scale and proportion for the structure.

Building Design and Detailing – The proposed design and detailing are appropriate to the site and its surroundings for the following reasons:

- The proposed garage addition will be architecturally consistent with the existing Spanish Colonial Revival style of the house.
- The new garage will be smooth beige stucco, matching with the existing house. A two-piece clay tile will be installed, keeping consistency.
- Consider decorative paving at new area of driveway.

This approval is for the project design only. Administrative Design Review approval of a project does not constitute compliance with the Zoning Code and/or Building Code requirements.
