Submittal Guidelines

- Proposals that result in the elimination or reduction of Code-required off-street parking spaces should be avoided in areas subject to on-street parking permits.
- Proposals to modify structures, especially single-family homes, should respect existing
 development patterns if possible. For example, if there is a consistent front setback on the
 homes adjacent to the subject property, proposed additions should be designed to adhere to
 the existing setback. If existing adjacent structures have a similar height above ground,
 proposed additions should respect the existing heights.
