Job Number: 2539-003
Historic Preservation Services
for 5426 San Fernando Road, Glendale, CA

MEMORANDUM FOR THE RECORD

2.6 2539-003.M01

TO: Gonzales Law Group
(Mr. Michael Gonzales)

FROM: Sapphos Environmental, Inc.
(Ms. Carrie Chasteen)

SUBJECT: Historic Preservation Services for 5426 San Fernando Road,
Glendale, CA

EXECUTIVE SUMMARY

Sapphos Environmental, Inc. understands the subject property was assigned a California Register Status Code of 5S3, or “Appears to be individually eligible for local listing or designation through survey evaluation” in the survey conducted for the 2018 South Glendale Community Draft Plan.¹ The property was found to be potentially locally significant for industrial development from the post-World War II period; continued growth of San Fernando Road as an important industrial corridor (Criterion 1). A review of historic aerials demonstrates the buildings associated with the West Glendale Winery were demolished between 1925 and 1947, and the subject property was redeveloped with the existing Moderne warehouse in 1947. Substantially more permits have been issued for the subject property than those cited in the 2018 survey results; many for interior alterations which would have greatly impacted the use of the buildings use for manufacturing and warehouse storage. In order for a property to be considered eligible for a historical register, it must meet one or more eligibility criteria and possess integrity. The post-World War II development period is commonly considered to have occurred between 1945 and 1969. Although the subject property may be associated with post-war industrial development of southwest Glendale, the businesses associated with this property did not significantly contribute to the history of Glendale. Numerous buildings on the subject property were constructed following the post-war period, the use of the buildings has not been retained, and the primary office building has been substantially altered. Therefore, the subject property does not appear eligible for listing in a historical register.

¹ City of Glendale. 2018. South Glendale Historic Resources Survey. Prepared by Historic Resources Group, Pasadena CA.

INTRODUCTION

Sapphos Environmental, Inc. understands that the subject property located at 5426 San Fernando Road, Glendale, California (APN 5638-018-032) is proposed to be redeveloped. Sapphos Environmental, Inc. also understands the subject property was assigned a California Register Status Code of 5S3, or “Appears to be individually eligible for local listing or designation through survey evaluation” in the survey conducted for the 2018 South Glendale Community Draft Plan.² The property was found to be potentially locally significant for industrial development from the post-World War II period; continued growth of San Fernando Road as an important industrial corridor (Criterion 1). For the 2018 survey, reconnaissance surveys were conducted to identify properties for which further research was warranted. Sapphos Environmental, Inc. qualified architectural historian (Ms. Carrie Chasteen) conducted a preliminary intensive survey to determine if the property retains sufficient integrity to merit consideration as a historical resource pursuant to the California Environmental Quality Act (CEQA).

METHODOLOGY

Background and literature research was conducted in the 2018 Historic Context Statement and Survey Report prepared for the South Glendale Community Plan. Additionally, historic Sanborn maps, building permits, and online newspaper articles were reviewed. A site visit was conducted by Ms. Chasteen on May 13, 2021. Ms. Chasteen possesses a Master of Science in Historic Preservation, has more than 19 years of experience in the field of cultural resources management, and meets the Secretary of the Interior’s *Professional Qualification Standards* in the fields of History and Architectural History.

PROPERTY HISTORY

The Sanborn Map Company generated hand-drawn maps for urban centers for use by fire insurance companies for actuary purposes and generally accurately depict building footprints, porches, building materials, building uses, and other details dependent upon availability. The earliest Sanborn map for the subject property was created in 1919 which depicts several buildings associated with the West Glendale Winery clustered at the intersection of Milford Street and San Fernando Road.³ The last Sanborn map available from lapl.org produced for the City of Glendale was published in 1925 which documents the existence of the West Glendale Winery.⁴ A review of historic aerials demonstrates the buildings associated with the West Glendale Winery were demolished between 1925 and 1947, and the subject property was redeveloped with the existing Moderne warehouse by 1947 (Figure 1, *Historic Aerial, 1952*).

⁴ Sanborn Map Company. 1925. Glendale, Volume 1, Sheet 116.

Figure 1. Historic Aerial, 1952
SOURCE: *Historicaerials.com*, 2021

The 1964 historic aerial (not pictured due to redundancy) does not depict any real change of development of the site. By 1972, infill construction began to occur on the subject property (Figure 2, *Historic Aerial, 1972*). In Figure 2, note the addition of ancillary buildings on the southern boundary of the subject property towards the center and eastern ends of the property.

Figure 2. Historic Aerial, 1972
SOURCE: *Historicaerials.com*, 2021

By 1977, the subject property was approximately 80 percent infilled with additions. Numerous ancillary buildings had been constructed, many of which are visible from the public right-of-way (Figure 3, *Historic Aerial, 1977*).

Figure 3. Historic Aerial, 1977
SOURCE: *Historicaerials.com*, 2021

By 1989, the subject property had been built out to the site plan that is visible today (Figure 4, *Historic Aerial, 1989*).

Figure 4. Historic Aerial, 1989
SOURCE: *Historicaerials.com*, 2021

Construction History

Substantially more permits have been issued for the subject property than those cited in the 2018 survey results; many for interior alterations which would have greatly impacted the use of the buildings use for manufacturing and warehouse storage. Table 1, *Permit History* summarizes the permits issued for the subject property.

**TABLE 1
PERMIT HISTORY**

Permit No.	Issue Date	Brief Summary of Work
15284	1/2/1940	Enclose stock in rear of building with 8 feet of fabric and barbed wire.
33952	12/10/1948	Construct property line wall.*
33985	12/15/1948	Add interior insulation. Build partitions for two additional offices.
N/A	N/A	Replace fire damage.
39696	9/18/1950	Application for proposed building at rear of parcel.
39536	2/1/1951	Make an exterior door into a window. Erect a 2 x 4 partition 12 feet long with a door.
39764	3/14/1951	Enlarge women's toilet room and change entry by addition partition. Enlarge men's toilet room and change location of [stalls].
39826	3/26/1951	Create opening in brick wall. Close a second opening. Construct partitions for additional offices.
40684	9/4/1951	Sheet rock partitions for additional offices.
40950	10/19/1951	Enclose opening, add stud sash and fire door.
55692	10/29/1951	Construct Warehouses E and F.⁵
41832	4/7/1952	Make new opening through brick wall and install overhead door.
42559	7/18/1952	Move the location of two toilets and toilet rooms.
42872	9/20/1952	Erect brick veneer on one wall and install partition to protect from steam boiler.
43158	10/14/1952	Install four new trusses and roof.
43510	12/5/1952	Application to construct Warehouse F.⁶
46216	1/18/1954	Install electric hoist monorail system.
51225	1/20/1956	Construct ceiling attached to existing trusses. Create toilet rooms and offices.
51405	2/15/1956	Construct new partition in existing compound room.
51515	2/29/1956	Demolish existing frame building.
51630	3/13/1956	Make men's and women's restrooms in existing building.
51834	4/6/1956	Install automated sprinkler system.
54043	3/8/1957	Convert existing area into office space.
55692	10/27/1957	Construction of a warehouse.
55806	11/19/1957	Add partition in warehouse and two fire doors.
07655	6/23/1960	Install cooling tower (rooftop).
44695	9/6/1962	Foundation and erection of steel shed building.
48901	11/28/1962	Add 20,800 square feet to existing 10,560-square-foot building.
55924	5/6/1963	Install partition and alter entry door swing.
03471	1/4/1966	Build concrete block building and adjacent facility.
12477	8/4/1966	Alter existing and masonry wall.
70417	6/2/1971	Install metal canopy.
00745	3/6/1974	Enclose existing roofed area with concrete block walls.
25801	8/1/1976	Replace metal beams and siding.
Illegible	9/10/1976	Construct 2-story concrete tilt up building.
65888	11/30/1979	Warehouse modified with concrete floor and glue lam roofing system.
77637	4/15/1980	Construct concrete tilt-up building.
N/A	10/13/1988	Construct paved parking lot.
B10070033	2/10/1998	Install 62 feet of wood screen on roof to screen air conditioner.
20080821	2/15/2009	Demo Building 1, a concrete tilt-up building constructed in 1977.

NOTE: *Bolded permits would impact the subject property's exterior integrity of design, materials, workmanship, feeling, association, and setting.

⁵ Certificate of Occupancy issued February 20, 1953.

⁶ Certificate of Occupancy issued February 11, 1953.

Other permits issued were related to electrical work, reroofing, and plumbing, which are generally not considered to bear weight in defining a property's significance. It was noted numerous permits were issued for electrical upgrades and equipment over the course of time, which reflects the expansion of buildings located on the subject property. On May 21, 1999, a Certificate of Use and Occupancy was applied for to use the subject property as corporate offices for PRC – DeSoto International, Inc.⁷

Use History

Certificates of Occupancy and the historic building permit record indicate several businesses have occupied this site. The Glendale Lumber Company is noted as using this facility. However, research in historic newspapers and the South Glendale Community Plan Historic Context Statement does not indicate that the Glendale Lumber Company made demonstrably significant contributions to the history of the nation, state, region, or City of Glendale. Another early business located at this site was the American Radiator & Standard Sanitary Company. This company was formed in 1929 through the merger of the American Radiator and Standard Sanitary companies in Buffalo, New York. Chicago was the chosen headquarters for the company with branch sales offices in New York, Boston, Minneapolis and Denver. The American Radiator & Standard Sanitary Company produced residential radiator heating equipment and quickly expanded its market throughout the United States.⁸ Based on lack of fanfare in the press and lack of mention in the South Glendale Community Plan Historic Context Statement, the American Radiator & Standard Sanitary Company did not make demonstrably significant contributions to the post-war history of Glendale.

An early Certificate of Occupancy indicates the subject property was owned and operated by Product Research Company (also known as Product Research & Chemical Company; PRC). All identified newspaper articles refer to PRC as being located at 2919 Empire Avenue, Burbank, California.⁹ PRC was noted for manufacturing caulking and sealants but is not known as the inventor of such products. The majority of the press coverage for PRC consists of help wanted advertisements, which lists the Burbank office as the place of business. The local press coverage does not champion innovative use of caulking and other sealants produced at this facility, no mention of tremendous sales that would have boosted the local economy, nor is there mention of expansion of the facility to meet increased post-war demand. Based on lack of fanfare in local media, it cannot be demonstrated that PRC made demonstrably significant contributions to the post-war history of industrial development of Glendale.

⁹ *Los Angeles Times*. 10 April 1966. Accountant Help Wanted Ad, 249.

SITE VISIT

A site visit was conducted on May 13, 2021 to document the current condition of the buildings located on the subject property. The subject property has been used by a film industry company for equipment storage, stages, and equipment testing. The original use of manufacturing and storage of caulking and sealants is no longer extant, and the equipment associated with this use is also no longer extant. It was noted that the original office building has been altered by infill of two large banks of windows facing San Fernando Road. Additionally, the primary entrance of the office building has been altered with the replacement of paired swinging doors noted in the permit history with a single, modern metal door. The entryway to the lobby, the premier public space, was reduced to accommodate the reduction of doors and the primary entryway has been further altered with the introduction of stone veneer.

CONCLUSIONS

In order for a property to be considered eligible for a historical register, it must meet one or more eligibility criteria and possess integrity. The post-World War II development period is commonly considered to have occurred between 1945 and 1973/75. Although the subject property may be associated with post-war industrial development of southwest Glendale, the businesses associated with this property did not significantly contribute to the history of Glendale.. Numerous buildings on the subject property were constructed following the post-war period, the use of the buildings has not been retained, and the primary office building has been substantially altered. Therefore, the subject property does not appear eligible for listing in a historical register.

from Margarita Jerabek-Bray, Ph.D., Alison Garcia Kellar, M.S., and Anokhi Varma, M.S.

subject Preliminary Historical Resources Assessment for 5426 San Fernando Road, Glendale, California

Environmental Science Associates appreciates the opportunity to submit this findings memorandum (Memo) summarizing the results of its preliminary Historical Resources Assessment for 5426 San Fernando Road (APN: 5638-018-032) in Glendale, California (Project Site). ESA understands that a new project may be proposed for the Project Site at 5426 San Fernando Road. This memo has been prepared for the purposes of due diligence with regard to historical resources, for compliance with CEQA.

As shown in **Figure 1** below, the Project Site is improved with eight industrial structures that have been identified and keyed to the map for the purposes of this study. Building A1 and A2, located at the northwest corner of the 5426 San Fernando Road property at the junction of San Fernando Road and Milford Street (**Figure 1**), is comprised of a warehouse which was constructed in 1946 (A1); and an attached office and display room (A2) which was constructed in 1947 (subject building). In 1974, a large L-shaped addition was constructed to the south and east of the warehouse portion of Building A1. The subject building, A2, (i.e. office and display room), which is located on the northwest corner of the project site, was previously identified in 2017 and assigned a California Historical Resource (CHR) Status Code of 5S3 as a part of the City of Glendale's *City of Glendale South Glendale Historic Resources Survey*, meaning the subject building "Appears to be individually eligible for local listing or designation through survey evaluation."¹ The survey also identified the subject building as eligible under local Criterion 1 as an "excellent example of industrial development from the immediate post-World War II period, representing the continued growth of San Fernando Road as an important industrial corridor in South Glendale." The period of significance in the City's Context: Industrial Development is from 1890 to 1955. Therefore, the "immediate post-World War II period" would be from 1945-1955.

5426-5454 San Fernando Road

Figure 1
Project Site

ESA conducted an intensive survey of the Project Site and has uncovered new information about the history, site development, construction, use, and later changes to the subject building and associated property. Building A2 was identified in the aforementioned survey as an example of Mid-Century Modern style, yet it also includes some Streamline Moderne characteristics which were not discussed in the survey. Based upon this new research, ESA found the subject building, Building A2, as well as the subject property as a whole (5426 San Fernando Road), to be ineligible for listing on the National Register of Historic Places (NR), California Register of Historic Resources (CR), and on the Glendale Register of Historic Resources, as the subject building (A2) fails to convey significant historic associations and is not a distinctive example of its style as applied to an industrial office and display room due to a substantial lack of integrity. Furthermore, the attached buildings A1 and A2 taken together do not appear to meet the thresholds of significance or integrity as applied to an industrial office and warehouse property type under any of the applicable criteria.

Survey and Research Methods

This Report was prepared by ESA's architectural historians, including: Margarita Jerabek-Bray, Ph.D., Director of Historical Resources; Alison Garcia Kellar, M.S., Senior Architectural Historian; and Anokhi Varma, M.S., Historic Architect. All of our ESA staff meet and exceed the *Secretary of the Interior's Professional Qualification Standards* in history, architectural history or historic architecture. Professional qualifications are provided in **Appendix A**.

The preparation of this Report involved a review of the National Register and its annual updates, the California Register, the Statewide Historical Resources Inventory (HRI) database maintained by the State Office of Historic Preservation (OHP), and the City of Glendale's Register of Historic Resources to identify any previously recorded properties within the Project site.

In addition, the following tasks were performed for the study:

- Conducted field inspections of the Project site and utilized the survey methodology of the OHP.
- Photographed the Project site and associated landscape features.
- Conducted site-specific research on the Project site utilizing assessor records, building permits, Sanborn Fire Insurance Maps (Sanborn maps), city directories, historical photographs, historical newspapers, and other published sources.
- Conducted research through the Los Angeles County Assessor's Office and the City of Glendale Department of Public Works.
- Reviewed and analyzed ordinances, statutes, regulations, bulletins, and technical materials relating to federal, state, and local historic preservation, designation assessment processes, and related programs.
- Reviewed the City of Glendale's previous historical resources surveys and the Citywide historic context.
- Evaluated potential historical resources based upon criteria used by the National Register of Historic Places (36 CFR Section 60.2), the California Register of Historical Resources (PRC Section 5024.1), and City of Glendale Historic Preservation Ordinance (Section 15.20.050 of the Glendale Municipal Code).

Environmental Setting

Previous Surveys

The *City of Glendale South Glendale Historic Resources Survey*, included the west portion of the subject building, Building A2, which was identified and recorded as potentially eligible for the Glendale Register under local Criterion 1 “as an excellent example of industrial development from the immediate post-WWII period, representing the continued growth of San Fernando Road as an important industrial corridor.”² The survey form is included as an attachment to this Memo. As mentioned above, Building A2 was assigned a preliminary status code of 5S3, which means that the building may be eligible for local listing or designation through survey evaluation. The property is associated with the “Industrial Development” contextual theme, and was included as a potential resource for the following: “Industrial development from the post-World War II period; continued growth of San Fernando Road as an important industrial corridor.”³

However, some of the statements related to potential historic eligibility of the subject building as stated on the survey form were found to be incorrect due to the low historic integrity present at the Project Site, as discussed in greater detail below.

The subject building (Building A 5426 San Fernando Road) was identified as having a “Mid-century Modern/Industrial” architectural style, with “No major alterations.”⁴ However, the construction history on the survey form included only a partial building permit history for the address 5426 San Fernando Road, which further research has determined also includes building permits for the other seven structures located on the property, and are not specific to Building A2. Further, building permits for the property at 5430 and 5454 San Fernando were not included in the survey report or inventory, which resulted in an incomplete depiction of all of the modifications undertaken at the property. Also, the survey did not mention the Streamline Moderne features that are present at Building A1. Additionally, notable engineer Eugene Birnbaum was erroneously identified as having worked at the Project Site on an alteration building permit from the 1950s as indicated in the 2017 DPR form. However, no such building permit was located in the permit search for any of the buildings on the property, as documented in this report.

Historic Contexts

Industrial Development (1890-1955)

The following context is from the *City of Glendale South Glendale Historic Resources Survey*:

Early industrial development in Glendale and Tropicco was associated primarily with the citrus and building industries and developed along the rail lines that connected the towns to Los Angeles. Industrial development after 1920 was focused almost exclusively in the area around San Fernando Road, which

² “DPR 523 Series Forms: 5426 San Fernando Road,” 2017, page 2 (BSO form); and Historic Resources Group, “Appendix B: Individually Eligible Properties, South Glendale Community Plan,” City of Glendale, 2018, 62.

³ “DPR 523 Series Forms: 5426 San Fernando Road,” 2017, page 2 (BSO form).

⁴ Ibid.

grew into a major industrial corridor and was a significant factor in the development and growth of Glendale and the surrounding area. The 1995 San Fernando Road Corridor survey determined that resources from this early era of development are rare.

One of the earliest industries in the Glendale vicinity was the West Glendale Winery, established about 1890 in a brick building located on San Fernando Road near what is now Doran Street, which at that time was outside the town limits. Proprietor Charles R. Pironi's products included orange wine. Sanborn Fire Insurance maps show that by 1908 a number of industries had been established in the town proper. Charles M. Lund, a wagon maker from Council Bluffs, Iowa opened Glendale's first blacksmith shop in 1906 on West Third Street (now Wilson Avenue) between Howard Street and Isabel Street. By 1908 Lund had added a buggies and implements shop and by 1912 a harness shop. Four fruit packing houses were located along Glendale Avenue, adjacent to the railroad tracks. The Pinkham & McKeivitt packing house, which by 1912 was owned by the Edmund Peycke Company, was located at the south end of town at the intersection of Glendale Avenue and Lomita Avenue. The Sparr Fruit Packing Company was located on Glendale Avenue just south of West Second Street (now California Avenue), and the C.C.U. packing house occupied the northeast corner of the intersection of Glendale Avenue and West First Street (now Lexington Avenue). Further north along the tracks, just outside of town, was the E.M. Ross packing house. The growing town also had three large lumber yards: the Independent Lumber Company at West Second Street (California Avenue) and Geneva Street; the Litchfield Lumber Company on Glendale Avenue, just south of the Sparr Fruit Packing Company; and the Valley Lumber Company at West Fourth Street (now Broadway) and Maryland Avenue. No physical remnant of these early industries remains.

The nearby town of Tropico was simultaneously developing its own industries. There was a small packing house at Brand Boulevard and Depot Street (now Cerritos Avenue), adjacent to the public school, but industrial development was logically focused west of San Fernando Road along the Southern Pacific Railroad tracks. The Los Angeles Basket Company occupied a long, narrow property between the tracks and Los Angeles Avenue, north of Cypress Street; its warehouse is still standing at 448 West Cypress Street. The Tropico Manufacturing Company planing mill was located on Tropico Avenue (now Los Feliz Road) just east of the tracks; across the street and immediately adjacent to the tracks was the Tropico Lumber Company. Across the tracks in Atwater was the Western Art Tile Works, which made decorative terra cotta, faience tile, vitrified clay sewer pipe, water pipe, drain tile, and other products. The plant was subsequently known by various names including Tropico Potteries, Pacific Tile Company, and Gladding McBean, and in the 1920s was the area's largest manufacturing plant. The site is now occupied by a Costco shopping center. Tropico was annexed by the city of Glendale in 1918, and in 1920 the Greater Glendale Development Association asked the City Council to set aside land flanking San Fernando Road as an industrial area. The Association focused on San Fernando because of its strategic location linking Los Angeles and the San Fernando Valley, and its proximity to both the Southern Pacific and Pacific Electric railways. Within a year a number of industries located in that section, and during the 1920s the area developed into a major industrial corridor stretching along the entire southwest flank of Glendale. One of the leading figures in the development of the San Fernando Road industrial corridor in the 1920s was Lloyd Harmond Wilson (1878-1942), a prominent Glendale realtor, developer, and real estate speculator. Wilson was born in Missouri in 1878 and began his career in Chicago in the publishing and advertising businesses. He moved to Glendale with his family in 1921 and quickly launched a successful career in real estate development, specializing in industrial properties in the San Fernando Road area. Wilson played an important role in the city's commercial life for two decades and was "instrumental in promoting much of the city's industrial growth and development, especially in the western part of the city." Wilson shrewdly focused his development efforts on San Fernando Road, then

primarily a residential district. He brokered deals with established businesses, persuading them to move to Glendale and selling or leasing them properties developed by his company, L.H. Wilson, Inc. Within two years Wilson was hailed as the “progressive realtor whose magic wand” had tripled and quadrupled real estate values in the area and enriched scores of investors:

The name L.H. Wilson has become synonymous with the remarkable development along the San Fernando Road. When you say San Fernando road you think of Wilson, and when you say Wilson you think of the San Fernando road.

By late 1928 Wilson was credited with the establishment of 70 separate industrial businesses in the city in the 1920s, settling them in extensive tracts he developed along San Fernando Road and “adding materially to the wealth of Glendale and paving the way for the distribution of immense sums of money through the different firms that he has established here.” In 1928 alone Wilson brokered deals that brought 14 companies to the San Fernando Road area and built nine industrial buildings, five of which he sold before the end of that year. By mid-1929 Wilson had signed leases for six more buildings that were then under construction. Among the diverse industries Wilson attracted to Glendale were the Security Baking Company, the Glendale Glass Tile Company, the Hollywood Shoe Manufacturing Company, the Hollywood Mosaic Tile Company the Indium Steel and Alloys Company, and the West Coast Style Shoes Co. In the late 1920s, Wilson, with his extensive holdings along San Fernando Road, was a leader in the effort to widen ten miles of the thoroughfare to 55 feet between curbs. The complex project required the demolition of existing buildings along both sides of the street, involving 540 separate parcels and more than 1,000 property owners.

Wilson eschewed mundane industrial designs for his developments, insisting instead on attractive, distinguished architecture. Wilson expressed his development philosophy in discussing plans for the Security Baking Co.:

We kept away from the stereotyped design of industrial structures and decided to erect a building that would be a credit not only to the industrial section of Glendale but to the business or residential districts as well. Not only have we set our faces steadily against anything shoddy in construction but we insisted on architecture and designs that have added a beautiful building to those that we have erected in this industrial area.

Most of the industrial buildings developed by Wilson in the San Fernando Road corridor have been demolished or substantially altered. Two extant examples include 3901 San Fernando Road and 4500 San Fernando Road. Post-World War II industrial development in Glendale received a significant boost beginning in 1955, when Grand Central Air Terminal was closed to air traffic and the airport property was subdivided for development. The Grand Central Industrial Center opened in 1955 with four buildings and gradually took over the airport’s entire 12-acre site. Though located outside of the South Glendale study area, the development of the Grand Central property extended the San Fernando Road industrial corridor along Glendale’s entire southwest border. By 2006 the Chamber of Commerce reported 575 industries, many located on the city’s west side, employing more than 21,000 persons.⁵

⁵ City of Glendale South Glendale Historic Resources Survey, 2014, 140-142.

Industrial Development: Property Types and Registration Requirements

Registration Requirements included for industrial resources under the Industrial Development Context in the “City of Glendale South Glendale Historic Resource Survey” are reproduced below:

Industrial buildings important to Glendale’s development history date from the late-18th century through the mid-20th century. Properties may include warehouses, industrial plants, factories, associated offices, and ancillary buildings and structures. Note that a property that is an excellent or rare example of a particular architectural style or property type, or the work of a master or noted architect may also be significant under the Architecture and Design Context.

An industrial property from this period may be significant:

CRITERIA	REASON
A/1/1 ⁶ (Event)	As an excellent example of industrial development representing an early industry in Glendale (including railroad development, viticulture, citrus, building, or motion picture industries), or the growth of San Fernando Road as an important industrial corridor.

Industrial Development: Integrity Considerations

Each type of property depends on certain aspects of integrity, more than others, to express its historic significance. Determining which of the aspects is most important to a particular property type requires an understanding of the property’s significance and its essential physical features. The rarity of the property type should also be considered when assessing its physical integrity. In order to be eligible for listing at the federal, state, or local levels, a property must retain sufficient integrity to convey its historic significance under the Industrial Development theme.

CRITERIA	REQUIRED ASPECTS OF INTEGRITY
A/1/1 (Event)	An industrial property from this period eligible under Criteria A/1/A, 1 (Event) should retain integrity of location, design, feeling, and association, at a minimum, in order to reflect the important association with industry in South Glendale. Some replacement of original features, including storefronts, may be acceptable given the relative rarity of these resources.

Industrial Development: Registration Requirements

To be eligible under the Industrial Development theme, a property must:

- Date from the period of significance;
- Represent one of the early industries in Glendale or reflect a pattern or trend in industrial growth;
- Display most of the character-defining features of the property type or style; and
- Retain the essential aspects of integrity.⁷

⁶ The local criterion was referenced from the *City of Glendale South Glendale Historic Resources Survey*, 2017, 15.

⁷ *City of Glendale South Glendale Historic Resources Survey*, 2017, 149.

Mid-Century Modern

The following is a Mid-Century Modern context is a sub-theme of Post-World War II Modernism, as published in the *City of Glendale South Glendale Historic Resources Survey*, prepared for the City of Glendale in 2014:

Mid-century Modern is a term used to describe the post-World War II iteration of the International Style in both residential and commercial design. The International Style was characterized by geometric forms, smooth wall surfaces, and an absence of exterior decoration. Mid-century Modern represents the adaptation of these elements to the local climate and topography, as well as to the postwar need for efficiently-built, moderately-priced homes. In Southern California, this often meant the use of wood post-and-beam construction. Midcentury Modernism is often characterized by a clear expression of structure and materials, large expanses of glass, and open interior plans.

The roots of the style can be traced to early Modernists like Richard Neutra and Rudolph Schindler, whose local work inspired “second generation” Modern architects like Gregory Ain, Craig Ellwood, Harwell Hamilton Harris, Pierre Koenig, Raphael Soriano, and many more. These postwar architects developed an indigenous Modernism that was born from the International Style but matured into a fundamentally regional style, fostered in part by Art and Architecture magazine’s pivotal Case Study Program (1945-1966). The style gained popularity because its use of standardized, prefabricated materials permitted quick and economical construction. It became the predominant architectural style in the postwar years and is represented in almost every property type, from single-family residences to commercial buildings to gas stations.

Character-defining features include:

- One or two-story configuration
- Horizontal massing (for small-scale buildings)
- Simple geometric forms
- Expressed post-and-beam construction, in wood or steel
- Flat roof or low-pitched gable roof with wide overhanging eaves and cantilevered canopies
- Unadorned wall surfaces
- Wood, plaster, brick or stone used as exterior wall panels or accent materials
- Flush-mounted metal frame fixed windows and sliding doors, and clerestory windows
- Exterior staircases, decks, patios and balconies
- Little or no exterior decorative detailing

- Expressionistic/Organic subtype: sculptural forms and geometric shapes, including butterfly, A-frame, folded plate or barrel vault roofs⁸

Merchandise Display Windows

As evidenced through the Sanborn map of 1950, Building A was originally constructed with display windows along its west front and north corner elevation situated along San Fernando Road. These display windows would have featured American Radiator & Standard Sanitary Company's latest products in the windows, oriented such that drivers-by and pedestrians could see the company's products - even at night. In the early to mid-20th century, commercial businesses began deliberately appealing to potential roadside customers through their architecture, as captured in the following excerpts from *Main Street to Miracle Mile: American Roadside Architecture* below:

By the 1920s, buildings and associated businesses were competing for attention from drivers navigating streets and highways. One approach to accomplish this was to make buildings appear to be bolder, in order to catch attention from the rapidly changing community and environment. Modern architecture served to fill the need for more eye-catching imagery in the built environment during a time of increased demand for roadside visibility. Architectural design offered solutions for businesses to present themselves with attention-grabbing modern style.⁹

One solution to the problem was the "visual front," a concept that began to surface in the mid-1930s for downtown architecture but did not gain widespread application along the roadside until after the war. A visual front was created by completely glazing the front, and sometimes the sides, of a commercial building, so that the interior of the structure, especially when lit at night, would provide visual appeal for the exterior. The glass was sometimes canted inward, to cut down on glare and provide visual variety. In this novel way of handling a favored Modern material, glass, architects devised a sleek-looking buildings that both answered the demand to attract attention and, by showcasing the inside on the outside, exhibited "function," therefore confirming to Modern architectural dogma.¹⁰

Streamline Moderne, 1935 to 1945

Building A 5426 San Fernando Road includes limited Streamline Moderne features, including the canopy, rounded corner, smooth stucco cladding, and a flat roof. As the City of Glendale does not have a context statement for the Streamline Moderne style, it is common practice to reference other applicable contexts. Since Glendale's architecture generally follows regional trends, excerpts from SurveyLA's *Los Angeles Citywide Historic Context Statement* regarding eligibility standards for the Streamline Moderne style are provided as follows:

Summary Statement of Significance: Resources evaluated under this sub-theme are significant in the area of Architecture as excellent examples of the Streamline Moderne styles and exhibit quality of design through distinctive features. Streamline Moderne architecture was popular between the mid-1930s and mid-1940s; the style underscored the American public's affinity for technology, progress, and modernity, and evinces a sense of motion and speed. It was applied to single-family and multi-family residences, as

⁸ Ibid., 224.

⁹ Chester Liebs, *Main Street to Miracle Mile: American Roadside Architecture*, United States, John Hopkins University Press, 1985, 53.

¹⁰ Ibid., 61.

well as some commercial and institutional properties. On rare occasion it was applied to industrial properties.¹¹

Property Type Description: The Streamline Moderne style was a versatile idiom that was applied to an array of property types. Some of the most iconic and architecturally distinctive examples of the style are represented in the context of commercial buildings; however, the style was often expressed in the form of custom single-family residences and small-scale multi-family residences. To a lesser extent, the style was also applied to institutional and industrial properties. Groupings of resources in the style may be evaluated as historic districts. Given Streamline Moderne's relatively brief period of popularity, examples of the style are relatively rare in [the] Los Angeles [area as well as Glendale]. Many of the buildings designed in the style are attributed to notable architects of the 1930s and 1940s. Milton J. Black and William Kesling designed single-family and multi-family dwellings in the style; Stiles Clements, Robert Derrah, Parkinson and Parkinson, Wurdeman and Becket, and other notable local architects are more closely aligned with larger-scale commercial, institutional, and industrial buildings designed in the style.¹²

Character-Defining/Associative Features:

- Retains most of the essential character-defining features of the style from the period of significance
- Horizontal orientation
- Rounded corners and curved surfaces, emulating a “windswept” appearance
- Flat or nearly flat roof
- Speedlines at wall surfaces, such as horizontal moldings and continuous sill courses
- Smooth stucco cladding
- Metal, often steel casement, windows
- Unadorned wall surfaces, with minimal ornament
- Windows “punched” into walls, with no surrounds¹³

Property Setting

The multi-building Project Site includes eight structures. Building permits for the entire Project Site were issued under three addresses - 5426, 5430 and 5454 San Fernando Road. **Table 1** includes building permits for Buildings

¹¹ Architectural Resources Group, *Los Angeles Citywide Historic Context Statement; Context: Architecture and Engineering; Sub-Context: L.A. Modernism, 1919-1980*, Prepared for the City of Los Angeles, Department of City Planning, 2019, 88.

¹² Ibid, 89.

¹³ Ibid.

B-F, H, and Structure G, as decipherable apart from Buildings A1 and A2, while **Table 2** includes building permits specific to Building A, inclusive (Buildings A1 and A2).

The 1925 Sanborn map depicts the Project Site prior to the construction of any of the extant buildings (**Figure 2**). The surrounding neighborhood included partially developed residential single-family lots to the east, northeast, and south, with commercial businesses including a veterinary hospital, feed mill, and cabinet manufacturing company located to the immediate north. While today the property is one single parcel, it was comprised of two distinct parcels in 1925. The southernmost parcel was occupied by the Glendale Lumber Company, and included a shop and a mill building. The West Glendale Winery was located in the northern parcel, at the northwestern extent of the Project Site. The northern parcel then included several different wine manufacturing buildings including a distillery/fermenting building, wine storage, and adjacent dwellings which were possibly for workers.

The 1950 Sanborn map and 1952 aerial photograph show further residential development surrounding the project site with many single family residences to the immediate east, northeast, and south of the subject property (**Figure 3**). A mix of manufacturing businesses sat to the north of the Project Site including: auto wrecking, refrigerator manufacturing, wood working, rubber manufacturing products, sheet metal works, air conditioning fixtures, aircraft part shops, and machine shops.

Los Angeles County Assessor records indicate that an early manufacturing or office building was constructed along San Fernando Road in 1940. The early building was likely the original location of the Products Research Company (PRC) when the company began in 1945, and is visible on the 1950 Sanborn map (**Figure 3**). The early building was later demolished in 2008.

Project Site Development

Building A1 and A2 at 5426 San Fernando Road) was constructed between 1946 and 1947 and was occupied by American Radiator & Standard Sanitary Corporation, replacing the West Glendale Winery. Building A1 was expanded to the south and east in 1974 according to a building permit.

By the time of the 1950 Sanborn map, the southern portion of the Project Site included an early building used as a felt gasket manufacturing facility as part of PRC, Building B which was then used as a bottle soft drink depot by a different business, truck storage, offices, and a parking lot (**Figure 3**).

Buildings C, D, E, and F were constructed between 1953 and 1967, around the time the PRC began to occupy more and more of the Project Site, and likely reflect a large construction campaign to accommodate the rapidly growing company. A newspaper article from 1960 indicates that PRC was then known nationally and was involved in manufacturing products for a wide range of industries.¹⁴ These new buildings replaced some of the buildings in the southern portion of the Project Site by the mid-1960s, and by the early 1970s, nearly all of the previous southern improvements had been removed and replaced by PRC, with additional infill toward the center of the Project Site.

Building C, used as offices and warehouse spaces with a punch press tool room, and Building D, used as a factory building for staging and packing were both constructed between 1953 and 1964. The Los Angeles County Assessor's records erroneously indicate that Buildings C and D were constructed in 1947 and 1950, yet the 1950

¹⁴ "Advertisement: How Green Is Our Valley," *Valley Times*, September 27, 1960, 33.

Sanborn map and 1952 aerial photograph do not include either (**Figures 3 and 4**). Building C was modified with an additional office space in 2000.

Buildings E and F were both constructed as factories in 1967 according to the Los Angeles County Assessor records, a construction date which corroborates with the aerial from 1964, and the aerial and Sanborn map from 1970 (**Figures 5, 6, and 7**). Building F was expanded substantially to the west by 1989, as visible in an aerial photograph (**Figure 9**).

A permit to construct Structure G was issued in 1967, and the structure appears on both the 1970 aerial photograph and Sanborn map (**Figures 6 and 7**). Structure G was not visible in the 1964 aerial, and thus does not reflect the Los Angeles County Assessor records which indicate its construction date as 1957.

Building H was constructed in 1975, according to Los Angeles County Assessor records and is first visible on an aerial photograph taken in 1981 (**Figure 8**).

Building permits on file with the City of Glendale Department of Public Works and the Los Angeles County Assessor’s Office for the multi-building Project Site include the following addresses: 5426, 5430, and 5454 San Fernando Road. As ESA was best able to discern, **Table 1** below includes the building permits specific to Buildings B-F, H, and Structure G, while **Table 2** includes building permits specific to Building A, inclusive (A1 and A2).

Plot plan with Project Site and relative construction dates, c. 1977. This document is included as an attachment to this Memo.

Construction History

Building A1 and A2 (5426 San Fernando Road)

According to a plot plan from the Los Angeles County Assessor's Office, Building A's warehouse area (A1) at the east portion of the building was constructed in 1946, while the office area at the west portion of the building (A2) was constructed in 1947 (**Figure 10**). There was no original building permit for the subject building (Building A1 or A2 at 5426 San Fernando Road) on file with the City of Glendale Department of Public Works. As mentioned previously, since the multi-building Project Site includes eight structures, building permits for the property were all collectively issued under the 5426, 5430, and 5454 San Fernando Road addresses. As ESA was best able to discern, **Table 2** includes building permits specific to Building A1 and A2, including building permits for the subject building issued under the 5426, 5430, and 5454 San Fernando Road addressees.

Building permits issued in 1948 included work to construct a reinforced property line wall; interior wall modifications; and additional interior partitions. The 1950 Sanborn map illustrates Buildings A1 and A2 when it was occupied by American Radiator & Standard Sanitary Corporation, who likely occupied the building from construction through to 1955, according to building permits and a newspaper article (**Figure 13**). The western portion, Building A2, included a display area, offices and a warehouse, while the eastern elongated portion,

Building A1, included shipping areas, both of which had skylights. As depicted on the Sanborn map, Building A2's northwest corner is curved with a generous awning. A large and elongated display room ran along the San Fernando elevation with large display windows facing the road. The 1952 aerial photograph reflects the same configuration as the 1950 Sanborn map (**Figure 11**). An April 1955 newspaper article discussing the sale of the building indicates that Building A2 was also referred to as 5454 San Fernando Road.¹⁶ Ames Harris Neville Co. occupied the building from roughly 1955 to 1958. An artist's rendering from the time of the transaction reflects Building A2's early configuration, which appears to have changed substantially over time (**Figure 13**). The facade originally featured large display windows and a primary corner entrance. Physical evidence of alterations to the original design were observed during ESA's survey and include the following: details at the overhang have since been removed, landscaping and original signage have been altered including brick entrance planters, and the original display room storefront with floor-to-ceiling display windows and primary entrance have been removed and the openings filled/stuccoed. The location of the former floor-to-ceiling display windows is visible in the 1950 Sanborn map (**Figure 3**). The existing new windows and door are non-original later replacements that detract from the architectural integrity of the building type and style. Further, the overhanging canopy had been altered with the removal of the decorative notches and raised signage as visible in the newspaper rendering (**Figure 13**).

Several building permits were issued in 1951 and 1952. Permitted work included modifications to the men's and women's restrooms; the creation of openings at the interior; the enclosure of an existing door along San Fernando Road; office partition enclosures; the enclosure of another interior room; plaster work; and fire door installation. Permits issued in 1952 included work to the restrooms; the construction of a brick veneer wall adjacent to a steam boiler; and 4 new trusses (**Figure 12**).

Permits issued when the building was occupied by Ames-Harris Neville Co. included sprinklers in 1954, and a new sign in 1955. However, a newspaper article published in December 1955 indicates that a fire damaged a building at the subject property, when materials caught on fire.¹⁷ The fire doors at the structure closed and sealed off the inflammable materials, which helped to prevent a severe explosion.¹⁸ 1956 modifications included a new ceiling; a new restroom; additional office partitions; and automatic sprinkler installation. Modifications to the building's roof, additional interior walls, and more sprinklers were installed in 1957.

According to building permits, it appears that Product Research Company (PRC) occupied the building beginning in the late-1950s. PRC first occupied the property further south along San Fernando Road, at a smaller building. PRC developed the southern portions of the site before migrating north into Buildings A1 and A2. In 1960, a building permit was issued to cut a door into the side of the building, which likely referred to modifications at the north or east elevations of the warehouse portion of Building A1. The 1970 Sanborn map illustrates PRC as occupying Building A1 and A2, despite multiple permits issued for interior modifications since the 1950 Sanborn map was issued (**Figure 14**). In 1974, a permit issued for 5454 San Fernando Road indicates that an addition to the south and east elevations at the warehouse portion (Building A1) were constructed, which is visible in the 1977 aerial photograph (**Figures 15 and 16**). Other permits from this time included new partitions, concrete floors, and the enclosure of former window openings. A permit issued in 1980 indicated that glass openings were replaced with wood and stucco, which likely reflects the current configuration of the north and west elevation of

¹⁷ "Automatic Fire Doors Prevent Serious Blast," *Los Angeles Evening Citizen News*, December 9, 1955.

¹⁸ *Ibid.*

the office portion of the building (Building A2). In 2002, a permit was issued to address structural steel truss and column modifications. Later permitted changes include electrical work and gas systems modifications in 2014.

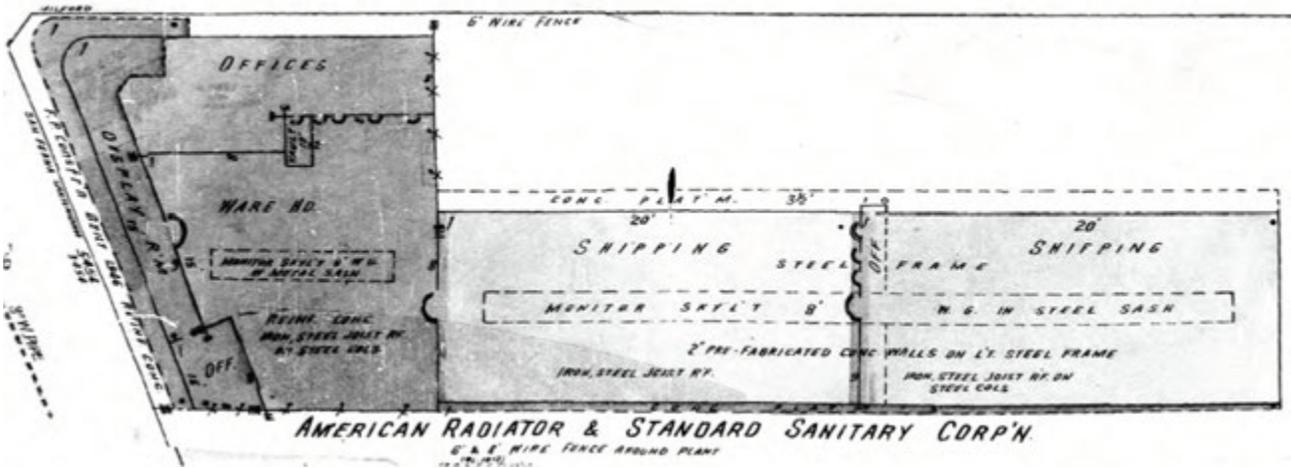

TABLE 2
BUILDING A 5426 AND 5454 SAN FERNANDO ROAD
CITY OF GLENDALE DEPARTMENT OF PUBLIC WORKS¹⁹

Issued	Location	Permit/Assessor Record	Owner	Contractor (C) or Architect (A) Engineer (E)	Valuation (\$)	Description
12/10/1948	5426 San Fernando Road	33957	Emma E. Boyd	Edgar Dregg (C)	1900	Construct a reinforced property line wall which is 14' high and 38' long. Strengthen the stud wall. Lath and plaster walls and ceiling. Place a 2-6" wooden partition with lath and plaster.
12/15/1948	5426 San Fernando Road	33985	Product Research Corp	Product Research Corp	1,200	Cover inside walls and ceilings of two existing offices in warehouse with 1/2" insulating material. Build 2x4 stud partitions for two additional offices: sizes 12x18 and size 12x12 adjoining existing offices. Cover walls and ceiling of the additional offices with 1/2" insulating material.
3/14/1951	5426 San Fernando Road	39764	Emma Boyd	W. R. Harter (C)	900	Enlarge women's restroom and change entry by adding partition. Enlarge men's restroom and change location of stools.
3/26/1951	5426 San Fernando Road	39826	Emma Boyd	W. R. Harter (C)	1,500	Create a 9'x 7' door through brick wall. Plaster close an existing door on the San Fernando Road. Build partitions to enclose offices.
9/04/1951	5426 San Fernando Road	40684	Emma Boyd	W. R. Harter (C)	150	Add a 8'x18' room to existing offices. Add partitions
10/19/1951	5426 San Fernando Road	40950	Emma Boyd	W. R. Harter (C)	250	Close off 10'x12' opening with 2x4 stud wall, plaster both sides, install

¹⁹ Documentation exists for all permits and certificates of occupancy listed in this table.

Issued	Location	Permit/Assessor Record	Owner	Contractor (C) or Architect (A) Engineer (E)	Valuation (\$)	Description
						steel sash and install 3' x 7' fire door
4/7/1951	5426 San Fernando Road	41832	Emma E. Boyd	W. R. Harter (C)	250	At commercial building, make 7'x9' opening through brick wall and install overhead door
7/18/1952	5426 San Fernando Road	42559	Emma E. Boyd	W. R. Harter (C)	500	Relocate 2 toilets and toilet rooms
9/2/1952	5426 San Fernando Road	42872	Emma E. Boyd	W. R. Harter (C)	400	Erect brick veneer on one wall to provide protection on steam boiler
10/14/1952	5426 San Fernando Road	43158	Estate of Emma Boyd	Mackintosh & Mackintosh (E) T. F. Merrill & Sons (C)	3,000	Install 4 new trusses on roof in factory
10/28/1954	5454 San Fernando Road	48173	Ames-Harris Neville Co	Grinnell Co of the Pacific (C)	21,500	Install automatic fire sprinklers in all the existing area of the building.
1/28/1955	5454 San Fernando Road	48716	Ames-Harris Neville Co	QRS Neon Corp (C)	400	Construct a 13' x 2'6" sign on the corner of the San Fernando Road and W Milford Street.
1/20/1956	5426 San Fernando Road	51225	Emma Boyd	W. R. Harter (C)	3,000	Modifications to 1-story office building, new 10'6" ceiling attached to existing trusses, construct new toilet room and private office separations
2/15/1956	5426 San Fernando Road	51405	Emma E. Boyd	W. R. Harter (C)	2,000	Construct new wall to make a Compound Room in the existing masonry building
4/6/1956	5426 San Fernando Road	51834	Products Research Co.	Scott E. Campbell Co.	5,414	Install automatic fire sprinkler system at office, warehouse, and manufacture buildings
3/8/1957	5426 San Fernando Road	54043	Emma E. Boyd	W. R. Harter (C)	2,000	Convert existing former general shop/manufacture area to offices
5/3/1957	5454 San Fernando Road	54427	Ames-Harris Neville Co	Dudley Steel Corp (C)	17,600	Construct a 40 x80 x16 open building with a corrugated galvanized iron roof 23' 2" high

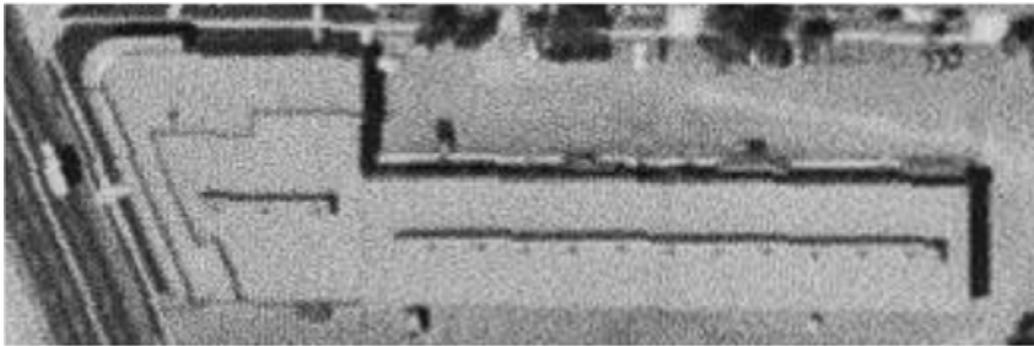

Issued	Location	Permit/Assessor Record	Owner	Contractor (C) or Architect (A) Engineer (E)	Valuation (\$)	Description
11/19/1957	5426 San Fernando Road	55806	Ruth Jennings, Edna Boyd, and Helen Gregg	Eugene Russell (A) Edgar N. Gregg (C)	1,000	Building a separation wall in warehouse, add fire doors
12/5/1957	5454 San Fernando Road	55910	Ames-Harris Neville Co	Dudley Steel Corp (C)	17,600	Enclose existing all steel building with formed girts and galvanized iron sheets.
12/30/1957	5454 San Fernando Road	56038	Ames-Harris Neville Co	Grinnell Co of the Pacific (C)	1,415	Addition to the existing automatic sprinkler system.
5/11/1960	5454 San Fernando Road	N/A	Fullview	D D Demski (C)	150	Cut a door at the side of the building.
12/23/1969	5454 San Fernando Road	N/A	Product Research Company	Carl Linderman (C)	4,000	Construct 2x4 wood sheet partitions
12/12/1969	5454 San Fernando Road	N/A	Product Research Company	Solar Co. (C)	1,687	Construct a metal canopy of size 52'x17' at south elevation

Occupancy and Ownership History

The Project Site has been occupied by several large companies over the course of its history. As noted above, the southern portion of the site was originally owned and occupied by the Glendale Lumber Company. Robert E. Boyd managed and owned the Glendale Lumber Company, and was married to Emma E. Boyd.²⁰ Robert passed away in 1938 making Emma a widow.²¹ Emma likely inherited her husband’s business and land, as a newspaper article indicates that she and daughter Helen were the owners of the Glendale Lumber Company by 1939.²² Building permits issued for the project site at 5426 San Fernando Road as early as 1948 include Emma E. Boyd as owner. Emma likely developed the property inherited from her husband as a means of income. Permits interchangeably include the various tenant company names and Emma’s name as the listed “owner” for roughly two decades up until the mid-1950s when much of the Project Site was developed with buildings serving PRC.

²² “Judge Denies Higher Court Has Ordered Closed Shop Ban,” *The Sacramento Bee*, April 22, 1939, 10.

An overlap in tenants is evident when comparing Sanborn maps, telephone directories, building permits, and newspaper articles as the northern and southern portions of the Project Site developed at different times. The earliest building permits for the Project Site were attributed to PRC, which operated at a building (since demolished) centrally located along San Fernando Road which was constructed in 1945, the year that PRC began. PRC continued to construct buildings toward the central portion of the site and eventually moved into Building A1 and A2 in the late-1950s, as discussed below.

The American Radiator & Standard Sanitary Corporation constructed the subject building (Building A1 and A2 5426 San Fernando Road) between 1946 and 1947 in the northern portion of the site. The American Radiator & Standard Sanitary Corporation had only occupied the building for about 8 years when it was sold to Ames Harris Neville Co., a company that produced canvas products, in 1955.²³ Ames Harris Neville Co. operated at Building A1 and A2 until about 1958, which was the last year the company was listed at that address in the Pacific Telephone Directory. Meanwhile, the southern and central portions of the Project Site were becoming developed; Buildings B, C, D, and F were constructed between 1950 and 1967 for PRC as indicated by building permits, newspaper articles, and job advertisements. By 1967, PRC had developed the entire Project Site to suit the company’s manufacturing needs, remaining its primary tenant through about 1991, when the last newspaper job posting was published at the 5426 San Fernando Road address.²⁴ Subsequent manufacturing tenants have included, Cortaulds Aerospace, PRC-DeSoto International Inc., Video Rental Service, Target Corporation, and Semco.

Emma E. Boyd

Emma E. Boyd was a longtime owner of the Project Site and developed many of the improvements still present today. Emma was born in Indiana in about 1873, to an American father and German mother. She married Robert E. Boyd at age 19, and was living in Utah along with their daughters Ruth and Helen at the time of the 1920 U.S. Census.²⁵ By the 1930 U. S. Census, Emma and her family were living in Glendale, and her husband was the owner and manager of the Glendale Lumber Company, which was formerly located on the southern portion of the Project Site.²⁶ Eight years later Robert passed away, and by 1939, Emma and Helen were owners of his company. After her husband died as the lumber yard business was ending, Emma appears to have been enterprising and continued to own land and redevelop the property. Various building permits issued between the 1940s through to the mid-1950s indicate Emma’s ownership of much, if not all, of the Project Site. Emma passed away in 1956.²⁷

Products Research Company (PRC)

The Products Research Company (PRC) was founded in 1945. The company produced caulking, sealing, coating, and potting compounds for use in a wide range of industrial applications.²⁸ PRC was operating at the Project Site as early as 1945, in a now demolished building which was centrally located along San Fernando Road. PCR slowly began to develop the site and after the mid-1950s began to expand its operations. However, the subject building (Building A 5426 San Fernando Road), was previously constructed for the American Radiator & Standard Sanitary Building between 1946 and 1947 and was not occupied by PRC until about 1956.

In 1960, the PRC national company headquarters was constructed at 2919 Empire Avenue in Burbank.²⁹ A 1960 advertisement indicates that PRC had grown rapidly from a “local industry into a world-wide power in the fields of its efforts...and there are many.”³⁰ By the time the new headquarters was constructed, the company was considered to be one of the nation’s leading manufacturers of calking, sealing, coating, and potting compounds for use in the construction, electronics, marine, petroleum, missile and aircraft industries.³¹ According to a newspaper article, PRC applied for listing on the Pacific Coast Stock Exchange and on the American Stock Exchange in 1964. The company was operating facilities in Burbank and Glendale and in Gloucester City, NJ at

the time. PRC also had manufacturing agreements with companies in Great Britain, France and Japan.³² PRC was renamed as “Products Research Chemical Corporation” by the mid-1960s.³³ A 1991 newspaper job posting indicates that Products Research Chemical Corporation was still operating at the subject property at 5426 San Fernando Road at this time.³⁴

Architectural Descriptions

Project Site

According to the Los Angeles County Assessor, the Project Site is comprised of one parcel 5638-018-032 sized 403,934 square feet, located at the southeast corner of San Fernando Road and Milford Street. The parcel is improved with seven buildings and one structure (**Figure 1 and 17**). The site is entered at the north from Milford Street, and from the west at San Fernando Road. The northern and the western edge of the site along the Milford Street and San Fernando Road are lined with cement concrete sidewalks with mature trees planted in medians along the sidewalk.

The parcel is improved with Buildings A-F and Structure G. Building A1 and A2 was constructed between 1946 and 1947 and is located parallel to Milford Street on the northern edge of the parcel. The elongated industrial warehouse portion of Building A1 projects to the east (**Figure 18**). A mid-century modern style office and warehouse addition at the west (Building A2) was later constructed in 1947 at the northwestern corner of the Project Site at the corner of San Fernando Road and Milford Street (**Figure 19**). Building A1 expanded to the south and west in 1974.

Building B, a reinforced concrete building with wooden trusses was constructed in 1950 and sits parallel on the southern edge of the parcel (**Figure 20**). Building B has a rectangular footprint and was used as a depot for bottled soft drinks in 1950, and by 1970 was used as a warehouse for raw materials and a truck stage.

Building C, a reinforced concrete building with steel columns and beams, was constructed between 1953 and 1964 along the eastern edge of the Project Site (**Figure 21**). Building C is generally square in footprint. A parking lot sits to the south of Building C. Building C was used as office areas and to store punch press tools and rubber sealants.

Building D, a reinforced concrete structure, with concrete foundation and wooden truss roof was constructed between 1953 and 1964 (**Figure 22**). Rectangular in footprint, Building D is located to the north of Building B and to the west of Building C. Building D was originally used as a warehouse for packaging and stage.

Building E, a concrete structure with plastered walls was constructed in 1967 (**Figure 23**). Rectangular in footprint, Building E lies to the north of Building D and was originally used as a factory.

Building F, a concrete structure with plastered walls was constructed in 1967 to the north of Building E, and to the south of Building A (**Figure 24**). Building F is rectangular in footprint and was originally used as a factory and was expanded to the west by 1989.

³⁴ “Chemist: Hazardous Materials,” *The Los Angeles Times*, June 29, 1991, 135.

Structure G, is an open steel gable structure with a truss roof that was constructed by 1970 (**Figure 25**). Located north of Building C and east of Building F, Structure G is rectangular in footprint and was used for open air storage purposes.

Building H, a concrete structure with plastered walls was constructed by 1981 (**Figure 26**). Located north of Building B and south of Building D, Building H has a rectangular footprint and was used as a warehouse.

Building A (5426 San Fernando Road) – Comprised of Buildings A1 and A2

Site

Building A2 is located on the northwest corner of the site at the southeast corner of San Fernando Road and Milford Street. The building is situated at the northwestern extent of the property. Building A2 is attached to the west end of Building A1. Building A1 and A2 extends along the northern edge of the Project Site, parallel with Milford Street (**Figure 27**). Milford Street and San Fernando Road are lined with cement concrete sidewalks and trees. A commercial building sits to the north of Milford Street, and a railroad extends to the west along San Fernando Road.

Exterior

The eastern warehouse portion, Building A1, was constructed first, and was originally used as for shipping. The Utilitarian Industrial style rectangular shaped building has modular prefabricated concrete walls attached to a steel wall matrix, a steel frame structure with monitor skylights along the length of the building, and a flat galvanized iron roof. The northern elevation of warehouse portion is articulated by a ribbon of metal casement windows and large metal roll up doors (altered) at regular intervals that lead to a concrete platform outside for docking (**Figure 28**). There is an ADA access ramp adjacent to the concrete platform on the corner of the building leading to the loading dock, which appears to be a contemporary alteration (**Figure 29**).

The main entrance to former office and display room in Building A2 (altered) is located at northwest corner of the site at the corner of San Fernando Road and Milford Street (**Figure 30**). A concrete staircase flanked by exposed brick retaining walls on either side leads to the primary entrance doors of the Industrial/Mid-Century Modern style office and warehouse building. The one-story building is roughly L-shaped and includes an irregular footprint at the western office portion, and an elongated rectangular footprint at the eastern warehouse portion. A surface parking lot sits to the north of the warehouse portion of the building. Building A2 was constructed in 1947, as a display room and office addition to the warehouse in Building A1. The façade has a curved overhang, flat roof, and raised parapet with vertical concrete scoring. The front elevation has non-original textured stone veneer cladding on either side of the non-original replacement flush metal door. All original display windows appear to have been removed and either walled in or replaced with tall fixed windows (tinted tempered glass). Some original multi-lite metal casement windows remain on the warehouse behind the former office and display area. The overall finish of the building is smooth concrete and stucco, however the finish below the windows on the western wall is painted brick (**Figure 31**). The eastern rear elevation of Building A2 has multi-light metal casement windows and a double door entry to the building. The southern elevation has three entrances to the building, one into the storage space and two into the office space and single hung hopper metal windows on side of the doors.

Interior

The character of the interior spaces is industrial and utilitarian. The display room and offices in Building A2 have been entirely removed and the area is currently used for storage. There are no remaining original features at the building interior, as evidenced by the extensive permitted interior modifications over time. The former office and display area is constructed of board-formed concrete with concrete girders. However, there is warehouse space behind the former office and display room that is covered by a metal truss roof and monitor windows. This area also has a building envelope constructed of board formed concrete.

There is a clear structural division between Building A2 and the long attached warehouse Building A1 to the east, which was constructed a year earlier in a separate building campaign and with a different construction method. While the east wall of Building A2 is board-formed concrete, the construction system of the attached Building A1 is not board formed concrete but appears to be a form of prefabricated modular construction consisting of a metal frame to which are affixed modular concrete sections that form the building envelope. This structural system is visible throughout Building A1 space at the north elevation. The original south elevation of Building A1, however, has a series of board-formed concrete rooms that are accessed off the main space. Metal roll up doors are located at regular intervals on the north and south elevations (Figure 32) of Building A1; and the south elevation and east entrance area of Building A1 are later additions. The main space of Building A1 has trussed roof with corrugated metal sheeting covering and monitor skylights that run the length of the warehouse portion (Figure 33). The metal roll-up doors on the northern wall open onto a docking platform and the concrete loading dock which connect directly onto Milford Street.

A wide corridor with a concrete ramp acts (Figure 34) as an internal entrance from the warehouse Building A1 into the office Building A2. The original office, restrooms, and a display area in Building A2 have been removed. Post and beam construction is visible in the interior space of office portion of Building A2 (Figure 35).

The walls and the ceiling are generally painted concrete in Building A2, but have a stucco finish in the northern portion of the office space of building A2 reflecting later alterations.

Findings

Evaluation

A/1/1 Events

According to Assessor records, the east section of Building A (Building A1) was originally constructed in 1946 as an industrial warehouse structure. The following year, the attached office and display room addition was constructed in the Mid-Century Modern style with limited Streamline Moderne elements (Building A2) at the northwest corner of the property oriented toward San Fernando Road. The Building A was constructed in 1946-1947, in the immediate post-World War II era, at the end of the period of significance for the City's Industrial Development context, which ranges from 1890 to 1955. The Project Site's proximity to the Southern Pacific Railway line was an intentional planned component of the San Fernando Road industrial corridor, an area that was set aside for industrial development in the 1920s strategically due to its proximity to the railways. Much of the corridor was constructed with an emphasis on high quality materials and architectural design. The subject property was first improved in the early twentieth century with early industrial uses including a winery and lumberyard. Following World War II, industrial development in Glendale soared with the closure of the Grand Central Air Terminal airport, a 112-acre site that was extensively developed thereafter. By 2006 there were 575 different industrial companies operating in the area. The subject property as a whole continued in industrial use during the Post World War period, supporting a variety of industrial enterprises, most notably including American Radiator & Standard Sanitary Corporation (c. 1946-1955); Ames Harris Neville Co. (c.1955-1958); and Product Research Company (c. 1945-1991); and generally contributed to economic development of area.

The subject building A2 appears to have been constructed for the American Radiator & Standard Sanitary Corporation, and originally included offices, a display room with large display windows, and a small warehouse with a monitor roof and daylight windows. The attached building A1 included a large utilitarian warehouse with a monitor roof and daylight windows and shipping facilities with multiple garage bays. The American Radiator & Standard Sanitary Corporation occupied the building between about 1946 to 1955, however, it was not a significant building in the corporation's history nor was it representative of the company's corporate identity. The company headquarters were in the truly iconic American Radiator Building, a 23-story black-and-gold skyscraper in New York City designed by Raymond M. Hood and built in 1923-24; a five-story showroom and office addition designed by J. Andre Fouilhoux to harmonize with the existing tower was built in 1936-37.³⁵ The subject building served as a local order processing and distribution facility for the much larger, national company. Originally, the subject building had display windows along the San Fernando Road elevation, which would have showcased the company's latest products. It appears that this company occupied the building for a short period, only a decade. It does not appear that this was a significant company facility but represented a branch facility in a larger sales and distribution network as the headquarters was located in New York City. As such, this was probably not the site of a locally significant industry or manufacturing plant that contributed significantly to the economic development of Glendale, it was only a general sales and shipping facility that was part of a broader network. Furthermore, based upon the maps, aerial views, permit, and occupancy history, it appears the building

³⁵ The American Radiator Building (now American Standard Building), as located at 40 West 40th Street, New York City, New York, is listed in the National Register of Historic Places (May 7, 1980) and as a New York City Landmark. Constructed in 1924, the building is identified for its architectural significance and for its association with master architect, Raymond Hood. The American Radiator Building is an architectural icon associated with the early American Radiator Company, five years before it merged with Standard Manufacturing Company to form American Radiator & Standard Sanitary Company, who built Building A in 1946-1947. National Register Nomination: American Radiator Building (American Standard Building), prepared by Landmarks Preservation Commission, 1979.

underwent substantial changes when PRC moved into the building in the late-1950s, and then later for subsequent occupants--modifications which would fall out of the period of significance for the City's Industrial Development context. PRC occupied Buildings A1 and A2 from the late-1950s through to the early 1990s, yet its headquarters was located in Burbank, with another large facility in New Jersey. Additionally, the remainder of the site development is associated with Products Research Company, which came in after the period of significance for industrial development (1890-1955). As such, the remainder of the Project Site does not qualify for eligibility for association with Products Research Company or as a potential historic district because the buildings were constructed after the period of significance.

As a result, it appears that Buildings A1 and A2 was not significantly associated with a notable business, as both the American Radiator & Standard Sanitary Company that built and occupied the building (c. 1946-1955), and PRC that occupied and remodeled the building after the period of significance, both were headquartered elsewhere around the country and are not significantly identified with this site, and the subject building is not associated with activities that appear to have contributed significantly to economic or industrial development or manufacturing (e.g. aviation, etc.) in Glendale. Further, Building A2 has undergone substantial changes over time, including the removal and/or enclosure of character-defining windows and original openings, modifications to the curved canopy awning including the removal of vertical detailing elements, the removal of historic signage, and the removal of all original interior finishes and spaces associated with the offices and display area. The most significant alteration is the removal of the large display windows that are a primary character-defining feature that is an essential feature of the subject property. Display windows are usually considered a significant character-defining feature for commercial buildings along automobile corridors, such as car showrooms, particularly in how buildings displaying merchandise would appeal to motorists during the mid-20th century. The American Radiator Company's headquarters in New York City featured large display windows that were added in the late 1930s. The subject building (A2) was originally designed as a branch distribution hub, and although it functioned as an industrial warehouse and merchandise distribution center, the building featured display windows set in a Mid-Century Modern style façade oriented toward San Fernando Road as a symbol of its corporate identity and association.

While Building A2 was identified in the *City of Glendale South Glendale Historic Resources Survey* as eligible for the Glendale Register under local Criterion 1 for its association as an "excellent example of industrial development from the immediate post-WWII period, representing the continued growth of San Fernando Road as an important industrial corridor," the changes to the building over time do not allow the building to be considered an excellent example of industrial development in the area. As clearly shown on the Sanborn map and supported by the building permit documentation, the subject Building A2 was built in 1947 as an office and display room for the American Radiator & Standard Sanitary Company, and in order to be considered eligible it would have to retain the integrity of its original façade and display windows. The alteration of the façade and removal of the display windows affects the integrity of design, altering the primary character-defining features of the office and showroom that was designed for the American Radiator & Standard Sanitary Company, as the windows would have been one of the most visible aspects of the facade. Further, the 1996 San Fernando Road Corridor Redevelopment Survey identified several extant pre-World War II industrial buildings as important examples of early industrial development along San Fernando Road. The subject Building comprised of A1 and A2, is not an excellent example of early industrial development along San Fernando Road as an industrial corridor, as it was constructed after World War II, after most of the development along the corridor was completed.

Therefore, Building A2, as located at 5426 San Fernando Road, is recommended ineligible for listing under National Register Criterion A, California Register Criterion 1, or Glendale Register of Historic Resources Criterion 1. Furthermore, Buildings A1 and A2 appear ineligible for listing, and the property as a whole does not appear eligible either.

B/2/2 Persons

Building A1 and A2 5426 San Fernando Road does not appear to be associated with notable persons at the National, State, or Local level. Emma E. Boyd was the early landowner, and developed much of the parcel after her husband, who owned the Glendale Lumber Company passed away. It appears as though Emma was enterprising and developed the Project Site in a piecemeal fashion until her death in the mid-1950s, at a time when the property was rapidly developing due to the PRC tenant. Comparably, Glendale realtor, and real estate developer Lloyd Harmond Wilson notably developed the San Fernando Road industrial corridor, beginning as early as the 1920s. Wilson owned and developed hundreds of parcels for industrial purposes in the area. While Emma was involved in industry development of San Fernando Road and contributed generally to the economic development of the area Emma does not appear to have been significant in Glendale, or in California.

Therefore, Building A1 and A2, as located at 5426 San Fernando Road, is recommended ineligible for listing under National Register Criterion B, California Register Criterion 2, or Glendale Register of Historic Resources Criterion 2.

C/3/3 Design/Architecture

The subject building is an example of a Mid-Century Modern industrial building. The office portion, Building A2, reflects late influences of the Streamline Moderne style in its curved corner form and canopy, and appears to be Modern derivative of the earlier style which was most prominent from 1924 to 1938.³⁶ While Building A2 was identified in the 2014 *City of Glendale South Glendale Historic Resources Survey*, some of the statements related to potential historic eligibility of Building A2 were found to be incorrect due to the low historic integrity present at the Project Site, and the relatively high thresholds necessary for local eligibility. Building A2 was identified in the survey as having a “Mid-century Modern/Industrial” architectural style, with “No major alterations.”³⁷ However, the façade has been substantially altered by removal of the display windows, filling in of window openings with stucco, replacement of the front entrance, installment of tall, narrow, fixed tinted tempered-glass windows, and alteration of the exterior finish with stone veneer. In the survey, Building A2 was not identified as significant as an excellent or rare example of the “Mid-century Modern/Industrial” style, and rather, was identified for its pattern of industrial development along the San Fernando Road corridor. Additionally, the survey did not identify the Streamline Moderne stylistic elements present at Building A2, which include the curved overhanging canopy, flat roof, rounded corner, and unadorned wall surfaces. Furthermore, the Construction History in the DPR 523 forms for Building A2 included only a partial building permit history for the address of 5426 San Fernando Road, which further research has determined also includes building permits for the other seven structures located on the property, and are not specific to Building A2. Research uncovered numerous additional building permits for the property, listed as 5430 and 5454 San Fernando Road, that were not reviewed as part of the DPR 523 forms, which resulted in an incomplete depiction of the site development and all of the

³⁶ “SurveyLA: Los Angeles Citywide Historic Context Statement, Context: Architecture and Engineering, Sub-Context: L.A. Modernism, 1919-1980,” Prepared for the City of Los Angeles, Department of City Planning, Office of Historic Resources, 2019, 65-70. A more notable example of a Steamline Moderne commercial building is the May Company Building in Los Angeles, constructed in 1939.

³⁷ Ibid.

modifications undertaken at Building A2 and at the Project Site. Additionally, notable engineer Eugene Birnbaum was erroneously identified as having worked at the Project Site on alteration building permit from the 1950s as indicated in the DPR 523 forms for the subject building. No such building permit was located in the permit search for the subject building or property.

While the subject building A2 includes a few character-defining features, namely the curved overhang, smooth exterior concrete and stucco walls, and horizontally oriented windows, Building A2 is not an outstanding or distinctive example of Mid-Century Modern architecture, as it is an altered Mid-Century Modern addition to a utilitarian industrial warehouse Building A1. While the Building A2 was identified in the City survey, it doesn't retain integrity to convey its association or design intent. Additionally, while the building was overall Mid-Century Modern in style, it retains some elements of the Streamline Moderne style, including the curved overhanging canopy, flat roof, rounded corner, and unadorned wall surfaces. There are several other Streamline Moderne style buildings within the South Glendale survey area that retain higher integrity, including 701 W. Broadway, 221 N. Brand Boulevard, and 305 E. Harvard Street. While subject building A2 was constructed just after the Streamline Modern style's period of significance, and retains only a few character-defining features, the building does not embody distinctive or exemplary characteristics of the architectural style. Furthermore, the entire removal of the original display windows and display area, that are depicted on the Sanborn maps and in the newspaper rendering, and conversion of the original display area to warehouse use has substantially obliterated the original design and style of the primary façade (street elevations and corner) of building A2. All of the original display windows have been removed and the walls filled in and new incompatible windows installed that are completely out of proportion and the wrong design for the building. Furthermore, the original front entrance has been removed and replaced with an incompatible entrance and door that are not at all in keeping with the original style of the building. The survey registration requirements allow that "Some replacement of original features, including storefronts, may be acceptable given the relative rarity of these resources."³⁸ Similar to the impact of removal of an automobile showroom and display windows, the removal of the building A2's display windows, corner entrance and display area that were directly associated with the original function and design of the building has resulted in a substantial material change that has impaired its ability to convey its original function and historical associations, rendering it ineligible.

Therefore, it is not a rare example of an industrial resource nor is it an excellent or rare example of a Mid-Century Modern or Streamline Moderne style building within the city. In addition, the Modern design of the display windows was a distinctive feature associated with the American Radiator & Standard Sanitary Corporation and with automobile culture during the immediate post-World War II period. Their removal and the alterations to the façade substantially detract from the subject Building A2's integrity of design, workmanship, materials, and association. Further there is no longer a strong distinction between the office portion and the warehouse portion as the interiors have been largely modified over time. As such, the building is not eligible for listing on the National, State, or local registers for its design or architecture.

Therefore, Building A2, as located at 5426 San Fernando Road, is recommended ineligible for listing under National Register Criterion C California Register Criterion 1, and Glendale Register of Historic Resources Criterion 3.

³⁸ *City of Glendale South Glendale Historic Context Statement*, August 14, 2014, page 150.

5. Early Heritage of the City

Building A2 was constructed in the mid-century period, and does not exemplify or reflect the City's early heritage, as buildings associated with its early heritage would have been constructed in the late 19th century, or early 20th century. Building A2 was constructed as a mid-century industrial warehouse with display room and office building and does not have historic associations with important events, notable persons, or for distinctive or exemplary characterizes of an architectural style, nor is representative of the work of a master designer, builder, or architect.

Therefore, Building A2, as located at 5426 San Fernando Road, is recommended ineligible for listing under Glendale Register of Historic Resources Criterion 5.

Integrity

The character-defining features as defined in the City's survey form for the subject property focus on the corner structure (subject building), and not the other buildings that comprise the Project Site. Several of the character-defining features that were identified in the survey have compromised integrity, including modification and removal of several of the steel sash windows, and replacement of the main entrance door and window assembly. ESA found Building A2's facade to be substantially altered – original display windows had been removed and filled, the primary entrance was replaced, incompatible veneer tiles were added, and several original windows were replaced with new non-original tinted tempered glass fixed windows. Furthermore, Building A1 was substantially altered by later additions on the south and east elevations and replacement of the garage bays on the north elevation and alteration of the loading dock. As a consequence, the integrity of association with the American Radiator & Standard Sanitary Corporation and the original industrial warehouse and office building type is materially impaired by these changes since the original function of the building as an office and warehouse facility is largely dependent upon the fact that the front of the building was a display area and offices. Furthermore, the offices and early display areas along San Fernando Road have been entirely removed and the area is presently used for warehouse storage. Additionally, the integrity of design, workmanship and materials is also affected by the changes to the west and north corner facade of the building where the architectural detailing was originally concentrated. The rest of the property was altered after the period of significance (ca. 1946-1955) and substantially detracts from the integrity of the property as an example of a post-WWII industrial facility.

Conclusion

Due to lack of historical significance under Criterion A/1/1, and lack of integrity under both Criterion A/1/1 and Criterion C/3/3, ESA finds the subject building does not meet the threshold of significance for listing in the National Register, California Register or for local listing.

The subject property is not a rare example of a pre-War industrial facility, it is not associated with a highly significant Post World War II industrial enterprise (e.g. aviation, etc.), but was constructed as a branch distributing center for the American Radiator & Standard Sanitary Corporation that made radiators, sinks, and refrigerators. The subject building was not occupied by PRC until after the period of significance. Furthermore, the subject property was largely redeveloped during the 1960s and 1970s by PRC and these changes substantially detract from the property's potential eligibility as a historic district. **Therefore, Building A1 and A2, as located at 5426 San Fernando Road, is recommended ineligible for listing under National Register Criterion A California Register Criterion 1, and Glendale Register of Historic Resources Criterion 1.**

The subject building is not associated with a significant personage. **Therefore, Building A1 and A2, as located at 5426 San Fernando Road, is recommended ineligible for listing under National Register Criterion B California Register Criterion 2, and Glendale Register of Historic Resources Criterion 2.**

As an example of a Mid-Century Modern-style with limited Streamline Modern elements, the building was designed as industrial office and display room for a warehouse and distributing facility. The subject building lacks integrity to convey the distinctive characteristics of its property type and style. The character-defining features that were identified as part of the City's survey focused solely on the 1947 office portion addition (Building A2), and did not address the warehouse portion, nor the other buildings that comprise the Project Site. Several of the character-defining features that were identified in the survey have compromised integrity, including modification and removal of several of the large display windows, and the replacement main entrance door and window assembly. ESA found Building A 5426 San Fernando's facade to be substantially altered – original display windows had been removed and filled, the primary entrance was replaced, incompatible veneer tiles were added, and several original windows were replaced with incompatible new windows. As a consequence, the integrity of association with the American Radiator & Standard Sanitary Corporation is materially impaired by these changes since the original function of the building as a sales and warehouse facility is largely dependent upon the fact that the front of the building was a display area and offices. Furthermore, the offices and early display areas along San Fernando Road have been entirely removed from the interior and the area is presently used for warehouse storage. Additionally, the integrity of design, workmanship and materials is also affected by these changes to the facade of the building where the architectural detailing was originally concentrated. The rest of the property was altered after the period of significance (ca. 1946-1955) for new uses associated with PRC and these changes substantially detracts from the integrity of the property as an example of a post-WWII industrial facility within the period of significance as defined by the City's historic context.

Therefore, Building A2, as located at 5426 San Fernando Road, is recommended ineligible for listing under National Register Criterion C California Register Criterion 1, and Glendale Register of Historic Resources Criterion 3.

Margarita Jerabek-Bray, Ph.D., has 32 years of professional practice in the United States with an extensive background in historic preservation, architectural history, and historical archaeology. She specializes in American Architecture, Modern and Contemporary Architecture, Urban History and Design, and Cultural Landscape, and is a regional expert on Southern California architecture. Her qualifications and experience meet and exceed the Secretary of the Interior's Professional Qualification Standards in History, Architectural History, and Archaeology. Margarita assists clients with strategic advice and historic preservation consultation services to support project success. Highly experienced and solution oriented, she provides historic resources management and preservation consultation services for all stages of project development, from due diligence through planning and design, to preparation of required documentation for environmental review and permitting. She provides expert historic preservation services for environmental review and, when necessary, implements mitigation requirements and preservation treatment measures.

Margarita is a highly experienced and respected authority in the evaluation, management and treatment of historic properties, and is expert in the preparation of legally defensible documentation for compliance with Sections 106 and 110 of the National Historic Preservation Act (NHPA), National Environmental Policy Act (NEPA), Section 4(f) of the Department of Transportation Act, California Environmental Quality Act (CEQA), and local ordinances and planning requirements. She has managed and conducted hundreds of projects for public and private clients throughout California and the United States, and as primary investigator she has authored numerous historic resources technical reports, plan reviews, HABS/HAER/HALS reports, salvage inventories, rehabilitation plans, relocation plans, construction monitoring reports, interpretive programs, as well as curated exhibits, provided input for interpretive websites and assisted in the development of content for documentary films.

Margarita Directs ESA's Southern California Historic Resources Practice, leading a team of historians, architectural historians, and preservation specialists who are a part of ESA's more than 30-member Cultural Resources Group. She has conducted a broad range of planning and technical studies for development projects throughout Los Angeles County. Her relevant on-call contracts with various municipalities and agencies throughout the Southland and her West Hollywood experience, including historic resource assessments for commercial, industrial, studio, and residential resources, is summarized below.

Relevant Experience

Agency On-Call Preservation Contracts. Margarita currently manages ESA's on-call preservation consulting contracts with the City of Santa Monica, City of Hermosa Beach, and serves as principal investigator for historic resources for our on-call contracts with the City of Los Angeles's Department of Public Works Bureau of Engineering, and Los Angeles Unified School District.

Policy Documents. Margarita has contributed her preservation planning expertise to several projects including **Lincoln Specific Plan** (Whittier), and **CPA-7** (Culver Studios). Her knowledge of preservation policy and law is also demonstrated in the **Citywide Survey and General Plan Update** completed by ESA for the City of Hermosa Beach, and the **Culver City General Plan Update**.

City of Santa Monica On-Call Historic Preservation Services, Santa Monica, CA. Project Manager/Principal Architectural Historian. Dr. Jerabek is the primary point of contact and contract administrator for ESA's on-call contract for historic preservation services with the City of Santa Monica. Under her 12-year tenure, ESA's historic division has prepared hundreds of studies including **preliminary assessments, landmark assessments, structure of merit assessments, Secretary of the Interior's Standards plan reviews** and preservation recommendations, **landscape assessments, character-defining features reports** and **CEQA impacts analyses**.

Historic Resources and Preservation Consultation Service for Santa Monica City Hall, City of Santa Monica, CA. Project Manager/Principal Architectural Historian. Prepared a **Section 106 Effects Evaluation** report and provided mitigation services pursuant to a **Memorandum of Agreement for Structural Seismic Upgrades, ADA Improvements, Relocation of Wood Paneling, and Adaptive Re-use of the Historic Jail** under a grant from the Federal Emergency Management Administration (FEMA). Dr. Jerabek was the primary point of contact, provided project management and agency coordination, and served as principal architectural historian for the project. ESA prepared a **HABS report** for the historic jail located in the northeast wing of City Hall; conducted **Plan Reviews** and provided preservation recommendations for the seismic upgrades; reviewed proposed ADA improvements and provided recommendations to avoid impacts; reviewed the wood paneling relocation plans and worked with the City to select a qualified master craftsman and conducted construction monitoring for the project; reviewed the jail rehabilitation project for conversion of the two-story jail into an IT Center and offices and provided design consultation for conformance with the Standards, including in-kind replacement of the historic windows; curated, designed and oversaw installation of an interpretive exhibit in the IT Center lobby. Follow-on services for the City included **Preservation Consultation and Monitoring** for restoration of the entrance to City Hall, and **Paint Analysis** and color recommendations for repainting City Hall. Dr. Jerabek also conducted a **Landscape Analysis** and provided **Plan Reviews** for the City's **Ken Genser Square** and **Tongva Park** projects that received a 2014 *Design Award* from the Westside Urban Forum.

City of Hermosa Beach On-Call Historic Preservation Services. Project Director. ESA has performed a number of surveys, Certificate of Appropriateness, and CEQA compliance reviews for historic structures while serving as a historic preservation consultant for the City of Hermosa Beach. Projects include historic resources surveys on three of the oldest commercial buildings in the downtown area of Hermosa Beach for the City of Hermosa Beach: **Bank of America Building** at 90 Pier Avenue, the **Hermosa Hotel** at 26 Pier Avenue, Art Deco-style **Community Center**, and the Neoclassical Revival-style **Bijou Theatre** located at

1221-1227 Hermosa Avenue. ESA prepared a comprehensive assessment of each building, and reviewed all plans for compliance under the local preservation ordinance and CEQA, which stipulate the use of the Secretary of the Interior's Standards for Rehabilitation as mitigation. Upon implementation of rehabilitation work on the Bijou, ESA also monitored all construction work until final completion. ESA was later commissioned to undertake a Certificate of Appropriateness and CEQA compliance review of interior tenant improvements to the Bijou Theater for conformance with the Secretary of the Interior's Standards. ESA has carried out site reviews of the work to examine the scope and nature of selective demolition and new construction, provided guidance on technical preservation matters, and undertook a substantial completion review of the works. Most recently, ESA provided project review for tenant improvements, and conducting construction monitoring and oversight for restoration of ornamental plasterwork in the Bijou Building. Additionally, ESA provided paint analysis and restoration treatment recommendations for the Art Deco-style Hermosa Beach Community Center.

Hermosa Beach General Plan Update and EIR, City of Hermosa Beach, CA. Project Manager for Cultural Resources/Principal Architectural Historian. Managed ESA's Cultural Resources scope of work and collaborated with Raimi & Associates and PMC to provide consulting services to the City of Hermosa Beach for preparation of a **Comprehensive Integrated General Plan and Coastal Land Use Plan Update and EIR Focused on Sustainability and Low Carbon Future.** Directed city-wide reconnaissance survey to identify potentially eligible historical resources. Developed historic contexts and themes for the City's historical resources. Reviewed and provided recommendations for revisions to the preservation ordinance. Provided input for preparation of historic preservation goals and policies for the General Plan update. Managed preparation of the cultural resources technical report, and oversaw preparation of the historic resources, archaeological and paleontological discussions and analyses for the EIR.

City of Long Beach, Environmental Consultation and HABS Documentation. Margarita has assisted the City of Long Beach by preparing documentation for the **City Hall and Library Complex HABS** and associated landscape plaza; she provided historic resources support for the City's EIR, and prepared documentation for the **Atlantic Theater HABS** and an **Interpretive Exhibit** for installation in the new North Long Beach Public Library.

City of Whittier, Preservation Consultation Services for the Public Library Rehabilitation Project. Margarita lead a **Historical Resources Assessment and Impacts Analysis** and provided design consultation for rehabilitation of the Modern-style Whittier Library. Constructed in 1958, the property is significant for its association with Mid-Century Modernism, postwar period institutional properties, and architect William Henry Harrison. ESA found that the library possesses sufficient historical significance and architectural merit to convey its significant as an individual resource under National Register Criteria A and C. Margarita's role on the project was to direct and manage the ESA project team, coordinate with the architect and City, provide review and internal quality assurance/quality control to the ESA team in the preparation of both the Historic Resources Assessment to evaluate the significance and integrity of the building, as well as for the plan review that was conducted to evaluate the proposed project's conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties, and hearing attendance. ESA is

currently completing a **HABS report** as baseline documentation for the rehabilitation project.

City of Burbank, Historic Preservation Consultation Services. Margarita directed preparation of ESA's historic resources technical report and CEQA impacts analysis, and prepared the historic section of the **IS/MND for the Burbank Reservoir No. 1 Replacement Project**, which evaluated the eligibility of the Burbank Reservoir facility and analyzed the potential impacts of the Project for compliance with the CEQA. Margarita directed preparation of ESA's historic resources technical report and historic resources EIR section for the **Burbank Bob Hope Airport Replacement Terminal Project EIR**, which evaluated the eligibility of the buildings and structures for eligibility as a potential historic district and as individual resources, and analyzed the potential impacts of the Project for compliance with the CEQA. While the Airport did not appear eligible as a historic district, ESA evaluated 11 hangars and buildings over 45 years in age as potential individual resources. The majority of the buildings and structures were found ineligible, however, Hangars 1 and 2, which are the earliest intact hangars, were recommended eligible for the National Register, California Register, and for local listing. Under contract with the City of Burbank, Margarita managed and conducted a historic resources impacts analysis and plan review for **Rehabilitation of the Casting Building** as a Fitness Center, by Marmol Radziner and Associates, AIA, located in the Disney Studio's Historic District. The Project repurposed and expanded the existing 4,000 square feet Casting Building on the Studio Lot by about 8,700 square feet for an Employee Fitness Center adjacent to the historic Commissary. Margarita provided design consultation for conformance with the Secretary of the Interior's Standards to rehabilitate the Casting Building as a fitness center. To reduce potential impacts, Margarita prepared a HABS report to record the Casting Building in professional large format HABS photographs and a narrative history and description of the building.

SoCal Historic Resource Surveys. Margarita has managed and conducted several large historic resources survey projects including three surveys for the **Adelante-Eastside** (Boyle Heights), **Wilshire Center/Koreatown**, and **Normandie 5** redevelopment areas that were among the earliest to utilize *SurveyLA* tools and methods and to employ the Multiple Property Documentation Approach, working in close collaboration with the Los Angeles Office of Historic Resources. These surveys have been incorporated into the **Los Angeles Citywide Survey**. Other notable accomplishments include **Hermosa Beach Citywide Survey**, and **Santa Monica North of Wilshire Survey** for which she served as Project Director.

Mills Act Applications and Architectural Conservation. Margarita has assisted applicants in Los Angeles, Beverly Hills and West Hollywood with the preparation of Mills Act Applications. Her expertise in the preservation of Modern architecture is represented by the Landmark nomination and Mills Act Application for Victor Gruen's **Rosenstiel Residence**, 1210 Coldwater Canyon Drive in Beverly Hills. Her forward-looking landmark nomination for a Mills Act application for the Post-Modern **Sun Tech Townhomes** in Santa Monica, illustrates her broad ranging knowledge in resources of the recent past. Her conservation and interpretation skills are represented by the award-winning **Montebello Home Savings and Loan** project that involved cleaning and restoration of the historic bank building and art works designed by Millard Sheets Studio, and design and installation of a 5-panel interpretive exhibit and rediscovery of a lost tapestry originally designed for the building, for which she received a *California Preservation Design Award, 2016*. Her in-depth and award-winning preservation work includes the **RMS Queen Mary Survey of Fine**

and Decorative Art, the RMS Queen Mary Historic Structure Report, and the Queen Mary Conservation Management Plan (*California Preservation Foundation Preservation Design Award, 2012*).

Environmental Documentation and Compliance with CEQA. Margarita has prepared a full range of CEQA documentation for historic preservation projects throughout greater Los Angeles including Categorical Exemption Letters, assessments and plan reviews for Certificates of Appropriateness, Initial Studies/MNDs, Focused EIRs, and EIRs. A partial list of important environmental documents for projects in Los Angeles involving substantial historical analysis completed by Dr. Jerabek-Bray includes the **LAX Specific Plan Amendment Study EIR, Academy of Motion Pictures Project EIR, The New Century Plan EIR for Westfield, Washington Square EIR, Sunset Doheny Mixed-Use EIR, One Santa Fe Mixed-Use MND, Lindbrook & Gayley Mixed-Use MND, 6230 Sunset Mixed-Use Project EIR, Hollywood Center EIR, Palladium EIR, Sunset and Crescent Heights EIR, and Yucca and Argyle EIR.** In Santa Monica she contributed to the **Fairmont Miramar Hotel & Bungalows Revitalization Plan EIR, St. John's Health Center Development Agreement Addendum EIR, Santa Monica Pier Gangway Project and Phase 4 Structural Upgrade,** and CEQA support for the **Santa Monica-Malibu Unified School District-Wide Facilities Plan.** In Pasadena her experience includes the **Glenarm Power Plant Repowering Project EIR.** In Long Beach she provided expertise and support for the **Art Exchange Redevelopment Project EIR** support, and the **Golden Shore Master Plan EIR.**

Educational Facilities and University Campuses, CA. Principal Investigator/Project Manager. Dr. Jerabek-Bray has conducted numerous evaluations of school and university campuses throughout Southern California. Under ESA's on-call contract with the Los Angeles Unified School District, she has managed and completed over 30 task orders involving historic resources, including campus assessments, character-defining features analysis, and project reviews for compliance with CEQA. For example, Margarita managed and conducted preparation of a historic resources technical report for Jefferson High School and provided preservation design consultation for this site-specific school upgrade and modernization project under the District's School Upgrade Program (SUP). The proposed project included the rehabilitation of existing character-defining buildings and landscapes, demolition and removal of non-contributing buildings, and construction of new facilities. Rehabilitation work included modernization and seismic upgrade to existing buildings. Because the school site is considered a historical resource under CEQA, Margarita provided design consultation for conformance with the Secretary of the Interior's Standards to reduce potential project impacts to less than significant. Once project plans were developed, Margarita oversaw review of the proposed project by ESA historic staff and completed impacts analysis findings regarding potential project impacts to identified historical resources that would be affected by the project. Margarita also provided project management, oversight and contributed to the preparation of CEQA and NEPA procedural guidelines to help the Los Angeles Unified School District (LAUSD) to comply with the historical resources requirements of CEQA and NEPA, and to implement practical approaches to preserving culturally significant resources whenever possible. The LAUSD's Office of Environmental Health and Safety requested the preparation of CEQA and NEPA guidelines, in addition to design guidelines and treatment approaches, specifically in support of the School Upgrade Program, and generally to guide ongoing repair and maintenance work on these sites. The guidelines build upon the District's ongoing efforts to identify historical

resources, including the recently updated Historic Context Statement, survey of 55 campuses, creation of an ArcGIS-compatible database with current and previous survey results, and a Historic Resources Inventory. Dr. Jerabek-Bray worked with LAUSD and facilities staff to determine the scope, class, and type of projects that would impact historical resources and need to be addressed in the procedural guidelines. As a final work product, Dr. Jerabek-Bray authored a CEQA and NEPA procedural guidelines document that included the following sections: introduction, regulatory setting, environmental setting, project description, management and planning guidelines, procedural flow charts for CEQA and NEPA/Section 106, and standard mitigation measures.

Margarita served as the project manager and principal investigator for the district-wide cultural resources survey for Long Beach Unified School District (LBUSD) which included the evaluation of 70 potentially eligible District school facilities for listing in the National Register and California Register, and included preservation guidelines for the district-wide facilities modernization program. She conducted CEQA Compliance reviews for select projects including rehabilitation of Long Beach Polytechnic Auditorium and Woodrow Wilson Auditorium. Margarita completed a district-wide historic resources survey for the Santa Monica Unified School District, and provided preservation consultation for modernization and additions to selected school sites.

As part of the larger USC Master Plan Project Margarita prepared a historic resources analysis for the USC Student Union Project IS/MND evaluating the Formalist Modern Norman Topping Center and impacts to the adjacent Commons Building and surrounding historic district. She also prepared a HABS report for the Schoenburg Institute at USC. Other HABS reports for educational facilities include the Gymnasium at the University of La Verne, and the Administration Building at Harvard-Westlake Academy.

Harkham Hillel Hebrew Academy Renovation and Expansion Project, Historic Resources Assessment and Impacts Analysis, Beverly Hills, CA. *Principal Investigator/Project Manager.* Margarita directed the historic significance analysis of two school buildings—the original Oakhurst Building designed by master architect Sydney Eisenshtat in 1963 in the Modern Style and the Doheny Building constructed in 1989 and designed by Harshad Patel. She oversaw preparation of an intensive-level Historic Resource Assessment Report for the two buildings in accordance with the California Office of Historic Preservation’s requirements for preparing historic resource evaluation reports. ESA found that the Oakhurst Building is eligible for listing on the National Register of Historic Places and the California Register of Historical Resources under criteria A/1 and C/3, but it did not meet the requirements for local eligibility under the City of Beverly Hills criteria. The client plans to rehabilitate the existing buildings, which would be updated for current use and continue to function as school buildings. The proposed project would add two additions to the rear of the property in order to accommodate additional classroom and gymnasium space. Margarita oversaw preparation of a character-defining features analysis and provided design consultation for conformance with the Secretary of the Interior’s Standards to reduce potential project impacts to less than significant. She also conducted an impacts analysis of the proposed project and prepared a preservation plan that was incorporated into the project as a project design feature to ensure the project would meet the Secretary’s Standards for Rehabilitation. The project has been reviewed and approved by the City of Beverly Hills as an Initial Study/Mitigated Negative Declaration.

Rehabilitation of the Dunbar Hotel, 4255 S. Central Avenue, Los Angeles, CA. *Project Manager/Principal Architectural Historian.* As a Project Manager, Dr. Jerabek-Bray directed a careful space-by-space inventory of character-defining features (including all windows) associated with the Dunbar Hotel's period of significance (1928-1970). This included photo documentation of each feature along with a written description, condition, and treatment options. ESA recorded 425 character-defining features and spaces into an electronic database. Dr. Jerabek was principal author for the rehabilitation report that included a project description, methods, historical background and construction history, accompanied by historic photographs, an architectural description of existing conditions, a maintenance plan for high-integrity features, a restoration plan for low-integrity features, and a replication plan. The written report also provided a list of any issues and concerns that should be taken into account during the building rehabilitation and for the long-term preservation of the Dunbar Hotel. The hotel reopened in June 2013 as a senior living facility amidst local fanfare, "An encore for the historic Dunbar Hotel," *Los Angeles Times*, June 11, 2013. The project was the recipient of the 2014 *Westside Prize* from the Westside Urban Forum and recipient of a 2014 *Preservation Award* from the L.A. Conservancy.

Historical Resources and Preservation Consulting Services for The Culver Studios, Culver City, CA. *Project Manager/Principal Architectural Historian.* Since late 2014, Dr. Jerabek-Bray and ESA's Historic Resources Practice has provided a suite of services including historical resources evaluation, environmental review and documentation, and historic preservation consultation services for the CPA-6 Specific Plan, and the CPA-7 Specific Plan known as "The Innovation Plan," a blueprint for the future of The Culver Studios. Dr. Jerabek is the point of contact for historic services, attends client and city meetings, attends public hearings, provides technical direction and advice, directs and conducts the preparation of report deliverables, directs and conducts construction monitoring, and acts as the City's preservation officer for the Innovation Plan. The Plan will transform the 14.3-acre Studio into a new media production hub, keeping the Studio on the vanguard of changing production practices in the entertainment industry. The Culver Studios is a motion picture studio in downtown Culver City established in 1919 by Thomas Ince, and eventually became the home of RCA, one of the "Big Eight" major motion picture companies in the Los Angeles metropolitan area. The Studio was the production site of historically significant motion pictures like *King Kong*, *Gone with the Wind*, and *Citizen Kane*. The Innovation Plan will restore and re-group historic structures adjacent to the Mansion, build new support buildings near existing historic sound-stages, and establish a creative campus in the core of the 14.3-acre studio lot. The Studio's 100-year history will be showcased, historic bungalows will be preserved, and original landscaping in front of the Mansion will be restored. The Innovation Plan balances the need to provide state-of-the-art studio facilities, while retaining the Studio's unique ambiance and prominent place in the community. ESA surveyed and evaluated the Studio's historical resources, provided input to the development of The Plan to reduce impacts to historical resources, completed HABS report for Bungalows S, T, U and V, prepared a Relocation and Rehabilitation Plan for the bungalows, conducted construction monitoring for relocation of the bungalows, conducted plan reviews for tenant improvements to the Mansion and associated historic buildings in the historic core, conducted a landscape analysis, and provided documentation and input for the landscape restoration. ESA also prepared the environmental documentation for The Innovation Plan EIR, and is

implementing the mitigation program for historical resources including HABS documentation of Stages 2/3/4 and a salvage program, preparation of a preservation plan for the Studio, and development of an interpretive program for the Studio.

Historic Resources and Preservation Consultation Services for the Redevelopment of the Fred C. Nelles State Reform School, Whittier, CA. *Project Manager/Principal Architectural Historian.* The Fred C. Nelles Correctional Facility is a listed California State Landmark, and is significant as the state's first reform school for boys. The 1920s-1930s Tudor Revival-style campus is currently vacant and will soon be redeveloped as a multi-use residential and commercial project, "The Groves", entitled under the certified Lincoln Specific Plan EIR. For over a decade, Dr. Jerabek-Bray has been providing Historic Resources and Preservation Consultation services to the developer, Brookfield Homes. Work began with preparation of a historic resources assessment report to clarify the regulatory status and assessed the potential eligibility of a historic district. No district was found to be present, but eight individual resources were identified. Margarita conducted an opportunities and constraints analysis and provided input to the developer on managing impacts to historic resources and the feasibility of adaptive reuse of the individual buildings for the project. She directed preparation of feasibility studies for the EIR, that were peer reviewed by the City's consultants. She provided peer review of the Lincoln Plan EIR on behalf of the developer, and attended city meetings and hearings for the EIR. Once the EIR was certified, she worked with the developer's architect to prepare rehabilitation plans for the individual resources to be retained and adaptively reused. The rehabilitation plans were peer reviewed by the City and the City's preservation consultant. She directed ESA's historic team in the completion of a HABS/HALS for the campus, with photography by Positive Image. She also worked with Eye-Glass Productions on a documentary film, and oral histories. Dr. Jerabek-Bray assisted the client to implement a full suite of mitigation measures including a heritage trail, a signage program, oral histories, salvage program, and construction monitoring for rehabilitation historic buildings. She recently completed consultation services and construction monitoring for adaptive reuse of the school's Commissary as a community center (The Commons), which is the first historic building to be restored. The Commons project received a Gold Nugget merit award (2020) for best rehabilitation project from Pacific Coast Builders Conference (PCBC).

Home Savings and Loan Art and Architecture Conservation Services, Interpretive Exhibit, Montebello, CA. *Project Manager/Principal Investigator.* Margarita provided project management and oversight for the conservation work of the art and architecture and an interpretive exhibit for the Montebello branch of Home Savings and Loan Association. Constructed in 1973, the Montebello branch was designed by Millard Sheets (1907-1989), an accomplished, nationally prominent artist and designer, with integrated art works by the Millard Sheets Design Company. The building and art works were preserved in preparation for the building's new use as a medical office by PIH Health. ESA provided oversight for the conservation work undertaken by Preservation Arts. Additionally, Margarita assisted with the development of a project schedule, conducted conservation monitoring and documentation, and provided project oversight during the implementation of the conservation project to ensure that the cleaning and repair of the art works and exterior architectural materials was conducted in accordance with accepted standards for art and architectural conservation work, that the work completed is of acceptable quality, and that the project stayed on schedule and within budget. After the conservation work was completed, she oversaw the development of an interpretive exhibit to

beautify the interior and protect the building's important art, architecture, and history. The exhibit contains professionally mounted permanent narrative panels and photographic enlargements with captions illustrating the key information about the Montebello Branch and its historic use. One of the highlights of the interpretive exhibit is a reproduction of the original tapestry hung its original location for which ESA coordinated with the Mingei International Museum. The project was the recipient of a prestigious 2016 *Preservation Design Award* from the California Preservation Foundation.

Rancho Los Amigos South Campus EIR, County of Los Angeles, Department of Public Works, Downey, CA. *Project Manager/Principal Architectural Historian.* The County of Los Angeles (County) proposes redevelopment of a portion of the Rancho Los Amigos (RLA) South Campus which is located in the City of Downey. The 74-acre RLA South Campus was the home of the "Los Angeles County Poor Farm" that was established in 1880s to provide room and board to indigent citizens in exchange for agricultural labor, then served as an infirmary and later evolved into a hospital facility in 1932. The RLA South Campus functioned as a major hospital complex from 1956 to the 1990s, when it was abandoned. The RLA South Campus is currently unoccupied and has been designated as the RLA Historic District in the National Register of Historic Places. The County is proposing redevelopment of a 21-acre portion of the RLA South Campus with County uses, including a Sheriff's Station Crime Laboratory, Internal Services Department Headquarters, and Probation Department Headquarters. The project will include supporting parking and installation of utilities and other features on a site that has been abandoned for nearly 30 years. Building demolition and/or repurposing or relocation of existing buildings will be required. ESA lead the CEQA process on behalf of the County, including preparation of all technical studies in support of a full-scope EIR for the RLA South Campus Project. This included a Historic District Evaluation, archaeological surveys, traffic, water supply, arborist services, and all other CEQA-required topics. ESA is also served in an Executive Consultant role to the County, to advise on other potential future projects at the RLA Campus.

Albert Binder Travel Fellowship, 2012 and 2013

PennDesign Departmental Grant, 2011-2013

Alison is a senior architectural historian with 9 years of professional and academic experience with a background in historic preservation, design, and museum collections. Her work with historic resources and cultural heritage in California has included managing and authoring historic resource assessments, National Register Nominations, historic structure reports, feasibility studies, Federal Historic Preservation Tax Credit applications, in addition to extensive archival research and resource documentation. Alison applies her understanding of preservation design and historic interiors to inform impacts analyses of proposed development and recommendations for adaptive reuse.

Relevant Experience

Earl Carroll Theatre Historic Structure Report, Los Angeles, CA. *Senior Architectural Historian.* Alison was the lead author of the Historic Structure Report created for the rehabilitation of the historic Earl Carroll Theatre in Hollywood. Constructed in 1938, the property is significant for its association with owner-operator Earl Carroll, Hollywood nightlife, and architect Gordon B. Kaufmann. The theatre is a listed LA Historic-Cultural Monument and has been identified as eligible for the National Register. In recent years, the theatre has been rented by television network studios as sound stages, and as a result some public areas have been modified over time. Alison conducted supplemental in-depth research, participated with the creation of a detailed interior and exterior character-defining features analysis, and assisted with the analysis of the theatre's current condition. She developed recommendations in compliance with the SOI standards that sensitively guide stakeholders with ongoing preservation efforts.

Celes King III Swimming Pool Historic American Building Survey, Los Angeles, CA. *Senior Architectural Historian, Deputy Project Manager.* ESA was hired to conduct HABS documentation for the City of Los Angeles Park and Recreation Department. Constructed in the early 1960s, the Celes King III Swimming Pool was designed by architect Albert Criz in the Mid-Century Modern-Expressionist style. Alison conducted in-depth research related to the history of the surrounding recreational complex, construction of the swimming pool, architect, and neighboring communities.

Alpine Village Preservation Consulting Services, Unincorporated Los Angeles County, CA. *Senior Architectural Historian.* Alison was the lead author of the preliminary historical significance evaluation determination for the Alpine Village complex, a European-style shopping center located near Torrance, California. Comprised of seven buildings constructed between 1969 and 1974, the complex is an example of an increasingly rare type of roadside architecture, and retains high historic integrity. Alison participated in conducting in-depth construction chronology research, determining the complex's period of significance, and

identified both interior and exterior character-defining features for the property to help guide ongoing planning efforts.

Whittier Public Library, Whittier CA. *Senior Architectural Historian.* Alison was the lead author of the Historic Resources Assessment which determined that the library is significant as an individual resource under National Register Criteria A and C. Constructed in 1958, the property is significant for its association with Mid-Century Modernism, postwar period institutional properties, and architect William Henry Harrison. Alison assembled the construction history for the library and the Whittier Civic Center. She created a detailed character-defining features analysis identifying significant and contributing features at the property's interior, exterior, and site. Alison coordinated with the project architect to ensure that the project met the Secretary of the Interior's Standards (SOI) in order to meet community's contemporary needs while respecting the building's historic character. Alison authored and oversaw the production of a HABS report to document the library building prior to selective demolition and project construction.

Benjamin Franklin Elementary School Historic Resource Evaluation and Mitigated Negative Declaration, San Diego, CA. *Senior Architectural Historian.* Alison conducted an HRA for the 1930s, 40s, and 50s-designed elementary school campus. The property was found to be a historic district eligible for its association with the post-war development of the Kensington neighborhood, and for its association with two master San Diego architects. The proposed project was reviewed for compliance with the Secretary of the Interior's Standards, and a CEQA analysis was performed, resulting in the Mitigation Measures and design considerations for future construction within the district. Alison authored and oversaw the production of a HABS report to document the campus and its buildings prior to project construction.

1202 3rd Street Promenade Preservation Consulting, Santa Monica, CA. *Senior Architectural Historian.* Constructed in 1949 as a JC Penny department store, the commercial building was designed in the Late Moderne style. ESA previously worked to produce a Landmark Assessment Report, and today, the property is recognized as a City of Santa Monica Landmark. Alison conducted a SOI Standards conformance review of a proposed tenant improvement project for a Certificate of Appropriateness.

1221 Hermosa Avenue Preservation Consulting, Hermosa Beach, CA. *Senior Architectural Historian.* ESA serves as a historic preservation consultant to the City of Hermosa Beach, and has a longstanding relationship with the building at 1221 Hermosa Boulevard, known as the Bijou Building. The building is a former historic theatre and bank designed in the NeoClassical Revival style, constructed in 1923. Alison evaluated proposed tenant improvement modifications including the removal of non-original features and the retention of original features related to original theatre and bank uses. Alison has conducted design reviews which included an understanding of all modifications to the space over time, character-defining features analyses, and reviews of proposed plans against CEQA thresholds and the SOI Standards for compliance. Alison is currently participating with overseeing the construction monitoring efforts for the theatre space as part of this ongoing project.

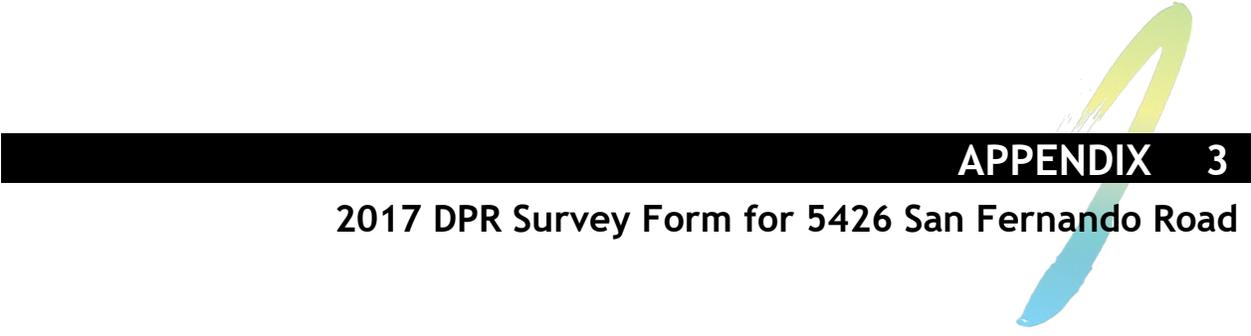

Universal Hilton Historic Resources Technical Report and Environmental Impacts Report for 555 W Universal Terrace Parkway, Los Angeles, CA. *Senior Architectural Historian.* The Universal Hilton Hotel was designed by master architect, William L. Pereira in 1983 in the Postmodern style. As one of Pereira's final commissions, the hotel building was originally part of a master plan and was designed to accommodate visitors to the expanding Universal Theme Parks. Alison conducted in-depth architect and postmodern style research, and evaluated the property for historic significance as part of the Historic Resources Technical Report.

Los Cerritos Wetlands Restoration Plan Program, Cultural Resource Assessment, Seal Beach, CA. *Senior Architectural Historian.* The Los Cerritos Wetlands Restoration EIR project will reinstate historic wetlands to a previously developed oil rig/production site that has been in operation since the early 20th century. As part of the larger restoration plan program, ESA was hired to conduct a cultural resources study to observe, document, and prepare preliminary mitigation measures related to identified built environment resources. Alison collaborated with the archeology team during a field visit to identify potential sites for later investigative studies. She reviewed historic aerial photographs, and conducted research to determine the companies and general ages of oil-industry related infrastructure including oil rigs, operations sheds, and decommissioned tank farms. Mitigation recommendations presented for the structures included Historic Resource Assessment reports to be conducted in the future.

3325 Monterey Road CEQA Impacts Analysis and Design Review, San Marino, California. *Senior Architectural Historian.* A two-story Art Deco style single-family residence, constructed in 1927 in San Marino, California was determined to be a historic resource. Proposed modifications to the residence included a two-story rear addition and building rehabilitation. Alison assisted with preservation design consultation and conducted a plan review for conformance with the SOI Standards for the proposed project. She coordinated with the project architect to better convey preservation components of the proposed work into the drawing set for city review. The review required a character-defining features analysis to determine the level of significance of the remaining features.

Golden Gate Village Historic Resource Evaluation, Marin City, CA. *Architectural Historian.* The highly-intact Golden Gate Village low-income housing complex was constructed in 1958 to house many of the former Marinship workers and their families. Designed by prominent mid-century designers including Aaron G. Green, John Carl Warnecke, and Lawrence Halprin, the property serves as an example of a well-designed housing complex, significant as a product of post-war urban development and for its prominent mid-century designers. Alison performed the site visit and conducted research through local and private archival repositories, plan analysis, and interviews, to produce the report narrative and historic evaluation for the property. Today, the property is listed on the National Register of Historic Places.

McDonnell Hall/Our Lady of Guadalupe Chapel Historic Structure Report, San Jose, CA. *Architectural Historian.* Constructed as a parish church in 1914, the building moved to its current location in 1953. Here, the building served as a

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

I am exempt under Sec. _____ B&PC for this reason _____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

Yes

No

Worker's Compensation Declaration

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation insurance or a certified copy thereof. (Sec. 3800, Labor Code)

Policy No. 2092 Company SELF INSUR Worker's Comp. expiration date _____

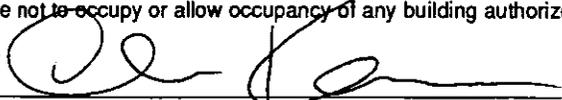

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.

Applicant _____ Date _____

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. This permit becomes null and void if construction or work is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 90 days at any time after work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

PLOT PLAN INSTRUCTIONS

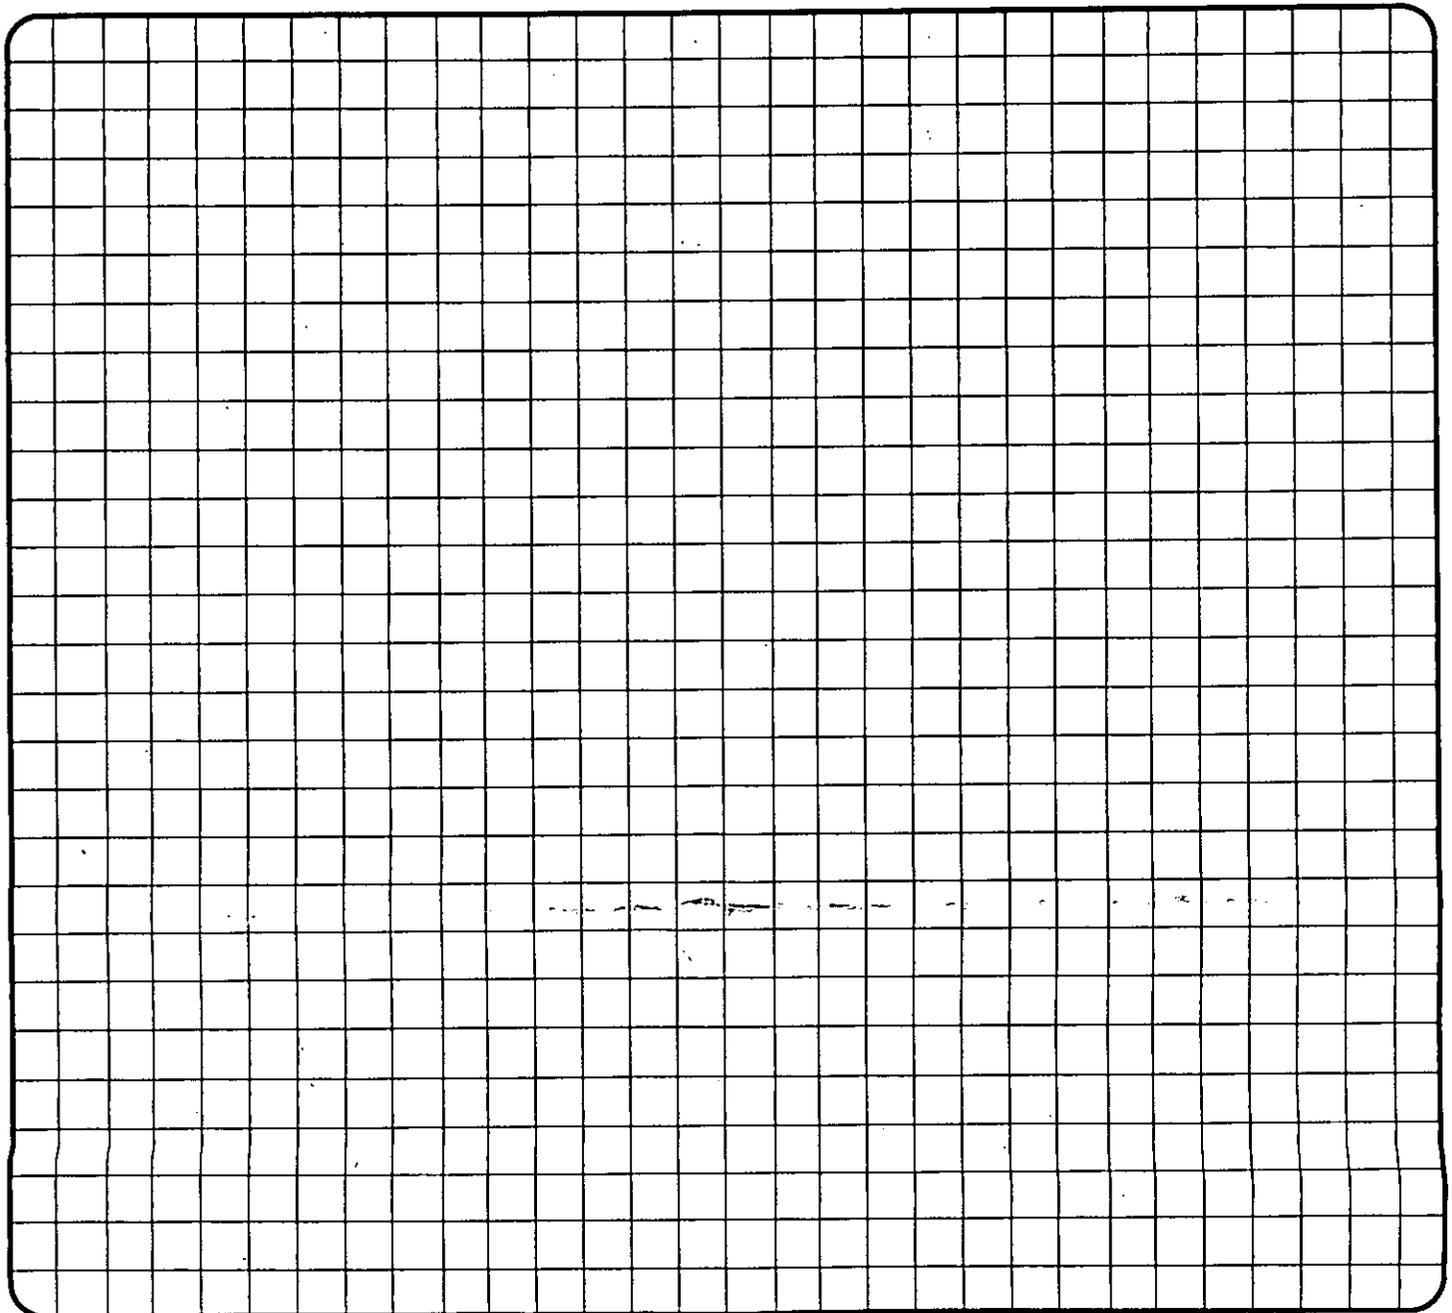

City of Glendale
Permit Services Center

PLEASE SHOW ON PLOT PLANS FOR BUILDING PERMIT THE FOLLOWING INFORMATION:

1. Make the bottom of the page the street frontage.
2. Draw the shape of the lot only if it is irregular.
3. Put the dimensions of the lot in the brackets provided on the sheet for right, left, front and rear; or if it is irregular, on the outside of the lot lines.
4. Draw where existing structures sit on the property and show length/width size. Locate all structures on the lot and their distance from one another.
5. Draw where the new construction will be located: ie. onto an existing building or on the property and its size.
6. Show how far from the property lines existing buildings and new construction will be.

STREET NAMES

1. Give the names of the road or street your property is located on. Mark an X where the building is located.
2. Show the nearest intersecting streets or roadways.
3. Check the appropriate box if the property is a corner or hillside lot.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

I am exempt under Sec. _____ B&PC for this reason _____

PERMANENT

September 25, 1980

Mr. Carl Linderman
5426 San Fernando Road
Glendale, CA. 91203

Re: 5426 San Fernando Road
Request for Variance

Dear Mr. Linderman:

The Building Commission at the September 24, 1980 meeting held a public hearing on your request for variance from the requirements of the 1976 Edition of the Uniform Building Code as adopted by the City of Glendale, to allow the use of 1979 Edition of the Code. This request for variance was by application #76230 and applied to the above-referenced address, constructed.

The Commission, after due consideration, found that the facts required by the 1976 Edition of the Uniform Building Code as adopted by the City of Glendale for the granting of a variance, were present. Your request for variance was granted based on the following facts:

1. That the strict application of the provisions of this Code would result in practical difficulties or unnecessary hardships inconsistent with the general purpose and intent of this Code, because if the project was delayed for ten months, the project could be built as planned by the designer.
2. That there are exceptional circumstances of conditions applicable to the building or structure involved or to the intended use or development thereof that do not generally apply to other buildings or structures, the construction of which is regulated by this Code.
3. That the granting of a variance will not be materially detrimental to the public welfare or injurious to the property or improvements in the neighborhood in which the building or structure is located; and in granting a variance, the Building Commission may impose such conditions as are necessary to protect the public health, safety or welfare in accordance with the purpose and intent of this Code. It will not be detrimental because if the project was delayed for ten months, the project could be built as designed by the designer.

Mr. Carl Linderman
Re: 5426 San Fernando Road

September 25, 1980
Page 2

4. That the granting of a variance will not be contrary to the objectives of this Code because the building will be designed in compliance with the 1979 Code.

Section 3-41 of the Glendale Municipal Code, 1964, provides that any person aggrieved by the decision of the Commission granting or denying a variance may appeal to the City Council within fifteen (15) days after the act or determination appealed from, by filing with the City Clerk a written notice of appeal.

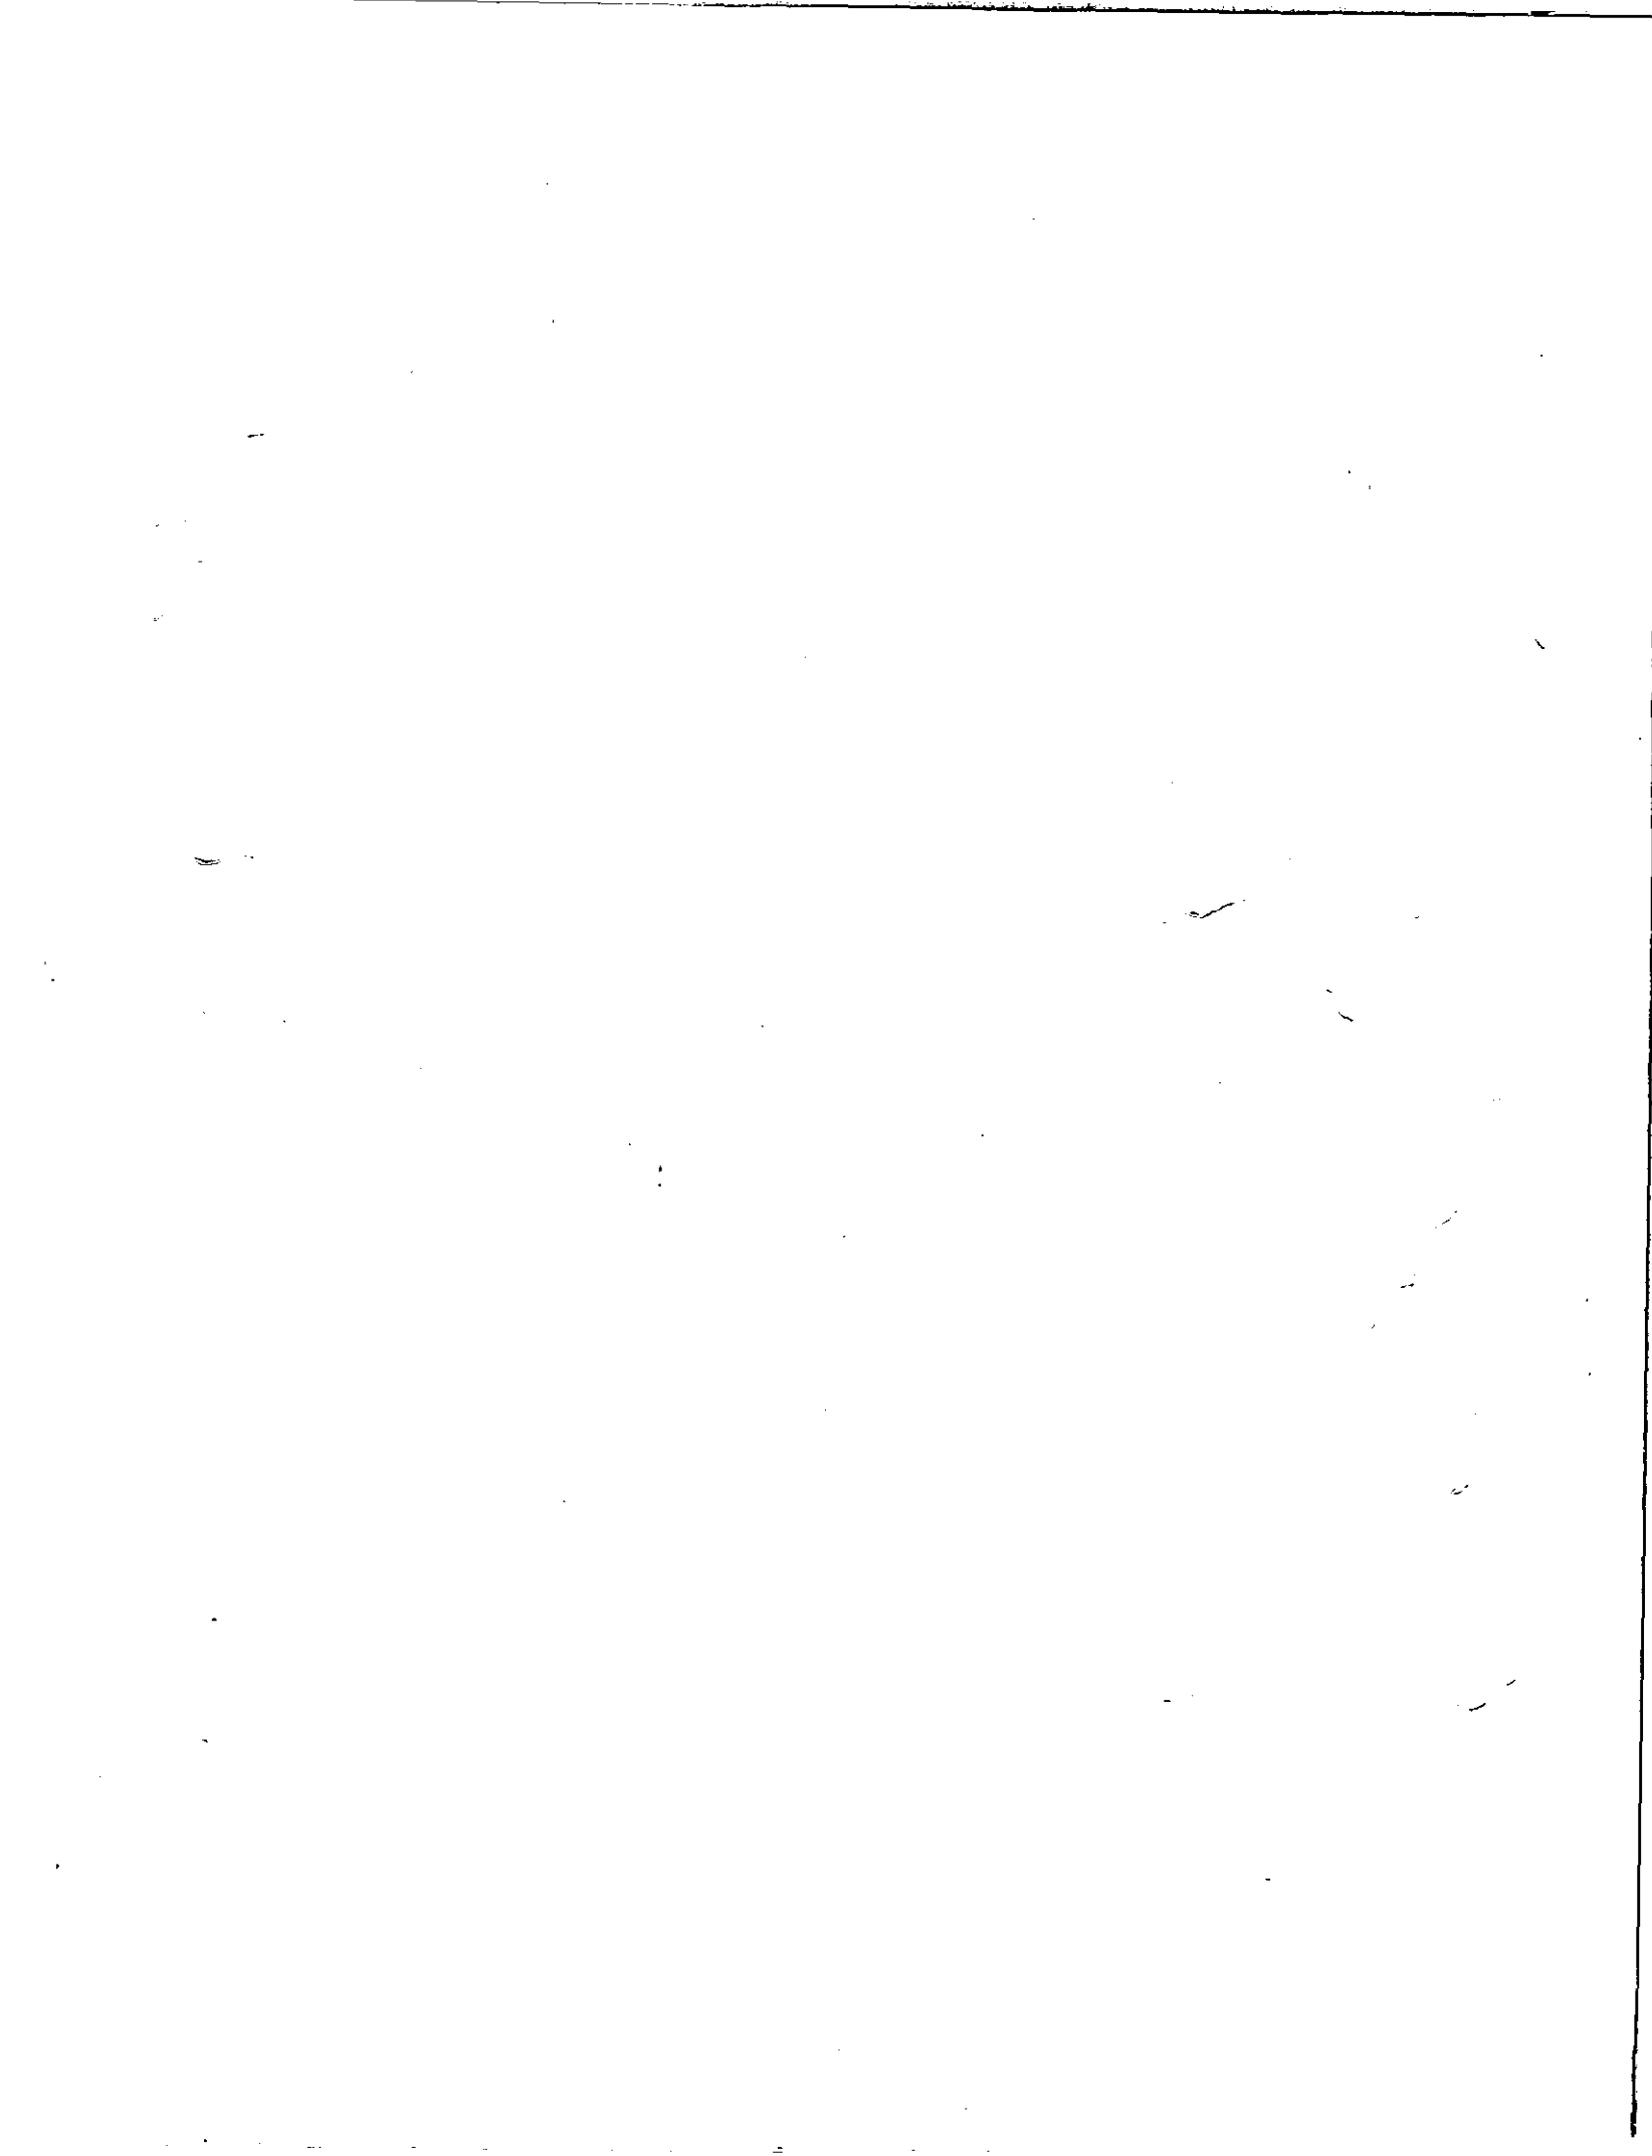

Very truly yours,

Alexander C. Pyper
Superintendent of Building

WORKERS COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof. (Sec. 3800, Labor Code.)

Policy No. _____ Company _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars (\$100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

Applicant: _____ Date: _____

I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been received.

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

Signature of Applicant: _____ Date: 10-13-88

Section 19831 of the Health & Safety Code requires the following:

"OWNER-BUILDER VERIFICATION

Attention Property Owner:

"An 'owner-builder' building permit has been applied for in your name and bearing your signature.

"Please complete and return this information in the envelope provided at your earliest opportunity to avoid unnecessary delay in processing and issuing your building permit. No building permit will be issued until this verification is received.

1. I personally plan to provide the major labor and materials for construction of the proposed property improvement (yes or no) YES

2. I (have/have not) HAVE signed an application for a building permit for the proposed work.

3. I have contracted with the following person (firm) to provide the proposed construction:

Name _____
Address _____ City _____
Phone _____ Contractors License No. _____

4. I plan to provide portions of the work, but I have hired the following person to coordinate, supervise, and provide the major work:

Name DAVID DEMSKY
Address _____ City 1604 1/2 VICTORY BLVD GLENDALE CA
Phone 242-7181 Contractors License No. _____

5. I will provide some of the work but I have contracted (hired) the following persons to provide the work indicated:

Name	Address	Phone	Type of Work

Signed: C.R. Ludemann

Property owner: [Redacted]

Social Security number: [Redacted]

Date: 10-16-80

C.R. Ludemann

CITY OF GLENDALE
PUBLIC WORKS DIVISION
OWNER-BUILDER INFORMATION

Dear Property Owner:

State law Sec. 19830 & 19831 of part 3 of division 13 of the Health & Safety Code requires the following information be supplied to you:

"OWNER-BUILDER INFORMATION"

"Dear Property Owner:

"An application for a building permit has been submitted in your name listing yourself as the builder of the property improvements specified.

"For your protection you should be aware that as 'owner-builder' you are the responsible party of record on such a permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name.

"Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the city or county. They are also required by law to put their license number on all permits for which they apply.

"If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware of the following information for your benefit and protection:

"If you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is \$200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer.

"If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers' compensation insurance, disability insurance costs, and unemployment compensation contributions.

"There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance.

"For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U. S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents.

"If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions.

"A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Building permits are not required to be signed by property owners unless they are performing their own work personally.

"Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814.

"Please complete and return the enclosed owner-builder verification form so that we can confirm that you are aware of these matters. The building permit will not be issued until the verification is returned.

Very truly yours,

Certificate of Use and Occupancy

For Existing Legal Structure or Building

March 13, 1995

UO-15709

Named Applicant: Theodore M. Clark, Vice President

Named Business: Courtaulds Aerospace, Inc.

Street Address: 5426 San Fernando Rd. Glendale, CA 91203

Use: Corporate Offices

Occupancy Classification: H2/H3/B2

Square Feet: 6,500

Parking Spaces: 294

Zoning: M2

This certifies that so far as ascertained by or made known to the below named parties, the building identified above is a legally existing building and has been determined that the change of use or occupancy or both to the named use occupancy and owner or tenant will not result in any increased hazard to life or limb, health, property or public welfare and such use and occupancy complies with the various ordinances of the city regulating building construction and use.

Michael J. Wiederkehr

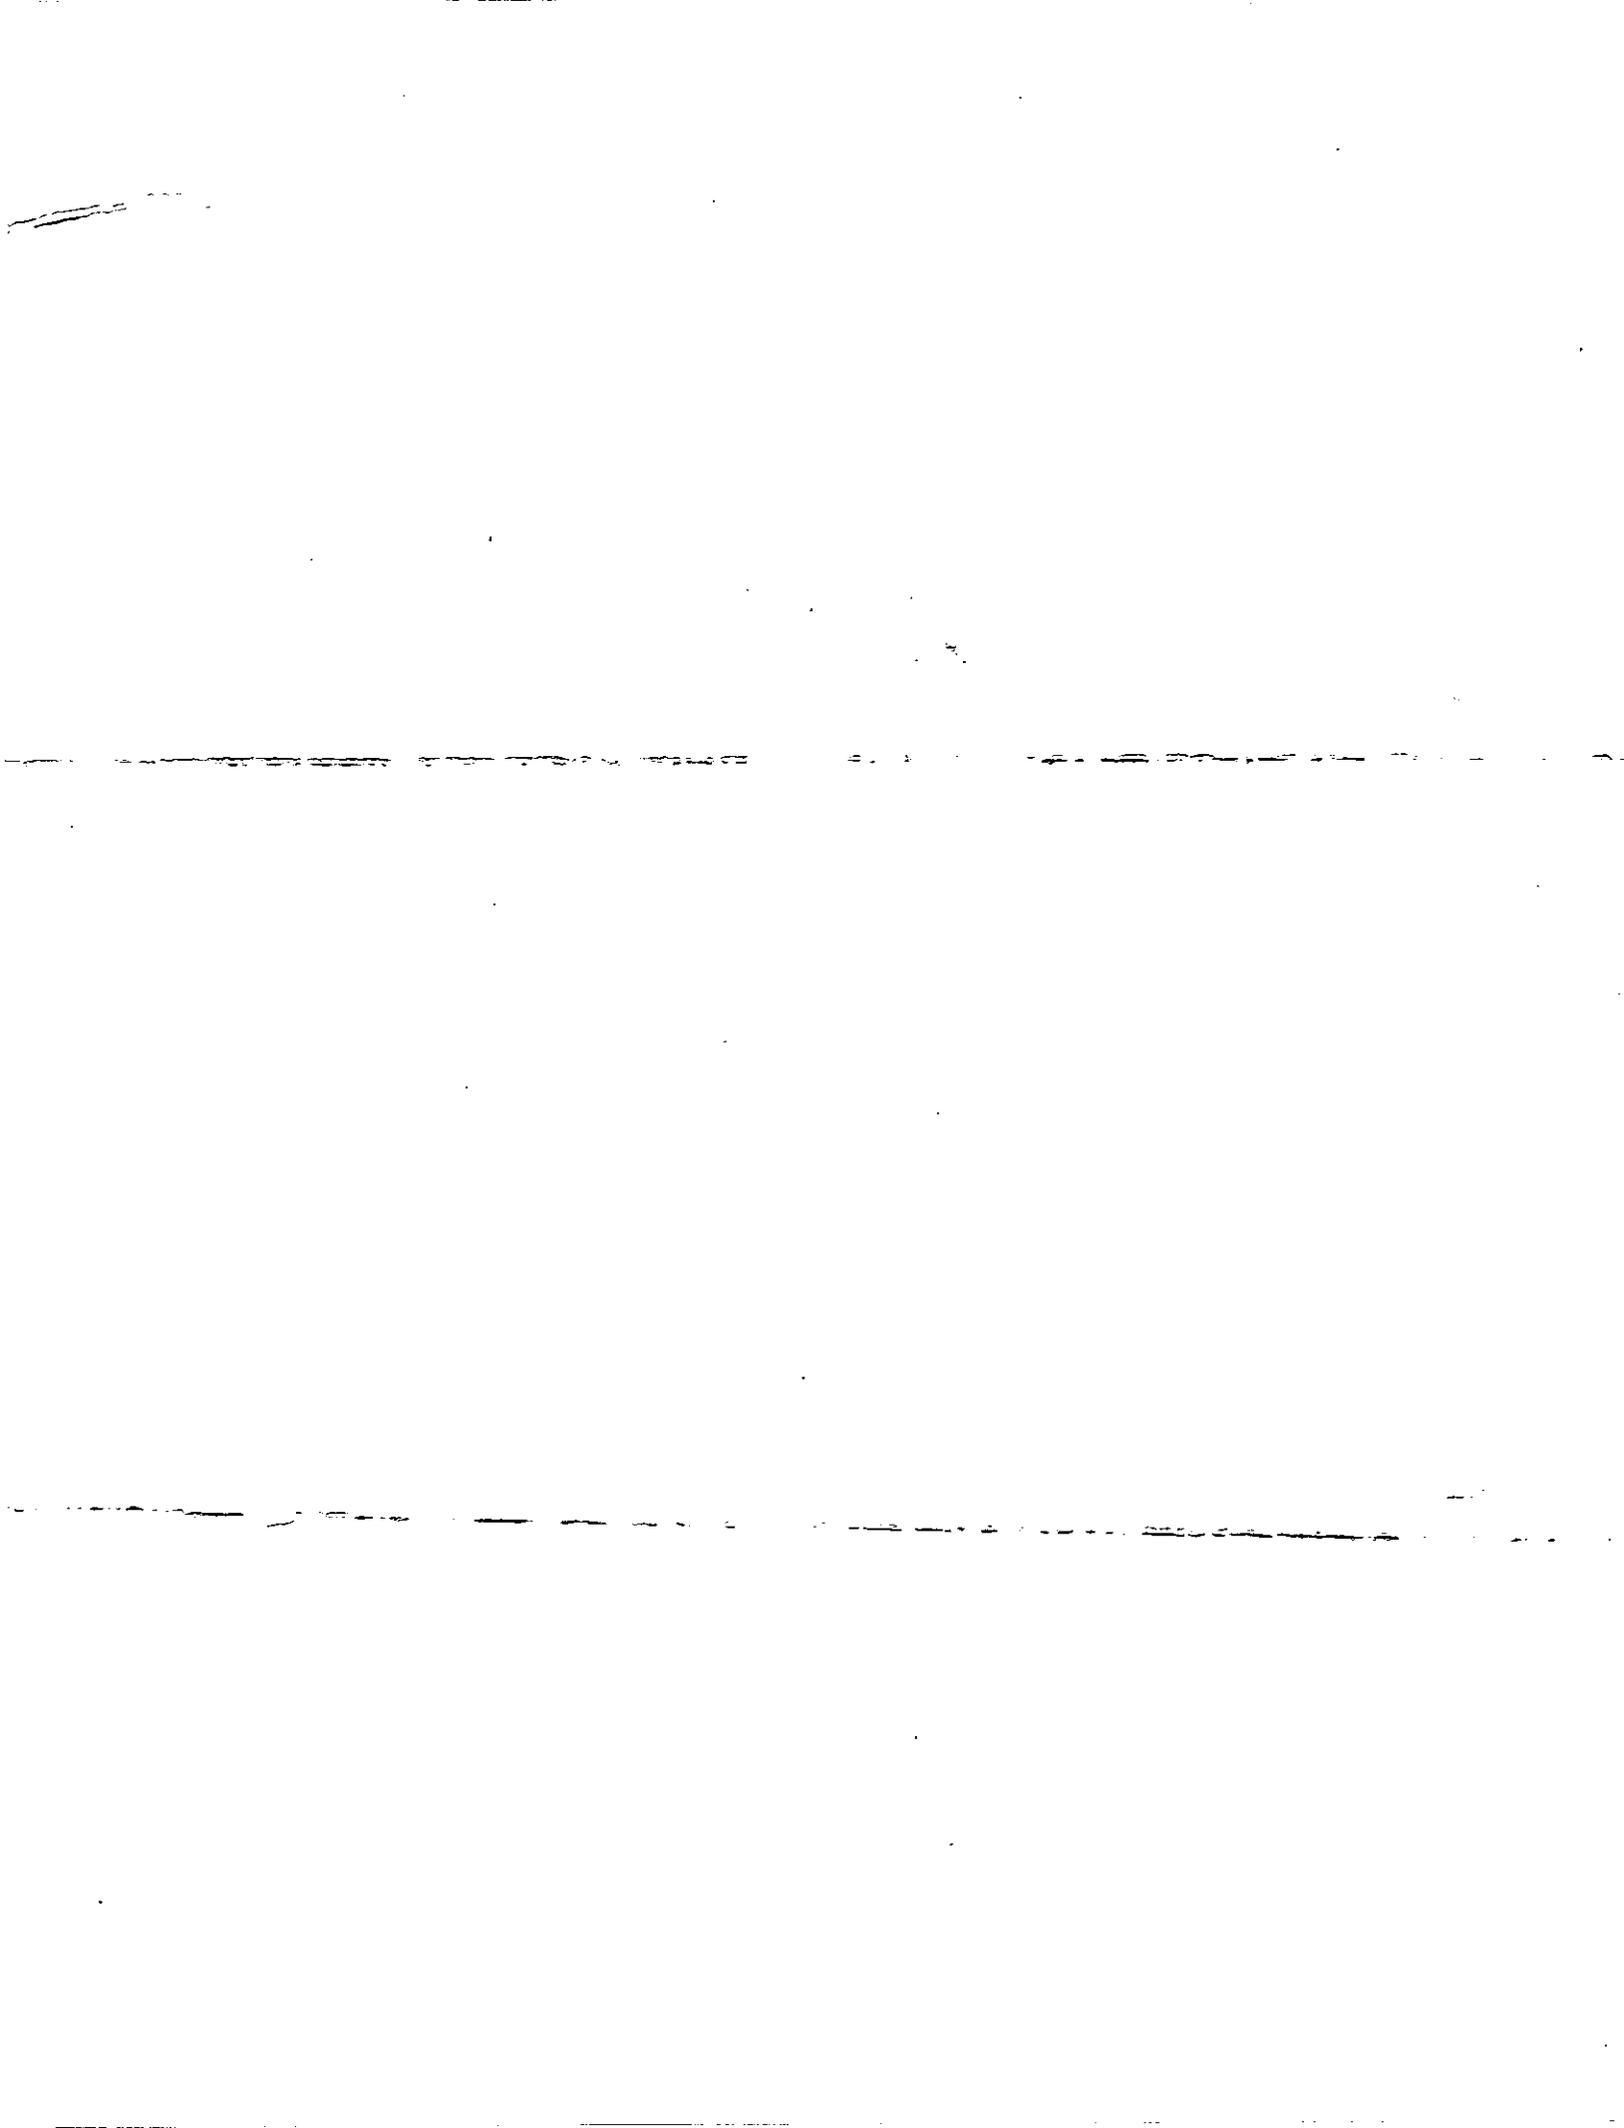

Edith Fuentes

Acting Permit Services Administrator

Zoning Administrator

(Section 308 (e), Volume I of the Glendale Building and Safety Code requires that this certificate be posted in a conspicuous place on the premises and shall not be removed except by the Permit Services Administrator.)

Attention: Mr. C. A. Blodgett, Assistant Superintendent

Gentlemen:

Reference is made to the construction of the Metal Products Facility at 5426 San Fernando Road by Products Research Company. A review in your office was made of the Building Code requirement for one hour fire resistive construction for exterior walls, Fire Zone No. 2. Noted was an exception to the requirement if the exterior wall is on a street at least 30 feet wide.

In the development of a "Master Plan" for Products Research Company of the Glendale Site a driveway is provided at least 30 feet in width adjacent to the west face of the Metal Products Facility extending beyond the Facility both northward and southward.

We respectfully request that the proposed Driveway, as long as maintained by Products Research Company, be accepted as an exception as noted in the first paragraph above.

Very truly yours,

HOLMES & NARVER, INC.

H. K. Madison

H. K. Madison

Attention: Mr. C. A. Blodgett

Gentlemen:

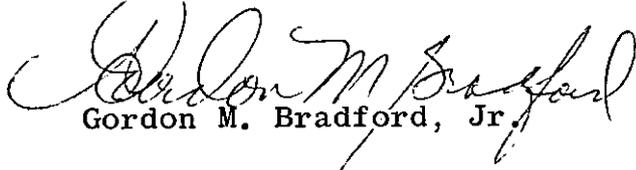

The final review by your office of the construction of the metal products manufacturing building at 5426 San Fernando Road, belonging to Products Research Company, raised a question about the material of construction on the exterior walls of the open side storage area.

Our engineers, Holmes & Narver, suggested a solution based on a statement in the Glendale Building Code that an "exterior wall fronting on a street having a width of at least thirty feet may be of unprotected incombustible construction." This would apply to the parapet and trim stub wall along the west side of the storage area which would then not have to be of one hour fire resistive construction, normally required in Fire Zone 2.

We understand, therefore, based on the above, that the present construction of the west face of the storage area portion of the building is acceptable as long as an adjacent driveway at least thirty feet wide is maintained for the purpose of controlled vehicular traffic.

Very truly yours,

PRODUCTS RESEARCH COMPANY

~~XXXXXXXXXXXX~~ G. B. WILSON

Edgar N. Gregg
208 E. Glenoaks Blvd.
Glendale, California

Dear Mr. Gregg,

In accordance with your request we would like to review the conditions imposed on your proposed building located at 5426 San Fernando Road. The easterly 90' of the building is restricted to use as an "F" occupancy as listed in the Glendale Building Code. The westerly 70' is classed as an "E3" occupancy and may be used for the storage of Class I, II, and III flammable liquids. This includes liquids with flash points below 190 degrees Fahrenheit as indicated in Section 1001 of the Glendale Building Code.

A one hour fire separation is to be provided between the "F" occupancy and the "E" occupancy and said separation is to be provided with Class "D" fire doors. The "D" fire doors are being accepted by this department in lieu of Class "C" fire doors normally required in the one hour occupancy separation.

The entire building is to be sprinklered throughout. At the time that sprinkler plans are submitted to this department we will require the approval of the Fire Department on these plans.

Please contact us if any further clarification is required or if we may be of any further assistance.

Very truly yours,

CITY OF GLENDALE

Gerald B. Wilson
Supt. of Buildings

Attention: Mr. C. A. Blodgett
Assistant Superintendent

Subject: Construction of Metal Products
Facility for Products Research
Company, 5426 San Fernando Road

Gentlemen:

Reference is made to the Subject Construction now underway by permit issued from your office. A telephone discussion was held with you on April 2, 1963, by Mr. Norman Jones, Chief Structural Engineer for Holmes & Narver pertaining to the nailing of the plywood roof diaphragm of the referenced building.

Determination was made that 6 penny nails at 4 inches on center at all edges will develop overstress of about 10%. The figure is arrived at by comparing the calculated maximum diaphragm shear of 290 pounds per foot (page 17 of our original calculations) with the allowable of 281 for the above nail and spacing per Table 25-M of the Uniform Building Code.

Recommendation is made that the 6 penny nailing at 4 inches on center at all edges with supplemental additional nailing with 6 penny nails at 12 inches on center at all edges will provide for the maximum shear stress in the diaphragm. Request is made for your approval of our recommendation.

CITY OF GLENDALE

INTER-DEPARTMENT COMMUNICATION

DATE July 21, 1959

TO G. Wilson, Building Superintendent

FROM E. H. Aiman, Fire Chief
By: A. W. Hunt, Fire MarshalSUBJECT PRODUCTS RESEARCH CO.
5426 SAN FERNANDO ROAD

With further reference to usage of Building "C" at the above location for the purpose of storing and packaging of certain flammable liquids, I have checked on the type of liquid to be used and stored in this building and found that 90% of the product is nonflammable, with the balance being M.E.K., and the mixture of the two result in the final product being practically nonflammable, also, except for a minor flash obtained under certain conditions.

Therefore, I am going to consider this material to be "Class III" and permit a total of 220 gallons to be stored and packaged inside of the aforesaid building, subject to your approval and the firm's compliance with the following:

1. It is understood that drums not exceeding 60 gallon capacity will be used in dispensing of liquids to smaller containers.
2. Drums used in dispensing of the liquids must be in an upright position, with dispensing being done by pump, and the tops of the drums must be covered in a satisfactory manner during dispensing operations.
3. Install an approved type mechanical ventilation system which will preclude the accumulation of any possible flammable vapors in hazardous concentrations. Design of the ventilating system shall take into account the relatively high specific gravity of the vapors. Mechanical systems for removing flammable vapors shall be designed, installed and operated in accordance with nationally recognized good practice.
4. Open flames and other sources of ignition shall not be used within the possible path of vapor travel^{or} in a vapor area.
5. Wherever flammable liquids are stored in containers, provision shall be made and maintained for the detection of leakage. Leaking containers shall be immediately removed and the contents transferred to a tight container.
6. Access shall be provided by unobstructed aisles whereby first-aid fire control apparatus may be brought to bear on any part of such flammable liquids storage.
7. In buildings, rooms or other confined spaces in which flammable liquids are stored, combustible waste materials shall not be allowed to accumulate, except in closed metal containers.

SECRET

07
1000

SECRET

7

G. Wilson, Building Superintendent

July 21, 1959

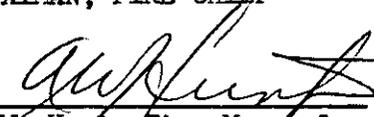

Page 2

8. Where flammable liquids are stored, or are used in open vessels, or are dispensed within buildings or other enclosures, first-aid fire-control equipment shall be provided in such quantities as public safety shall require. The number and type of appliances shall be in accordance with nationally recognized good practice and shall be acceptable to the Chief of the Bureau of Fire Prevention.
9. Smoking is to be prohibited within this building, and approved type "No Smoking" signs, with the letters "By Order of the Fire Chief," must be posted in conspicuous places.
10. Two means of egress must be provided from this building, one remote from the other, and must be installed in accordance with the Building Code requirements.

Yours very truly,

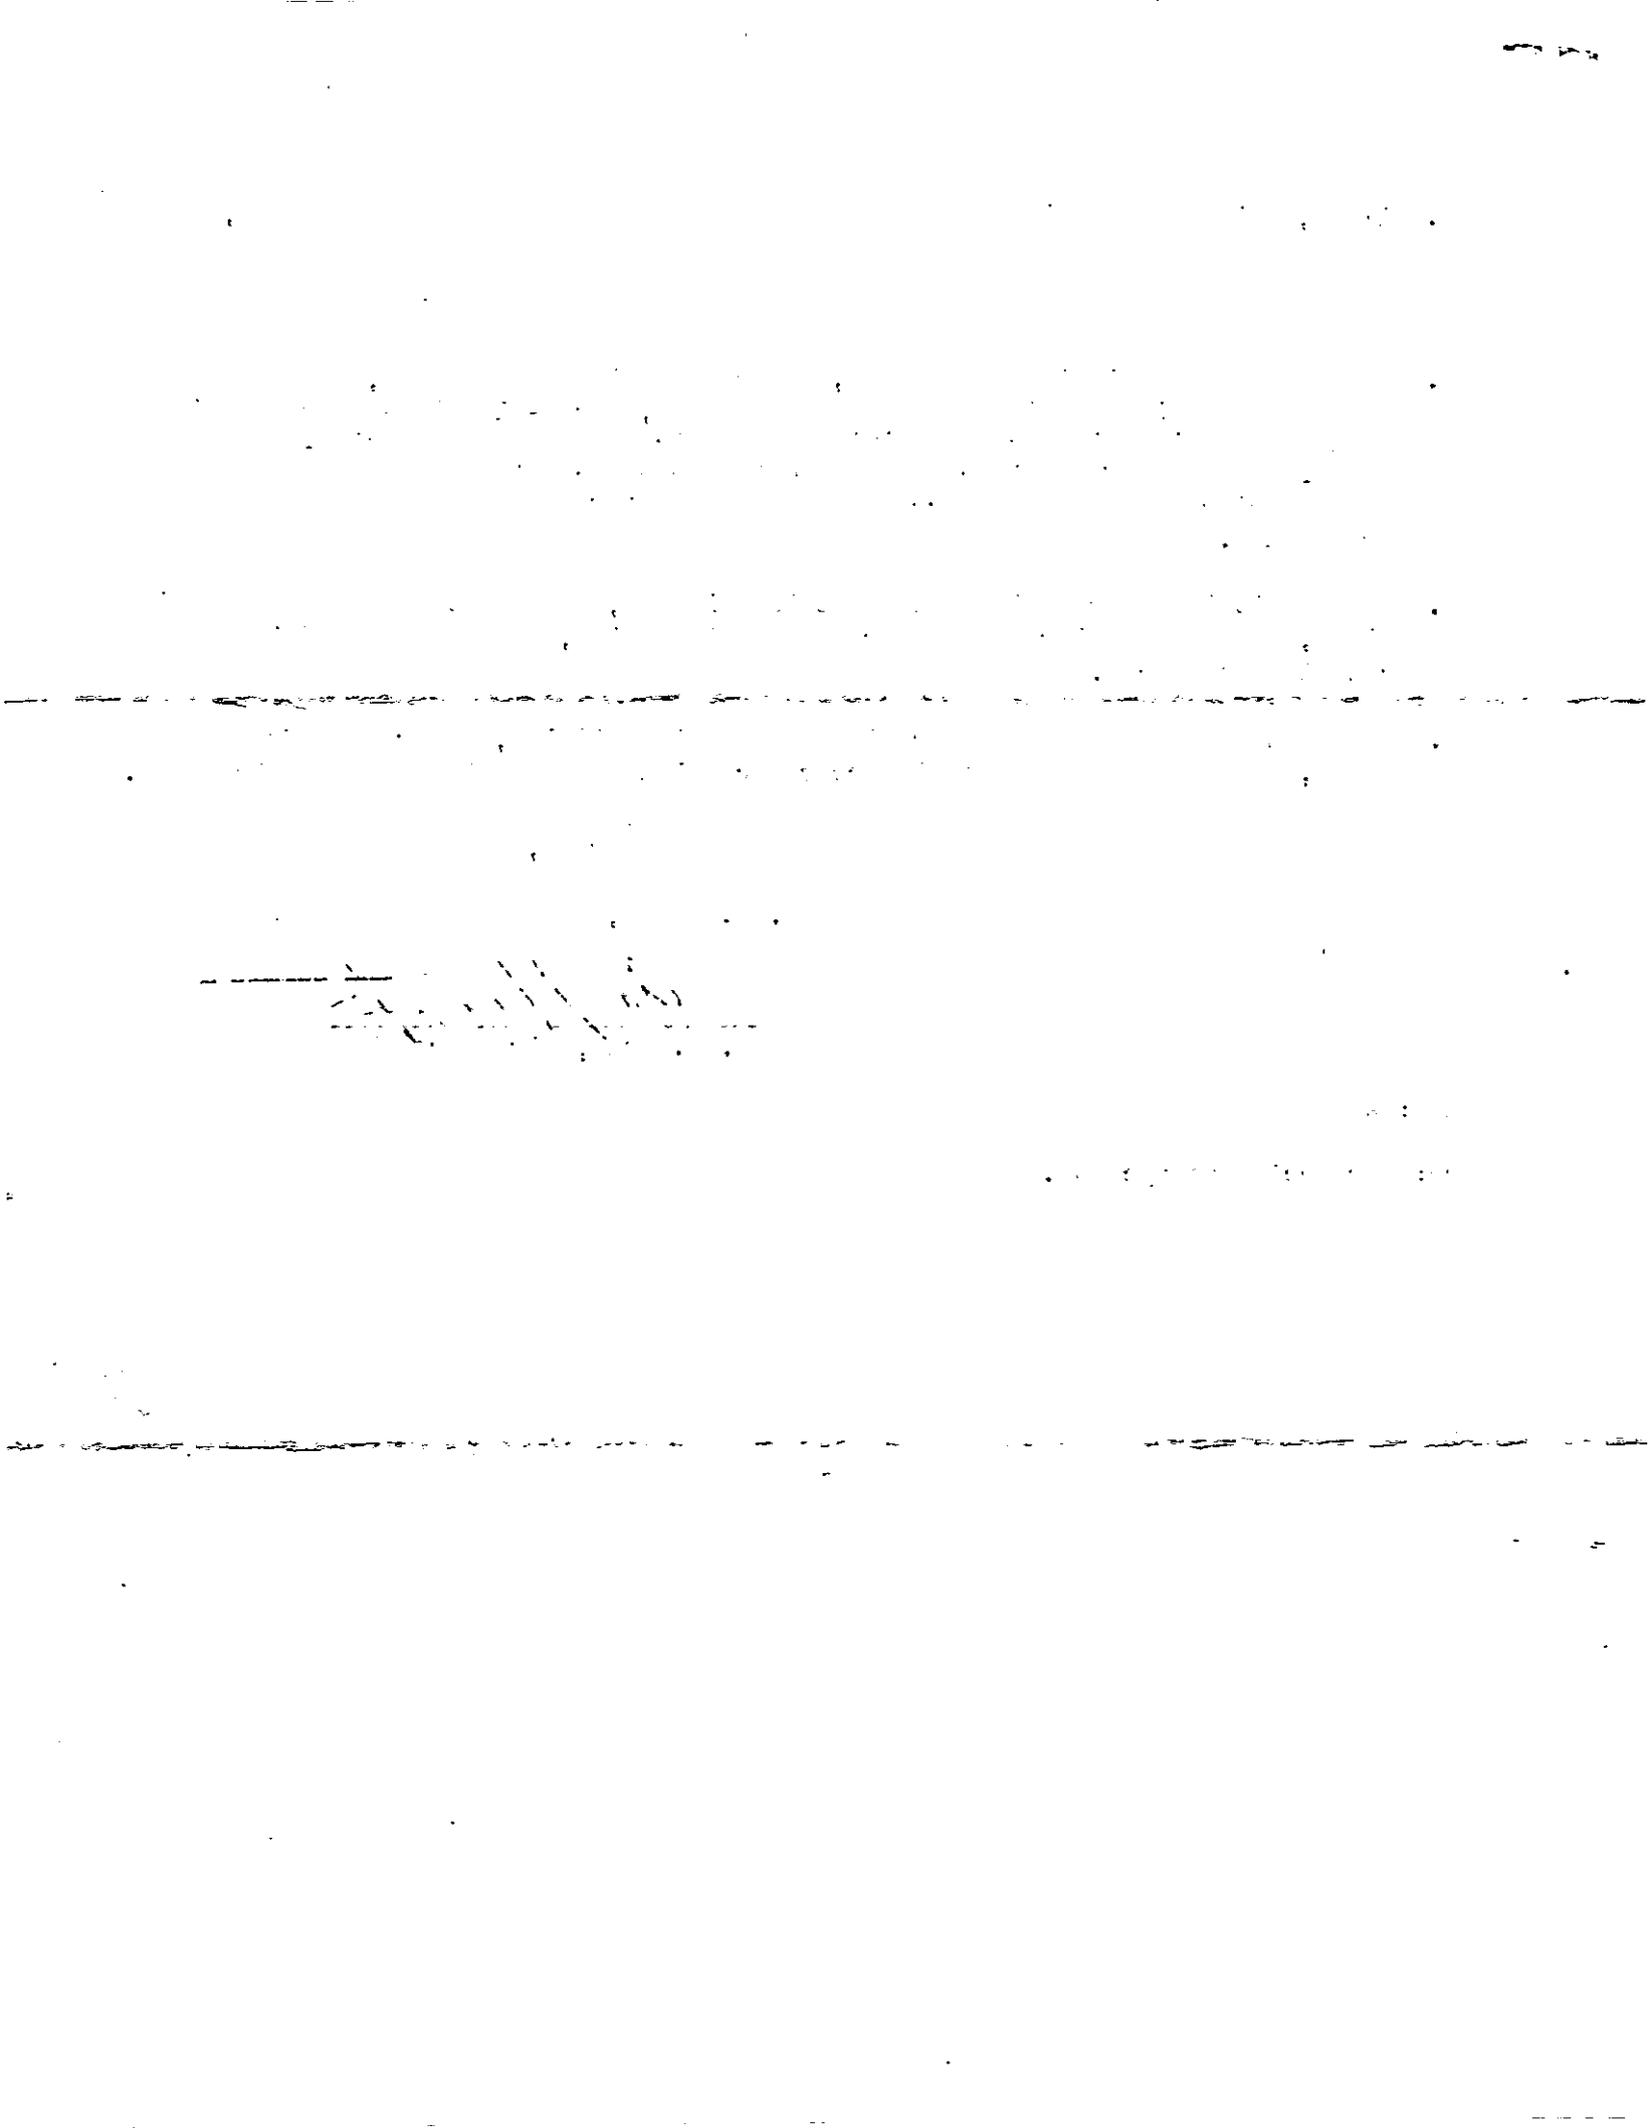

E. H. AILMAN, FIRE CHIEF

Mr. A. Kidder
4712 Rosemont Avenue
La Crescenta, California

Subject: Cummings & Sander Division
of Products Research Company

Dear Mr. Kidder:

At your request, we met you this morning at Cummings & Sander Division of Products Research Company, 5426 San Fernando Road, Glendale, California for the purpose of inspecting four disconnect switches.

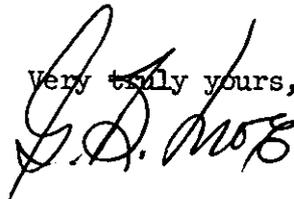

There was some question as to whether or not these switches were capable of handling 480 volts.

The purpose of this letter is to certify that the General Electric HCI switches, Catalog THC31 and THC32, are rated 600-volts maximum. The basic switch rating of the THC31 is 30-amp, 3-pole, 600-volt. The THC32 is rated 60-amp, 3-pole, 600-volt.

Enclosed you will find a copy of our Handbook Sheet 7621, Page 1. You will note - the basic switch is listed separately and then under heading "Fuse-clip and No-fuse Kits", we list the various fuse-clip kits of different ratings, both 250-volt and 600-volt, for the same switch.

I trust this is the information you wanted. If I can be of further assistance in this matter, please do not hesitate to contact me.

Very truly yours,

G. B. Moe

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: (Sec. 7031.3, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.3 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).)

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project. (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B. & P.C. for this reason _____

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).)

- I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)
- I, as owner of the property, am exclusively contracting with licensed contractors to construct the project. (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)
- I am exempt under Sec. _____, B. & P.C. for this reason, _____

Date 11-29-79 Owner Carl Linderman

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof. (Sec. 3800, Labor Code.)

Policy No. _____ Company _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars (\$100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

Applicant _____ Date _____

I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been received.

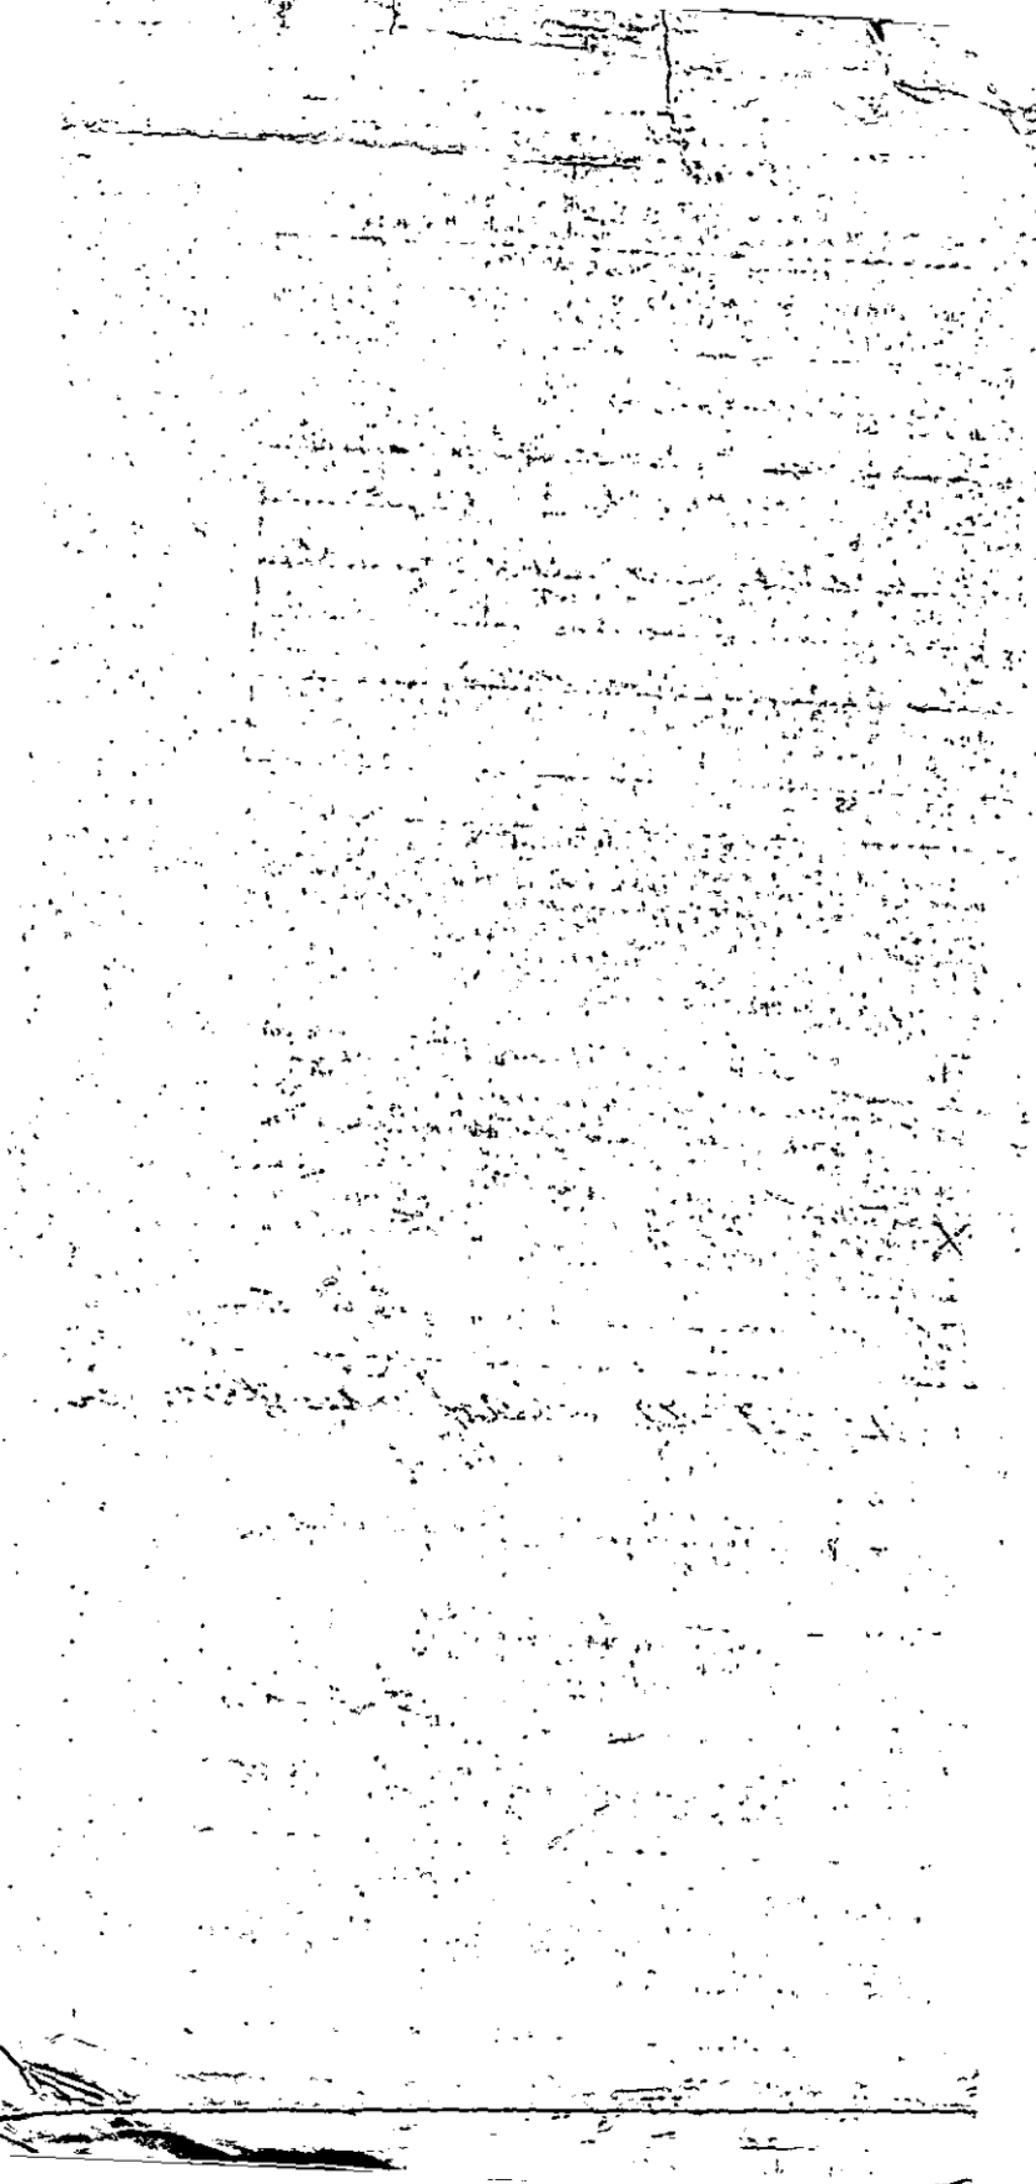

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

I am exempt under Sec. _____ B&PC for this reason _____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

Yes

No

Worker's Comp. expiration date _____

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.

Applicant

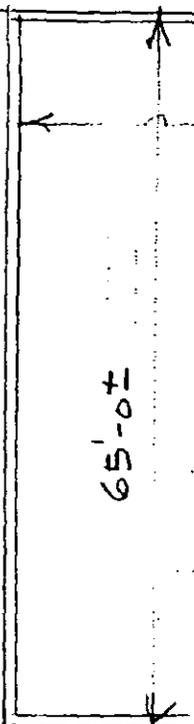

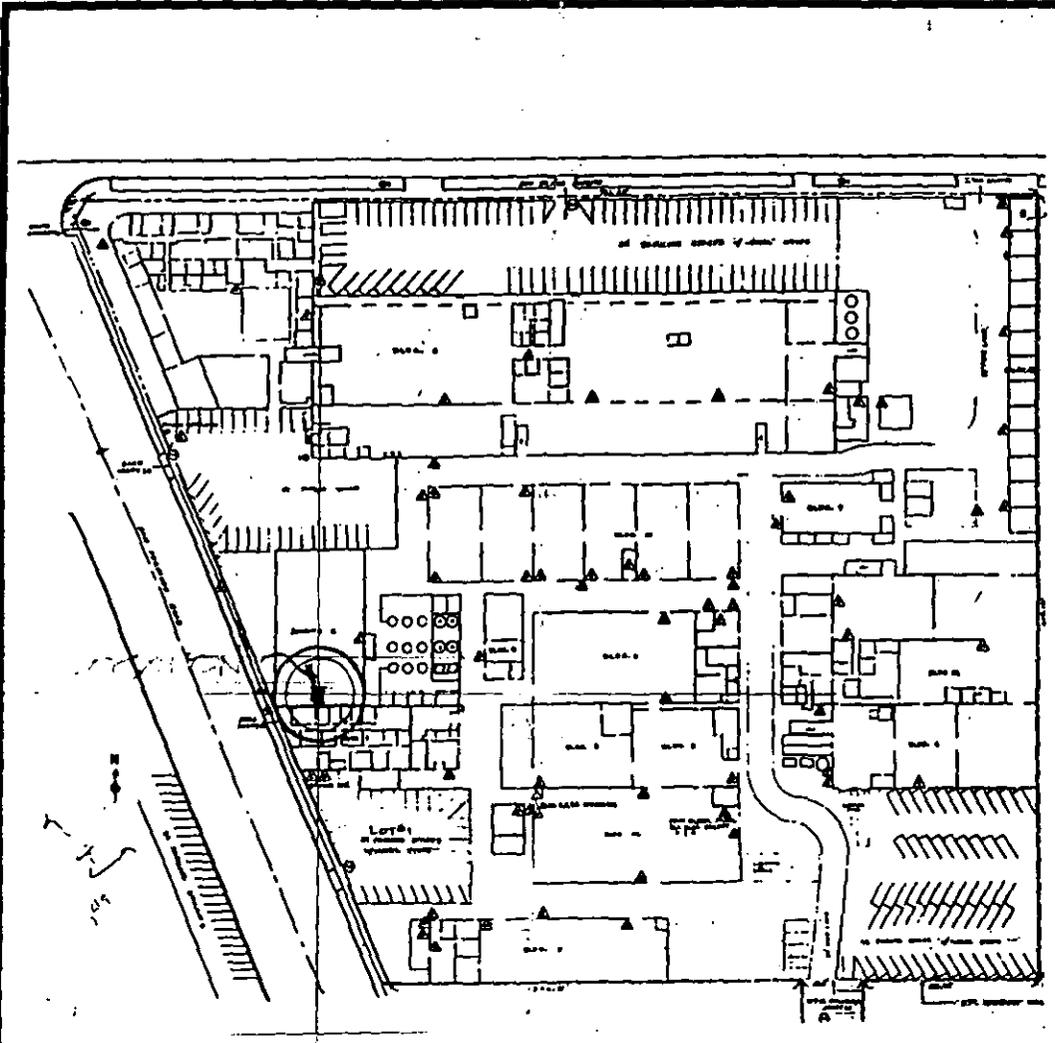

MILESTONE BLDG S.V.C.S. Date 11-10-97

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. This permit becomes null and void if construction or work is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 90 days at any time after work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

The person signing for this permit acknowledges that there are **NO** Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

COPYRIGHT KIVA 1997

5420 SAN FERNANDO RD,

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 of the Bus. & Prof. code, and that my license is in full force and effect.

License Class C-10 License No. 280420 Contractor's Signature Paul Mustoe Date 6-29-00

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is \$200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars (\$500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

CERTIFICATE OF CONFORMANCE

THE UNDERSIGNED MANUFACTURER HEREBY CERTIFIES that the products identified below and on attached sheets Nos. _____ and the principal members of which are marked with the Collective Mark of the AMERICAN INSTITUTE OF TIMBER CONSTRUCTION (AITC) were manufactured in conformance with applicable provisions of U. S. Commercial Standard, CS 253-63, for Structural Glued Laminated Timber, and that such manufacture has been at our plant in Cottage Grove, which plant has a quality control system approved by the Inspection Bureau of the AMERICAN INSTITUTE OF TIMBER CONSTRUCTION and inspected periodically by such Bureau. The undersigned manufacturer further certifies that the work has been done in accordance with the applicable job specifications. **Undersigned manufacturer certifies that work has been done in accordance w/applicable job specs & w/manufacturing & fabricating provision**
 JOB NAME: PRODUCTS RESEARCH of Chap. 25 U.B.C.

JOB LOCATION: 5440 San Fernando Rd., Glendale, California

CUSTOMER'S ORDER NO. _____ DATE 3-7-67 MFGR'S ORDER NO. 2275-0005

SIGNATURE: C. P. Brassell COMPANY: **WEYERHAEUSER COMPANY LAMINATED LUMBER PRODUCTS**

TITLE: Quality Control Supervisor ADDRESS: P.O. Box 585 Cottage Grove, Oregon DATE: March 15, 1967

AITC HEREBY CERTIFIES that the said company at its said plant is licensed by the AMERICAN INSTITUTE OF TIMBER CONSTRUCTION to use the AITC Collective Mark in respect of products which comply with applicable provisions of said Standard, that the adequacy of the quality control system in effect at said plant is periodically inspected and verified by the Inspection Bureau of the AMERICAN INSTITUTE OF TIMBER CONSTRUCTION; and that, in the judgment of the undersigned, said company is capable of complying with applicable manufacturing and testing provisions of said Standard in respect of products manufactured at said plant. Conformance with the Standard in respect of any specific or particular product is the sole responsibility of the manufacturer; AITC's guarantee hereunder being that the said company is qualified to produce a product meeting the said Standard and that its plant is periodically inspected and verified by the AITC Inspection Bureau.

AITC Certificate No. **45723** Signed for

AMERICAN INSTITUTE OF TIMBER CONSTRUCTION

Harroshan Thomas E Brassell

Executive Vice President

Director, Inspection Bureau

The principal members of the job covered by this certificate are stamped with one of the following type quality marks. Each qualified plant has an individual qualification designation. The designation "P-143" shown on the typical quality marks below is not assigned to any plant and is used only for the purpose of illustration.

A TYPICAL CUSTOM PRODUCT QUALITY MARK

P-143

AITC designation of qualified licensed plant.

CS 253-63

Indicates that the designated licensed plant has met all requirements for qualification and maintains an acceptable quality control system which is periodically inspected by AITC.

Indicates conformance to U.S. Commercial Standard for Structural Glued Laminated Timber.

A TYPICAL NON-CUSTOM PRODUCT QUALITY MARK

P-143 W

AITC designation of qualified licensed plant.

"SPECIES"

Designates type of adhesive, W for WET USE or D for DRY USE.

000f ARCH

Name of wood species used.

CS 253-63

Designates appearance grade. IND—Industrial. ARCH—Architectural. PREM—Premium.

Indicates that the designated licensed plant has met all requirements for qualification and maintains an acceptable quality control system which is periodically inspected by AITC.

Indicates conformance to U.S. Commercial Standard for Structural Glued Laminated Timber.

Designates dry use stress. f—bending. t—tension. c—compression parallel to grain.

- ▷ For a custom-product the specifications covering the desired product are included in the plans and specifications.
- ▷ For non-custom products essential detail specifications are included on stamp.

ATTACHMENT NUMBER 1 TO

Attention: Mr. G. M. Bradford

Re: Case No. 3787-U

Gentlemen:

The Zoning Administrator at a hearing held January 7, 1966, at 2:45 P. M., granted your application for a Variance to permit polymeric raw material manufacturing on Portion of West Glendale, being 5430-5460 San Fernando Road and 744-846 Milford Street, which is in the M2 Industrial Zone and No. 2 Fire Zone, subject to the following conditions:

1. That the location of the construction be substantially in accordance with the Zoning Administrator's Exhibit "A".
2. That the applicants obtain approval of the Bureau of Fire Prevention;
3. That final plans for the construction be approved by the Zoning Administrator;
4. That the application be granted for two years, until January 7, 1968.

Under the provisions of the Municipal Code the determination of the Zoning Administrator does not become effective until after an elapsed period of seven days from the date of determination. This seven-day period is provided for the purpose of allowing opportunity for any aggrieved person to file a written appeal from this decision with the Board of Zoning Adjustments.

The rights and privileges granted by this variance unless promptly commenced and used in full compliance with all

Products Research Company

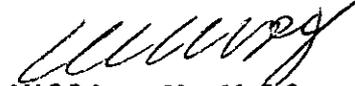

-2-

January 10, 1966

the conditions of approval will expire one year from the date of this grant except where the time limit is stated as a condition of approval.

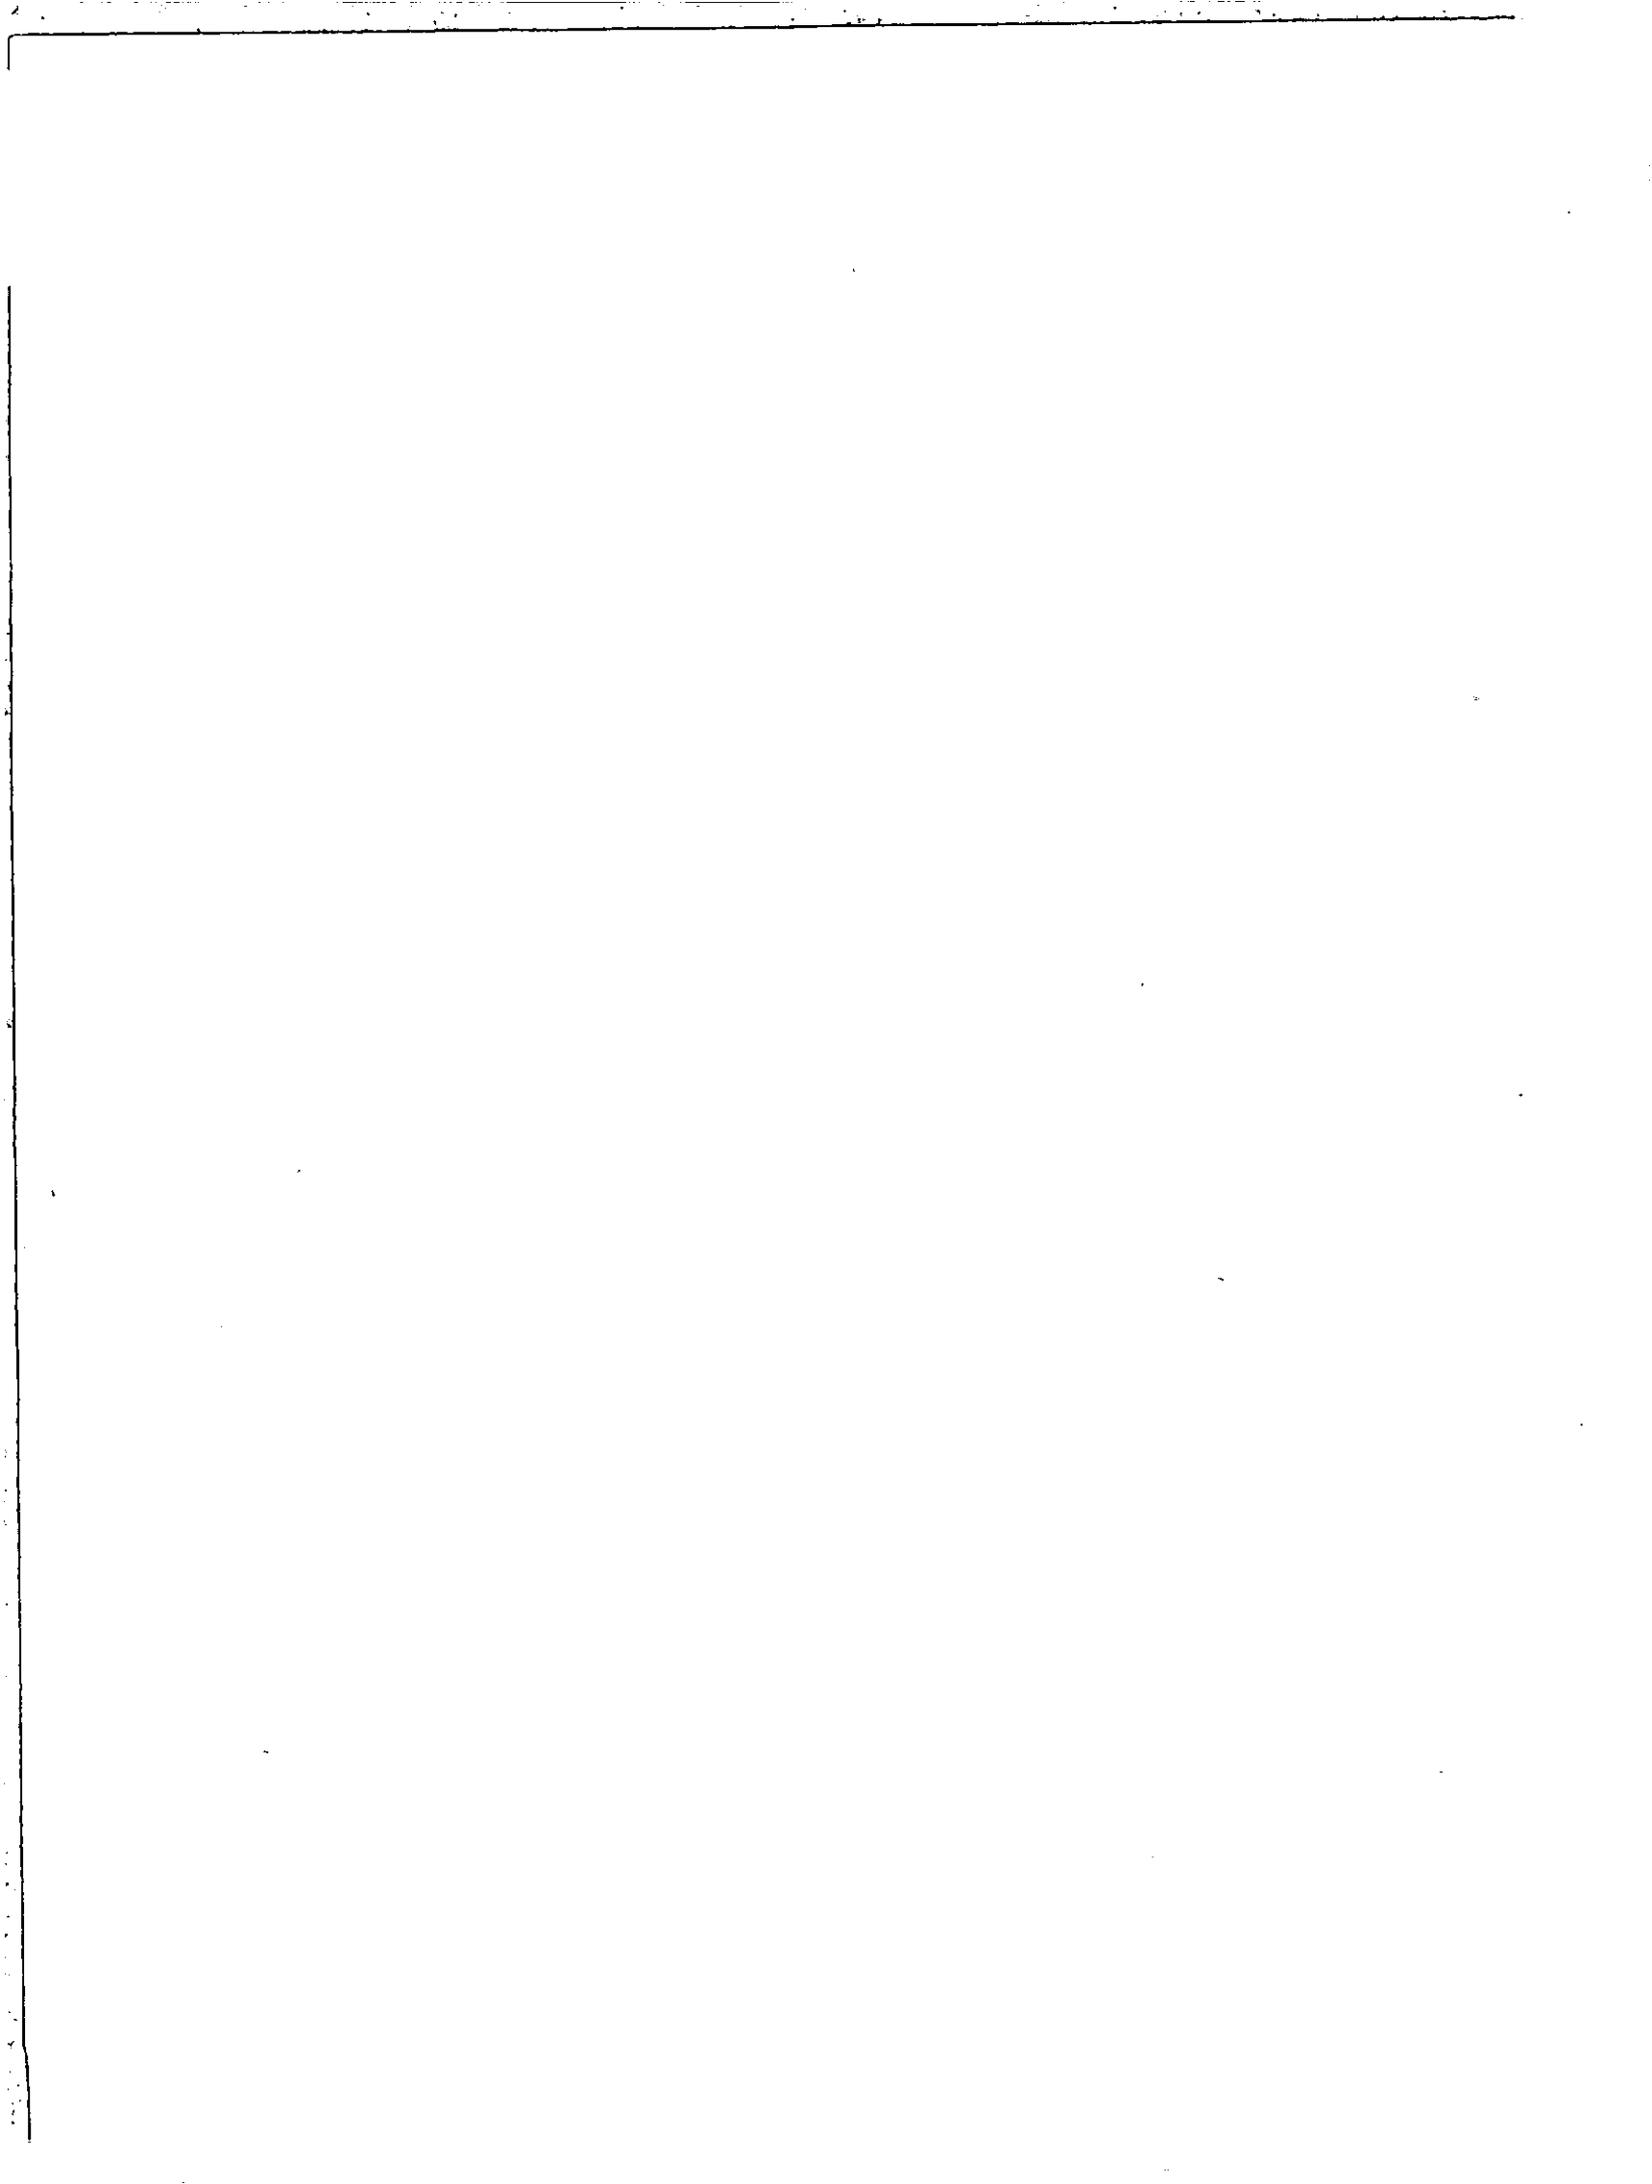

Yours very truly,

W. H. Eaton, Zoning Administrator

Re: Case No. 4446-U

Gentlemen:

The Zoning Administrator at a hearing held December 20, 1967, at 9:00 A. M., granted your application for Variance to permit polymeric raw material manufacture on Portion of West Glendale Tract, being 5430-5460 San Fernando Road and 744-846 Milford St., which is in the I2 Industrial Zone and No. 2 Fire Zone, for a period of four years, until January 7, 1972, subject to the condition that the applicants obtain approval of the Bureau of Fire Prevention.

Under the provisions of the Municipal Code, the determination of the Zoning Administrator does not become effective until after an elapsed period of seven days from the date of determination. This seven-day period is provided for the purpose of allowing opportunity for any aggrieved person to file a written appeal from this decision with the Board of Zoning Adjustments.

The rights and privileges granted by this variance unless promptly commenced and used in full compliance with all the conditions of approval will expire one year from the date of this grant.

Yours very truly,

W. H. Eaton

The person signing for this permit acknowledges that there are **NO** Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

At the time of final inspection, the inspector shall verify the installation of **smoke detectors in all sleeping rooms and hallways** leading thereto. Battery operated smoke detectors are acceptable in existing construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 of the Bus. & Prof. code, and that my license is in full force and effect.

License Class _____ License No. _____ Contractor's Signature _____ Date _____

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is \$200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars (\$500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his INITIAL or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License INITIAL Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name _____ Address _____ Phone _____ Contractors Lic. No. _____

I, as owner of the property, plan to provide portions of the work but I have or plan to contract with the following person(s) / (company(ies)) to provide the work indicated. INITIAL

LICENSE CLASS _____ LICENSE NO. _____ CONTRACTOR'S SIGNATURE _____ DATE _____

OWNER-BUILDER DECLARATION

AS THE PROPERTY OWNER AND BUILDER OF THE PROPOSED PROJECT ('OWNER-BUILDER') YOU ARE THE RESPONSIBLE PARTY OF RECORD ON THIS PERMIT. BUILDING PERMITS ARE NOT REQUIRED TO BE SIGNED BY PROPERTY OWNERS UNLESS THEY ARE PERSONALLY PERFORMING THEIR OWN WORK. IF YOUR WORK IS BEING PERFORMED BY SOMEONE OTHER THAN YOURSELF, YOU MAY PROTECT YOURSELF FROM POSSIBLE LIABILITY IF THAT PERSON APPLIES FOR THE PROPER PERMIT IN HIS OR HER NAME. CONTRACTORS ARE REQUIRED BY LAW TO BE LICENSED AND BONDED BY THE STATE OF CALIFORNIA AND TO HAVE A BUSINESS LICENSE FROM THE CITY OF GLENDALE. THEY ARE ALSO REQUIRED BY LAW TO PUT THEIR LICENSE NUMBER ON ALL PERMITS FOR WHICH THEY APPLY. IF YOU PLAN TO DO YOUR OWN WORK, WITH THE EXCEPTION OF VARIOUS TRADES THAT YOU PLAN TO SUBCONTRACT, YOU SHOULD BE AWARE THAT IF YOU EMPLOY OR OTHERWISE ENGAGE ANY PERSONS OTHER THAN YOUR IMMEDIATE FAMILY, AND THE WORK (INCLUDING MATERIALS AND OTHER COSTS) IS \$200 OR MORE FOR THE ENTIRE PROJECT, AND SUCH PERSONS ARE NOT LICENSED AS CONTRACTORS OR SUBCONTRACTORS, THEN YOU MAY BE AN EMPLOYER. IF YOU ARE AN EMPLOYER, YOU MUST REGISTER WITH THE STATE AND FEDERAL GOVERNMENT AS AN EMPLOYER AND YOU ARE SUBJECT TO SEVERAL OBLIGATIONS INCLUDING STATE AND FEDERAL INCOME TAX WITHHOLDING, FEDERAL SOCIAL SECURITY TAXES, WORKERS COMPENSATION INSURANCE, DISABILITY INSURANCE COSTS, AND UNEMPLOYMENT COMPENSATION CONTRIBUTIONS. THERE MAY BE FINANCIAL RISKS FOR YOU IF YOU DO NOT CARRY OUT THESE OBLIGATIONS, AND THESE RISKS ARE ESPECIALLY SERIOUS WITH RESPECT TO WORKERS' COMPENSATION INSURANCE. FOR MORE SPECIFIC INFORMATION ABOUT YOUR OBLIGATIONS UNDER FEDERAL LAW, CONTACT THE INTERNAL REVENUE SERVICE (AND, IF YOU WISH, THE U.S. SMALL BUSINESS ADMINISTRATION). FOR MORE SPECIFIC INFORMATION ABOUT YOUR OBLIGATIONS UNDER STATE LAW, CONTACT THE DEPARTMENT OF BENEFIT PAYMENTS AND THE DIVISION OF INDUSTRIAL ACCIDENTS. IF THE STRUCTURE IS INTENDED FOR SALE, PROPERTY OWNERS WHO ARE NOT LICENSED CONTRACTORS ARE ALLOWED TO PERFORM THEIR WORK PERSONALLY OR THROUGH THEIR OWN EMPLOYEES, WITHOUT A LICENSED CONTRACTOR OR SUBCONTRACTOR, ONLY UNDER LIMITED CONDITIONS. A FREQUENT PRACTICE OF UNLICENSED PERSONS PROFESSING TO BE CONTRACTORS IS TO SECURE AN 'OWNER-BUILDER' BUILDING PERMIT, ERRONEOUSLY IMPLYING THAT THE PROPERTY OWNER IS PROVIDING HIS OR HER OWN LABOR AND MATERIAL PERSONALLY. INFORMATION ABOUT LICENSED CONTRACTORS MAY BE OBTAINED BY CONTACTING THE CONTRACTORS' STATE LICENSE BOARD IN YOUR COMMUNITY OR AT 1020 N STREET, SACRAMENTO, CALIFORNIA 95814. NOTE: THE CURRENT MAILING ADDRESS OF THE CONTRACTORS STATE LICENSE BOARD IS P.O. BOX 26000, SACRAMENTO, CALIFORNIA 95826.

SECTION 7031.5 OF THE BUS. & PROF. CODE REQUIRES THE PERMIT APPLICANT TO SIGN A STATEMENT ABOVE OR CLAIM EXEMPTION FROM THE CONTRACTOR'S LICENSE LAW AND STATE THE BASIS FOR SUCH EXEMPTION. VIOLATIONS OF THIS SECTION SUBJECTS THE APPLICANT TO A CIVIL PENALTY OF NOT MORE THAN FIVE HUNDRED DOLLARS (\$500). I HEREBY AFFIRM THAT I HAVE READ THE PARAGRAPH ABOVE AND WILLFULLY ACCEPT THE RESPONSIBILITY OF AN OWNER-BUILDER. I FURTHER AFFIRM, UNDER PENALTY OF PERJURY, THAT I AM EXEMPT FROM THE CONTRACTOR'S LICENSE LAW FOR THE FOLLOWING REASON:

INITIAL _____ I, AS OWNER OF THE PROPERTY, OR MY EMPLOYEES WITH WAGES AS THEIR SOLE COMPENSATION, WILL DO THE WORK, AND THE STRUCTURE IS NOT INTENDED OR OFFERED FOR SALE (SEC. 7044, BUSINESS AND PROFESSIONS CODE: THE CONTRACTORS LICENSE LAW DOES NOT APPLY TO AN OWNER OF PROPERTY WHO BUILDS OR IMPROVES THEREON, AND WHO DOES SUCH WORK HIMSELF OR HERSELF OR THROUGH HIS OR HER OWN EMPLOYEES, PROVIDED THAT THE IMPROVEMENTS ARE NOT INTENDED OR OFFERED FOR SALE. IF, HOWEVER, THE BUILDING OR IMPROVEMENT IS SOLD WITHIN ONE YEAR OF COMPLETION, THE OWNER-BUILDER WILL HAVE THE BURDEN OF PROVING THAT HE OR SHE DID NOT BUILD OR IMPROVE FOR THE PURPOSE OF SALE.)

INITIAL _____ I, AS OWNER OF THE PROPERTY, AM EXCLUSIVELY CONTRACTING WITH LICENSED CONTRACTORS TO CONSTRUCT THE PROJECT (SEC. 7044, BUSINESS AND PROFESSIONS CODE: THE CONTRACTORS LICENSE LAW DOES NOT APPLY TO AN OWNER OF PROPERTY WHO BUILDS OR IMPROVES THEREON, AND WHO CONTRACTS FOR THE PROJECTS WITH A CONTRACTOR(S) LICENSED PURSUANT TO THE CONTRACTORS LICENSE LAW.). I HAVE OR PLAN TO CONTRACT WITH THE FOLLOWING PERSON (COMPANY) TO PROVIDE THE PROPOSED CONSTRUCTION:

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code)

CONSTRUCTION LENDER & BRANCH
 MAILING ADDRESS

CITY ZIP

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9 (commencing with Section 7100) of Division 3 of the Business and Professions Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).)

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Sec. 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project. (Sec. 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____, B. & P.C. for this reason: _____

Mr. Fred S. Solomon
 Superintendent of Buildings
 City of Glendale
 633 East Broadway
 Glendale, California 91205

Dear Mr. Solomon:

Your Letter of April 16 Concerning Discharge of Hexavalent Chromium
 to the Public Street at 5454 San Fernando Road, Glendale

Corrections have been made to prevent any reoccurrence as follows:

1. The bermed cleaning area has been made water tight.
2. The metylene chloride storage tank has been diked.
3. Spent cleaning solutions are returned to the supplier for reprocessing and reuse.
4. A portable tank and pump are available for emptying the bermed and diked areas in the event of a spill.
5. Employees have been informed of the absolute necessity of preventing any chemical discharge to the street gutters.

We hope this meets with your approval and if there are any questions, please contact the writer.

Very truly yours,

PRODUCTS RESEARCH & CHEMICAL CORPORATION

Re: Case No. 6143-U

Gentlemen:

Pursuant to the provisions of Article IX, Appendix, Glendale Municipal Code, the Zoning Administrator on September 1, 1976, conducted and closed a hearing, taking under submission the application for Zone Variance to manufacture polymeric raw materials in the M2 Industrial Zone at 5454 San Fernando Road, being Portion of West Glendale and Portion of Lot 31, Tract No. 3784, which is in the M2 Zone and No. 2 Fire Zone.

After considering the evidence presented with respect to this application, under the provisions of Section 900, Appendix, the Zoning Administrator has made the following findings:

- I. The strict application of the provisions of the ordinance would result in practical difficulties or unnecessary hardship inconsistent with the general purposes and intent of the ordinance in that it would cause abandonment of a use which has been established for ten years pursuant to a variance renewed twice in the past. The area used in polymeric production is essential to the efficient operation of the plant, but uses only a very minor fraction of the total land area. The ordinance intends reasonable flexibility to allow an operation in a zone which chiefly falls into the Code allowed uses.
- II. There are exceptional circumstances or conditions applicable to the property involved or to the intended use or development of the property that do not apply generally to other property in the same zone or neighborhood in

that the proposed site is one of the largest in the neighborhood, and the area occupied for the polymeric production is in the center of this area, totally buffered with uses permitted in the M2 Zone.

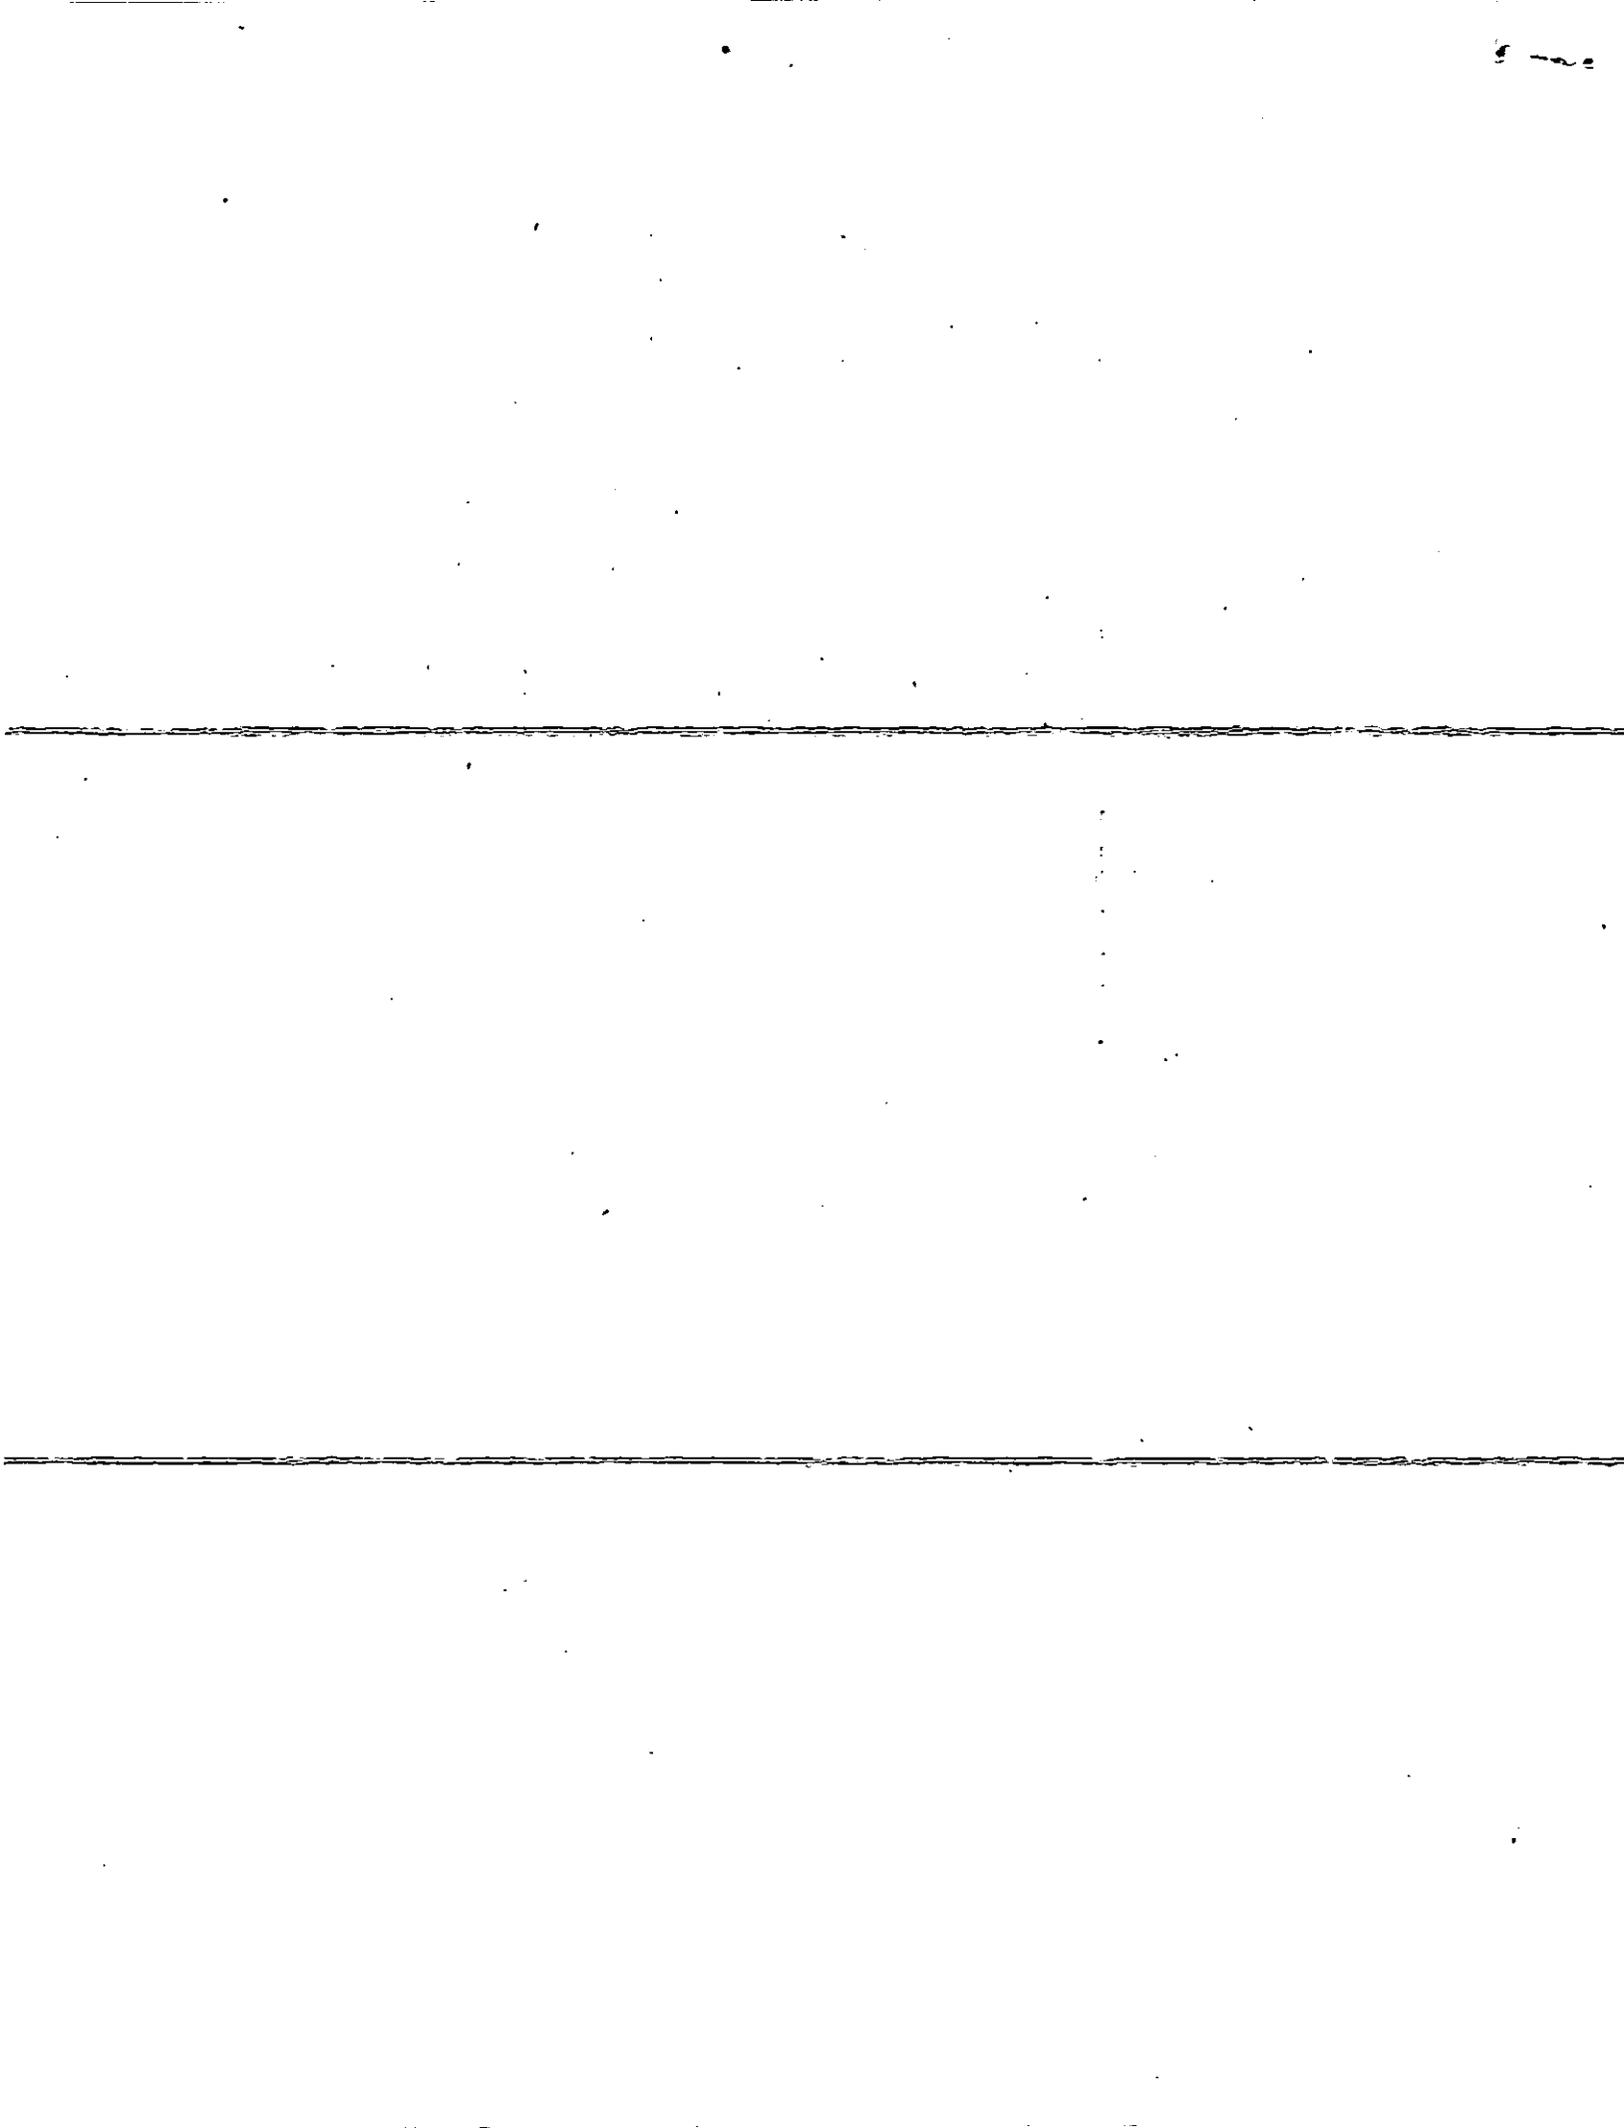

III. The granting of the variance will not be materially detrimental to the public welfare or injurious to the property or improvements in such zone or neighborhood in which the property is located because the use will not be expanded beyond its present size, the use has not proven detrimental in the past, the Environmental and Planning Board has recommended that the use would not be detrimental to the surrounding area, and because the use will continue to be surrounded by uses conforming to the Code.

IV. The granting of the variance will not be contrary to the objectives of the ordinance in that the surrounding neighborhood will be protected, which is the intent of the Code, and because of the unique situation further or more extensive variance or zone change requests will not be engendered by the favorable consideration of this variance.

It is, therefore, the determination of the Zoning Administrator on September 9, 1976, that this application for variance be granted subject to compliance with the following conditions:

1. That all noise and odors be suppressed from being transmitted into the adjacent residential areas. Noise shall be suppressed to the extent prescribed by Article II, Chapter 11, Glendale Municipal Code.
2. All requirements of the Bureau of Fire Prevention shall be maintained in satisfactory compliance.
3. That the polymeric raw material manufacturing facility shall remain essential where located on the site as shown on the site plan submitted in conjunction with the application. Variance granted herein shall terminate if the site or property is divided for sale, lease or rental to other firms such that the above spatial relationship no longer exists.
4. That variance granted herein shall be granted for a period of seven years, until September 1, 1983, at which time renewal may be considered.

Under the provisions of Article X, Appendix, the determination of the Zoning Administrator does not become effective for a

Products Research & Chemical Corp.

-3-

September 9, 1976

fifteen-day period. This period of time, until September 24, 1976, is allowed for any person aggrieved by this determination to file a written appeal in triplicate on forms which shall be provided upon request to the Board of Zoning Adjustments.

The rights and privileges granted by this variance will expire one year from the date of this grant unless promptly commenced and used in full compliance with the law and all conditions of approval.

Very truly yours,

Gerald J. Jamriska, A.I.P.

Re: Case No. 6886-U
5454 San Fernando Road

Gentlemen:

Pursuant to the provisions of Article IX, Appendix, Glendale Municipal Code, the Zoning Administrator on November 14, 1979, conducted and closed a public hearing on your application for Use Variance to continue the manufacture of polymeric raw materials in the M2 Industrial Zone at 5454 San Fernando Road, being a Portion of Lot 31, Tract No. 3784.

After considering the evidence presented with respect to this application, under the provisions of Section 900, Appendix, the Zoning Administrator has made the following findings:

- I. The strict application of the provisions of the ordinance would result in practical difficulties or unnecessary hardship inconsistent with the general purposes and intent of the ordinance in that it would create an uncertainty that could lead to relocation of the business. The Code intends to promote stability among uses of property, promoting investment in plants and improvements.
- II. There are exceptional circumstances or conditions applicable to the property involved or the intended use or development of the property that do not apply generally to other property in the same zone or neighborhood in that the area used for polymeric production (the M3 use) is but a minor fraction of the plant; and it is located far from the boundaries of the property. The bulk of all operations is well within M2 permitted uses. The polymeric production is however, a vital element of the company's business.

ENCLOSURE

1979 DEC 7 PM 12 47

RECEIVED
BUILDING SECTION

- III. The granting of the variance will not be materially detrimental to the public welfare or injurious to the property or improvements in such zone or neighborhood in which the property is located in that the use has proven to be compatible with the industrial zone it is in for more than thirteen years, and no expansion of the M3 polymeric production is contemplated or granted herein. The Environmental and Planning Board has recommended that the use would not be determinantal to the surrounding area, and the Fire Division has indicated conditional approval is appropriate.
- IV. The granting of the variance will not be contrary to the objectives of the ordinance in that the surrounding neighborhood is not subjected to a use of property that is any more intense than permitted M2 uses. Only reasonable flexibility is granted herein to permit a business to continue operations which for all practical considerations is already permitted in the Zone.

It is, therefore, the determination of the Zoning Administrator, that this application for variance be granted subject to compliance with the following conditions:

1. That all noise and odors be suppressed from being transmitted into the adjacent residential areas. Noise shall be suppressed to the extent prescribed by Article II, Chapter 11, Glendale Municipal Code.
2. All requirements of the Bureau of Fire Prevention shall be maintained in satisfactory compliance.
3. That the polymeric raw material manufacturing facility shall remain essential where located on the site as shown on the site plan submitted in conjunction with the application. Variance granted herein shall terminate if ~~the site or property is divided for sale, lease or rental~~ to other firms such that the above spatial relationship no longer exists.
4. All flammable liquids and material that may not be compatible shall be clearly identified and stored properly as to minimize any potential fire hazard to the satisfaction of the Bureau of Fire Prevention.
5. The plant shall at all times operate within the established regulations of all regulatory agencies having jurisdiction concerning hazards or pollutants.
6. The discharge of waste water to San Fernando Road or other City street shall immediately be discontinued.

December 4, 1979

Under the provisions of Section 1001, Appendix, any person affected by the above decision may appeal said determination to the Board of Zoning Adjustments within fifteen days following the actual date of such action. Appeal forms will be provided by the Zoning office upon request and must be filed with the prescribed fee prior to expiration of the 15-day period, or until December 19, 1979, at the office of the Zoning Administrator.

The rights and privileges granted by this variance will expire one year from the date of this grant unless promptly commenced and used in full compliance with the law and all conditions of approval.

Very truly yours,

Gerald J. Jamriska, A.I.C.P.

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licensed under the provisions of Chapter 9 (starting with Section 7000) of Division 3 of the Bus. & Prof. Code, and that my license is in full force and effect.

License Class _____ License No. _____ Contractor's Signature _____ Date _____

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is \$200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars (\$500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name _____ Address _____ Phone _____ Contractors Lic. No. _____

INITIAL I, as owner of the property, plan to provide portions of the work but I have or plan to contract with the following person(s) / (company(ies)) to provide the work indicated.

Name _____ Address _____ Phone _____ Type of work _____

Name _____ Address _____ Phone _____ Type of work _____

Re: Explosion Damage
5454 San Fernando Road
M.R. 42-39, Portion West Glendale

Gentlemen:

As a result of an explosion, an inspection of the commercial buildings at 5454 San Fernando Road was made by a representative of the Building Section on July 6, 1976. The inspection revealed the following conditions:

The corrugated metal wall covering was blown off of the building.

Correction requires that you repair the building under permit and inspection.

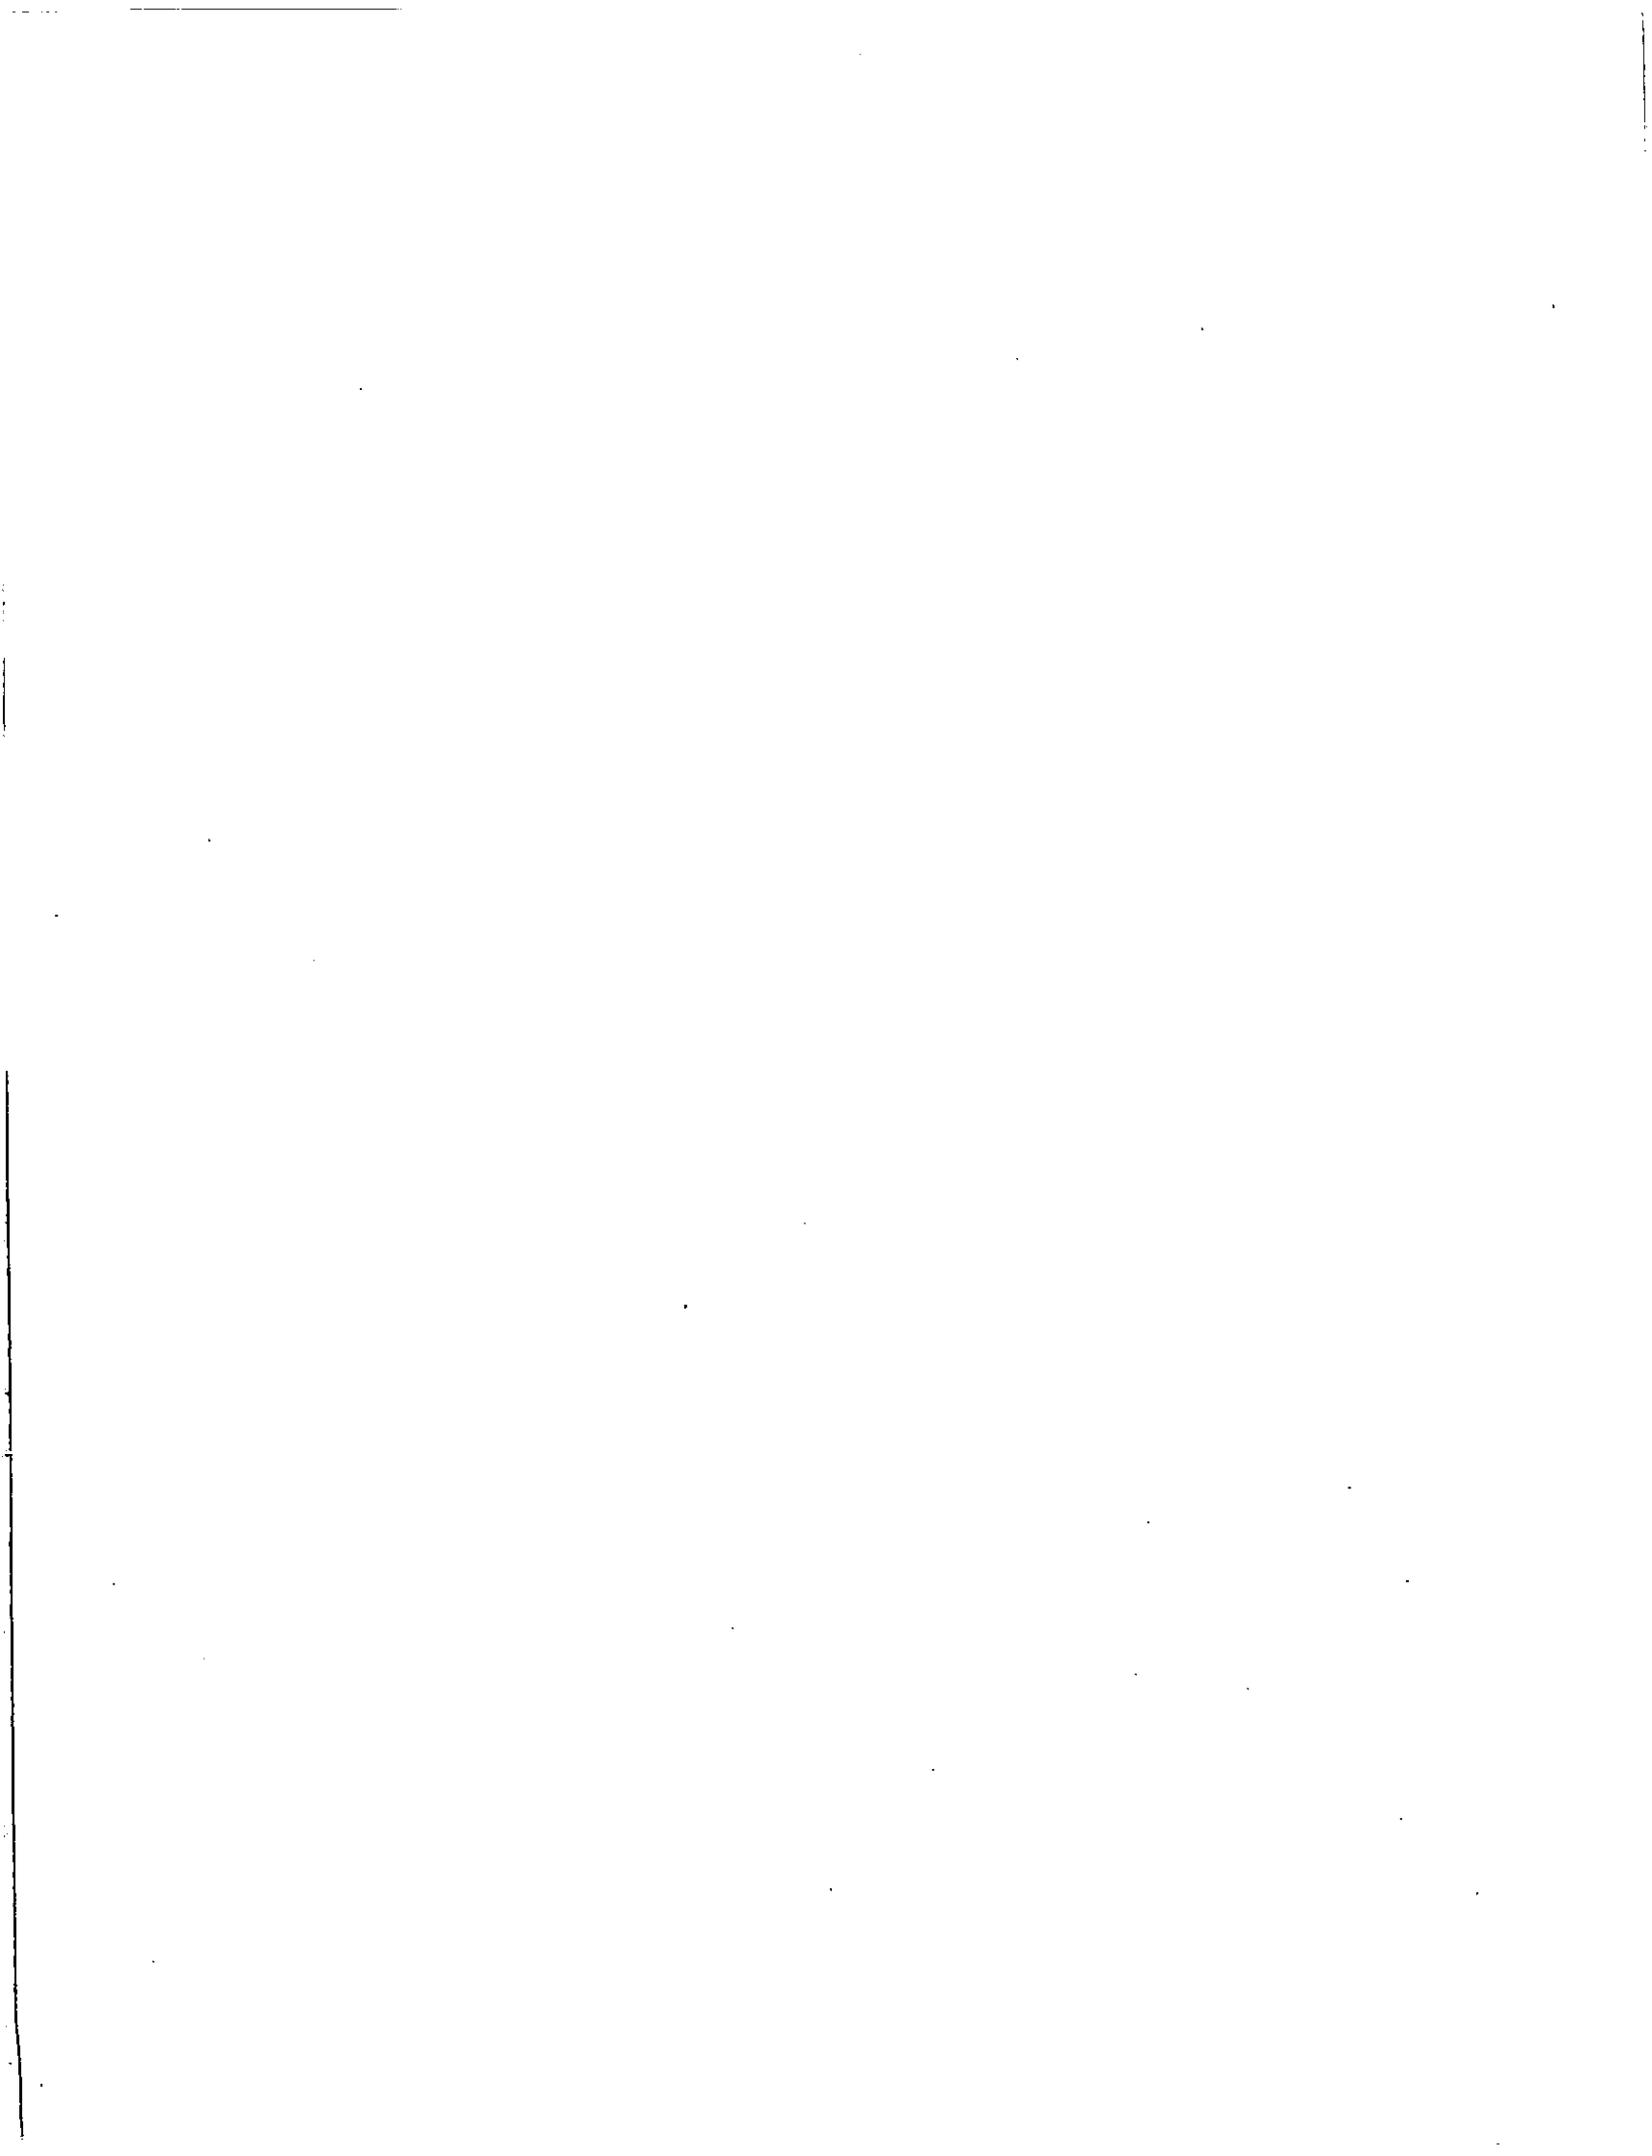

In accordance with the provisions of Section 203 of Ordinance 4193, you are hereby required to obtain the necessary permits and commence corrective action within thirty (30) days of the date of this notice.

Please do not hesitate to contact this office for any clarification you may require.

Very truly yours,

Alexander C. Pyper, S.E.
Superintendent of Buildings

Re: Discharge of Hexavalent Chromium
to the public street at
5454 San Fernando Road, Glendale

Attention: Mr. Charles Foley
Executive Vice President

Gentlemen:

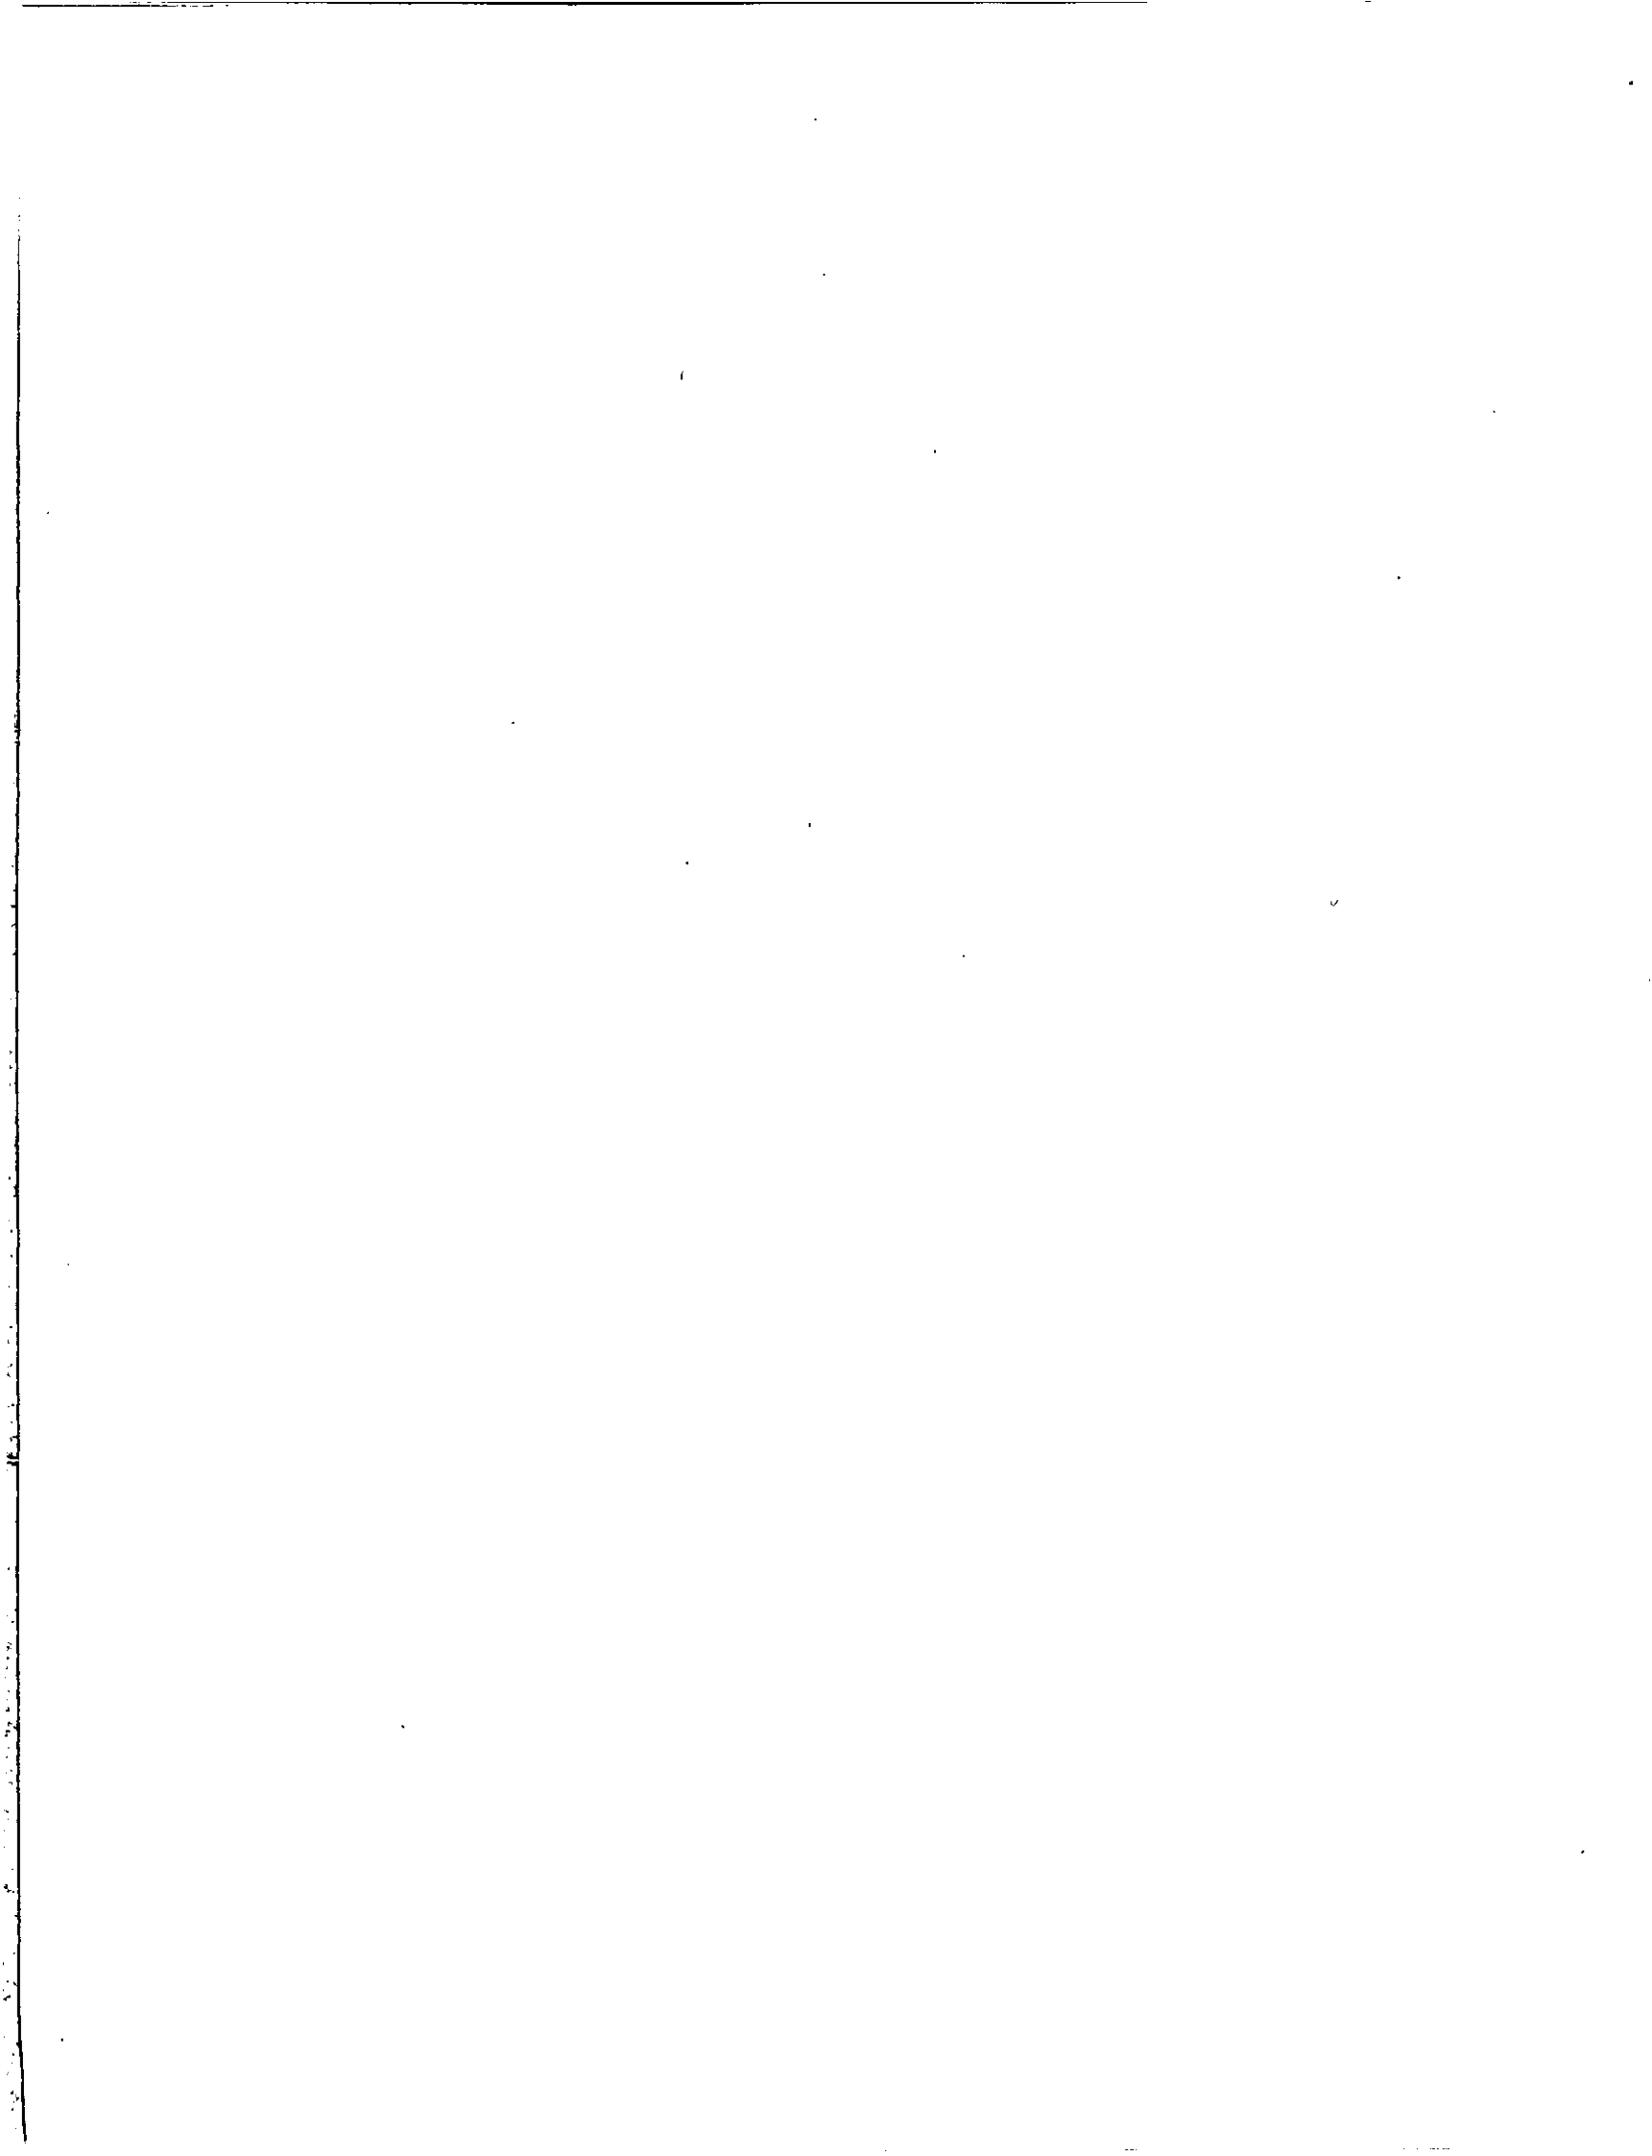

A sample was collected by Mr. Wayne O'Shana, Industrial Waste Inspector, for laboratory analysis for hexavalent chromium from the street gutter at the subject address at 10:40 A.M. on April 11, 1973, which contained 740 ppm Cr⁺⁶ and a pH of 6.4. A sample collected on March 9, 1973, contained 360 ppm Cr⁺⁶ and a similar flow was noted on March 22, 1973. These flows enter the storm drain system and discharge into the Los Angeles river via Verdugo Wash in violation of Section 25-38 of the Glendale Municipal Code.

Mr. Gerald Carson, Plant Manager, was contact on April 11, 1973, regarding the above discharges and the recommendations contained herein were made to effect the correction of these violations.

A similar situation at your facility at 5426 San Fernando Road occurred on December 11, 1965, when a sample from the street gutter was found to contain 7,700 ppm of Cr⁺⁶ and a pH of 5.8 which flowed to the storm drain. Mr. Carson was notified of the situation and corrections to the facility were made. No further violations have been noted at that facility. To correct the situation at 5454 San Fernando Road the following corrections are to be made:

1. The bermed wash area must be made water-tight and be provided with a storage tank, or sump, to collect and contain all waste liquids in that area.
2. All chemical storage areas are to be bermed, or diked, to prevent any spills from reaching the storm drain system.

There was evidence of waste discharge from the doorway of a chemical compounding room onto the paved area. Cease and desist from such discharge and provide proper disposal for this waste.

It is requested that thorough inspection of the facility at 5454 San Fernando Road should be made to insure that no discharge of toxic or hazardous materials can escape the premises to reach the storm drain system.

Please do not hesitate to call if this office can provide additional information.

Very truly yours,

Fred S. Solomon

NOTICE OF VIOLATION

No 107

TO:

Date 5-14-58

NAME: AMES, HARRIS, Neville Co.

ADDRESS: 5454 SAN FERNANDO Rd.

An inspection of the property located at 5454 San Fernando Rd. has revealed the fact that certain violations of the Glendale Bldg Code exist as follows:

- (1) Section 301-A - Glendale Bldg. Code
(ERECTOR OF CANVAS COVERED STRUCTURE ALONG SOUTH PROPERTY LINE WITHOUT PERMIT)
- (2) Section 1603 Glendale Bldg. Code
(THIS CANVAS COVERED STRUCTURE DOES NOT CONFORM TO FIRE ZONE #2 REQUIREMENTS.)

Correction of these conditions requires that the following be done:

REMOVE CANVAS COVERED STRUCTURE.

DECLARATION OF OWNER

I, the bonafide owner of the building described in the foregoing application: Said building is a single family dwelling, used exclusively for living purposes except for the usual accessory buildings in connection with such dwelling. Said living quarters are occupied or will be occupied by the applicant. I will personally purchase all materials and I will personally perform all labor in connection with the foregoing permit.

I declare under penalty of perjury that the foregoing is true and correct.
